Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
☒ Yes ☐ No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.
☐ Yes ☒ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). ☒ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). ☐ Yes ☒ No

At June 30, 2021, the aggregate market value of the registrant's voting stock held by non-affiliates was approximately \$232,001,885,386.

At January 31, 2022, 4,197,823,662 shares of the registrant's common stock were outstanding, after deducting 93,609,984 shares held in treasury.

Documents Incorporated By Reference:

Portions of the registrant's definitive Proxy Statement to be delivered to shareholders in connection with the registrant's 2022 Annual Meeting of Shareholders (Part III).

PART I

Item 1. Business

General

Verizon Communications Inc. (Verizon or the Company) is a holding company that, acting through its subsidiaries, is one of the world's leading providers of communications, technology, information and entertainment products and services to consumers, businesses and government entities. With a presence around the world, we offer data, video and voice services and solutions on our networks and platforms that are designed to meet customers' demand for mobility, reliable network connectivity, security and control.

Our principal executive offices are located at 1095 Avenue of the Americas, New York, New York 10036 (telephone number 212-395-1000).

We have two reportable segments that we operate and manage as strategic business units - Verizon Consumer Group (Consumer) and Verizon Business Group (Business).

On September 1, 2021, we completed the sale of our media business, Verizon Media Group (Verizon Media), to an affiliate of Apollo Global Management Inc. Additional information is included in Note 3 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries.

Verizon Consumer Group

Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the United States (U.S.) under the Verizon brand and through wholesale and other arrangements. We also provide fixed wireless access (FWA) broadband through our wireless networks. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios. On November 23, 2021, we completed the acquisition of TracFone Wireless, Inc. (Tracfone), a provider of prepaid and value mobile services in the U.S. Additional information is included in Note 3 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries.

In 2021, the Consumer segment's revenues were \$95.3 billion, representing approximately 71% of Verizon's consolidated revenues. As of December 31, 2021, Consumer had approximately 115 million wireless retail connections, approximately 7 million wireline broadband connections, which includes Fios and Digital Subscriber Line (DSL) internet connections, and approximately 4 million Fios video connections.

Verizon Business Group

Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various Internet of Things (IoT) services and products. We also provide FWA broadband through our wireless networks. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world.

In 2021, the Business segment's revenues were \$31.0 billion, representing approximately 23% of Verizon's consolidated revenues. As of December 31, 2021, Business had approximately 27 million wireless retail postpaid connections and approximately 477 thousand wireline broadband connections, which includes Fios and DSL internet connections.

Additional discussion of our reportable segments is included in Item 7. under the headings "Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview" and - "Segment Results of Operations" and in Note 13 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries.

Service and Product Offerings

Our Consumer segment's wireless and wireline products and services are available to our retail customers, as well as resellers that purchase wireless network access from us on a wholesale basis. Our Business segment's wireless and wireline products and services are organized by the primary customer groups targeted by these offerings: Small and Medium Business, Global Enterprise, Public Sector and Other, and Wholesale.

Wireless

We offer wireless services and equipment to both Consumer customers and Business customers.

Wireless Services

Our Consumer and Business segments provide a wide variety of wireless services accessible on a broad range of devices. Customers can obtain our wireless services on a postpaid or prepaid basis. Retail (non-wholesale) postpaid accounts primarily represent retail customers that

[Table of Contents](#)

are directly served and managed by Verizon and use Verizon branded services. A single account may include monthly wireless services for a variety of connected devices. Our postpaid service is generally billed one month in advance for a monthly access charge in return for access to and usage of network services. Our prepaid service is offered only to Consumer customers and enables individuals to obtain wireless services without credit verification by paying for all services in advance. As of December 31, 2021, we had 24 million prepaid connections, which include approximately 20 million Consumer prepaid connections due to the Tracfone acquisition. Approximately 79% of our Consumer wireless retail connections were postpaid connections as of December 31, 2021.

We offer various postpaid and prepaid service plans tailored to the needs of our customers. Depending on those needs at a particular time, our plans may include features related to, among other things: unlimited or metered domestic and/or international voice, data, and texting; the ability to share data allowances and/or use data allowances in different periods; high definition voice and video features; premium content; the ability to use a device as a Wi-Fi hotspot; and varying data rates depending on the plan and usage on that plan. Our service offerings vary from time to time based on customer needs, technology changes and market conditions and may be provided as standard plans or as part of limited time promotional offers.

Access to the internet is available on all smartphones and nearly all basic phones. In addition, our customers can access the internet at broadband speeds on notebook computers and tablets that are either wireless-enabled or that are used in conjunction with separate dedicated devices that provide a mobile Wi-Fi connection.

We no longer offer Consumer customers new fixed-term, subsidized service plans for devices; however, we continue to offer subsidized plans to our Business customers.

Wireless Equipment

Consumer and Business offer several categories of wireless equipment to customers, including a variety of smartphones and other handsets, wireless-enabled internet devices, such as tablets, and other wireless-enabled connected devices, such as smart watches. We permit customers to acquire equipment from us using device payment plans, which permit the customer to pay for the device in installments over time.

Verizon Consumer Group

In addition to the wireless services and equipment discussed above, Consumer sells residential fixed connectivity solutions, including internet, video and voice services, and wireless network access to resellers on a wholesale basis. Consumer also provides non-connectivity services including device protection, cloud storage, and other products.

Residential Fixed Services. We provide residential fixed connectivity solutions to customers over our 100% fiber-optic network through our Verizon Fios product portfolio, and over a traditional copper-based network to customers who are not served by Fios. As of December 31, 2021, fifth-generation (5G) fixed wireless technology for the home (5G Home) is available in parts of 65 U.S. cities. In addition, as of December 31, 2021, our Long-Term Evolution (LTE) Home fixed wireless access internet service is available in parts of all 50 states across the United States.

We offer residential fixed services tailored to the needs of our customers. Depending on those needs at a particular time, our services may include features related to, among other things: internet access at different speed tiers using fiber-optic, copper or wireless technology; video services that may feature a variety of channel options, video on demand products, cloud-based services and digital video recording capabilities; over-the-top video services; voice services; and other home solutions.

Network Access Services. We sell network access to mobile virtual network operators (MVNOs) on a wholesale basis, who in turn resell wireless service under their own brand(s) to consumers. Our largest such arrangement was with Tracfone, until we acquired Tracfone from América Móvil in November 2021.

Verizon Business Group

In addition to the wireless services and equipment discussed above, our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long-distance voice services and network access to deliver various IoT services and products.

Small and Medium Business

Small and Medium Business offers wireless services and equipment, conferencing services, tailored voice and networking products, Fios services, Internet Protocol (IP) networking, advanced voice solutions and security and managed information technology (IT) services to our U.S.-based small and medium businesses that do not meet the requirements to be categorized as Global Enterprise, as described below. In 2021, Small and Medium Business revenues were \$11.8 billion, representing approximately 38% of Business's total revenues.

In addition to the wireless services and equipment discussed above, Small and Medium Business provides fixed connectivity solutions comparable to the residential fixed services provided by Consumer, as well as business services and connectivity similar to the products and services offered by Global Enterprise, in each case with features and pricing designed to address the needs of small and medium businesses.

[Table of Contents](#)

Global Enterprise

Global Enterprise offers services to large businesses, which are identified based on their size and volume of business with Verizon, as well as non-U.S. public sector customers. In 2021, Global Enterprise revenues were \$10.2 billion, representing approximately 33% of Business's total revenues.

Global Enterprise offers a broad portfolio of connectivity, security and professional services designed to enable our customers to optimize their business operations, mitigate business risks and capitalize on data. These services include the following:

- *Network Services.* We offer a portfolio of network connectivity products to help our customers connect with their employees, partners, vendors and customers. These products include private networking services, private cloud connectivity services, virtual and software defined networking services and internet access services.
- *Advanced Communications Services.* We offer a suite of services to our customers to help them communicate with their employees, partners, vendors, constituents and customers. These products include IP-based voice and video services, unified communications and collaboration tools and customer contact center solutions.
- *Security services.* We offer a suite of management and data security services that help our customers protect, detect and respond to security threats to their networks, data, applications and infrastructure.
- *Core services.* We provide a portfolio of domestic and global voice and data solutions utilizing traditional telecommunications technology, including voice calling, messaging services, conferencing, contact center solutions and private line and data access networks. Core services also include the provision of customer premises equipment, and installation, maintenance and site services.
- *IoT services.* We provide the network access required to deliver various IoT products and services. We work with companies that purchase network access from us to connect their devices, bundled together with their own solutions, which they sell to end users. We are building IoT capabilities by leveraging business models that monetize usage on our networks at the connectivity, platform and solution layers.

Public Sector and Other

Public Sector and Other offers wireless products and services as well as wireline connectivity and managed solutions to U.S. federal, state and local governments and educational institutions. These services include business services and connectivity similar to the products and services offered by Global Enterprise, in each case, with features and pricing designed to address the needs of governments and educational institutions. In 2021, Public Sector and Other revenues were \$6.3 billion, representing approximately 20% of Business's total revenues.

Public Sector and Other also includes solutions that support fleet tracking management, compliance management, field service management, asset tracking and other types of mobile resource management in the U.S. and around the world.

Wholesale

Wholesale offers wireline communications services including data, voice, local dial tone and broadband services primarily to local, long distance, and wireless carriers that use our facilities to provide services to their customers. In 2021, Wholesale revenues were \$2.7 billion, representing approximately 9% of Business's total revenues. A portion of Wholesale revenues are generated by a few large telecommunications companies, most of which compete directly with us. Wholesale's services include:

- *Data services.* We offer a portfolio of data services to enhance our Wholesale customers' networks and provide connections to their end-users and subscribers.

- *Voice services.* We provide switched access services that allow carriers to complete their end-user calls that originate or terminate within our territory. In addition, we provide originating and terminating voice services throughout the U.S. and globally utilizing our time-division multiplexing and Voice over Internet Protocol (VoIP) networks.
- *Local services.* We offer an array of local dial tone and broadband services to competitive local exchange carriers, some of which are offered to comply with telecommunications regulations. In addition, we offer services such as colocation, resale and unbundled network elements in compliance with applicable regulations.

Distribution

We use a combination of direct, indirect and alternative distribution channels to market and distribute our products and services to Consumer and Business customers.

Our direct channel, including our company-operated stores, is a core component of our distribution strategy. Our sales and service centers and business direct sales teams also represent significant distribution channels for our services. In addition, we have a robust digital channel and omni-channel experience for our customers in order to offer choice and convenience.

[Table of Contents](#)

Our indirect channel includes agents that sell our wireless and wireline products and services at retail locations throughout the U.S., as well as through the internet. The majority of these sales are made under exclusive selling arrangements with us. We also have relationships with high-profile national retailers that sell our wireless and wireline products and services, as well as convenience store chains that sell our wireless prepaid products and services.

In addition to our direct channel, our Business segment has additional distribution channels that include business solution fulfillment provided by resellers, non-stocked device fulfillment performed by distributors and integrated mobility services provided by system integrators and resellers.

Competition and Related Trends

The telecommunications industry is highly competitive. We expect competition to remain intense as traditional and non-traditional participants seek increased market share.

With respect to our wireless connectivity products and services, we compete against other national wireless service providers, including AT&T Inc. and T-Mobile USA, Inc., as well as various regional wireless service providers. We also compete for retail activations with resellers that buy bulk wholesale service from wireless service providers, including Verizon, and resell it to their customers. Resellers include cable companies and others. Competition remains intense as a result of high rates of smartphone penetration in the wireless market, increased network investment by our competitors, the development and deployment of new technologies, including 5G, the introduction of new products and services, offerings that include additional bundled premium content, increased levels of promotions and service plan discounts, new market entrants, the availability of additional licensed and unlicensed spectrum and regulatory changes. In addition, increasing government incentives related to network deployment may enhance the ability of certain of our competitors to compete with us. Competition may also increase as smaller, stand-alone wireless service providers merge or transfer licenses to larger, better capitalized wireless service providers and as MVNOs resell wireless communication services. In addition, DISH Network has committed to deploy a facilities-based 5G broadband network in each of its license areas capable of serving at least 70 percent of the U.S. population by June 2023, which could result in additional competitive pressures in the U.S. wireless industry.

We also face competition from other communications and technology companies seeking to increase their brand recognition and capture customer revenue with respect to the provision of wireless products and services, in addition to non-traditional offerings in mobile data. For example, Microsoft Corporation, Alphabet Inc., Apple Inc., Meta Platforms, Inc. and others are offering alternative means for messaging and making wireless voice calls that, in certain cases, can be used in lieu of the wireless provider's voice service, as well as alternative means of accessing video content. In addition, we expect to see increasing competition in the provisioning of internet access by low Earth orbit satellite companies.

With respect to our wireline connectivity services, we compete against cable companies, wireless service providers, domestic and foreign telecommunications providers, satellite television companies, internet service providers, over-the-top (OTT) providers and other companies that offer network services and managed enterprise solutions. Cable operators have increased the size and capacity of their networks in order to deliver digital products and services. Several major cable operators offer bundles with wireless services through strategic relationships. Traditional wireless carriers are also bundling broadband internet offerings with wireless services while increasing their broadband internet footprint. Customers have an increasing number of choices for obtaining video content from various online services. We expect the market will continue to shift from traditional linear video to OTT offerings. We expect customer migration from traditional voice services to wireless services to continue as a growing number of customers place greater value on mobility and wireless companies position their services as a landline alternative. We also face increasing competition from cable operators and other providers of VoIP services as well as internet portal providers.

We believe that the following are the most important competitive factors and trends in the telecommunications industry:

- *Network reliability, speed and coverage.* We consider networks that consistently provide high-quality, fast and reliable service to be a key differentiator in the market and driver of customer satisfaction. Lower prices, improved service quality and new service offerings, which in many cases include video content, have led to increased customer usage of

connectivity services. We and other network-based providers must ensure that our networks can meet these increasing capacity usage requirements and offer highly reliable national coverage.

- *Pricing.* With respect to wireless services and equipment, pricing plays an important role in the wireless competitive landscape. As the demand for wireless services continues to grow, wireless service providers are offering a range of service plans at competitive prices. Many wireless service providers also bundle wireless service offerings with other content and offer promotional pricing and incentives, some of which may be targeted specifically to customers of Verizon. We and other wireless service providers, as well as equipment manufacturers, offer device payment options, which provide customers with the ability to pay for their device over a period of time, and some providers offer device leasing arrangements. In addition, aggressive device promotions have become more common in an effort to gain a greater share of subscribers interested in changing carriers. Pricing also plays an important role in the wireline competitive landscape, as traditional service providers compete aggressively in offerings such as IP Networking, Core Voice and other legacy products. In addition, as non-traditional modes of providing wireline communication services emerge, new entrants attempt to capture market share from incumbents using competitive pricing. For example, VoIP and portal-based voice and video calling is often free or nearly free for customers and supported by advertising revenues.

[Table of Contents](#)

- *Customer service.* We believe that high-quality customer service is a key factor in retaining customers and attracting new customers, including those of other providers. Our customer service, retention and satisfaction programs are based on providing customers with convenient and easy-to-use products and services and focusing on their needs in order to promote long-term relationships and minimize churn.

Customer service is highly valued by our Business customers. We provide Global Enterprise and Public Sector and Other customers with ready access to their system and performance information, and we conduct proactive testing of our networks to identify issues before they affect our customers. We service our Small and Medium Business customers through service representatives and online support, as well as through store-based representatives for small business customers. For Wholesale customers, we pursue service improvement through continued system automation initiatives.

- *Product differentiation.* Customer and revenue growth are increasingly dependent on the development of new and enhanced products and services, as the delivery of new and innovative products and services has been accelerating. Customers are shifting their focus from access to applications and are seeking ways to leverage their broadband, video and wireless connections. To compete effectively, providers need to continuously review, improve and refine their product portfolio and develop and rapidly deploy new products and services tailored to the needs of customers. We continue to pursue the development and rapid deployment of new and innovative products and services, both independently and in collaboration with application providers, content providers and device manufacturers. Features such as wireless and wireline inter-operability are becoming increasingly important, driven by both customer demand and technological advancement.
- *Sales and distribution.* A key to achieving sales success in the consumer and small and medium business sectors of the wireless industry is the reach and quality of sales channels and distribution points. We seek to optimally vary distribution channels among our company-operated stores selling wireless products and services, web-based sales and fulfillment capabilities, outside sales teams and telemarketing, our extensive indirect distribution network of retail outlets and our sale of wireless service to resellers, which resell wireless services to their end-users.

In addition to these competitive factors and trends, companies with a global presence are increasingly competing with us in our Business segment. A relatively small number of telecommunications and integrated service providers with global operations serve customers in the global enterprise market and, to a lesser extent, the global wholesale market. We compete with these providers for large contracts to provide integrated solutions to global enterprises and government customers. Many of these companies have strong market presence, brand recognition and existing customer relationships, all of which contribute to intensifying competition that may affect our future revenue growth.

In the Small and Medium Business market, customer purchasing behaviors and preferences continue to evolve. Solution speed and simplicity with user interfaces that have a consumer-like "look and feel" are becoming key differentiators for customers who are seeking full life-cycle offers that simplify the process of starting, running and growing their businesses. Several major cable operators also offer bundles with wireless services through strategic relationships.

In the Global Enterprise and Public Sector and Other markets, competition levels remain high, primarily as a result of increased industry focus on technology convergence. We compete in this area with system integrators, carriers, and hardware and software providers. In addition, some of the largest information technology services companies are making strategic acquisitions, divesting non-strategic assets and forging new alliances to improve their cost structure. Many new alliances and acquisitions have focused on emerging fields, such as cloud computing, software defined networking, communication applications and other computing tasks via networks, rather than by the use of in-house machines.

Our Wholesale business competes with traditional carriers for long-haul, voice and IP services. In addition, mobile video and data needs are driving a greater need for wireless backhaul. Network providers, cable companies and niche players are competitors for this business opportunity.

Our global network architecture is used by Consumer and Business. Our network technology platforms include both wireless and wireline technologies.

Network Evolution

We are transforming the architecture of our networks into our Intelligent Edge Network, providing improved efficiency and virtualization, increased automation and opportunities for edge computing services that will support our fiber-based and radio access network technologies. We expect that this new architecture will simplify operations by eliminating legacy network elements, speed the deployment of 5G wireless technology and create new opportunities in the business market in a cost-efficient manner.

5G Deployment

Over the past several years, we have been leading the development of 5G wireless technology industry standards and the ecosystems for fixed and mobile 5G wireless services. We expect that 5G technology will provide higher throughput and lower latency than the current fourth-generation (4G) LTE technology and enable our networks to handle more traffic as the number of internet-connected devices grows. As of December 31, 2021, 5G Ultra Wideband is available in parts of 87 U.S. cities and 5G Home is available in parts of 65 U.S. cities. Our FWA

[Table of Contents](#)

broadband service continued to grow during the year with a customer base of approximately 223 thousand as of December 31, 2021. In January 2022, we successfully deployed C-Band spectrum, reaching approximately 100 million people in the U.S. as of February 2022.

5G Nationwide uses low and mid-band spectrum and dynamic spectrum sharing (DSS) technology, which allows 5G service to run simultaneously with 4G LTE on multiple spectrum bands. With DSS, whenever customers move outside Verizon's high-band Ultra Wideband coverage area, their 5G-enabled devices will remain on 5G technology using the lower spectrum bands where the 5G Nationwide network is available. This allows us to more fully and effectively utilize our current spectrum resources to serve both 4G and 5G customers.

4G LTE

The wireless network technology platform that carries the majority of our wireless traffic is 4G LTE, which provides higher data throughput performance for data services at a lower cost compared to that offered by 3G technology. As of December 31, 2021, our 4G LTE network covers approximately 328 million people, including those in areas served by our LTE in Rural America partners. Under this program, we have collaborated with wireless carriers in rural areas to build and operate a 4G LTE network using each carrier's network assets with our core 4G LTE equipment and 700 Megahertz (MHz) C Block and Advanced Wireless Services (AWS) spectrum. LTE Home Internet, our home broadband internet service, leverages the Verizon 4G LTE network.

Wireless Network Reliability and Build-Out

We consider the reliability, coverage and speed of our wireless network to be key factors for our continued success. We believe that steady and consistent network and platform investments provide the foundation for innovative products and services. As we design and deploy our network, we focus on the number of successful data sessions the network enables, delivering on our advertised throughput speeds, and the number of calls that are connected on the first attempt and completed without being dropped. We utilize three strategies to maintain the quality of our network: increasing the density of our network elements, deploying new technologies as they are developed and putting additional wireless spectrum into service.

We have been densifying our network by utilizing small cell technology, in-building solutions and distributed antenna systems. Network densification enables us to add capacity to address increasing mobile video consumption and the growing demand for IoT products and services on our 4G LTE and 5G networks. We are also utilizing existing network capabilities to handle increased traffic without interrupting the quality of the customer experience. We continue to deploy advanced technologies to increase both network capacity and data rates.

In order to build and upgrade our existing 4G LTE network and deploy our 5G network, we must secure rights to a large number of sites and obtain zoning and other governmental approvals and fiber facilities for our macro and small cells, in-building systems and antennas and related radio equipment that comprise distributed antenna systems. We have relationships with a wide variety of vendors that supply various products and services that support our wireless network operations. We utilize tower site management firms as lessors or managers of a portion of our existing leased and owned tower sites.

Our networks in the U.S. include various elements of redundancy designed to enhance the reliability of the services provided to our customers. To mitigate the impact of power disruptions on our operations, we have battery backup at every switch and every macro cell. We also utilize backup generators at a majority of our macro cells and at every switch location. In addition, we have a fleet of portable backup generators that can be deployed if needed. We further enhance reliability by using a fully redundant Multiprotocol Label Switching backbone network in critical locations.

In addition to our own network coverage, we have roaming agreements with a number of wireless service providers to enable our customers to receive wireless service in nearly all other areas in the U.S. where wireless service is available. We also offer a variety of international wireless voice and data services to our customers through roaming arrangements with wireless service providers outside the U.S.

Fios

Residential broadband service has seen significant growth in bandwidth demand over the past several years, and we believe that demand will continue to grow. We expect the continued emergence of new video services, new data applications and the proliferation of IP devices in the home will continue to drive new network requirements for increased data speeds and throughput. We believe that the Passive Optical Network (PON) technology underpinning Fios positions us well to meet these demands in a cost-effective and efficient manner.

While deployed initially as a consumer broadband network, our PON infrastructure is also experiencing more widespread application in the Business segment, especially as businesses increasingly migrate to Ethernet-based access services.

Global IP

Verizon owns and operates one of the largest global fiber-optic networks in the world, providing connectivity to Business customers in more than 180 countries. Our global IP network includes long-haul, metro and submarine assets that enable and support international operations.

Global business is rapidly evolving to an "everything-as-a-service" model in which Business customers seek cloud-based, converged enterprise solutions delivered securely via managed and professional services. We are continuing to deploy packet optical transport technology in order to create a global network platform to meet this demand.

Spectrum

The spectrum licenses we hold can be used for mobile and fixed wireless voice, video and data communications services. We are licensed by the Federal Communications Commission (FCC) to provide these wireless services on portions of the 800 MHz band, also known as cellular spectrum, the 1800-1900 MHz band, also known as Personal Communication Services (PCS) spectrum, portions of the 700 MHz upper C-Band and AWS 1 and 3 spectrum in the 1700 and 2100 MHz bands, in areas that collectively cover nearly all of the population of the U.S. We have also deployed 4G technologies in 3.5 Gigahertz (GHz) shared spectrum, using LTE/Citizens Broadband Radio Service, and in 5 GHz unlicensed spectrum, using LTE/Licensed Assisted Access. All of this spectrum is collectively called low and mid-band spectrum. We are using our low and mid-band spectrum to provide 3G, 4G LTE and 5G wireless services. We are increasingly reallocating spectrum previously used for 3G service to provide 4G LTE service. We are also utilizing low and mid-band spectrum through DSS for 5G to complement our spectrum licenses in the 28 and 39 GHz band, collectively called millimeter wave spectrum. In 2021, we acquired an average of 161 MHz of new mid-band spectrum in the continental United States in the 3700-3980 MHz band, also known as C-Band. We began using C-Band for 5G service in January 2022.

Millimeter wave spectrum is being used in conjunction with low and mid-band spectrum for our 5G technology deployment. We own millimeter wave spectrum predominantly in the 28 GHz and 37/39 GHz bands. Millimeter wave spectrum is currently being used to increase capacity for mobile and fixed wireless services in areas of high demand. We anticipate that demand will continue to increase over time, driven by growth in customer connections and the increased usage of wireless broadband services that use more bandwidth and require faster rates of speed, as well as the wider deployment of 5G mobile and fixed services. We expect to meet the demand for 4G and 5G spectrum needs with our existing spectrum assets. If demand continues to increase or if new spectrum is required for a future generation of technology, we can meet that demand by acquiring licenses or leasing spectrum from other licensees, or by acquiring new spectrum licenses from the FCC, if and when future FCC spectrum auctions occur.

From time to time we have exchanged spectrum licenses with other wireless service providers through secondary market swap transactions. We expect to continue to pursue similar opportunities to trade spectrum licenses in order to meet capacity and expansion needs in the future. In certain cases, we have entered into intra-market spectrum swaps designed to increase the amount of contiguous spectrum within frequency bands in a specific market. Contiguous spectrum improves network performance and efficiency. These swaps, as well as any spectrum purchases, require us to obtain governmental approvals.

Information regarding spectrum license transactions is included in Note 3 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries.

Human Capital Resources¹

At Verizon, we know that our people are one of our most valuable assets. In order to realize our core business strategy, we have developed human capital programs and practices that support, develop and care for our employees from the time they join our team through the entirety of their careers with Verizon. These programs are centered on the following principles:

- Attract the right talent for our future and maintain a diverse workforce with high-value skills and expertise.
- Develop our employees to their full potential through best-in-class educational programs and exceptional development experiences and create a culture of continuous learning and engagement.
- Inspire individuals to build a career at Verizon by providing meaningful work and upskilling opportunities and establishing an inclusive work environment for all.

Verizon is committed to being an employer of choice. With approximately 118,400 employees, including approximately 800 Tracfone employees, on a full-time equivalent basis as of December 31, 2021, 89% of whom are based in the U.S., we know that we need employees with diverse backgrounds, experiences and perspectives to help us understand and connect more meaningfully to the diverse customers and communities we serve. Our human capital programs and practices are designed to create a workplace

where employees are empowered to share their authentic selves and feel seen and heard as vital contributors to Verizon's corporate purpose. In addition, Verizon has extensive on-the-job training opportunities, tuition reimbursement programs and career development support to enable our employees to maximize their potential and thrive professionally. Guided by our long-standing commitment to diversity and inclusion, our hiring and outreach programs have resulted in a strong representation of women and people of color. As of December 31, 2021, Verizon's global workforce was approximately 66.9% male and 33.1% female, and the race/ethnicity of our U.S. workforce was 53.9% White, 20.1% Black, 11.9% Hispanic, 8.0% Asian, 0.4% American Indian/Alaskan Native, 0.3% Native Hawaiian/Pacific Islander, 2.6% two or more races, and 2.8% unknown or undeclared. Women represented 38.7% of U.S. senior leadership (vice president level and above). People of color represented 34.9% of U.S. senior leadership.

¹ Unless otherwise specified, the workforce metrics disclosed in this discussion do not include employees who joined Verizon in connection with the acquisition of Tracfone in November 2021.

[Table of Contents](#)

Verizon respects our employees' rights to freedom of association and collective bargaining in compliance with applicable law, including the right to join or not join labor unions. We have a long history of working with the Communications Workers of America and the International Brotherhood of Electrical Workers—the two unions that in total represent approximately 24.0% of our employees as of December 31, 2021. The current collective bargaining agreements covering our union-represented employees who serve customers in our Mid-Atlantic and Northeast service areas extend through August 5, 2023. In addition, where applicable outside of the U.S., we engage with employee representative bodies such as works council. Verizon meets with U.S. national and local union leaders, as well as works council leaders outside the U.S., to talk about key business topics, including safety, customer service, plans to improve operational processes, our business performance and the impacts that changing technology and competition are having on our customers, employees and business strategy.

For a discussion of the oversight provided by the Verizon Board of Directors over the Company's human capital management practices, see the section entitled "Governance — Our Approach to Governance — Our Approach to Strategy and Risk Oversight — Oversight of Human Capital Management" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2022 Annual Meeting of Shareholders.

Patents, Trademarks and Licenses

We own or have licenses to various patents, copyrights, trademarks, domain names and other intellectual property rights necessary to conduct our business. We actively pursue the filing and registration of patents, copyrights, trademarks and domain names to protect our intellectual property rights within the United States and abroad. We also actively grant licenses, in exchange for appropriate fees or other consideration and subject to appropriate safeguards and restrictions, to other companies that enable them to utilize certain of our intellectual property rights and proprietary technology as part of their products and services. Such licenses enable the licensees to take advantage of Verizon's brands and the results of Verizon's research and development efforts. While these licenses result in valuable consideration for Verizon, we do not believe that the loss of such consideration, or the expiration of any of our intellectual property rights, would have a material effect on our results of operations.

We periodically receive offers from third parties to purchase or obtain licenses for patents and other intellectual property rights in exchange for royalties or other payments. We also periodically receive notices alleging that our products or services infringe on third-party patents or other intellectual property rights. These claims, whether against us directly or against third-party suppliers of products or services that we sell to our customers, if successful, could require us to pay damages or royalties, rebrand, or cease offering the relevant products or services.

Regulatory and Competitive Trends

Regulatory and Competitive Landscape

Verizon operates in a regulated and highly competitive market, as described above. Some of our competitors are subject to fewer regulatory constraints than Verizon. For many services offered by Verizon, the FCC is our primary regulator. The FCC has jurisdiction over interstate telecommunications services and other matters under the Communications Act of 1934, as amended (Communications Act or Act). Other Verizon services are subject to state and local regulation.

Federal, State and Local Regulation

Wireless Services

The FCC regulates several aspects of our wireless operations. Generally, the FCC has jurisdiction over the construction, operation, acquisition and transfer of wireless communications systems. All wireless services require use of radio frequency spectrum, the assignment and distribution of which is subject to FCC oversight. If demand continues to increase or if new spectrum is required for a future generation of technology, we can meet our needs for licensed spectrum by purchasing licenses or leasing spectrum from others, or by participating in a competitive bidding process to acquire new spectrum from the FCC. Those processes are subject to certain reviews, approvals and potential conditions.

Today, Verizon holds FCC spectrum licenses that allow it to provide a wide range of mobile and fixed communications services, including both voice and data services. FCC spectrum licenses typically have a term of 10 years, at which time they are subject to renewal. While the FCC has routinely renewed all of Verizon's wireless licenses, challenges could be raised in the future. If a wireless license was revoked or not renewed, Verizon would not be permitted to provide services on the spectrum covered by that license. Some of our licenses require us to comply with so-called "open access" FCC regulations, which generally require licensees of particular spectrum to allow customers to use devices and applications of their choice, subject to certain technical limitations. The FCC has also imposed certain specific mandates on wireless carriers, including construction and geographic coverage requirements, technical operating standards, provision of enhanced 911 services, roaming obligations and requirements for wireless tower and antenna facilities.

The Act generally preempts regulation by state and local governments of the entry of, or the rates charged by, wireless carriers. The Act does not prohibit states from regulating the other "terms and conditions" of wireless service. For example, some states impose reporting requirements. Several states also have laws or regulations that address safety issues (e.g., use of wireless handsets while driving) and taxation matters. In addition, wireless tower and antenna facilities are often subject to state and local zoning and land use regulation, and securing approvals for new or modified facilities is often a lengthy and expensive process.

[Table of Contents](#)

Broadband

Verizon offers many different broadband services. The FCC currently recognizes broadband internet access services as "information services" subject to a "light touch" regulatory approach rather than to the traditional, utilities-style regulations. However, the FCC could return to a more utilities-style regulation of broadband. Additionally, a number of states have taken steps to attempt to regulate broadband and two of those cases related to regulations in California and Vermont are being litigated in the courts. Regardless of regulation, Verizon remains committed to the open internet, which provides consumers with competitive choices and unblocked access to lawful websites and content. Our commitment to our customers can be found on our website at <https://www.verizon.com/about/our-company/verizon-broadband-commitment>.

Wireline Voice

Verizon offers many different wireline voice services, including traditional telephone service and other services that rely on technologies such as VoIP. For regulatory purposes, legacy telephone services are generally considered to be "common carrier" services. Common carrier services are subject to heightened regulatory oversight with respect to rates, terms and conditions and other aspects of the services. The FCC has not decided the regulatory classification of VoIP but has said VoIP service providers must comply with certain rules, such as 911 capabilities and law enforcement assistance requirements.

State public utility commissions regulate Verizon's telephone operations with respect to certain telecommunications intrastate matters. Verizon operates as an "incumbent local exchange carrier" in nine states and the District of Columbia. These incumbent operations are subject to various levels of pricing flexibility and other state oversight and requirements. Verizon also has other wireline operations that are more lightly regulated.

Video

Verizon offers a multichannel video service that is regulated like traditional cable service. The FCC has a body of rules that apply to cable operators, and these rules also generally apply to Verizon. In areas where Verizon offers its facilities-based multichannel video services, Verizon has been required to obtain a cable franchise from local government entities, or in some cases a state-wide franchise, and comply with certain one-time and ongoing obligations as a result.

Privacy and Data Security

We are subject to local, state, federal, and international laws and regulations relating to privacy and data security that impact all parts of our business, including wireline, wireless, broadband and the development and roll out of new products, such as those in the artificial intelligence and IoT space. At the federal level, our business is governed by the FCC or the Federal Trade Commission (FTC), depending on the product or service. Europe's General Data Protection Regulation, which went into effect in May 2018, and the California Consumer Privacy Act, which went into effect in January 2020, both include significant penalties for non-compliance. In addition, other states and countries have continued to adopt new privacy laws that apply to us. Generally, attention to privacy and data security requirements is increasing at all levels of government globally, and privacy-related legislation has been introduced or is under consideration in many locations. These regulations could have a significant impact on our businesses.

Public Safety and Cybersecurity

The FCC plays a role in addressing public safety concerns by regulating emergency communications services and mandating widespread availability of both media (broadcast/cable) and wireless emergency alerting services. In response to cyber attacks that have occurred or could occur in the future, however, the FCC or other regulators may attempt to increase regulation of the cybersecurity practices of providers. The FCC is also addressing the use by American companies of equipment produced by certain companies deemed to cause potential national security risks. Verizon does not currently use equipment in its networks from vendors under such restrictions. In addition, due to recent natural disasters, federal and state agencies may attempt to impose regulations to ensure continuity of service during disasters; for example, the California Public Utilities Commission has imposed regulations on back-up power for communications facilities.

Intercarrier Compensation and Network Access

The FCC regulates some of the rates that carriers pay each other for the exchange of voice traffic (particularly traditional wireline traffic) over different networks and other aspects of interconnection for some voice services. The FCC also regulates some of the rates and terms and conditions for certain wireline "business data services" and other services and network facilities. Verizon is both a seller and a buyer of these services, and both makes and receives interconnection payments. The FCC has focused in recent years on whether changes in the rates, terms and conditions for both the exchange of traffic and for business data services may be appropriate.

Regulatory Response to the COVID-19 Pandemic

Since the time that COVID-19 began to spread throughout the world in 2020, Verizon has been subject to various international, federal, state and local policies, regulations and initiatives aimed at reducing the transmission of the disease and protecting the health and safety of the world's population. In addition, governments have imposed a wide variety of consumer protection measures that limit how certain businesses, including telecommunications companies, can operate their business and interact with their customers. Because the severity, magnitude and duration of the COVID-19 pandemic and its economic consequences are uncertain and rapidly changing, the impact of the crisis and the governmental responses to the crisis on our business in 2022 and beyond remains uncertain and difficult to predict.

Information About Our Executive Officers

See Part III, Item 10. "Directors, Executive Officers and Corporate Governance" of this Annual Report on Form 10-K for information about our executive officers.

Information on Our Internet Website

We make available, free of charge on our website, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports at <https://www.verizon.com/about/investors> as soon as reasonably practicable after such reports are electronically filed with the Securities and Exchange Commission (SEC). These reports and other information are also available on the SEC's website at <https://www.sec.gov>. We periodically provide other information for investors on our website, including news and announcements regarding our financial performance, information on corporate governance and details related to our annual meeting of shareholders. We encourage investors, the media, our customers, business partners and other stakeholders to review the information we post on this channel. Website references in this report are provided as a convenience and do not constitute, and should not be viewed as, incorporation by reference of the information contained on, or available through, the websites. Therefore, such information should not be considered part of this report.

Cautionary Statement Concerning Forward-Looking Statements

In this report we have made forward-looking statements. These statements are based on our estimates and assumptions and are subject to risks and uncertainties. Forward-looking statements include the information concerning our possible or assumed future results of operations. Forward-looking statements also include those preceded or followed by the words "anticipates," "believes," "estimates," "expects," "hopes," "forecasts," "plans" or similar expressions. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required by law. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

The following important factors, along with those discussed elsewhere in this report and in other filings with the SEC, could affect future results and could cause those results to differ materially from those expressed in the forward-looking statements:

- cyber attacks impacting our networks or systems and any resulting financial or reputational impact;
- damage to our infrastructure or disruption of our operations from natural disasters, extreme weather conditions or terrorist attacks and any resulting financial or reputational impact;
- the impact of public health crises, including the COVID-19 pandemic, on our operations, our employees and the ways in which our customers use our networks and other products and services;
- disruption of our key suppliers' or vendors' provisioning of products or services, including as a result of geopolitical factors, the COVID-19 pandemic or the potential impacts of global climate change;
- material adverse changes in labor matters and any resulting financial or operational impact;
- the effects of competition in the markets in which we operate;
- failure to take advantage of developments in technology and address changes in consumer demand;
- performance issues or delays in the deployment of our 5G network resulting in significant costs or a reduction in the anticipated benefits of the enhancement to our networks;

- the inability to implement our business strategy;
- adverse conditions in the U.S. and international economies;
- changes in the regulatory environment in which we operate, including any increase in restrictions on our ability to operate our networks or businesses;
- our high level of indebtedness;
- significant litigation and any resulting material expenses incurred in defending against lawsuits or paying awards or settlements;
- an adverse change in the ratings afforded our debt securities by nationally accredited ratings organizations or adverse conditions in the credit markets affecting the cost, including interest rates, and/or availability of further financing;
- significant increases in benefit plan costs or lower investment returns on plan assets;

[Table of Contents](#)

- changes in tax laws or treaties, or in their interpretation; and
- changes in accounting assumptions that regulatory agencies, including the SEC, may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings.

Item 1A. Risk Factors

The following discussion of "Risk Factors" identifies factors that may adversely affect our business, operations, financial condition or future performance. This information should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Result of Operations" and the consolidated financial statements and related notes. The following discussion of risks is not all-inclusive but is designed to highlight what we believe are the material factors to consider when evaluating our business and expectations. These factors could cause our future results to differ materially from our historical results and from expectations reflected in forward-looking statements.

Operational Risks

Cyber attacks impacting our networks or systems could have an adverse effect on our business.

Cyber attacks, including through the use of malware, computer viruses, distributed denial of services attacks, ransomware attacks, credential harvesting, social engineering and other means for obtaining unauthorized access to or disrupting the operation of our networks and systems and those of our suppliers, vendors and other service providers, could have an adverse effect on our business. Cyber attacks may cause equipment failures, loss of information, including sensitive personal information of customers or employees or valuable technical and marketing information, as well as disruptions to our or our customers' operations. Cyber attacks against companies, including Verizon, have increased in frequency, scope and potential harm in recent years. They may occur alone or in conjunction with physical attacks, especially where disruption of service is an objective of the attacker. The development and maintenance of systems to prevent such attacks is costly and requires ongoing monitoring and updating to address their increasing prevalence and sophistication. While, to date, we have not been subject to cyber attacks that, individually or in the aggregate, have been material to Verizon's operations or financial condition, the preventive actions we take to reduce the risks associated with cyber attacks, including protection of our systems and networks, may be insufficient to repel or mitigate the effects of a major cyber attack in the future.

The inability to operate or use our networks and systems or those of our suppliers, vendors and other service providers as a result of cyber attacks, even for a limited period of time, may result in significant expenses to Verizon and/or a loss of market share to our competitors. The costs associated with a major cyber attack on Verizon could include expensive incentives offered to existing customers and business partners to retain their business, increased expenditures on cybersecurity measures and the use of alternate resources, lost revenues from business interruption and litigation. Further, certain of Verizon's businesses, such as those offering security solutions and infrastructure and cloud services to business customers, could be negatively affected if our ability to protect our own networks and systems is called into question as a result of a cyber attack. Our presence in the IoT industry, which includes offerings of telematics products and services, could also increase our exposure to potential costs and expenses and reputational harm in the event of cyber attacks impacting these products or services. In addition, a compromise of security or a theft or other compromise of valuable information, such as financial data and sensitive or private personal information, could result in lawsuits and government claims, investigations or proceedings. Any of these occurrences could damage our reputation, adversely impact customer and investor confidence and result in a material adverse effect on Verizon's results of operation or financial condition.

Natural disasters, extreme weather conditions or terrorist or other hostile acts could cause damage to our infrastructure and result in significant disruptions to our operations.

Our business operations are subject to interruption by power outages, terrorist or other hostile acts, natural disasters or the potential impacts of climate change, including the increasing prevalence and intensity of hurricanes, wildfires, flooding, hail and storms. Such events could cause significant damage to our infrastructure upon which our business operations rely, resulting in degradation or disruption of service to our customers, as well as significant recovery time and expenditures to resume operations.

Our system redundancy may be ineffective or inadequate to sustain our operations through all such events. We are implementing, and will continue to implement, measures to protect our infrastructure and operations from the impacts of these events in the future, but these measures and our overall disaster recovery planning may not be sufficient for all eventualities. These events could also damage the infrastructure of the suppliers that provide us with the equipment and services that we need to operate our business and provide products to our customers. These occurrences could result in lost revenues from business interruption, damage to our reputation and reduced profits.

Public health crises, including the COVID-19 pandemic, could materially adversely affect our business, financial condition and results of operations.

We are subject to risks related to public health crises, such as the COVID-19 pandemic, which had an adverse effect on our operating results in 2020. Our business is based on our ability to provide products and services to customers throughout the United States and around the world and the ability of those customers to use and pay for those products and services for their businesses and in their daily lives. As a result, our business, financial condition and results of operations could be materially adversely affected by a crisis, like the COVID-19 pandemic, that significantly impacts the way customers use and are able to pay for our products and services, the way our employees are able to provide services to our customers, and the ways that our partners and suppliers are able to provide products and services to us. For example, public and private sector policies and initiatives to reduce the transmission of COVID-19 and initiatives Verizon took in response to the health crisis to promote the health and safety of our employees and provide critical infrastructure and connectivity to our customers, along with the related

[Table of Contents](#)

global slowdown in economic activity, resulted in decreased revenues, increased costs and lower earnings per share during 2020. In addition, such a crisis could significantly increase the probability or consequences of the risks our business faces in ordinary circumstances, such as risks associated with our supplier and vendor relationships, risks of an economic slowdown, regulatory risks, and the costs and availability of financing. Because the severity, magnitude and duration of the COVID-19 pandemic and its economic consequences are uncertain and rapidly changing, the impact on our business, financial condition and results of operations in 2022 and beyond remains uncertain and difficult to predict. In addition, the ultimate impact of the COVID-19 pandemic on our business, financial condition and results of operations depends on many factors, including those discussed above, that are not within our control.

We depend on key suppliers and vendors to provide equipment that we need to operate our business.

We depend on various key suppliers and vendors to provide us, directly or through other suppliers, with equipment and services, such as fiber, switch and network equipment, smartphones and other wireless devices that we need in order to operate our business and provide products to our customers. For example, our smartphone and other device suppliers often rely on one vendor for the manufacture and supply of critical components, such as chipsets, used in their devices, and there are a limited number of companies capable of supplying the network infrastructure equipment on which we depend. These suppliers or vendors could fail to provide equipment or service on a timely basis, or fail to meet our performance expectations, for a number of reasons, including, for example, disruption to the global supply chain as a result of geopolitical factors, the COVID-19 pandemic, natural disasters or the potential impacts of global climate change. If such failures occur, we may be unable to provide products and services as and when requested by our customers, or we may be unable to continue to maintain or upgrade our networks. Because of the cost and time lag that can be associated with transitioning from one supplier to another, our business could be substantially disrupted if we were required to, or chose to, replace the products or services of one or more major suppliers with products or services from another source, especially if the replacement became necessary on short notice. Any such disruption could increase our costs, decrease our operating efficiencies and have a material adverse effect on our business, results of operations and financial condition.

The suppliers and vendors on which we rely may also be subject to litigation with respect to technology on which we depend, including litigation involving claims of patent infringement. Such claims are frequently made in the communications industry. We are unable to predict whether our business will be affected by any such litigation. We expect our dependence on key suppliers to continue as we develop and introduce more advanced generations of technology.

A significant portion of our workforce is represented by labor unions, and we could incur additional costs or experience work stoppages as a result of the renegotiation of our labor contracts.¹

As of December 31, 2021, approximately 24.0% of our workforce is represented by the Communications Workers of America or the International Brotherhood of Electrical Workers. While we have labor contracts in place with these unions, with subsequent negotiations we could incur additional costs and/or experience work stoppages, which could adversely affect our business operations. In addition, while a small percentage of the workforce outside of our traditional wireline operations is represented by unions for bargaining, we cannot predict what impact increased union density in this workforce could have on our operations.

Economic and Strategic Risks

We face significant competition that may reduce our profits.

We face significant competition in our industries. The rapid development of new technologies, services and products has eliminated many of the traditional distinctions among wireless, cable, internet and local and long distance communication services and brought new competitors to our markets, including other telecommunications companies, cable companies, wireless service providers, satellite providers, technology companies and application and device providers. While these changes have enabled us to offer new types of products and services, they have also allowed other providers to broaden the scope of their own competitive offerings. If we are unable to compete effectively, we could experience lower than expected revenues and earnings. In addition, wireless service providers are significantly altering the financial relationships with their customers through commercial offers that vary service and device pricing, promotions, incentives and levels of service provided – in some cases specifically targeting our customers. Our ability to compete effectively will depend on, among other things, our network quality, capacity and coverage, the

pricing of our products and services, the quality of our customer service, our development of new and enhanced products and services, the reach and quality of our sales and distribution channels, our ability to market our products and services effectively and our capital resources. It will also depend on how successfully we anticipate and respond to various factors affecting our industries, including new technologies and business models, changes in consumer preferences and demand for existing services, demographic trends and economic conditions. If we are not able to respond successfully to these competitive challenges, we could experience reduced profits.

¹ Workforce profile metrics do not include employees who joined Verizon in connection with the acquisition of Tracfone in November 2021.

If we are not able to take advantage of developments in technology and address changing consumer demand on a timely basis, or if the deployment of our 5G network is delayed or hindered for any reason, we may experience a decline in the demand for our services, be unable to implement our business strategy and experience reduced profits.

Our industries are rapidly changing as new technologies are developed that offer consumers an array of choices for their communications needs and allow new entrants into the markets we serve. In order to grow and remain competitive, we will need to adapt to future changes in technology, enhance our existing offerings and introduce new offerings to address our customers' changing demands. If we are unable to meet

future challenges from competing technologies on a timely basis or at an acceptable cost, we could lose customers to our competitors. We may not be able to accurately predict technological trends or the success of new services in the market. If our new services fail to gain acceptance in the marketplace, or if costs associated with the implementation and introduction of these services materially increase, our ability to retain and attract customers could be adversely affected.

In addition, the deployment of our 5G network is subject to a variety of risks, including those related to equipment and spectrum availability, unexpected costs, and regulatory matters that could cause deployment delays or network performance issues. These issues could result in significant costs, put us at a competitive disadvantage, or reduce the anticipated benefits of the enhancements to our networks.

As we introduce new offerings and technologies, such as 5G technology, we must phase out outdated and unprofitable technologies and services. If we are unable to do so on a cost-effective basis, we could experience reduced profits. In addition, there could be legal or regulatory restraints on our ability to phase out current services.

Adverse conditions in the U.S. and international economies could impact our results of operations.

Unfavorable economic conditions, such as a recession or economic slowdown in the U.S. or elsewhere, or inflation in the markets in which we operate, could negatively affect the affordability of and demand for some of our products and services and our cost of doing business. In difficult economic conditions, consumers may seek to reduce discretionary spending by forgoing purchases of our products, electing to use fewer higher margin services, dropping down in price plans or obtaining lower-cost products and services offered by other companies. Similarly, under these conditions, the business customers that we serve may delay purchasing decisions, delay full implementation of service offerings or reduce their use of services. In addition, adverse economic conditions may lead to an increased number of our consumer and business customers that are unable to pay for services. If these events were to occur, it could have a material adverse effect on our results of operations.

Regulatory and Legal Risks

Changes in the regulatory framework under which we operate could adversely affect our business prospects or results of operations.

Our domestic operations are subject to regulation by the FCC and other federal, state, and local agencies, and our international operations are regulated by various foreign governments and international bodies. These regulatory regimes frequently restrict or impose conditions on our ability to operate in designated areas and provide specified products or services. We are frequently required to maintain licenses for our operations and conduct our operations in accordance with prescribed standards. We are often involved in regulatory and other governmental proceedings or inquiries related to the application of these requirements. It is impossible to predict with any certainty the outcome of pending federal and state regulatory proceedings relating to our operations, or the reviews by federal or state courts of regulatory rulings. Without relief, existing laws and regulations may inhibit our ability to expand our business and introduce new products and services. Similarly, we cannot guarantee that we will be successful in obtaining the licenses needed to carry out our business plan or in maintaining our existing licenses. For example, the FCC grants wireless licenses for terms generally lasting 10 years, subject to renewal. The loss of, or a material limitation on, certain of our licenses could have a material adverse effect on our business, results of operations and financial condition.

New laws or regulations or changes to the existing regulatory framework at the federal, state, and local, or international level, such as those described below, those that incentivize business models or technologies different from ours or requirements limiting

our ability to discontinue service to customers could restrict the ways in which we manage our wireline and wireless networks and operate our businesses, impose additional costs, impair revenue opportunities, and potentially impede our ability to provide services in a manner that would be attractive to us and our customers.

- *Privacy and data protection* - We are subject to federal, state and international laws related to privacy and data protection. Europe's General Data Protection Regulation, which went into effect in May 2018, and the California Consumer Privacy Act, which went into effect in January 2020, both include significant penalties for non-compliance. In addition, other states and countries have continued to adopt new privacy laws that apply to us. Generally, attention to privacy and data security requirements is increasing at all levels of government globally, and privacy-related legislation has been introduced or is under consideration in many locations. These regulations could have a significant impact on our businesses.
- *Regulation of broadband internet access services* - In its 2015 Title II Order, the FCC nullified its longstanding "light touch" approach to regulating broadband internet access services and "reclassified" these services as telecommunications services subject to utilities-style common carriage regulation. The FCC repealed the 2015 Title II Order in December 2017, and returned to its traditional light-touch approach for these services. The 2017 order has been affirmed in part by the D.C. Circuit but may be revisited by the FCC or by Congress. Several states have also adopted or are considering adopting laws or executive orders that

[Table of Contents](#)

would impose net neutrality and other requirements on some of our services (in some cases different from the FCC's 2015 rules). Although some of these have been challenged in court, the ultimate enforceability and effect of these state rules is uncertain.

- *"Open Access"* - We hold certain wireless licenses that require us to comply with so-called "open access" FCC regulations, which generally require licensees of particular spectrum to allow customers to use devices and applications of their choice. Moreover, certain services could be subject to conflicting regulation by the FCC and/or various state and local authorities, which could significantly increase the cost of implementing and introducing new services.
- *Climate-Related Regulation and Policy* – Due to the nature of our operations, we may be impacted by regulatory developments related to climate change, including, for example, the direct regulation of greenhouse gas emissions or carbon policies that could result in a tax on such emissions. In addition, policy-driven changes in the prices of fuel or energy in geographies in which we operate could make it more expensive for us to purchase energy to power our networks and data centers, and any increase in taxes on fuel could increase our costs associated with operating those vehicles in our fleet that are dependent on traditional fuels.

These developments and the further regulation of broadband, wireless, and our other activities and any related court decisions could result in significant increases in costs for us or restrict our ability to compete in the marketplace and limit the return we can expect to achieve on past and future investments in our networks.

We are subject to a substantial amount of litigation, which could require us to pay significant damages or settlements.

We are subject to a substantial amount of litigation, including, from time to time, shareholder derivative suits, patent infringement lawsuits, antitrust class actions, wage and hour class actions, personal injury claims, property claims, and lawsuits relating to our advertising, sales, billing and collection practices. In addition, our wireless business also faces personal injury and wrongful death lawsuits relating to alleged health effects of wireless phones or radio frequency transmitters. We may incur significant expenses in defending these lawsuits. In addition, we may be required to pay significant awards or settlements.

Financial Risks

Verizon has significant debt, which could increase further if Verizon incurs additional debt in the future and does not retire existing debt.

As of December 31, 2021, Verizon had approximately \$136.7 billion of outstanding unsecured indebtedness, \$9.4 billion of unused borrowing capacity under our existing revolving credit facility and \$14.2 billion of outstanding secured indebtedness. Verizon's debt level and related debt service obligations could have negative consequences, including:

- requiring Verizon to dedicate significant cash flow from operations to the payment of principal, interest and other amounts payable on our debt, which would reduce the funds we have available for other purposes, such as working capital, capital expenditures, dividend payments and acquisitions;
- making it more difficult or expensive for Verizon to obtain any necessary future financing for working capital, capital expenditures, debt service requirements, debt refinancing, acquisitions or other purposes;
- reducing Verizon's flexibility in planning for or reacting to changes in our industries and market conditions;
- making Verizon more vulnerable in the event of a downturn in our business; and
- exposing Verizon to increased interest rate risk to the extent that our debt obligations are subject to variable interest rates.

Adverse changes in the credit markets and other factors could increase our borrowing costs and the availability of financing.

We require a significant amount of capital to operate and grow our business. We fund our capital needs in part through borrowings in the public and private credit markets. Adverse changes in the credit markets, including increases in interest rates, could increase our cost of borrowing and/or make it more difficult for us to obtain financing for our operations or refinance existing indebtedness. In addition, our ability to obtain funding under asset-backed debt transactions is subject to our ability to continue to originate a sufficient amount of assets eligible to be securitized. Our borrowing costs also can be affected by short- and long-term debt ratings assigned by independent rating agencies, which are based, in significant part, on our performance as measured by customary credit metrics. A decrease in these ratings would likely increase our cost of borrowing and/or make it more difficult for us to obtain financing. A severe disruption in the global financial markets could impact some of the financial institutions with which we do business, and such instability could also affect our access to financing.

Increases in costs for pension benefits and active and retiree healthcare benefits may reduce our profitability and increase our funding commitments.

With approximately 118,400 employees, including approximately 800 Tracfone employees, and approximately 187,000 retirees as of December 31, 2021 eligible to participate in Verizon's benefit plans, the costs of pension benefits and active and retiree healthcare benefits

[Table of Contents](#)

have a significant impact on our profitability. Our costs of maintaining these plans, and the future funding requirements for these plans, are affected by several factors, including increases in healthcare costs, decreases in investment returns on funds held by our pension and other benefit plan trusts and changes in the discount rate and mortality assumptions used to calculate pension and other postretirement expenses. If we are unable to limit future increases in the costs of our benefit plans, those costs could reduce our profitability and increase our funding commitments.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principal properties do not lend themselves to simple description by character and location. Our total gross investment in property, plant and equipment was approximately \$290 billion at December 31, 2021 and \$280 billion at December 31, 2020, including the effect of retirements, but before deducting accumulated depreciation. Our gross investment in property, plant and equipment consisted of the following:

At December 31,	2021	2020
Network equipment	76.9 %	77.6 %
Land, buildings and building equipment	11.7 %	12.0 %
Furniture and other	11.4 %	10.4 %
	100.0 %	100.0 %

Network equipment consists primarily of cable (aerial, buried, underground or undersea) and the related support structures of poles and conduit, wireless plant, switching equipment, network software, transmission equipment and related facilities. Land, buildings and building equipment consists of land and land improvements, central office buildings or any other buildings that house network equipment, and buildings that are used for administrative and other purposes. Substantially all the switching centers are located on land and in buildings we own due to their critical role in the networks and high set-up and relocation costs. We also maintain facilities throughout the U.S. comprised of administrative and sales offices, customer care centers, retail sales locations, garage work centers, switching centers, cell sites and data centers. Furniture and other consists of telephone equipment, furniture, data processing equipment, office equipment, motor vehicles, construction in process, and leasehold improvements.

Item 3. Legal Proceedings

Verizon is not subject to any administrative or judicial proceeding arising under any Federal, State or local provisions that have been enacted or adopted regulating the discharge of materials into the environment or primarily for the purpose of protecting the environment that is likely to result in monetary sanctions of \$1 million or more.

Item 4. Mine Safety Disclosures

None.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The principal market for trading in the common stock of Verizon is the New York Stock Exchange under the symbol "VZ". As of December 31, 2021, there were 484,764 shareholders of record.

Stock Repurchases

In February 2020, the Verizon Board of Directors authorized a share buyback program to repurchase up to 100 million shares of Verizon's common stock. The program will terminate when the aggregate number of shares purchased reaches 100 million, or a new share repurchase plan superseding the current plan is authorized, whichever is sooner. Under the program, shares may be repurchased in privately negotiated transactions, on the open market, or otherwise, including through plans complying with Rule 10b5-1 under the Exchange Act. The timing and number of shares purchased under the program, if any, will depend on market conditions and the Company's capital allocation priorities.

During the years ended December 31, 2021 and 2020, Verizon did not repurchase any shares of Verizon's common stock under our current or previously authorized share buyback programs. At December 31, 2021, the maximum number of shares that could be purchased by or on behalf of Verizon under our share buyback program was 100 million.

Stock Performance Graph

vz-20211231_g1.jpg

	2016	2017	2018	2019	2020	2021
Verizon	\$ 100.0	\$ 104.0	\$ 115.7	\$ 131.8	\$ 131.6	\$ 121.7
S&P 500	100.0	121.8	116.5	153.1	181.3	233.3
S&P 500 Telecom Services	100.0	98.7	86.4	114.6	141.7	172.2

The graph compares the cumulative total returns of Verizon, the S&P 500 Stock Index and the S&P 500 Telecommunications Services Index over a five-year period. It assumes \$100 was invested on December 31, 2016 with dividends being reinvested.

Item 6. [Reserved]

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Verizon Communications Inc. (Verizon or the Company) is a holding company that, acting through its subsidiaries, is one of the world's leading providers of communications, technology, information and entertainment products and services to consumers, businesses and government entities. With a presence around the world, we offer data, video and voice services and solutions on our networks and platforms that are designed to meet customers' demand for mobility, reliable network connectivity, security and control.

[Table of Contents](#)

To compete effectively in today's dynamic marketplace, we are focused on the capabilities of our high-performing networks to drive growth based on delivering what customers want and need in the new digital world. During 2021, we focused on leveraging our network leadership; retaining and growing our high-quality customer base while balancing profitability; enhancing ecosystems in growth businesses; and driving monetization of our networks, platforms and solutions. We are creating business value by earning customers', employees' and shareholders' trust, limiting our environmental impact and continuing our customer base growth while creating social benefit through our products and services. Our strategy requires significant capital investments primarily to acquire wireless spectrum, put the spectrum into service, provide additional capacity for growth in our networks, invest in the fiber that supports our businesses, evolve and maintain our networks and develop and maintain significant advanced information technology systems and data system capabilities. We believe that steady and consistent investments in our networks and platforms will drive innovative products and services and fuel our growth.

We are consistently deploying new network architecture and technologies to secure our leadership in both fourth-generation (4G) and fifth-generation (5G) wireless networks. We expect that our next-generation multi-use platform, which we call the Intelligent Edge Network, will simplify operations by eliminating legacy network elements, speed the deployment of 5G wireless technology and create new opportunities in the business market in a cost efficient manner. Our network leadership is the hallmark of our brand and the foundation for the connectivity, platforms and solutions upon which we build our competitive advantage.

Highlights of Our 2021 Financial Results

(dollars in millions)

vz-20211231_g2.jpgvz-20211231_g3.jpgvz-20211231_g4.jpgvz-20211231_g5.jpgvz-20211231_g6.jpg

Business Overview

We have two reportable segments that we operate and manage as strategic business units - Verizon Consumer Group (Consumer) and Verizon Business Group (Business).

Revenue by Segment

vz-20211231_g7.jpgvz-20211231_g8.jpg
vz-20211231_g9.jpg

Note: Excludes eliminations.

Verizon Consumer Group

Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the United States (U.S.) under the Verizon brand and through wholesale and other arrangements. We also provide fixed wireless access (FWA) broadband through our wireless networks. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios. Our Consumer segment's wireless and wireline products and services are available to our retail customers, as well as resellers that purchase wireless network access from us on a wholesale basis.

Customers can obtain our wireless services on a postpaid or prepaid basis. Our postpaid service is generally billed one month in advance for a monthly access charge in return for access to and usage of network services. Our prepaid service is offered only to Consumer customers and enables individuals to obtain wireless services without credit verification by paying for all services in advance. The Consumer segment also offers several categories of wireless equipment to customers, including a variety of smartphones and other handsets, wireless-enabled internet devices, such as tablets, and other wireless-enabled connected devices, such as smart watches. On November 23, 2021, we completed the acquisition of TracFone Wireless, Inc. (Tracfone), a provider of prepaid and value mobile services in the U.S. Additional information is included in Note 3 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries.

In addition to the wireless services and equipment discussed above, Consumer sells residential fixed connectivity solutions, including internet, video and voice services, and wireless network access to resellers on a wholesale basis. The Consumer segment's operating revenues for the year ended December 31, 2021 totaled \$95.3 billion, an increase of \$6.8 billion, or 7.6%, compared to the year ended December 31, 2020. See "Segment Results of Operations" for additional information regarding our Consumer segment's operating performance and selected operating statistics.

Verizon Business Group

Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various Internet of Things (IoT) services and products, including solutions that support fleet tracking management, compliance management, field service management, asset tracking and other types of mobile resource management. We also provide FWA broadband through our wireless networks. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world. The Business segment's operating revenues for the year ended December 31, 2021 totaled \$31.0 billion, an increase of \$80 million, or 0.3%, compared to the year ended December 31, 2020. See "Segment Results of Operations" for additional information regarding our Business segment's operating performance and selected operating statistics.

Corporate and Other

Corporate and other primarily includes insurance captives, investments in unconsolidated businesses and development stage businesses that support our strategic initiatives, as well as unallocated corporate expenses, certain pension and other employee benefit related costs and interest and financing expenses. Corporate and other also includes the historical results of divested

businesses including Verizon Media Group (Verizon Media), and other adjustments and gains and losses that are not allocated in assessing segment performance due to their nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and

[Table of Contents](#)

losses from these transactions that are not individually significant are included in segment results as these items are included in the chief operating decision maker's assessment of segment performance.

On May 2, 2021, Verizon entered into a definitive agreement with an affiliate of Apollo Global Management Inc. (the Apollo Affiliate) pursuant to which we agreed to sell Verizon Media to the affiliate. The transaction closed on September 1, 2021. See Note 3 to the consolidated financial statements for additional information. Under our ownership, Verizon Media's total operating revenues were \$5.3 billion for the year ended December 31, 2021.

Capital Expenditures and Investments

We continue to invest in our wireless networks, high-speed fiber and other advanced technologies to position ourselves at the center of growth trends for the future. During the year ended December 31, 2021, these investments included \$20.3 billion for capital expenditures, inclusive of approximately \$2.1 billion in C-Band related capital expenditures. See "Cash Flows Used in Investing Activities" and "Liquidity and Capital Resources" for additional information. We believe that our investments aimed at expanding our portfolio of products and services will provide our customers with an efficient, reliable infrastructure for competing in the information economy.

Global Network and Technology

We are focusing our capital spending on adding capacity and density to our 4G Long-Term Evolution (LTE) network, while also building our next generation 5G network. We are densifying our networks by utilizing small cell technology, in-building solutions and distributed antenna systems. Network densification enables us to add capacity to address increasing mobile video consumption and the growing demand for IoT products and services on our 4G LTE and 5G networks. Over the past several years, we have been leading the development of 5G wireless technology industry standards and the ecosystems for fixed and mobile 5G wireless services. We expect that 5G technology will provide higher throughput and lower latency than the current 4G LTE technology and enable our networks to handle more traffic as the number of internet-connected devices grows. As of December 31, 2021, 5G Ultra Wideband is available in parts of 87 U.S. cities and 5G Home is available in parts of 65 U.S. cities. 5G Nationwide uses low and mid-band spectrum and dynamic spectrum sharing (DSS) technology, which allows 5G service to run simultaneously with 4G LTE on multiple spectrum bands. With DSS, whenever customers move outside Verizon's high-band Ultra Wideband coverage area, their 5G-enabled devices will remain on 5G technology using the lower spectrum bands where the 5G Nationwide network is available. This allows us to more fully and effectively utilize our current spectrum resources to serve both 4G and 5G customers.

To compensate for the shrinking market for traditional copper-based products, we continue to build fiber-based networks supporting data, video and advanced business services - areas where demand for reliable high-speed connections is growing. We are transforming the architecture of our networks into our Intelligent Edge Network, providing improved efficiency and virtualization, increased automation and opportunities for edge computing services that will support our fiber-based and radio access network technologies. We expect that this new architecture will simplify operations by eliminating legacy network elements, speed the deployment of 5G wireless technology and create new opportunities in the business market in a cost-efficient manner.

Impact of the COVID-19 Pandemic

The impacts from the COVID-19 pandemic on our operations were significant during 2020, which affects the comparability of the results from 2021 to 2020. The COVID-19 pandemic continues to be dynamic, and near-term challenges across the economy remain, including the recent surge of new virus variants across the U.S. We remain committed to caring for the health and safety of our employees and our customers through this challenge while supporting the communities in which we operate. While we have not experienced a material impact on our business from these new variants thus far, we cannot predict with certainty the ultimate impact they may have on our results of operations in the future, and will continue to monitor their daily evolution. For a discussion of the risks to our business from COVID-19, refer to Item 1A Risk Factors.

Recent Development

In January 2022, we successfully deployed C-Band spectrum, reaching approximately 100 million people in the U.S. as of February 2022.

Consolidated Results of Operations

In this section, we discuss our overall results of operations and highlight special items that are not included in our segment results. In "Segment Results of Operations," we review the performance of our two reportable segments in more detail. A detailed discussion of 2019 items and year-over-year comparisons between 2020 and 2019 that are not included in this Form 10-K can be found in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended December 31, 2020.

Consolidated Revenues

Years Ended December 31,	2021	2020	(dollars in millions)	
			Increase/(Decrease)	
			2021 vs. 2020	
Consumer	\$ 95,300	\$ 88,533	\$ 6,767	7.6 %
Business	31,042	30,962	80	0.3
Corporate and other	7,722	9,334	(1,612)	(17.3)
Eliminations	(451)	(537)	86	(16.0)
Consolidated Revenues	\$ 133,613	\$ 128,292	\$ 5,321	4.1

Consolidated revenues increased during 2021 compared to 2020, due to increases in our Consumer and Business segments, partially offset by a decrease in Corporate and other.

Corporate and other revenues decreased during 2021 compared to 2020, primarily due to a decrease of \$1.7 billion within Verizon Media. We had four less months of operating revenues from Verizon Media as a result of the sale completed on September 1, 2021. See Note 3 to the consolidated financial statements for additional information on the Verizon Media sale.

Revenues for our segments are discussed separately below under the heading "Segment Results of Operations."

Consolidated Operating Expenses

Years Ended December 31,	2021	2020	(dollars in millions)	
			Increase/(Decrease)	
			2021 vs. 2020	
Cost of services	\$ 31,234	\$ 31,401	\$ (167)	(0.5)%
Cost of wireless equipment	25,067	19,800	5,267	26.6
Selling, general and administrative expense	28,658	31,573	(2,915)	(9.2)
Depreciation and amortization expense	16,206	16,720	(514)	(3.1)
Consolidated Operating Expenses	\$ 101,165	\$ 99,494	\$ 1,671	1.7

Operating expenses for our segments are discussed separately below under the heading "Segment Results of Operations."

Cost of Services

Cost of services includes the following costs directly attributable to a service: salaries and wages, benefits, materials and supplies, content costs, contracted services, network access and transport costs, customer provisioning costs, computer systems support, costs to support our outsourcing contracts and technical facilities and traffic acquisition costs. Aggregate customer service costs, which include billing and service provisioning, are allocated between Cost of services and Selling, general and administrative expense.

Cost of services decreased during 2021 compared to 2020 and was primarily due to:

- a decrease of \$576 million in traffic acquisition primarily related to the sale of Verizon Media;
- a decrease of \$294 million in personnel costs primarily related to the sale of Verizon Media;
- a decrease of \$220 million in access costs primarily related to a decline in voice services offset by the inclusion of Tracfone results since the acquisition date;

- an increase of \$349 million in rent expense related to both adding capacity to the networks to support demand and lease modifications for certain existing cell towers to support the build out of our 5G wireless network;
- an increase of \$205 million related to the device protection offerings to our wireless retail postpaid customers;
- an increase of \$185 million in buildings and facilities costs primarily driven by higher utility rates; and
- an increase of \$164 million in regulatory fees related to a higher Federal Universal Service Fund (FUSF) rate.

See Note 3 to the consolidated financial statements for additional information on the sale of Verizon Media.

Cost of Wireless Equipment

Cost of wireless equipment increased during 2021 compared to 2020 and was primarily due to:

- an increase of \$3.6 billion related to a shift to higher priced equipment in the mix of wireless devices sold, partly driven by the increased demand for 5G enabled devices; and
- an increase of \$1.3 billion driven by a higher volume of wireless devices and accessories sold.

Selling, General and Administrative Expense

Selling, general and administrative expense includes salaries and wages and benefits not directly attributable to a service or product, the provision for credit losses, taxes other than income taxes, advertising and sales commission costs, call center and information technology

[Table of Contents](#)

costs, regulatory fees, professional service fees and rent and utilities for administrative space. Also included is a portion of the aggregate customer care costs as discussed above in "Cost of Services."

Selling, general and administrative expense decreased during 2021 compared to 2020 and was primarily due to:

- the \$651 million net gain related to the sale of Verizon Media in 2021, compared to the \$126 million loss related to the sale of Huffington Post in 2020. In 2021, we recorded a pre-tax gain on sale of approximately \$1.0 billion and \$346 million of various costs associated with the sale of Verizon Media;
- the \$1.2 billion loss during 2020 resulting from the exchange of spectrum licenses in connection with Auction 103, compared to the \$223 million loss recognized during 2021 resulting from agreements we entered into to sell certain wireless licenses;
- a decrease of \$857 million in personnel expense primarily related to the sale of Verizon Media in 2021 and additional sales commission expense resulting from actions taken in 2020 in response to the COVID-19 pandemic;
- a decrease of \$591 million in provision for credit losses related to both improvement in payment trends in 2021 as well as actions taken in 2020 in response to the COVID-19 pandemic; and
- an increase of \$364 million in advertising and promotion costs related to brand messaging in 2021 as well as lower expenses in 2020 related to customer behavior during the COVID-19 pandemic.

See Note 3 to the consolidated financial statements for additional information on both the sale of Verizon Media and loss on spectrum licenses.

Depreciation and Amortization Expense

Depreciation and amortization expense decreased during 2021 compared to 2020, primarily as a result of the Verizon Media sale. See Note 3 to the consolidated financial statements for additional information.

Other Consolidated Results

Other Income (Expense), Net

Additional information relating to Other income (expense), net is as follows:

		(dollars in millions)			
				Increase/ (Decrease)	
Years Ended December 31,		2021	2020	2021 vs. 2020	
Interest income	\$	48	\$ 65	\$ (17)	(26.2)%
Other components of net periodic benefit (cost) income		3,785	(425)	4,210	nm
Early debt extinguishment costs		(3,541)	(129)	(3,412)	nm
Other, net		20	(50)	70	nm
Total	\$	312	\$ (539)	\$ 851	nm

nm - not meaningful

Other income (expense), net reflects certain items not directly related to our core operations, including interest income, gains and losses from non-operating asset dispositions, debt extinguishment costs, components of net periodic pension and postretirement benefit cost and income and foreign exchange gains and losses.

Other income (expense), net changed during 2021 compared to 2020 and was primarily due to:

- a net pension and postretirement benefits remeasurement gain of \$2.4 billion recorded during 2021, compared with a net pension and postretirement benefits remeasurement loss of \$1.6 billion recorded during 2020; and
- an increase of \$3.4 billion in early debt redemption costs driven by tender offers, the redemptions of securities issued by Verizon and open market repurchases of Verizon and subsidiary notes in 2021.

[Table of Contents](#)

Interest Expense

(dollars in millions)				
Years Ended December 31,	2021	2020	Increase/(Decrease)	
			2021 vs. 2020	
Total interest costs on debt balances	\$ 5,326	\$ 4,802	\$ 524	10.9 %
Less capitalized interest costs	1,841	555	1,286	nm
Total	\$ 3,485	\$ 4,247	\$ (762)	(17.9)
Average debt outstanding ^{(1) (3)}	\$ 147,035	\$ 116,888		
Effective interest rate ^{(2) (3)}	3.6 %	4.1 %		

nm - not meaningful

⁽¹⁾ The average debt outstanding is a financial measure and is calculated by applying a simple average of prior thirteen-month end balances of total short-term and long-term debt, net of discounts, premiums and unamortized debt issuance costs.

⁽²⁾ The effective interest rate is the rate of actual interest incurred on debt. It is calculated by dividing the total interest costs on debt balances by the average debt outstanding.

⁽³⁾ We believe that this measure is useful to management, investors and other users of our financial information in evaluating our debt financing cost and trends in our debt leverage management.

Total interest expense decreased during 2021 compared to 2020 and was primarily due to:

- an increase in capitalized interest costs as a result of qualifying activities performed on C-Band licenses won; and
- an increase in interest costs on debt balances as a result of higher average debt balances, partially offset by lower average interest rates as a result of our continuing focus on optimizing our debt footprint and total borrowing costs.

See Note 4 and Note 7 to the consolidated financial statements for additional information on spectrum licenses and debt transactions, respectively.

Provision for Income Taxes

(dollars in millions)				
Years Ended December 31,	2021	2020	Increase/(Decrease)	
			2021 vs. 2020	
Provision for income taxes	\$ 6,802	\$ 5,619	\$ 1,183	21.1 %
Effective income tax rate	23.1 %	23.4 %		

The effective income tax rate is calculated by dividing the provision for income taxes by income before the provision for income taxes. The decrease in the effective income tax rate was primarily due to the sale of Verizon Media in the current period, partially offset by the non-recurring tax benefit recognized in 2020 from a series of legal entity restructurings. The increase in the provision for income taxes was primarily due to the increase in income before income taxes in the current period.

A reconciliation of the statutory federal income tax rate to the effective income tax rate for each period is included in Note 12 to the consolidated financial statements.

Consolidated Net Income, Consolidated EBITDA and Consolidated Adjusted EBITDA

Consolidated earnings before interest, taxes, depreciation and amortization expenses (Consolidated EBITDA) and Consolidated Adjusted EBITDA, which are presented below, are non-generally accepted accounting principles (GAAP) measures that we believe are useful to management, investors and other users of our financial information in evaluating operating profitability on a

more variable cost basis as they exclude the depreciation and amortization expense related primarily to capital expenditures and acquisitions that occurred in prior years, as well as in evaluating operating performance in relation to Verizon's competitors. Consolidated EBITDA is calculated by adding back interest, taxes, depreciation and amortization expenses to net income.

Consolidated Adjusted EBITDA is calculated by excluding from Consolidated EBITDA the effect of the following non-operational items: equity in earnings and losses of unconsolidated businesses and other income and expense, net, as well as the effect of special items. We believe that this measure is useful to management, investors and other users of our financial information in evaluating the effectiveness of our operations and underlying business trends in a manner that is consistent with management's evaluation of business performance. We believe that Consolidated Adjusted EBITDA is widely used by investors to compare a company's operating performance to its competitors by minimizing impacts caused by differences in capital structure, taxes, and depreciation and amortization policies. Further, the exclusion of non-operational items and special items enables comparability to prior period performance and trend analysis. See "Special Items" for additional information.

It is management's intent to provide non-GAAP financial information to enhance the understanding of Verizon's GAAP financial information, and it should be considered by the reader in addition to, but not instead of, the financial statements prepared in accordance with GAAP. Each non-GAAP financial measure is presented along with the corresponding GAAP measure so as not to imply that more emphasis

[Table of Contents](#)

should be placed on the non-GAAP measure. We believe that providing these non-GAAP measures in addition to the GAAP measures allows management, investors and other users of our financial information to more fully and accurately assess both consolidated and segment performance. The non-GAAP financial information presented may be determined or calculated differently by other companies and may not be directly comparable to that of other companies.

		(dollars in millions)	
Years Ended December 31,		2021	2020
Consolidated Net Income	\$	22,618	\$ 18,348
Add:			
Provision for income taxes		6,802	5,619
Interest expense ⁽¹⁾		3,485	4,247
Depreciation and amortization expense		16,206	16,720
Consolidated EBITDA	\$	49,111	\$ 44,934
Add (Less):			
Other (income) expense, net ⁽²⁾		(312)	539
Equity in (earnings) losses of unconsolidated businesses ⁽³⁾		(145)	45
Severance charges		209	221
Loss on spectrum licenses		223	1,195
Net (gain) loss from dispositions of businesses		(706)	126
Consolidated Adjusted EBITDA	\$	48,380	\$ 47,060

⁽¹⁾ Includes Early debt redemption costs, where applicable. See "Special Items" for additional information.

⁽²⁾ Includes Pension and benefits mark-to-market adjustments and Early debt redemption costs, where applicable. See "Special Items" for additional information.

⁽³⁾ Includes Net gains from dispositions of assets, where applicable. See "Special Items" for additional information.

The changes in Consolidated Net Income, Consolidated EBITDA and Consolidated Adjusted EBITDA in the table above during 2021 compared to 2020, were primarily a result of the factors described in connection with operating revenues and operating expenses.

Segment Results of Operations

We have two reportable segments that we operate and manage as strategic business units - Consumer and Business. We measure and evaluate our segments based on segment operating income. The use of segment operating income is consistent with the chief operating decision maker's assessment of segment performance.

To aid in the understanding of segment performance as it relates to segment operating income, management uses the following operating statistics to evaluate the overall effectiveness of our segments. We believe these operating statistics are useful to investors and other users of our financial information because they provide additional insight into drivers of our segments' operating results, key trends and performance relative to our peers. These operating statistics may be determined or calculated differently by other companies and may not be directly comparable to those statistics of other companies.

Wireless retail connections are retail customer device postpaid and prepaid connections as of the end of the period. Retail connections under an account may include those from smartphones and basic phones (collectively, phones), as well as tablets and other internet devices, including wearables and retail IoT devices. Wireless retail connections are calculated by adding total retail postpaid and prepaid new connections in the period to prior period retail connections, and subtracting total retail postpaid and prepaid disconnects in the period.

Wireless retail postpaid connections are retail postpaid customer device connections as of the end of the period. Retail connections under an account may include those from phones, as well as tablets and other internet devices, including wearables and retail IoT devices. Wireless retail postpaid connections are calculated by adding retail postpaid new connections in the period to prior period retail postpaid connections, and subtracting retail postpaid disconnects in the period.

Fios internet connections are the total number of connections to the internet using Fios internet services as of the end of the period. Fios internet connections are calculated by adding Fios internet new connections in the period to prior period Fios internet connections, and subtracting Fios internet disconnects in the period.

Fios video connections are the total number of connections to traditional linear video programming using Fios video services as of the end of the period. Fios video connections are calculated by adding Fios video net additions in the period to prior period Fios video connections. Fios video net additions are calculated by subtracting the Fios video disconnects from the Fios video new connections.

Wireline broadband connections are the total number of connections to the internet using Digital Subscriber Line (DSL) and Fios internet services as of the end of the period. Wireline broadband connections are calculated by adding wireline broadband net additions in the period to prior period wireline broadband connections. Wireline broadband net additions are calculated by subtracting the wireline broadband disconnects from the wireline broadband new connections.

[Table of Contents](#)

Wireless retail connections, net additions are the total number of additional retail customer device postpaid and prepaid connections, less the number of device disconnects in the period. Wireless retail connections, net additions in each period presented are calculated by subtracting the total retail postpaid and prepaid disconnects, net of certain adjustments, from the total retail postpaid and prepaid new connections in the period.

Wireless retail postpaid connections, net additions are the total number of additional retail customer device postpaid connections, less the number of device disconnects in the period. Wireless retail postpaid connections, net additions in each period presented are calculated by subtracting the retail postpaid disconnects, net of certain adjustments, from the retail postpaid new connections in the period.

Wireless retail postpaid phone connections, net additions are the total number of additional retail customer postpaid phone connections, less the number of phone disconnects in the period. Wireless retail postpaid phone connections, net additions in each period presented are calculated by subtracting the retail postpaid phone disconnects, net of certain adjustments, from the retail postpaid phone new connections in the period.

Wireless Churn is the rate at which service to retail, retail postpaid, or retail postpaid phone connections is terminated on average in the period. The churn rate in each period presented is calculated by dividing retail disconnections, retail postpaid disconnections, or retail postpaid phone disconnections by the average retail connections, average retail postpaid connections, or average retail postpaid phone connections, respectively, in the period.

Wireless retail postpaid ARPA is the calculated average retail postpaid service revenue per account (ARPA) from retail postpaid accounts in the period. Wireless retail postpaid service revenue does not include recurring device payment plan billings related to the Verizon device payment program, plan billings related to device warranty and insurance or regulatory fees. Wireless retail postpaid ARPA in each period presented is calculated by dividing retail postpaid service revenue by the average retail postpaid accounts in the period.

Wireless retail postpaid accounts are wireless retail customers that are directly served and managed under the Verizon brand and use its services as of the end of the period. Accounts include unlimited plans, shared data plans and corporate accounts, as well as legacy single connection plans and multi-connection family plans. A single account may include monthly wireless services for a variety of connected devices. Wireless retail postpaid accounts are calculated by adding retail postpaid new accounts to the prior period retail postpaid accounts.

Wireless retail postpaid connections per account is the calculated average number of retail postpaid connections per retail postpaid account as of the end of the period. Wireless retail postpaid connections per account is calculated by dividing the total number of retail postpaid connections by the number of retail postpaid accounts as of the end of the period.

Segment operating income margin reflects the profitability of the segment as a percentage of revenue. Segment operating income margin is calculated by dividing total segment operating income by total segment operating revenues.

Segment earnings before interest, taxes, depreciation and amortization (Segment EBITDA), which is presented below, is a non-GAAP measure and does not purport to be an alternative to operating income (loss) as a measure of operating performance. We believe this measure is useful to management, investors and other users of our financial information in evaluating operating profitability on a more variable cost basis as it excludes the depreciation and amortization expenses related primarily to capital expenditures and acquisitions that occurred in prior years, as well as in evaluating operating performance in relation to our competitors. Segment EBITDA is calculated by adding back depreciation and amortization expense to segment operating income (loss). Segment EBITDA margin is calculated by dividing Segment EBITDA by total segment operating revenues. See Note 13 to the consolidated financial statements for additional information.

Verizon Consumer Group

Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the U.S. under the Verizon brand and through wholesale and other arrangements. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as

well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios.

Operating Revenues and Selected Operating Statistics

(dollars in millions, except ARPA)				
Years Ended December 31,	2021	2020	Increase/(Decrease)	
			2021 vs. 2020

⁽¹⁾ As of end of period

⁽²⁾ Includes certain adjustments
nm - not meaningful

Consumer's total operating revenues increased during 2021 compared to 2020, as a result of increases in Service and Wireless equipment revenues, partially offset by a decrease in Other revenue. The increase in Consumer total operating revenues includes the net impact of approximately \$680 million in the fourth quarter of 2021 as a result of our acquisition of Tracfone.

Service Revenue

Service revenue increased during 2021 compared to 2020, primarily driven by increases in wireless and Fios service revenues.

Wireless service revenue increased \$2.5 billion during 2021 compared to 2020 and was primarily due to:

- an increase of \$1.3 billion in access revenues related to our postpaid plans driven by additional subscribers and migrations to higher priced plans as well as growth related to content offerings, cloud services and mobile security products included in certain protection packages;
- an increase of \$544 million, representing the net impact as a result of the acquisition of Tracfone in the fourth quarter of 2021; and
- an increase of \$464 million related to growth in non-retail service revenue.

For the year ended December 31, 2021, Fios service revenue totaled \$10.8 billion, representing an increase of \$462 million compared to 2020 primarily resulting from an increase in Fios internet connections, reflecting increased demand for higher broadband speeds, partially offset by a decrease in Fios voice revenues.

See Note 3 to the consolidated financial statements for additional information on the acquisition of Tracfone.

Wireless Equipment Revenue

Wireless equipment revenue increased during 2021 compared to 2020 and was primarily due to:

- an increase of \$2.6 billion related to a shift to higher priced equipment in the mix of wireless devices sold, partly driven by the increased demand for 5G enabled devices; and

[Table of Contents](#)

- an increase of \$1.6 billion driven by a higher volume of wireless devices and accessories sold, partially offset by related promotions.

Other Revenue

Other revenue includes non-service revenues such as regulatory fees, cost recovery surcharges, revenues associated with certain products included in our device protection offerings, leasing and interest on equipment financed under a device payment plan agreement when sold to the customer by an authorized agent.

Other revenue decreased during 2021 compared to 2020 and was primarily due to:

- a decrease of \$462 million that resulted from an update to our device protection offering which increased the price of the bundled offering and changed the product mix within the offering such that a smaller amount of the overall device protection revenue is recognized in Other revenue; and
- an increase of \$128 million related to cost recovery surcharges.

Operating Expenses

Years Ended December 31,	(dollars in millions)			
			Increase/(Decrease)	
	2021	2020	2021 vs. 2020	
Cost of services	\$ 16,581	\$ 15,610	\$ 971	6.2 %
Cost of wireless equipment	20,523	15,736	4,787	30.4
Selling, general and administrative expense	16,562	16,936	(374)	(2.2)
Depreciation and amortization expense	11,679	11,395	284	2.5
Total Operating Expenses	\$ 65,345	\$ 59,677	\$ 5,668	9.5

Cost of Services

Cost of services increased during 2021 compared to 2020 and was primarily due to:

- an increase in rent expense of \$323 million related to adding capacity to the networks to support demand and lease modifications for certain existing cell towers to support the build out of our 5G wireless network;
- an increase in digital content costs of \$209 million driven by additional streaming service subscriptions, partially offset by a decline in traditional linear content costs;
- an increase of \$197 million related to the device protection offerings to our wireless retail postpaid customers; and
- an increase of \$133 million in network access costs primarily driven by the inclusion of Tracfone results since acquisition date.

Cost of Wireless Equipment

Cost of wireless equipment increased during 2021 compared to 2020 and was primarily due to:

- an increase of \$2.3 billion driven by a higher volume of wireless devices and accessories sold; and
- an increase of \$2.2 billion related to a shift to higher priced equipment in the mix of wireless devices sold, partly driven by the increased demand for 5G enabled devices.

Selling, General and Administrative Expense

Selling, general and administrative expense decreased during 2021 compared to 2020 and was primarily due to:

- a decrease in provision for credit losses of \$564 million related to both improvement in payment trends in 2021 as well as actions taken in 2020 in response to the COVID-19 pandemic;
- a decrease in personnel expense of \$237 million primarily driven by additional sales commission expense related to actions taken in 2020 in response to the COVID-19 pandemic;

- an increase in advertising expenses of \$390 million related to brand messaging in 2021 as well as lower expenses in 2020 related to customer behavior during the COVID-19 pandemic; and
- an increase in building and facilities of \$121 million primarily driven by higher utility rates.

Depreciation and Amortization Expense

Depreciation and amortization expense increased during 2021 compared to 2020, driven by the change in the mix of total Verizon depreciable assets and Consumer's usage of those assets.

Segment Operating Income and EBITDA

(dollars in millions)				
Increase/(Decrease)				
Years Ended December 31,	2021	2020	2021 vs. 2020	
Segment Operating Income	\$ 29,955	\$ 28,856	\$ 1,099	3.8 %
Add Depreciation and amortization expense	11,679	11,395	284	2.5
Segment EBITDA	\$ 41,634	\$ 40,251	\$ 1,383	3.4
Segment operating income margin	31.4 %	32.6 %		
Segment EBITDA margin	43.7 %	45.5 %		

The changes in the table above during the periods presented were primarily a result of the factors described in connection with operating revenues and operating expenses.

Verizon Business Group

Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various IoT services and products. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world. The Business segment is organized in four customer groups: Small and Medium Business, Global Enterprise, Public Sector and Other, and Wholesale.

Operating Revenues and Selected Operating Statistics

				(dollars in millions)
				Increase/ (Decrease)
Years Ended December 31,	2021	2020	2021 vs. 2020	
Small and Medium Business	\$ 11,774	\$ 11,132	\$ 642	5.8 %
Global Enterprise	10,224	10,410	(186)	(1.8)
Public Sector and Other	6,324	6,362	(38)	(0.6)
Wholesale	2,720	3,058	(338)	(11.1)
Total Operating Revenues⁽¹⁾	\$ 31,042	\$ 30,962	\$ 80	0.3
Connections ('000):⁽²⁾				
Wireless retail postpaid connections	27,411	26,507	904	3.4
Fios internet connections	356	335	21	6.3
Fios video connections	71	73	(2)	(2.7)
Wireline broadband connections	477	482	(5)	(1.0)
Net Additions in Period ('000):⁽³⁾				
Wireless retail postpaid	1,001	1,518	(517)	(34.1)
Wireless retail postpaid phones	509	572	(63)	(11.0)
Churn Rate:				
Wireless retail postpaid	1.27 %	1.20 %		
Wireless retail postpaid phones	1.03 %	0.96 %		

⁽¹⁾ Service and other revenues included in our Business segment amounted to approximately \$27.7 billion and \$28.1 billion for the years ended December 31, 2021 and 2020, respectively. Wireless equipment revenues included in our Business segment amounted to approximately \$3.4 billion and \$2.9 billion for the years ended December 31, 2021 and 2020, respectively.

⁽²⁾ As of end of period

⁽³⁾ Includes certain adjustments

Business's total operating revenues increased during 2021 compared to 2020, as a result of an increase in Small and Medium Business revenue, partially offset by decreases in Global Enterprise, Public Sector and Other and Wholesale revenues.

Small and Medium Business

Small and Medium Business offers wireless services and equipment, conferencing services, tailored voice and networking products, Fios services, Internet Protocol (IP) networking, advanced voice solutions and security and managed information technology services to our U.S.-based small and medium businesses that do not meet the requirements to be categorized as Global Enterprise, as described below.

[Table of Contents](#)

Small and Medium Business revenues increased during 2021 compared to 2020 and was primarily due to:

- an increase in wireless equipment revenue of \$392 million driven by a shift to higher priced equipment in the mix of devices sold and higher volumes, partially offset by an increase in promotions;
- an increase in wireless service revenue of \$331 million driven by an increase in the amount of wireless retail postpaid connections, as well as increases in usage and non-recurring fees related to the impacts of the COVID-19 pandemic in the prior year; and
- a decrease of \$127 million related to the loss of voice and DSL service connections.

Fios revenues totaled \$984 million, which represents an increase of \$58 million during 2021 compared to 2020. The increase was primarily related to increases in total connections, as well as increased demand for higher broadband speeds.

Global Enterprise

Global Enterprise offers services to large businesses, which are identified based on their size and volume of business with Verizon, as well as non-U.S. public sector customers.

Global Enterprise revenues decreased during 2021 compared to 2020 and was primarily due to:

- a decrease of \$467 million in traditional data and voice communication services related to secular pressures in the marketplace;
- an increase of \$106 million in wireless equipment revenue driven by a shift to higher priced equipment in the mix of devices sold and higher volumes;
- an increase of \$90 million in customer premise equipment related to increased volumes; and
- an increase of \$58 million related to professional services revenue.

Public Sector and Other

Public Sector and Other offers wireless products and services as well as wireline connectivity and managed solutions to U.S. federal, state and local governments and educational institutions. These services include business services and connectivity similar to the products and services offered by Global Enterprise, in each case, with features and pricing designed to address the needs of governments and educational institutions.

Public Sector and Other revenues decreased during 2021 compared to 2020 and was primarily due to:

- a decrease of \$248 million due to customers migrating to new solutions, customer premise equipment volumes and other miscellaneous activity;
- a decrease of \$42 million in wireless equipment revenue primarily driven by a decrease in the number of wireless devices sold as a result of a reduction in activations partly related to COVID-19 impacts in the prior year. The decrease is partially offset by a shift to higher priced equipment in the mix of wireless devices sold;
- an increase in wireless service revenue of \$217 million primarily related to a higher volume of wireless connections driven by shifting technology needs in remote business environments, particularly in education; and
- an increase of \$52 million in professional services revenue.

Wholesale

Wholesale offers wireline communications services including data, voice, local dial tone and broadband services primarily to local, long distance, and wireless carriers that use our facilities to provide services to their customers.

Wholesale revenues decreased during 2021 compared to 2020 and was primarily due to:

- a decrease of \$338 million related to declines in traditional voice communication and network connectivity as a result of technology substitution.

Operating Expenses

(dollars in millions)				
Years Ended December 31,	2021	2020	Increase/ (Decrease)	
			2021 vs. 2020	
Cost of services	\$ 10,653	\$ 10,659	\$ (6)	(0.1)%
Cost of wireless equipment	4,544	4,064	480	11.8
Selling, general and administrative expense	8,324	8,380	(56)	(0.7)
Depreciation and amortization expense	4,084	4,086	(2)	—
Total Operating Expenses	\$ 27,605	\$ 27,189	\$ 416	1.5

Cost of Services

Cost of services were relatively flat during 2021 compared to 2020 primarily due to:

- a decrease in access costs of \$317 million related to a decline in voice services;
- an increase in direct costs of \$128 million related to professional services;
- an increase in building and facilities costs of \$119 million primarily driven by higher utility rates; and
- an increase in regulatory fees of \$81 million related to a higher FUSF rate.

Cost of Wireless Equipment

Cost of wireless equipment increased during 2021 compared to 2020 and was primarily due to:

- an increase of \$987 million related to a shift to higher priced equipment in the mix of wireless devices sold; and
- a decrease of \$578 million driven by a lower volume of wireless devices sold.

Selling, General and Administrative Expense

Selling, general and administrative expense decreased during 2021 compared to 2020, and was primarily due to:

- a decrease in personnel expense of \$140 million primarily driven by additional sales commission expense related to actions taken in 2020 in response to the COVID-19 pandemic and lower consulting fees; and
- an increase of \$71 million in data and network systems related to IT and technology contracts.

Segment Operating Income and EBITDA

					(dollars in millions)
					Increase/(Decrease)
Years Ended December 31,	2021	2020	2021 vs. 2020		
Segment Operating Income	\$ 3,437	\$ 3,773	\$ (336)	(8.9)%	
Add Depreciation and amortization expense	4,084	4,086	(2)	—	
Segment EBITDA	\$ 7,521	\$ 7,859	\$ (338)	(4.3)	
Segment operating income margin	11.1 %	12.2 %			
Segment EBITDA margin	24.2 %	25.4 %			

The changes in the table above during the periods presented were primarily a result of the factors described in connection with operating revenues and operating expenses.

Special Items

Special items included in Income Before Provision For Income Taxes were as follows:

Years Ended December 31,	(dollars in millions)	2021
Severance, pension and benefits charges (credits)		
Selling, general and administrative expense	\$	209
Other income (expense), net		(2,379)
Loss on spectrum licenses		
Selling, general and administrative expense		223
Net early debt redemption costs		
Other income (expense), net		3,541
Interest expense		—
Net (gain) loss from dispositions of assets and businesses		
Selling, general and administrative expense		(706)
Equity in earnings (losses) of unconsolidated businesses		(131)
Other income (expense), net		—
Total	\$	757

The Consolidated Adjusted EBITDA non-GAAP measure presented in the Consolidated Net Income, Consolidated EBITDA and Consolidated Adjusted EBITDA discussion (see "Consolidated Results of Operations") excludes all of the amounts included above, as described below.

[Table of Contents](#)

The income and expenses related to special items included in our consolidated results of operations were as follows:

Years Ended December 31,		(dollars)	2021
Within Total Operating Expenses	\$	(274)	\$
Within Equity in earnings (losses) of unconsolidated businesses		(131)	
Within Other income (expense), net		1,162	
Within Interest expense		—	
Total	\$	757	\$

Severance, Pension and Benefits Charges (Credits)

During 2021, in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur, we recorded net pre-tax pension and benefits credits of \$2.4 billion in our pension and postretirement benefit plans. The credits were recorded in Other income (expense), net in our consolidated statement of income and were primarily driven by a credit of \$1.1 billion due to an increase in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 2.6% at December 31, 2020 to a weighted-average of 2.9% at December 31, 2021, a credit of \$847 million due to the difference between our estimated and our actual return on assets and a credit of \$453 million due to other actuarial assumption adjustments. During 2021, we also recorded net pre-tax severance charges of \$209 million related to voluntary separations under our existing plans in Selling, general and administrative expense in our consolidated statements of income.

During 2020, in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur, we recorded net pre-tax pension and benefits charges of \$1.6 billion in our pension and postretirement benefit plans. The charges were recorded in Other income (expense), net in our consolidated statements of income and were primarily driven by a charge of \$3.2 billion due to a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 3.3% at December 31, 2019 to a weighted-average of 2.6% at December 31, 2020, partially offset by a credit of \$1.6 billion due to the difference between our estimated and our actual return on assets. During 2020, we also recorded net pre-tax severance charges of \$221 million related to a voluntary offer under our existing separation plans in Selling, general and administrative expense in our consolidated statements of income.

Due to the presentation of the other components of net periodic benefit cost, we recognize a portion of the pension and benefits charges (credits) in Other income (expense), net in our consolidated statements of income.

See Note 11 to the consolidated financial statements for additional information related to severance, pension and benefits charges (credits).

Loss on Spectrum Licenses

During 2021, we recognized a pre-tax loss of \$223 million as a result of signing two agreements to sell certain wireless licenses.

During 2020, we recorded a pre-tax net loss of \$1.2 billion as a result of the conclusion of the FCC incentive auction, Auction 103, for spectrum licenses in the upper 37 Gigahertz (GHz), 39 GHz and 47 GHz bands. See Note 3 to the consolidated financial statements for additional information.

Net Early Debt Redemption Costs

During 2021, we recorded pre-tax early debt redemption costs of \$3.5 billion in connection with tender offers, the redemptions of securities issued by Verizon and open market repurchases of various Verizon and subsidiary notes.

During 2020, we recorded net pre-tax early debt redemption costs of \$102 million in connection with the redemptions of securities issued by Verizon and open market repurchases.

See Note 7 to the consolidated financial statements for additional information related to our early debt redemptions.

Net (Gain) Loss from Dispositions of Assets and Businesses

During 2021, we recorded a pre-tax net gain of \$837 million, primarily in connection with the sales of Verizon Media and our investment in the Complex Media business. During 2020, we recorded a pre-tax net loss of \$119 million, primarily in connection with the sale of our Huffington Post business.

See Note 3 to the consolidated financial statements for additional information related to dispositions of assets and businesses.

Operating Environment and Trends

The telecommunications industry is highly competitive. We expect competition to remain intense as traditional and non-traditional participants seek increased market share. Our high-quality customer base and networks differentiate us from our competitors and give us the ability to plan and manage through changing economic and competitive conditions. We remain focused on executing on the fundamentals of the business: maintaining a high-quality customer base, delivering strong financial and operating results and strengthening our balance sheet.

[Table of Contents](#)

We will continue to invest for growth, which we believe is the key to creating value for our shareholders. We continue to lead in 4G LTE performance while building momentum for our 5G network. Our strategy lays the foundation for the future through investments in our Intelligent Edge Network that enable efficiencies throughout our core infrastructure and deliver flexibility to meet customer requirements.

The U.S. wireless market has achieved a high penetration of smartphones, which reduces the opportunity for new phone connection growth for the industry. We expect future revenue growth in the industry to be driven by expanding existing customer relationships, increasing the number of ways customers can connect with wireless networks and services and increasing the penetration of other connected devices including wearables, tablets and IoT devices. We expect 5G technology will provide a significant opportunity for growth in the industry in 2022 and beyond. With respect to our wireless connectivity products and services, we compete against other national wireless service providers, including AT&T Inc. and T-Mobile USA, Inc., as well as various regional wireless service providers. We also compete for retail activations with resellers that buy bulk wholesale service from wireless service providers, including Verizon, and resell it to their customers. Resellers include cable companies and others. We face competition from other communications and technology companies seeking to increase their brand recognition and capture customer revenue with respect to the provision of wireless products and services, in addition to non-traditional offerings in mobile data. For example, Microsoft Corporation, Alphabet Inc., Apple Inc., Meta Platforms, Inc. and others are offering alternative means for messaging and making wireless voice calls that, in certain cases, can be used in lieu of the wireless provider's voice service, as well as alternative means of accessing video content.

With respect to wireless services and equipment, pricing plays an important role in the wireless competitive landscape. We compete in this area by offering our customers services and devices that we believe they will regard as the best available value for the price. As the demand for wireless services continues to grow, wireless service providers are offering a range of service plans at competitive prices. These service offerings will vary from time to time based on customer needs, technology changes and market conditions and may be provided as standard plans or as part of limited time promotional offers.

We expect future service revenue growth opportunities to arise from increased access revenue as customers shift to higher access plans, driven in part by attractive bundled content with premium brands, as well as from increased connections per account. Future service revenue growth opportunities will be dependent on expanding the penetration of our services, increasing the number of ways that our customers can connect with our networks and services and the development of new ecosystems. We and other wireless service providers, as well as equipment manufacturers, offer device payment options, which provide customers with the ability to pay for their device over a period of time, and some providers offer device leasing arrangements.

Current and potential competitors in the wireline service market include cable companies, wireless service providers, domestic and foreign telecommunications providers, satellite television companies, internet service providers, over-the-top providers and other companies that offer network services and managed enterprise solutions.

In addition, companies with a global presence are increasingly competing with us in our wireline services. A relatively small number of telecommunications and integrated service providers with global operations serve customers in the global enterprise market and, to a lesser extent, the global wholesale market. We compete with these providers for large contracts to provide integrated solutions to global enterprises and government customers. Many of these companies have strong market presence, brand recognition and existing customer relationships, all of which contribute to intensifying competition that may affect our future revenue growth.

Despite this challenging environment, we expect that we will be able to grow key aspects of our wireline services. We continue to provide network reliability and offer products, which include fiber-optic internet access, several video services, and voice services. Further, we will continue to offer our business and government customers more robust IP products and services, and advance our IoT strategies by leveraging business models that monetize usage on our networks at the connectivity, platform and solution layers.

We will also continue to focus on cost efficiencies to ensure we have the maximum flexibility to adjust to changes in the competitive and economic environments and maximize returns to shareholders.

2022 Connection Trends

In our Consumer segment, we expect to continue to attract new customers and maintain high-quality retail postpaid customers, capitalizing on demand for data services and providing our customers new ways of using wireless services in their daily lives. We expect that future connection growth will be driven by smartphones, tablets and other connected devices such as wearables. We believe the combination of our wireless network performance and Mix & Match unlimited plans provides a superior customer experience, supporting increased penetration of data services and the continued attraction and retention of higher valued retail postpaid connections. We anticipate continued pressure in 2022 related to Tracfone subscribers as we seek to improve the customer retention rate that has declined over the prior two years, however expect to grow the Tracfone customer base over time by furthering our investment and increasing our product and service offerings within the business. We expect to manage churn by providing a consistent, reliable experience on our wireless service and focusing on improving the customer experience through simplified pricing and continued focus in our distribution channels. We expect to continue to grow our Fios internet connections as we seek to increase our penetration rates within our Fios service areas, further supported by the demand for higher speed internet connections. At the same time, we expect accelerating fixed wireless access connections to complement strong Fios results as demand for services continues to grow. In Fios video, the business continues to face ongoing pressure as observed throughout the linear television market. We expect to manage market pressure by offering customers a choice of video service, including options such as Mix & Match on Fios and other offerings. We have experienced continuing access line and DSL losses as customers have disconnected both primary

[Table of Contents](#)

and secondary lines and switched to alternative technologies such as wireless, Voice over Internet Protocol, and cable for voice and data services.

In our Business segment, we offer wireless products and services to business and government customers across the U.S. We continue to grow our retail connections while operating in a competitive environment. We expect that this connection growth, combined with our industry-leading network assets, will provide additional opportunities to sell solutions, such as those around security, advanced communications and professional services. We also expect to expand our existing services offered to business customers through our Intelligent Edge Network, our multi-use platform.

In addition, in both our Consumer and our Business segments, we expect to support connection growth in part by adding capacity and density to our 4G LTE network, and by leading the build-out of our 5G network. We also anticipate the continued migration of 3G connections onto 4G and 5G technologies with the expected cessation of 3G services.

2022 Operating Revenue Trends

In our Consumer segment, we expect to see a continuation of service revenue growth in 2022 as customers shift to higher access plans with additional services and increase the number of devices they connect with our networks and services. We expect continued growth in wireless service revenue, driven by Tracfone contributions, migrations to higher priced plans and increases in fixed wireless access connections. We expect Fios revenue to benefit in 2022 as growth in our broadband customer base and increases in demand for higher speed internet connections offsets the impact of the shift from the triple-play bundle to standalone service.

In our Business segment, we expect wireless revenue to expand, driven by growth from increases in wireless volumes and fixed wireless access contributions. We expect that Fios, through increased penetration, will also contribute to revenue growth. Legacy traditional wireline services will continue to face secular pressures.

On September 1, 2021, we completed the sale of Verizon Media. We expect to see a decrease in operating revenues as a result of this divestiture.

2022 Operating Expense and Cash Flow from Operations Trends

We expect our consolidated operating income margin and adjusted consolidated EBITDA margin to remain strong as we continue to drive revenue growth and undertake initiatives to reduce our overall cost structure by improving productivity and gaining efficiencies in our operations throughout the business in 2022 and beyond. Business Excellence initiatives include zero-based budgeting methodology, driving capital efficiencies from the architecture of the networks and evolving our Information Technology strategy. We believe our additional investments in our Business segment in both product simplification and continued focus on process improvements and new work tools will drive cost savings and create incremental growth opportunities in areas such as 5G and One Fiber.

We create value for our shareholders by investing the cash flows generated by our business in opportunities and transactions that support continued profitable growth, thereby increasing customer satisfaction and usage of our products and services. In addition, we have used our cash flows to maintain and grow our dividend payout to shareholders. Verizon's Board of Directors increased the Company's quarterly dividend by 2.0% during 2021, making this the fifteenth consecutive year in which we have raised our dividend.

Our goal is to use our cash to create long-term value for our shareholders. We will continue to look for investment opportunities that will help us to grow the business, strengthen our balance sheet, acquire spectrum licenses (see "Cash Flows from Investing Activities"), pay dividends to our shareholders and, when appropriate, buy back shares of our outstanding common stock (see "Cash Flows from Financing Activities").

Liquidity and Capital Resources

We use the net cash generated from our operations to fund expansion and modernization of our networks, service and repay external financing, pay dividends, invest in new businesses and spectrum and, when appropriate, buy back shares of our outstanding common stock. Our sources of funds, primarily from operations and, to the extent necessary, from external financing arrangements, are sufficient to meet ongoing operating and investing requirements over the next 12 months and beyond.

Our cash and cash equivalents balance is \$2.9 billion as of December 31, 2021, consistent with historical pre-pandemic levels. Our cash and cash equivalents are held both domestically and internationally, and are invested to maintain principal and provide liquidity. See "Market Risk" for additional information regarding our foreign currency risk management strategies.

We expect that our capital spending requirements will continue to be financed primarily through internally generated funds. Debt or equity financing may be needed to fund additional investments or development activities, such as the completion of business acquisitions, the acquisition of additional wireless spectrum, or to maintain an appropriate capital structure to ensure our financial flexibility. Our available external financing arrangements include an active commercial paper program, credit available under credit facilities and other bank lines of credit, vendor financing arrangements, issuances of registered debt or equity securities, U.S. retail medium-term notes and other capital market securities that are privately-placed or offered overseas. In addition, we monetize our device payment plan agreement receivables through asset-backed debt transactions.

Capital Expenditures

Our 2022 capital program includes capital to fund advanced networks and services, including expanding our core networks, adding capacity and density to our 5G network in order to stay ahead of our customers' increasing data demands and deploying C-Band, transforming our structure to deploy the Intelligent Edge Network while reducing the cost to deliver services to our customers, and pursuing other opportunities to drive operating efficiencies. We expect that the new network architecture will simplify operations by eliminating legacy network elements, improve our 4G LTE coverage, speed the deployment of 5G technology, and create new enterprise opportunities in the business market. We anticipate cash requirements for our 2022 capital program to be between \$16.5 billion and \$17.5 billion. Furthermore, we expect an additional \$5.0 billion to \$6.0 billion in capital expenditures related to C-Band, as we continue to build out the initial markets and begin preparations for deploying phase two spectrum.

Contractual Obligations and Commitments

We have various contractual obligations and commitments. The following represent our anticipated material cash requirements from known contractual and other obligations as of December 31, 2021:

- Long-term debt, including current maturities, commitments of \$150.2 billion and related interest payments of \$78.0 billion, of which \$7.1 billion and \$4.9 billion, respectively, are expected to be due within the next twelve months. Items included in long-term debt with variable coupon rates exclude unamortized debt issuance costs, and are described in Note 7 to the consolidated financial statements.
- Operating lease obligations of \$31.5 billion and Finance lease obligations of \$1.4 billion, of which \$4.4 billion and \$402 million, respectively, are expected to be due within the next twelve months. In addition, the Company has an obligation of \$969 million representing future minimum payments under the sublease arrangement for our cell towers, of which \$292 million is expected to be due within the next twelve months. See Note 6 to the consolidated financial statements for additional information.
- Unconditional purchase obligations, with terms in excess of one year, amount to \$29.8 billion, of which \$10.2 billion is expected to be due within the next twelve months. Items included in unconditional purchase obligations are primarily commitments to purchase network equipment, software and services, content, marketing services and other items which will be used or sold in the ordinary course of business. These amounts do not represent our entire anticipated purchases in the future, but represent only those items that are the subject of contractual obligations. We also purchase products and services as needed with no firm commitment. See Note 16 to the consolidated financial statements for additional information.
- Other long-term liabilities, including current maturities, of \$4.2 billion, of which \$864 million is expected to be due within the next twelve months. Other long-term liabilities represent estimated postretirement benefit and qualified pension plan contributions. Qualified pension plan contributions include estimated minimum funding contributions. We expect that there will be no required pension funding through 2031, subject to changes in market conditions. Postretirement benefit payments include estimated future postretirement benefit payments. These estimated amounts: (1) are subject to change based on changes to assumptions and future plan performance, which could impact the timing and/or amounts of these payments; and (2) exclude expectations beyond 5 years due to uncertainty of the timing and amounts. See Note 11 to the consolidated financial statements for additional information.
- We are not able to make a reasonable estimate of when the unrecognized tax benefits balance of \$3.1 billion and related interest and penalties will be settled with the respective taxing authorities until the related tax audits are further developed or resolved. See Note 12 to the consolidated financial statements for additional information.

	(dollars in millions)	
Years Ended December 31,	2021	2020
Cash flows provided by (used in)		
Operating activities	\$ 39,539	\$ 41,768
Investing activities	(67,153)	(23,512)
Financing activities	8,277	1,325
Increase (decrease) in cash, cash equivalents and restricted cash	\$ (19,337)	\$ 19,581

Cash Flows Provided By Operating Activities

Our primary source of funds continues to be cash generated from operations. Net cash provided by operating activities decreased by \$2.2 billion during 2021 compared to 2020, primarily due to changes in working capital, which includes higher wireless volumes, and slightly higher cash taxes in 2021. These decreases were partially offset by an increase in earnings of \$4.3 billion. As a result of prior years' discretionary contributions and the fact that actual asset returns have been higher than expected, we expect that there will be no required pension funding through 2031, subject to changes in market conditions.

Cash Flows Used In Investing Activities

Capital Expenditures

Capital expenditures continue to relate primarily to the use of capital resources to increase the operating efficiency and productivity of our networks, maintain our existing infrastructure, facilitate the introduction of new products and services and enhance responsiveness to competitive challenges.

[Table of Contents](#)

Capital expenditures, including capitalized software, were \$20.3 billion and \$18.2 billion for 2021 and 2020, respectively. Capital expenditures increased approximately \$2.1 billion, or 11.5%, during 2021 compared to 2020, primarily due to increased focus on 5G technology deployment.

Acquisitions of Wireless Licenses

In February 2021, the FCC completed an auction, Auction 107, for mid-band spectrum known as C-Band. During 2021, we paid approximately \$45.9 billion for spectrum licenses in connection with this auction and related costs, of which \$1.3 billion was primarily paid for certain obligations related to projected clearing costs associated with this auction.

During 2020, we paid approximately \$3.9 billion in acquisitions of wireless licenses. In March 2020, the FCC completed an incentive auction, Auction 103, for spectrum licenses. Through December 31, 2020, we paid approximately \$1.6 billion, including \$101 million paid in December 2019. In September 2020, the FCC completed Auction 105 for Priority Access Licenses. Through December 31, 2020, we paid approximately \$1.9 billion for the licenses.

During 2021 and 2020, we recorded capitalized interest related to wireless licenses of \$1.6 billion and \$242 million, respectively.

During 2021 and 2020, we entered into and completed various other wireless license acquisitions for cash consideration of \$95 million and \$360 million, respectively.

Acquisitions of Businesses, Net of Cash Acquired

During 2021 and 2020, we invested \$4.1 billion and \$520 million, respectively, in acquisitions of businesses, net of cash acquired.

In September 2020, we entered into a purchase agreement to acquire Tracfone, a provider of prepaid and value mobile services in the U.S. The transaction closed in November 2021. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$3.6 billion, net of cash acquired, subject to customary closing adjustments, approximately 57.6 million shares of Verizon common stock valued at approximately \$3.0 billion, and up to an additional \$650 million in future cash contingent consideration.

In October 2020, we entered into a definitive agreement to acquire certain assets of Bluegrass Cellular (Bluegrass), a rural wireless operator serving central Kentucky. The transaction closed in March 2021. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$412 million, net of cash acquired, which is subject to customary closing adjustments.

In April 2020, we entered into a definitive purchase agreement to acquire Blue Jeans Network, Inc. (BlueJeans), an enterprise-grade video conferencing and event platform, whose services are sold to Business customers globally. The transaction closed in May 2020. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$397 million, net of cash acquired.

During 2021 and 2020, we completed various other acquisitions for cash consideration of approximately \$51 million and \$127 million, respectively.

See "Acquisitions and Divestitures" for information on our acquisitions.

Disposition of Business

During 2021, we received cash proceeds in connection with the sale of Verizon Media of \$4.1 billion, net of cash transferred, subject to customary adjustments, \$750 million in non-convertible preferred limited partnership units of the Apollo Affiliate and 10% of the fully-diluted common limited partnership units of the Apollo Affiliate. See Note 3 to the consolidated financial statements for additional information.

Other, Net

During 2021, we received cash of \$321 million in connection with the settlement of a note receivable related to Tracfone and net cash proceeds of \$98 million in connection with the sale of our investment in the Complex Media business.

Cash Flows Provided by Financing Activities

We seek to maintain a mix of fixed and variable rate debt to lower borrowing costs within reasonable risk parameters and to protect against earnings and cash flow volatility resulting from changes in market conditions. During 2021 and 2020, net cash provided by financing activities was \$8.3 billion and \$1.3 billion, respectively.

2021

During 2021, our net cash provided by financing activities of \$8.3 billion was primarily driven by \$41.4 billion provided by proceeds from long-term borrowings, which included \$8.4 billion of proceeds from our asset-backed debt transactions. These cash flows provided by financing activities were partially offset by \$18.9 billion used for repayments, redemptions and repurchases of long-term borrowings (secured and unsecured) as well as finance lease obligations, \$10.4 billion used for dividend payments and \$3.8 billion used for other financing activities.

[Table of Contents](#)

Proceeds from and Repayments, Redemptions, and Repurchases of Long-Term Borrowings

At December 31, 2021, our total debt increased to \$150.9 billion as compared to \$129.1 billion at December 31, 2020. Our effective interest rate was 3.6% and 4.1% during the years ended December 31, 2021 and 2020, respectively. The substantial majority of our total debt portfolio consists of fixed rate indebtedness, therefore, changes in interest rates do not have a material effect on our interest payments. See also "Market Risk" and Note 7 to the consolidated financial statements for additional information.

At December 31, 2021, approximately \$33.5 billion, or 22.2%, of the aggregate principal amount of our total debt portfolio consisted of foreign denominated debt, primarily Euro and British Pound Sterling. We have entered into cross currency swaps on our foreign denominated debt in order to fix our future interest and principal payments in U.S. dollars and mitigate the impact of foreign currency transaction gains or losses. See "Market Risk" for additional information.

Verizon may acquire debt securities issued by Verizon and its affiliates through open market purchases, redemptions, privately negotiated transactions, tender offers, exchange offers, or otherwise, upon such terms and at such prices as Verizon may from time to time determine, for cash or other consideration.

Other, Net

Other, net financing activities during 2021 includes \$320 million in payments related to vendor financing arrangements, \$161 million in postings of derivative collateral and early debt redemption costs. See Note 15 to the consolidated financial statements for additional information on the early debt redemption costs.

Dividends

The Verizon Board of Directors assesses the level of our dividend payments on a periodic basis taking into account such factors as long-term growth opportunities, internal cash requirements and the expectations of our shareholders. During the third quarter of 2021, the Board increased our quarterly dividend payment by 2.0% to \$0.6400 from \$0.6275 per share from the previous quarter. This is the fifteenth consecutive year that Verizon's Board of Directors has approved a quarterly dividend increase.

As in prior periods, dividend payments were a significant use of capital resources. During 2021, we paid \$10.4 billion in dividends.

2020

During 2020, our net cash provided by financing activities of \$1.3 billion was primarily driven by \$31.5 billion provided by proceeds from long-term borrowings, which included \$5.6 billion of proceeds from our asset-backed debt transactions. These cash flows provided by financing activities were partially offset by \$17.2 billion used for repayments, redemptions and repurchases of long-term borrowings (secured and unsecured) as well as finance lease obligations, \$10.2 billion used for dividend payments and \$2.7 billion used for other financing activities.

Proceeds from and Repayments, Redemptions, and Repurchases of Long-Term Borrowings

At December 31, 2020, our total debt was \$129.1 billion, and during the year ended December 31, 2020, our effective interest rate was 4.1%. The substantial majority of our total debt portfolio consisted of fixed rate indebtedness, therefore, changes in interest rates did not have a material effect on our interest payments. See "Market Risk" and Note 7 to the consolidated financial statements for additional information.

At December 31, 2020, approximately \$29.0 billion, or 22.5%, of the aggregate principal amount of our total debt portfolio consisted of foreign denominated debt, primarily Euro and British Pound Sterling. We have entered into cross currency swaps on substantially all of our foreign denominated debt in order to fix our future interest and principal payments in U.S. dollars and mitigate the impact of foreign currency transaction gains or losses. See "Market Risk" for additional information.

Other, Net

Other, net financing activities during 2020 includes \$827 million in payments related to vendor financing arrangements and \$748 million in cash paid on debt exchanges. See Note 15 to the consolidated financial statements for additional information.

Dividends

During the third quarter of 2020, the Board increased our quarterly dividend payment by 2.0% to \$0.6275 per share.

As in prior periods, dividend payments were a significant use of capital resources. During 2020, we paid \$10.2 billion in dividends.

Asset-Backed Debt

As of December 31, 2021, the carrying value of our asset-backed debt was \$14.2 billion. Our asset-backed debt includes Asset-Backed Notes (ABS Notes) issued to third-party investors (Investors) and loans (ABS Financing Facilities) received from banks and their conduit facilities (collectively, the Banks). Our consolidated asset-backed debt bankruptcy remote legal entities (each, an ABS Entity or collectively, the ABS Entities) issue the debt or are otherwise party to the transaction documentation in connection with our asset-backed debt transactions. Under the terms of our asset-backed debt, Cellco Partnership (Cellco), a wholly-owned subsidiary of Verizon, and certain other affiliates of Verizon (collectively, the Originators) transfer device payment plan agreement receivables to one of the ABS Entities, which in turn transfers such

[Table of Contents](#)

receivables to another ABS Entity that issues the debt. Verizon entities retain the equity interests and residual interests, as applicable, in the ABS Entities, which represent the rights to all funds not needed to make required payments on the asset-backed debt and other related payments and expenses.

Our asset-backed debt is secured by the transferred device payment plan agreement receivables and future collections on such receivables. The device payment plan agreement receivables transferred to the ABS Entities and related assets, consisting primarily of restricted cash, will only be available for payment of asset-backed debt and expenses related thereto, payments to the Originators in respect of additional transfers of device payment plan agreement receivables, and other obligations arising from our asset-backed debt transactions, and will not be available to pay other obligations or claims of Verizon's creditors until the associated asset-backed debt and other obligations are satisfied. The Investors or Banks, as applicable, which hold our asset-backed debt have legal recourse to the assets securing the debt, but do not have any recourse to Verizon with respect to the payment of principal and interest on the debt. Under a parent support agreement, Verizon has agreed to guarantee certain of the payment obligations of Cellco and the Originators to the ABS Entities.

Cash collections on the device payment plan agreement receivables collateralizing our asset-backed debt securities are required at certain specified times to be placed into segregated accounts. Deposits to the segregated accounts are considered restricted cash and are included in Prepaid expenses and other and Other assets in our consolidated balance sheets.

Proceeds from our asset-backed debt transactions are reflected in Cash flows from financing activities in our consolidated statements of cash flows. The asset-backed debt issued and the assets securing this debt are included in our consolidated balance sheets.

See Note 7 to the consolidated financial statements for additional information.

In December 2021, we entered into an ABS financing facility with a number of financial institutions (2021 ABS Financing Facility). Two loan agreements were entered into in connection with the 2021 ABS Financing Facility in December 2021. Under the terms of the 2021 ABS Financing Facility, the financial institutions make advances under asset-backed loans backed by device payment plan agreement receivables of both Consumer customers and Business customers. Two loan agreements are outstanding in connection with the 2021 ABS Financing Facility, one with a final maturity date in December 2025 and the other in December 2026, and each loan agreement bears interest at floating rates. There is a one or two year revolving period, as set forth in the applicable loan agreement, which may be extended with the approval of the financial institutions. Under the loan agreements, we have the right to prepay all or a portion of the advances at any time without penalty, but in certain cases, with breakage costs. Subject to certain conditions, we may also remove receivables from the ABS Entity. In December 2021, we borrowed \$4.3 billion under the loan agreements. The aggregate outstanding balance under the 2021 ABS Financing Facility was \$4.3 billion as of December 31, 2021.

Long-Term Credit Facilities

		At December 31, 2021			
(dollars in millions)	Maturities	Facility Capacity	Unused Capacity	Principal Amount Outstanding	
Verizon revolving credit facility ⁽¹⁾	2024	\$ 9,500	\$ 9,418		N/A
Various export credit facilities ⁽²⁾	2024 - 2029	7,000	—	\$	4,676
Total		\$ 16,500	\$ 9,418	\$	4,676

N/A - not applicable

⁽¹⁾ The revolving credit facility does not require us to comply with financial covenants or maintain specified credit ratings, and it permits us to borrow even if our business has incurred a material adverse change. The revolving credit facility provides for the issuance of letters of credit.

⁽²⁾ During both 2021 and 2020, we drew down \$1.0 billion from these facilities, respectively. These credit facilities are used to finance equipment-related purchases. Borrowings under certain of these facilities amortize semi-annually in equal installments up to the applicable maturity dates. Maturities reflect maturity dates of principal amounts outstanding. Any amounts borrowed under these facilities and subsequently repaid cannot be reborrowed.

In November 2021, we repaid \$500 million under an export credit facility entered into in July 2017.

Common Stock

Common stock has been used from time to time to satisfy some of the funding requirements of employee and shareholder plans. During the years ended December 31, 2021 and 2020, we issued 2.1 million and 2.3 million common shares from treasury stock, respectively, which had an insignificant aggregate value.

In connection with our acquisition of Tracfone in November 2021, we issued approximately 57.6 million shares of Verizon common shares from treasury stock valued at approximately \$3.0 billion. See Note 3 to the consolidated financial statements for additional information.

In February 2020, the Verizon Board of Directors authorized a share buyback program to repurchase up to 100 million shares of Verizon's common stock. The program will terminate when the aggregate number of shares purchased reaches 100 million, or a new share repurchase plan superseding the current plan is authorized, whichever is sooner. The program permits Verizon to repurchase shares over time, with the

[Table of Contents](#)

amount and timing of repurchases depending on market conditions and corporate needs. There were no repurchases of common stock during 2021 and 2020 under our current or previously authorized share buyback program.

Credit Ratings

Verizon's credit ratings did not change in 2021 or 2020.

Securities ratings assigned by rating organizations are expressions of opinion and are not recommendations to buy, sell or hold securities. A securities rating is subject to revision or withdrawal at any time by the assigning rating organization. Each rating should be evaluated independently of any other rating.

Covenants

Our credit agreements contain covenants that are typical for large, investment grade companies. These covenants include requirements to pay interest and principal in a timely fashion, pay taxes, maintain insurance with responsible and reputable insurance companies, preserve our corporate existence, keep appropriate books and records of financial transactions, maintain our properties, provide financial and other reports to our lenders, limit pledging and disposition of assets and mergers and consolidations, and other similar covenants.

We and our consolidated subsidiaries are in compliance with all of our restrictive covenants in our debt agreements.

Change In Cash, Cash Equivalents and Restricted Cash

Our Cash and cash equivalents at December 31, 2021 totaled \$2.9 billion, a \$19.3 billion decrease compared to December 31, 2020, primarily as a result of the factors discussed above.

Restricted cash at December 31, 2021 totaled \$1.2 billion, an \$87 million decrease compared to restricted cash at December 31, 2020, primarily related to cash collections on the device payment plan agreement receivables that are required at certain specified times to be placed into segregated accounts.

Free Cash Flow

Free cash flow is a non-GAAP financial measure that reflects an additional way of viewing our liquidity that, we believe, when viewed with our GAAP results, provides management, investors and other users of our financial information with a more complete understanding of factors and trends affecting our cash flows. Free cash flow is calculated by subtracting capital expenditures (including capitalized software) from net cash provided by operating activities. We believe it is a more conservative measure of cash flow since purchases of fixed assets are necessary for ongoing operations. Free cash flow has limitations due to the fact that it does not represent the residual cash flow available for discretionary expenditures. For example, free cash flow does not incorporate payments made on finance lease obligations or cash payments for business acquisitions or wireless licenses. Therefore, we believe it is important to view free cash flow as a complement to our entire consolidated statements of cash flows.

The following table reconciles net cash provided by operating activities to free cash flow:

	(dollars in millions)	
Years Ended December 31,	2021	2020
Net cash provided by operating activities	\$ 39,539	\$ 41,768
Less Capital expenditures (including capitalized software)	20,286	18,192
Free cash flow	\$ 19,253	\$ 23,576

The decrease in free cash flow during 2021 is a reflection of the decrease in operating cash flows, as well as the increase in capital expenditures discussed above.

Employee Benefit Plans Funded Status and Contributions

Employer Contributions

We operate numerous qualified and nonqualified pension plans and other postretirement benefit plans. These plans primarily relate to our domestic business units. We made no discretionary contribution to our qualified pension plan in either 2021 or 2020. During 2021 and 2020 we made contributions of \$58 million and \$57 million to our nonqualified pension plans, respectively.

The Company's overall investment strategy is to achieve a mix of assets that allows us to meet projected benefit payments while taking into consideration risk and return. In an effort to reduce the risk of our portfolio strategy and better align assets with liabilities, we have adopted a liability driven pension strategy that seeks to better match the interest rate sensitivity of the liability hedging assets with the interest rate sensitivity of the liability. We expect that the strategy will reduce the likelihood that assets will decline at a time when liabilities increase (referred to as liability hedging), with the goal to reduce the risk of underfunding to the plan and its participants and beneficiaries; however, we also expect the strategy to result in lower asset returns. Nonqualified pension contributions are estimated to be approximately \$60 million in 2022.

[Table of Contents](#)

Contributions to our other postretirement benefit plans generally relate to payments for benefits on an as-incurred basis since these other postretirement benefit plans do not have funding requirements similar to the pension plans. We contributed \$885 million and \$709 million to our other postretirement benefit plans in 2021 and 2020, respectively. Contributions to our other postretirement benefit plans are estimated to be approximately \$860 million in 2022.

Leasing Arrangements

See Note 6 to the consolidated financial statements for additional information related to leasing arrangements.

Guarantees

We guarantee the debentures of our operating telephone company subsidiaries. See Note 7 to the consolidated financial statements for additional information.

In connection with the execution of agreements for the sale of businesses and investments, Verizon ordinarily provides representations and warranties to the purchasers pertaining to a variety of nonfinancial matters, such as ownership of the securities being sold, as well as financial losses. See Note 16 to the consolidated financial statements for additional information.

As of December 31, 2021, letters of credit totaling approximately \$674 million, which were executed in the normal course of business and support several financing arrangements and payment obligations to third parties, were outstanding. See Note 16 to the consolidated financial statements for additional information.

Other Future Obligations

During 2021, Verizon entered into seven renewable energy purchase agreements (REPAs) with third parties, in addition to 13 signed in previous years. See Note 16 to the consolidated financial statements for additional information. Under the REPAs, we plan to purchase up to an aggregate of approximately 2.6 gigawatts of capacity across multiple states, including Arizona, Illinois, Indiana, Iowa, Maryland, New York, North Carolina, Ohio, Pennsylvania, Texas and West Virginia.

Critical Accounting Estimates and Recently Issued Accounting Standards

Critical Accounting Estimates

A summary of the critical accounting estimates used in preparing our financial statements are as follows:

Wireless Licenses and Goodwill

Wireless licenses and Goodwill are a significant component of our consolidated assets. Both our wireless licenses and goodwill are treated as indefinite-lived intangible assets and, therefore are not amortized, but rather are tested for impairment annually in the fourth fiscal quarter, unless there are events requiring an earlier assessment or changes in circumstances during an interim period suggesting impairment indicators are present. We believe our estimates and assumptions are reasonable and represent appropriate marketplace considerations as of the valuation date. Although we use consistent methodologies in developing the assumptions and estimates underlying the fair value calculations used in our impairment tests, these estimates and assumptions are uncertain by nature, may change over time and can vary from actual results. It is possible that in the future there may be changes in our estimates and assumptions, including the timing and amount of future cash flows, margins, growth rates, market participant assumptions, comparable benchmark companies and related multiples and discount rates, which could result in different fair value estimates. Significant and adverse changes to any one or more of the above-noted estimates and assumptions could result in an impairment to our wireless licenses and goodwill impairment for one or more of our reporting units.

Wireless Licenses

The carrying value of our wireless licenses was approximately \$147.6 billion as of December 31, 2021. We aggregate our wireless licenses into one single unit of accounting, as we utilize our wireless licenses on an integrated basis as part of our nationwide wireless network. Our wireless licenses provide us with the exclusive right to utilize certain radio frequency spectrum to provide

wireless communication services. There are currently no legal, regulatory, contractual, competitive, economic or other factors that limit the useful life of our wireless licenses.

We test our wireless licenses for potential impairment annually or more frequently if impairment indicators are present. We have the option to first perform a qualitative assessment to determine whether it is necessary to perform a quantitative impairment test. However, we may elect to bypass the qualitative assessment in any period and proceed directly to performing the quantitative impairment test. It is our policy to perform quantitative impairment assessment at least every three years. During the fourth quarter of 2021, we performed a quantitative impairment assessment according to the policy.

Our quantitative impairment assessment consisted of comparing the estimated fair value of our aggregate wireless licenses to the aggregated carrying amount as of the test date. Under our quantitative assessment, we estimated the fair value of our wireless licenses using the Greenfield approach. The Greenfield approach is an income based valuation approach that values the wireless licenses by calculating the cash flow generating potential of a hypothetical start-up company that goes into business with no assets except the wireless licenses to be valued. A discounted cash flow analysis is used to estimate what a marketplace participant would be willing to pay to purchase the aggregated wireless licenses as of the valuation date. As a result, we were required to make significant estimates about future cash flows and profitability specifically associated with our wireless licenses, an appropriate discount rate based on the risk associated with those estimated cash flows

[Table of Contents](#)

and assumed terminal value and growth rates. We considered current and expected future economic conditions, current and expected availability of wireless network technology and infrastructure and related equipment and the costs thereof as well as other relevant factors in estimating future cash flows and profitability. The discount rate represented our estimate of the weighted-average cost of capital (WACC), or expected return, that a marketplace participant would have required as of the valuation date. We developed the discount rate based on our consideration of the cost of debt and equity of a group of guideline companies as of the valuation date. Accordingly, our discount rate incorporated our estimate of the expected return a marketplace participant would have required as of the valuation date, including the risk premium associated with the current and expected economic conditions as of the valuation date. The terminal value growth rate represented our estimate of the marketplace's long-term growth rate.

The quantitative impairment assessment we performed during the fourth quarter of 2021 indicated that the fair value of our wireless licenses is substantially in excess of their carrying value and, therefore, did not result in an impairment. In the event of a 10% decline in the fair value of our wireless licenses, the fair value would have still exceeded their carrying value. We do not believe reasonable changes in significant estimates would change the outcome to this quantitative assessment. For instance, if either the terminal value growth rate declined by 50 basis points (bps) or if the WACC increased by 50 bps, the fair value of wireless licenses would still exceed its carrying value.

During the fourth quarter of 2020, we performed a qualitative impairment assessment as our annual impairment test to determine whether it is more likely than not that the fair value of our wireless licenses was less than the carrying amount. As part of our assessment we considered several qualitative factors including the business enterprise value of our combined wireless business, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and EBITDA margin results, projections and recent merger and acquisition activity), the recent and projected financial performance of our combined wireless business as a whole, as well as other factors. Our annual impairment tests in 2020 indicated that it is more likely than not that the fair value of our wireless licenses remained above their carrying value and, therefore, did not result in an impairment.

Goodwill

To determine if goodwill is potentially impaired, we have the option to perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If we elect not to conduct the qualitative assessment or if indications of a potential impairment exist, the determination of whether an impairment has occurred requires the determination of the fair value of each reporting unit being assessed. It is our policy to perform quantitative impairment assessments at least every three years. During the fourth quarter of 2021, we performed quantitative impairment assessments for our Consumer and Business reporting units according to the policy.

Under the qualitative assessment, we consider several qualitative factors, including the business enterprise value of the reporting unit from the last quantitative test and the excess of fair value over carrying value from this test, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and EBITDA margin results, projections and recent merger and acquisition activity), the recent and projected financial performance of the reporting unit, as well as other factors.

Under our quantitative assessment, the fair value of the reporting unit is calculated using a market approach and a discounted cash flow method, as a form of the income approach. The market approach includes the use of comparative multiples to corroborate discounted cash flow results. The discounted cash flow method is based on the present value of two components-projected cash flows and a terminal value. The terminal value represents the expected normalized future cash flows of the reporting unit beyond the cash flows from the discrete projection period. The fair value of the reporting unit is calculated based on the sum of the present value of the cash flows from the discrete period and the present value of the terminal value. The discount rate represented our estimate of the weighted-average cost of capital (WACC), or expected return, that a marketplace participant would have required as of the valuation date. The application of our goodwill impairment test required key assumptions underlying our valuation model. The discounted cash flow analysis factored in assumptions on discount rates and terminal growth rates to reflect risk profiles of key strategic revenue and cost initiatives, as well as revenue and EBITDA growth relative to history and market trends and expectations. The market multiples approach incorporated significant judgment involved in the selection comparable public company multiples and benchmarks. The selection of companies was influenced by differences in growth and profitability, and

volatility in market prices of peer companies. These valuation inputs are inherently judgmental, and an adverse change in one or a combination of these inputs could trigger a goodwill impairment loss in the future.

A projected sustained decline in a reporting unit's revenues and earnings could have a significant negative impact on its fair value and may result in impairment charges. Such a decline could be driven by, among other things: (1) more than anticipated increase in promotional activity, decreases in sales volumes or long-term growth rate as a result of competitive pressures or other factors; or (2) the inability to achieve or delays in achieving the goals in strategic initiatives. Also, adverse changes to macroeconomic factors, such as increases to long-term interest rates, would also negatively impact the fair value of the reporting unit.

At December 31, 2021, the balance of our goodwill was approximately \$28.6 billion, of which \$21.0 billion was in our Consumer reporting unit and \$7.5 billion was in our Business reporting unit. At the goodwill impairment measurement date of October 31, 2021, our quantitative assessments indicate that the fair values for our Consumer and Business reporting units are substantially in excess of their carrying values and therefore did not result in an impairment. In the event of a 10% decline in the fair value of any of our reporting units, the fair value of each of our reporting units would have still exceeded their book values. We do not anticipate reasonable changes in significant estimates to change the outcomes to these quantitative impairment assessments. For instance, if either the terminal value growth rate declined by 50 bps, or if the WACC increased by 50 bps, the fair values of our reporting units would still exceed their respective carrying values.

At December 31, 2020, the balance of our goodwill was approximately \$24.8 billion, of which \$17.2 billion was in our Consumer reporting unit and \$7.5 billion was in our Business reporting unit. We performed qualitative impairment assessments for our Consumer and Business

[Table of Contents](#)

reporting units during the fourth quarter of 2020. Our qualitative assessments indicated that it was more likely than not that the fair values of our Consumer and Business reporting units exceeded their respective carrying values and, therefore, did not result in an impairment.

Pension and Other Postretirement Benefit Plans

We maintain benefit plans for most of our employees, including, for certain employees, pension and other postretirement benefit plans. Benefit plan assumptions, including the discount rate used, the long-term rate of return on plan assets, the determination of the substantive plan and health care trend rates are periodically updated and impact the amount of benefit plan income, expense, assets and obligations. Changes to one or more of these assumptions could significantly impact our accounting for pension and other postretirement benefits.

In determining pension and other postretirement obligations, the weighted-average discount rate was selected to approximate the composite interest rates available on a selection of high-quality bonds available in the market at December 31, 2021. The bonds selected had maturities that coincided with the time periods during which benefit payments are expected to occur, were non-callable and available in sufficient quantities to ensure marketability (at least \$300 million par outstanding). Bond yields are subject to uncertainty for a number of reasons including corporate performance, credit rating downgrades and upgrades, government fiscal policy decisions, and general market volatility. The expected long-term rates of return on plan assets used in determining the Company's pension and other postretirement obligations are based on expectations for future investment returns for the plans' asset allocation. The rates are subject to uncertainty for a number of reasons including corporate performance, credit ratings, monetary policy, inflation, exchange rates, investor behavior and general market volatility.

A sensitivity analysis of the impact of changes in the discount rate and the long-term rate of return on plan assets on the benefit obligations and expense (income) recorded, as well as on the funded status due to an increase or a decrease in the actual versus expected return on plan assets as of December 31, 2021 and for the year then ended pertaining to Verizon's pension and postretirement benefit plans, is provided in the table below.

(dollars in millions)	Percentage point change	Increase/(decrease) at December 31, 2021
Pension plans discount rate	+0.50 \$	(1,125)
	-0.50	1,249
Rate of return on pension plan assets	+1.00	(189)
	-1.00	189
Postretirement plans discount rate	+0.50	(810)
	-0.50	896
Rate of return on postretirement plan assets	+1.00	(5)
	-1.00	5

The annual measurement date for both our pension and other postretirement benefits is December 31. We use the full yield curve approach to estimate the interest cost component of net periodic benefit cost for pension and other postretirement benefits. The full yield curve approach refines our estimate of interest cost by applying the individual spot rates from a yield curve composed of the rates of return on several hundred high-quality fixed income corporate bonds available at the measurement date. These individual spot rates align with the timing of each future cash outflow for benefit payments and therefore provide a more precise estimate of interest cost.

See Note 11 to the consolidated financial statements for additional information.

Income Taxes

Our current and deferred income taxes and associated valuation allowances are impacted by events and transactions arising in the normal course of business as well as in connection with the adoption of new accounting standards, changes in tax laws and rates,

acquisitions and dispositions of businesses and non-recurring items. As a global commercial enterprise, our income tax rate and the classification of income taxes can be affected by many factors, including estimates of the timing and realization of deferred income tax assets and the timing and amount of income tax payments. We account for tax benefits taken or expected to be taken in our tax returns in accordance with the accounting standard relating to the uncertainty in income taxes, which requires the use of a two-step approach for recognizing and measuring tax benefits taken or expected to be taken in a tax return. We review and adjust our liability for unrecognized tax benefits based on our best judgment given the facts, circumstances and information available at each reporting date. To the extent that the final outcome of these tax positions is different than the amounts recorded, such differences may impact income tax expense and actual tax payments. We recognize any interest and penalties accrued related to unrecognized tax benefits in income tax expense. Actual tax payments may materially differ from estimated liabilities as a result of changes in tax laws as well as unanticipated transactions impacting related income tax balances. See Note 12 to the consolidated financial statements for additional information.

Property, Plant and Equipment

Our Property, plant and equipment balance represents a significant component of our consolidated assets. We record Property, plant and equipment at cost. We depreciate Property, plant and equipment on a straight-line basis over the estimated useful life of the assets. The estimated useful life is subject to change due to a variety of factors such as change in asset capacity or performance, technical obsolescence, market expectations and competition impacts. In connection with our ongoing review of the estimated useful lives of property, plant and equipment during 2021, we determined that the estimated useful life of our Property, plant and equipment would remain unchanged. We expect that a one year increase in estimated useful lives of our Property, plant and equipment would result in a decrease to our 2021 depreciation expense of \$2.2 billion and that a one year decrease would result in an increase of approximately \$3.5 billion in our 2021 depreciation expense.

Accounts Receivable

Prior to January 1, 2020, accounts receivable were recorded at cost less an allowance for doubtful accounts. The gross amount of accounts receivable and corresponding allowance for doubtful accounts were presented separately in the consolidated balance sheets. We maintained allowances for uncollectible accounts receivable, including our direct-channel device payment plan agreement receivables, for estimated losses resulting from the failure or inability of our customers to make required payments. Indirect-channel device payment receivables are considered financial instruments and were initially recorded at fair value net of imputed interest, and credit losses were recorded as incurred. However, receivable balances were assessed quarterly for impairment and an allowance was recorded if the receivable was considered impaired. Subsequent to January 1, 2020, accounts receivable are recorded at amortized cost less an allowance for credit losses that are not expected to be recovered. The gross amount of accounts receivable and corresponding allowance for credit losses are presented separately in the consolidated balance sheets. We maintain allowances for credit losses resulting from the expected failure or inability of our customers to make required payments. We recognize the allowance for credit losses at inception and reassess quarterly based on management's expectation of the asset's collectability. The allowance is based on multiple factors including historical experience with bad debts, the credit quality of the customer base, the aging of such receivables and current macroeconomic conditions, such as the COVID-19 pandemic, as well as management's expectations of conditions in the future, if applicable. The impact of these factors on the allowance involves significant level of estimation and is subject to uncertainty. Our allowance for credit losses is based on management's assessment of the collectability of assets pooled together with similar risk characteristics.

We record an allowance to reduce the receivables to the amount that is expected to be collectible. For device payment plan agreement receivables, we record bad debt expense based on a default and loss calculation using our proprietary loss model. The expected loss rate is determined based on customer credit scores and other qualitative factors as noted above. The loss rate is assigned individually on a customer by customer basis and the custom credit scores are then aggregated by vintage and used in our proprietary loss model to calculate the weighted-average loss rate used for determining the allowance balance. The weighted-average expected loss rate decreased 0.81% at December 31, 2021 as compared to at December 31, 2020. We expect that an increase or decrease of 0.25% in the weighted-average loss rate would result in a change of \$94 million in the allowance.

We monitor the collectability of our wireless service receivables as one overall pool. Wireline service receivables are disaggregated and pooled by the following customer groups: consumer, small and medium business, global enterprise, public sector and wholesale. For wireless service receivables and wireline consumer and small and medium business receivables, the allowance is calculated based on a 12 month rolling average write-off balance multiplied by the average life-cycle of an account from billing to write-off. The risk of loss is assessed over the contractual life of the receivables and we adjust the historical loss amounts for current and future conditions based on management's qualitative considerations. For global enterprise, public sector and wholesale wireline receivables, the allowance for credit losses is based on historical write-off experience and individual customer credit risk, if applicable. We consider multiple factors in determining the allowance as discussed above.

If there is a deterioration of our customers' financial condition or if future actual default rates on receivables in general differ from those currently anticipated, we may have to adjust our allowance for credit losses, which would affect earnings in the period the adjustments are made. See Note 8 to the consolidated financial statements for additional information.

Acquisitions and Divestitures

Spectrum License Transactions

From time to time, we enter into agreements to buy, sell or exchange spectrum licenses. We believe these spectrum license transactions have allowed us to continue to enhance the reliability of our wireless network while also resulting in a more efficient use of spectrum.

In March 2020, the FCC's incentive auction, Auction 103, for spectrum licenses in the upper 37 GHz, 39 GHz, and 47 GHz bands concluded. Verizon participated in this incentive auction and was the high bidder on 4,940 licenses, which primarily consisted of 37 GHz and, to a lesser extent, 39 GHz spectrum. As an incumbent licensee, our 39 GHz licenses provided us with incentive

payments that were applied towards the purchase price of spectrum in the auction. The value of the licenses won by Verizon amounted to \$3.4 billion, of which \$1.8 billion was settled with the relinquished 39 GHz licenses. The new reconfigured licenses were received in the second quarter 2020 and are included in Wireless licenses in our consolidated balance sheets.

In September 2020, the FCC completed Auction 105 for Priority Access Licenses. Verizon participated in the auction and was the high bidder on 557 licenses in the 3.5 GHz band valued at approximately \$1.9 billion. Verizon made payments for these licenses in 2020 and received them from the FCC in March 2021. The purchase cost for these licenses and related capitalized interest, based on qualifying activities that occurred, are included in Wireless licenses in our consolidated balance sheets.

In February 2021, the FCC concluded Auction 107 for C-Band wireless spectrum. Verizon was the winning bidder on 3,511 licenses, consisting of contiguous C-Band spectrum bands ranging between 140 and 200 megahertz of C-Band spectrum in all 406 markets available in the auction. Verizon paid \$45.5 billion for the licenses it won, of which \$44.6 billion was paid in the first quarter of 2021. In accordance with the rules applicable to the auction, Verizon is required to make additional payments to acquire the licenses. The payments are for our allocable share of clearing costs incurred by, and incentive payments due to, the incumbent license holders associated with the auction, which are estimated to be \$7.7 billion. During 2021, we made payments of \$1.3 billion primarily related to certain obligations for projected clearing costs. In January 2022, we made additional payments of \$1.4 billion for obligations related to accelerated clearing incentives. We expect to continue to make payments related to clearing cost and incentive payment obligations through 2024. These payments are dependent on the

[Table of Contents](#)

incumbent license holders accelerated clearing of the spectrum for Verizon's use and, therefore, the final timing and amounts could differ based on the incumbent holders' execution of their clearing process. In accordance with the FCC order, the clearing must be completed by December 2025. The carrying value of the wireless spectrum won in Auction 107 will consist of all payments required to participate and purchase licenses in the auction, including Verizon's allocable share of clearing costs incurred by, and incentive payments due to, the incumbent license holders associated with the auction that we are obligated to pay in order to acquire the licenses. Carrying value will also include capitalized interest to the extent qualifying activities have occurred. The licenses were received from the FCC in July 2021 and are included within Wireless licenses in our consolidated balance sheet.

See Note 3 to the consolidated financial statements for additional information regarding our spectrum license transactions.

TracFone Wireless, Inc.

In September 2020, we entered into a purchase agreement (Tracfone Purchase Agreement) with América Móvil to acquire TracFone Wireless, Inc. (Tracfone), a leading provider of prepaid and value mobile services in the U.S. The transaction closed on November 23, 2021 (the Acquisition Date). In accordance with the terms of the Tracfone Purchase Agreement, Verizon acquired all of Tracfone's outstanding stock in exchange for approximately \$3.5 billion in cash, net of cash acquired and working capital and other adjustments, subject to customary adjustments, 57,596,544 shares of Verizon common stock valued at approximately \$3.0 billion, and up to an additional \$650 million in future cash contingent consideration related to the achievement of certain performance measures and other commercial arrangements. The fair value of the Verizon common stock was determined on the basis of its closing market price on the Acquisition Date. The estimated fair value of the contingent consideration as of the Acquisition Date was approximately \$542 million calculated using a probability-weighted discounted cash flow model and significant unobservable inputs, thus representing a Level 3 measurement. The contingent consideration payable is based on the achievement of certain revenue and operational targets, measured over a two-year earn out period, as defined in the Tracfone Purchase Agreement. Payments related to the contingent consideration are expected to begin in 2022 and continue through 2024. See Note 3 to the consolidated financial statements for additional information.

Bluegrass Cellular

In October 2020, we entered into a definitive agreement to acquire certain assets of Bluegrass, a rural wireless operator serving central Kentucky. Bluegrass provides wireless service to 210,000 customers in 34 counties in rural service areas 3, 4, and 5 in Central Kentucky. The transaction closed in March 2021. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$412 million, net of cash acquired, which is subject to customary closing adjustments. See Note 3 to the consolidated financial statements for additional information.

Blue Jeans Network, Inc.

In April 2020, we entered into a definitive purchase agreement to acquire BlueJeans, an enterprise-grade video conferencing and event platform, whose services are sold to Business customers globally. The transaction closed in May 2020. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$397 million, net of cash acquired.

Verizon Media Divestiture

On May 2, 2021, Verizon entered into a definitive agreement with an affiliate of Apollo Global Management Inc. (the Apollo Affiliate) pursuant to which we agreed to sell Verizon Media in return for consideration of \$4.3 billion in cash, subject to customary adjustments, \$750 million in non-convertible preferred limited partnership units of the Apollo Affiliate, and 10% of the fully-diluted common limited partnership units of the Apollo Affiliate.

On September 1, 2021, we completed the sale of Verizon Media. As of the close of the transaction, cash proceeds, the fair value of the non-convertible preferred limited partnership units of the Apollo Affiliate, and the fair value of 10% of the fully-diluted common limited partnership units of the Apollo Affiliate were \$4.3 billion, \$496 million, and \$124 million, respectively. We recorded a pre-tax gain on sale of approximately \$1.0 billion (after-tax \$1.0 billion) in Selling general and administrative expense in our consolidated statement of income for the year ended December 31, 2021. In addition, we incurred \$346 million of various costs associated with this disposition which are primarily recorded in Selling general and administrative expense in our

consolidated statement of income for the year ended December 31, 2021. See Note 3 to the consolidated financial statements for additional information.

Other

From time to time, we enter into strategic agreements to acquire various other businesses and investments. See Note 3 to the consolidated financial statements for additional information.

In December 2021, we completed the sale of our investment in the Complex Media business. In connection with this transaction, we recorded a pre-tax gain of \$131 million in Equity in earnings (losses) of unconsolidated businesses in our consolidated statement of income for the year ended December 31, 2021.

In November 2020, Verizon entered into an agreement to sell our Huffington Post business. In connection with this transaction, we recorded a pre-tax loss of \$126 million in Selling, general and administrative expense in our consolidated statement of income for the year ended December 31, 2020. The transaction closed in February 2021.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to various types of market risk in the normal course of business, including the impact of interest rate changes, foreign currency exchange rate fluctuations, changes in investment, equity and commodity prices and changes in corporate tax rates. We employ risk management strategies, which may include the use of a variety of derivatives including cross currency swaps, forward starting interest rate swaps, interest rate swaps, interest rate caps, treasury rate locks and foreign exchange forwards. We do not hold derivatives for trading purposes.

It is our general policy to enter into interest rate, foreign currency and other derivative transactions only to the extent necessary to achieve our desired objectives in optimizing exposure to various market risks. Our objectives include maintaining a mix of fixed and variable rate debt to lower borrowing costs within reasonable risk parameters and to protect against earnings and cash flow volatility resulting from changes in market conditions. We do not hedge our market risk exposure in a manner that would completely eliminate the effect of changes in interest rates and foreign exchange rates on our earnings.

Counterparties to our derivative contracts are major financial institutions with whom we have negotiated derivatives agreements (ISDA master agreements) and credit support annex (CSA) agreements which provide rules for collateral exchange. The CSA agreements contain rating based thresholds such that we or our counterparties may be required to hold or post collateral based upon changes in outstanding positions as compared to established thresholds and changes in credit ratings. We do not offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments recognized at fair value. At December 31, 2021, we held and posted \$0.1 billion and an insignificant amount, respectively, of collateral related to derivative contracts under collateral exchange agreements, which were recorded as Other current liabilities and Prepaid expenses and other, respectively, in our consolidated balance sheet. At December 31, 2020, we held \$0.2 billion of collateral related to derivative contracts under collateral exchange arrangements, which were recorded as Other current liabilities in our consolidated balance sheet. While we may be exposed to credit losses due to the nonperformance of our counterparties, we consider the risk remote and do not expect that any such nonperformance would result in a significant effect on our results of operations or financial condition due to our diversified pool of counterparties. See Note 9 to the consolidated financial statements for additional information regarding the derivative portfolio.

Interest Rate Risk

We are exposed to changes in interest rates, primarily on our short-term debt and the portion of long-term debt that carries floating interest rates. As of December 31, 2021, approximately 81% of the aggregate principal amount of our total debt portfolio consisted of fixed-rate indebtedness, including the effect of interest rate swap agreements designated as hedges. The impact of a 100-basis-point change in interest rates affecting our floating rate debt would result in a change in annual interest expense, including our interest rate swap agreements that are designated as hedges, of approximately \$288 million. The interest rates on our existing long-term debt obligations are unaffected by changes to our credit ratings.

Certain of our floating rate debt and certain of our interest rate derivative transactions utilize interest rates that are linked to the London Inter-Bank Offered Rate (LIBOR) as the benchmark rate. LIBOR is the subject of recent U.S. and international regulatory guidance for reform. The one-week and two-month U.S. dollar LIBOR rates ceased publication after December 31, 2021, and other U.S. dollar LIBOR rates will cease publication after June 30, 2023. The consequences of these developments cannot be entirely predicted but could include an increase in the cost of our floating rate debt or exposure under our interest rate derivative transactions. We do not anticipate a significant impact to our financial position given our current mix of variable and fixed-rate debt, taking into account the impact of our interest rate hedging. The floating rate senior unsecured notes issued in March 2021 and certain of our interest rate derivative transactions utilize interest rates that are linked to the Secured Overnight Financing Rate as the benchmark rate.

The table that follows summarizes the fair values of our long-term debt, including current maturities, and interest rate swap derivatives as of December 31, 2021 and 2020. The table also provides a sensitivity analysis of the estimated fair values of these financial instruments assuming 100-basis-point upward and downward shifts in the yield curve. Our sensitivity analysis does not

include the fair values of our commercial paper and bank loans, if any, because they are not significantly affected by changes in market interest rates.

(dollars in millions)			
Long-term debt and related derivatives	Fair Value	Fair Value assuming	
		+ 100 basis point shift	- 100 basis point shift
At December 31, 2021	\$ 169,179	\$ 156,078	\$ 184,496
At December 31, 2020	155,695	142,420	170,423

Interest Rate Swaps

We enter into interest rate swaps to achieve a targeted mix of fixed and variable rate debt. We principally receive fixed rates and pay variable rates, resulting in a net increase or decrease to Interest expense. These swaps are designated as fair value hedges and hedge against interest rate risk exposure of designated debt issuances. At December 31, 2021, the fair value of the asset and liability of these contracts was \$473 million and \$666 million, respectively. At December 31, 2020, the fair value of the asset and liability of these contracts was \$787 million and \$303 million, respectively. At December 31, 2021 and 2020, the total notional amount of the interest rate swaps was \$19.8 billion and \$17.8 billion, respectively.

Forward Starting Interest Rate Swaps

We have entered into forward starting interest rate swaps designated as cash flow hedges in order to manage our exposure to interest rate changes on future forecasted transactions. At December 31, 2021 and 2020, the fair value of the liability of these contracts was \$302 million and \$797 million, respectively. At December 31, 2021 and 2020, the total notional amount of the forward starting interest rate swaps was \$1.0 billion and \$2.0 billion, respectively.

Treasury Rate Locks

We enter into treasury rate locks to mitigate our interest rate risk. We recognize gains and losses resulting from interest rate movements in Other comprehensive income (loss). There was no outstanding notional amount for treasury rate locks at December 31, 2021 or 2020.

Foreign Currency Translation

The functional currency for our foreign operations is primarily the local currency. The translation of income statement and balance sheet amounts of our foreign operations into U.S. dollars is recorded as cumulative translation adjustments, which are included in Accumulated other comprehensive loss in our consolidated balance sheets. Gains and losses on foreign currency transactions are recorded in the consolidated statements of income in Other income (expense), net. At December 31, 2021, our primary translation exposure was to the British Pound Sterling, Euro, Australian Dollar, and Japanese Yen.

Cross Currency Swaps

We have entered into cross currency swaps designated as cash flow hedges to exchange our British Pound Sterling, Euro, Swiss Franc, Canadian Dollar and Australian Dollar-denominated cash flows into U.S. dollars and to fix our cash payments in U.S. dollars, as well as to mitigate the impact of foreign currency transaction gains or losses. The fair value of the asset of these contracts was \$589 million and \$1.4 billion at December 31, 2021 and 2020, respectively. At December 31, 2021 and 2020, the fair value of the liability of these contracts was \$1.6 billion and \$196 million, respectively. At December 31, 2021 and 2020, the total notional amount of the cross currency swaps was \$32.5 billion and \$26.3 billion, respectively.

Foreign Exchange Forwards

We also have foreign exchange forwards which we use as an economic hedge but for which we have elected not to apply hedge accounting. We enter into British Pound Sterling and Euro foreign exchange forwards to mitigate our foreign exchange rate risk related to non-functional currency denominated monetary assets and liabilities of international subsidiaries. At December 31, 2021, the fair value of the asset of these contracts was insignificant and there is no amount related to the liability of these contracts. At December 31, 2020, the fair value of the asset and liability of these contracts was insignificant. At December 31, 2021 and 2020, the total notional amount of the foreign exchange forwards was \$932 million and \$1.4 billion, respectively.

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Verizon Communications Inc.:

Opinion on Internal Control Over Financial Reporting

We have audited Verizon Communications Inc. and subsidiaries' (Verizon) internal control over financial reporting as of December 31, 2021, based on criteria established in Internal Control–Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Verizon maintained, in all material respects, effective internal control over financial reporting as of December 31, 2021, based on the COSO criteria.

As indicated in the accompanying Management's Annual Report on Internal Control over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of TracFone Wireless, Inc. (TracFone), which is included in the 2021 consolidated financial statements of Verizon and constituted approximately 3% of total assets, as of December 31, 2021 and less than 1% of revenues for the year then ended. Our audit of internal control over financial reporting of the Company also did not include an evaluation of the internal control over financial reporting of TracFone.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of Verizon as of December 31, 2021 and 2020, the related consolidated statements of income, comprehensive income, cash flows, and changes in equity for each of the three years in the period ended December 31, 2021, and the related notes and financial statement schedule listed in the Index at Item 15(a) and our report dated February 11, 2022 expressed an unqualified opinion thereon.

Basis for Opinion

Verizon's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on Verizon's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to Verizon in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

February 11, 2022

Reporting of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Verizon Communications Inc.:

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Verizon Communications Inc. and subsidiaries (Verizon) as of December 31, 2021 and 2020, the related consolidated statements of income, comprehensive income, cash flows, and changes in equity for each of the three years in the period ended December 31, 2021, and the related notes and the financial statement schedule listed in the Index at Item 15(a) (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Verizon at December 31, 2021 and 2020, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2021, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), Verizon's internal control over financial reporting as of December 31, 2021, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 11, 2022 expressed an unqualified opinion thereon.

Basis for Opinion

These financial statements are the responsibility of Verizon's management. Our responsibility is to express an opinion on Verizon's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to Verizon in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

[Table of Contents](#)

Description of the Matter

Valuation of Emp

The Company's sponsored pension and other employee benefit plans had an aggregate liability of \$20.2 billion and \$20.1 billion, respectively, at December 31, 2013. The pension obligation for the other postretirement benefit plans was \$14.7 billion. As of December 31, 2013, the Company's financial statements were required to measure employee benefit obligations at the fourth quarter and the actual return on plan assets.

Auditing the employee benefit obligations is the highly judgmental area of the audit. The discount rate, health care cost trends and mortality rates are key assumptions. These assumptions are used to value the benefit obligation.

How We Addressed the Matter in Our Audit

We obtained an understanding of the operating effectiveness of the controls over management's calculation of the obligation and the data inputs provided to the actuaries.

To test the employee benefit obligations, we included, among other things, significant actuarial assumptions underlying data used in the actuarial assumptions. We evaluated current economic conditions, employee benefit plan terms, and the impact of service cost, interest on debt, payments, contributions, and other factors. We involved an actuary to evaluate management's methodology that reflects the market value of the obligation and is used to measure the obligation. We performed this assessment of the prior year project and the amount paid to the prior year project. We evaluated health care cost trends, mortality rates, and other factors. We evaluated the information was consistent with the actual data and whether any adjustments were necessary. We evaluated the accuracy of the information provided to management.

Notes to Consolidated Financial Statements

Verizon Communications Inc. and Subsidiaries

Note 1. Description of Business and Summary of Significant Accounting Policies

Description of Business

Verizon Communications Inc. (Verizon or the Company) is a holding company that, acting through its subsidiaries, is one of the world's leading providers of communications, technology, information and entertainment products and services to consumers, businesses and government entities. With a presence around the world, we offer data, video and voice services and solutions on our networks and platforms that are designed to meet customers' demand for mobility, reliable network connectivity, security and control.

We have two reportable segments that we operate and manage as strategic business units - Verizon Consumer Group (Consumer) and Verizon Business Group (Business).

Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the United States (U.S.) under the Verizon brand and through wholesale and other arrangements. We also provide fixed wireless access (FWA) broadband through our wireless networks. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios. Our Consumer segment's wireless and wireline products and services are available to our retail customers, as well as resellers that purchase wireless network access from us on a wholesale basis.

Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various Internet of Things (IoT) services and products. We also provide FWA broadband through our wireless networks. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world.

Consolidation

The method of accounting applied to investments, whether consolidated or equity, involves an evaluation of all significant terms of the investments that explicitly grant or suggest evidence of control or influence over the operations of the investee. The consolidated financial statements include our controlled subsidiaries, as well as variable interest entities (VIE) where we are deemed to be the primary beneficiary. For controlled subsidiaries that are not wholly-owned, the noncontrolling interests are included in Net income and Total equity. Investments in businesses that we do not control, but have the ability to exercise significant influence over operating and financial policies, are accounted for using the equity method. Equity method investments are included in Investments in unconsolidated businesses in our consolidated balance sheets. All significant intercompany accounts and transactions have been eliminated.

Basis of Presentation

We have reclassified certain prior year amounts to conform to the current year presentation.

Use of Estimates

We prepare our financial statements using U.S. generally accepted accounting principles (GAAP), which requires management to make estimates and assumptions that affect reported amounts and disclosures. These estimates and assumptions take into account historical and forward-looking factors that the Company believes are reasonable, including but not limited to the potential impacts arising from COVID-19 pandemic and public and private sector policies and initiatives aimed at reducing its transmission. As the

extent and duration of the impacts from COVID-19 remain unclear, the Company's estimates and assumptions may evolve as conditions change. Actual results could differ significantly from those estimates.

Examples of significant estimates include the allowance for credit losses, the recoverability of intangible assets, property, plant and equipment, and other long-lived assets, the incremental borrowing rate for the lease liability, fair value measurements, including those related to financial instruments, goodwill, spectrum licenses and intangible assets, unrecognized tax benefits, valuation allowances on tax assets, pension and postretirement benefit obligations, contingencies and the identification and valuation of assets acquired and liabilities assumed in connection with business combinations.

Revenue Recognition

We earn revenue from contracts with customers, primarily through the provision of telecommunications and other services and through the sale of wireless equipment. These services include a variety of communication and connectivity services for our Consumer and Business customers including other carriers that use our facilities to provide services to their customers, as well as professional and integrated managed services for our large enterprises and government customers. We account for these revenues under Accounting Standards Update (ASU) 2014-09, "Revenue from Contracts with Customers" (Topic 606).

[Table of Contents](#)

We also earn revenues that are not accounted for under Topic 606 from leasing arrangements (such as those for towers and equipment), captive reinsurance arrangements primarily related to wireless device insurance and the interest on equipment financed under a device payment plan agreement when sold to the customer by an authorized agent.

Nature of Products and Services

Telecommunications

Service

We offer wireless services through a variety of plans on a postpaid or prepaid basis. For wireless service, we recognize revenue using an output method, either as the service allowance units are used or as time elapses, because it reflects the pattern by which we satisfy our performance obligation through the transfer of service to the customer. Monthly service is generally billed in advance, which results in a contract liability. See Note 2 for additional information. For postpaid plans, where monthly usage exceeds the allowance, the overage usage represents options held by the customer for incremental services and the usage-based fee is recognized when the customer exercises the option (typically on a month-to-month basis).

For our contracts related to wireline communication and connectivity services, in general, fixed monthly fees for service are billed one month in advance, which results in a contract liability, and service revenue is recognized over the enforceable contract term as the service is rendered, as the customer simultaneously receives and consumes the benefits of the services through network access and usage. While substantially all of our wireline service revenue contracts are the result of providing access to our networks, revenue from services that are not fixed in amount and, instead, are based on usage are generally billed in arrears and recognized as the usage occurs.

Equipment

We sell wireless devices and accessories under the Verizon brand and other brands. Equipment revenue is generally recognized when the products are delivered to and accepted by the customer, as this is when control passes to the customer. In addition to offering the sale of equipment on a standalone basis, we have two primary offerings through which customers pay for a wireless device, in connection with a service contract: fixed-term plans and device payment plans.

Under a fixed-term plan, the customer is sold the wireless device without any upfront charge or at a discounted price in exchange for entering into a fixed-term service contract (typically for a term of 24 months or less).

Under a device payment plan, the customer is sold the wireless device in exchange for a non-interest-bearing installment note, which is repaid by the customer, typically over a 24 or 30-month term, and concurrently enters into a month-to-month contract for wireless service. We may offer certain promotions that provide billing credits applied over a specified term, contingent upon the customer maintaining service. The credits are included in the transaction price, which are allocated to the performance obligations based on their relative selling price and are recognized when earned.

A financing component exists in both our fixed-term plans and device payment plans because the timing of the payment for the device, which occurs over the contract term, differs from the satisfaction of the performance obligation, which occurs at contract inception upon transfer of the device to the customer. We periodically assess, at the contract level, the significance of the financing component inherent in our fixed-term and device payment plan receivable based on qualitative and quantitative considerations related to our customer classes. These considerations include assessing the commercial objective of our plans, the term and duration of financing provided, interest rates prevailing in the marketplace, and credit risks of our customer classes, all of which impact our selection of appropriate discount rates. Based on current facts and circumstances, we determined that the financing component in our existing wireless device payments and fixed-term contracts sold through the direct channel is not significant and therefore is not accounted for separately. See Note 8 for additional information on the interest on equipment financed on a device payment plan agreement when sold to the customer by an authorized agent in our indirect channel.

Wireless Contracts

For our wireless contracts, total contract revenue, which represents the transaction price for wireless service and wireless equipment, is allocated between service and equipment revenue based on their estimated standalone selling prices. We estimate the standalone selling price of the device or accessory to be its retail price excluding subsidies or conditional purchase discounts. We estimate the standalone selling price of wireless service to be the price that we offer to customers on month-to-month contracts that can be cancelled at any time without penalty (i.e., when there is no fixed-term for service) or when service is procured without the concurrent purchase of a wireless device. In addition, we also assess whether the service term is impacted by certain legally enforceable rights and obligations in our contract with customers, such as penalties that a customer would have to pay to early terminate a fixed-term contract or billing credits that would cease if the month-to-month wireless service is canceled. The assessment of these legally enforceable rights and obligations involves judgment and impacts our determination of the transaction price and related disclosures.

From time to time, we may offer certain promotions that provide our customers on device payment plans with the right to upgrade to a new device after paying a specified portion of their device payment plan agreement amount and trading in their device in good working order. We account for this trade-in right as a guarantee obligation. The full amount of the trade-in right's fair value is recognized as a guarantee liability and results in a reduction to the revenue recognized upon the sale of the device. The guarantee liability was \$77 million and insignificant at December 31, 2021 and 2020, respectively. The total transaction price is reduced by the guarantee, which is accounted for outside the scope of Topic 606, and the remaining transaction price is allocated between the performance obligations within the contract.

[Table of Contents](#)

Our fixed-term plans generally include the sale of a wireless device at subsidized prices. This results in the creation of a contract asset at the time of sale, which represents the recognition of equipment revenue in excess of amounts billed.

For our device payment plans, billing credits are accounted for as consideration payable to a customer and are included in the determination of total transaction price, resulting in a contract liability.

We may provide a right of return on our products and services for a short time period after a sale. These rights are accounted for as variable consideration when determining the transaction price, and accordingly we recognize revenue based on the estimated amount to which we expect to be entitled after considering expected returns. Returns and credits are estimated at contract inception and updated at the end of each reporting period as additional information becomes available. We also may provide credits or incentives on our products and services for contracts with resellers, which are accounted for as variable consideration when estimating the amount of revenue to recognize.

Wireline Contracts

Total consideration for wireline services that are bundled in a single contract is allocated to each performance obligation based on our standalone selling price for each service. While many contracts include one or more service performance obligations, the revenue recognition pattern is generally not impacted by the allocation since the services are generally satisfied over the same period of time. We estimate the standalone selling price to be the price of the services when sold on a standalone basis without any promotional discount. In addition, we also assess whether the service term is impacted by certain legally enforceable rights and obligations in our contract with customers such as penalties that a customer would have to pay to early terminate a fixed-term contract. The assessment of these legally enforceable rights and obligations involves judgment and impacts our determination of transaction price and related disclosures.

We may provide performance-based credits or incentives on our products and services for contracts with our Business customers, which are accounted for as variable consideration when estimating the transaction price. Credits are estimated at contract inception and are updated at the end of each reporting period as additional information becomes available.

Wireless and Wireline Contracts

For offers that include third-party providers, we evaluate whether we are acting as the principal or as the agent with respect to the goods or services provided to the customer. This principal-versus-agent assessment involves judgment and focuses on whether the facts and circumstances of the arrangement indicate that the goods or services were controlled by us prior to transferring them to the customer. To evaluate if we have control, we consider various factors including whether we are primarily responsible for fulfillment, bear risk of loss and have discretion over pricing.

Other

Advertising revenues are generated through display advertising and search advertising. Display advertising revenue is generated by the display of graphical advertisements and other performance-based advertising. Search advertising revenue is generated when a consumer clicks on a text-based advertisement on the search results page. The divested Verizon Media Group (Verizon Media), primarily earned revenue through display advertising on Verizon Media properties, as well as on third-party properties through our advertising platforms, search advertising, and subscription arrangements. Revenue for display and search advertising contracts is recognized as ads are delivered, while subscription contracts are recognized over time. We are generally the principal in transactions carried out through our advertising platforms, and therefore report gross revenue based on the amount billed to our customers. The control and transfer of digital advertising inventory occurs in a rapid, real-time environment, where our proprietary technology enables us to identify, enhance, verify and solely control digital advertising inventory that we then sell to our customers. Our control is further supported by us being primarily responsible to our customers for fulfillment and the fact that we can exercise a level of discretion over pricing. We completed the sale of Verizon Media on September 1, 2021. See Note 3 for additional information on the sale of Verizon Media.

We offer telematics services including smart fleet management and optimization software. Telematics service revenue is generated primarily through subscription contracts. We recognize revenue over time for our subscription contracts.

We report taxes collected from customers on behalf of governmental authorities on revenue-producing transactions on a net basis.

Maintenance and Repairs

We charge the cost of maintenance and repairs, including the cost of replacing minor items not constituting substantial betterments, principally to Cost of services as these costs are incurred.

Advertising Costs

Costs for advertising products and services, as well as other promotional and sponsorship costs, are charged to Selling, general and administrative expense in the periods in which they are incurred. See Note 15 for additional information.

Earnings Per Common Share

Basic earnings per common share are based on the weighted-average number of shares outstanding during the period. Where appropriate, diluted earnings per common share include the dilutive effect of shares issuable under our stock-based compensation plans.

[Table of Contents](#)

There were a total of approximately 2 million outstanding dilutive securities, primarily consisting of restricted stock units, included in the computation of diluted earnings per common share for the years ended December 31, 2021, 2020, and 2019.

Cash, Cash Equivalents and Restricted Cash

We consider all highly liquid investments with an original maturity of 90 days or less when purchased to be cash equivalents. Cash equivalents are stated at cost, which approximates quoted market value and includes amounts held in money market funds.

Cash collections on the device payment plan agreement receivables collateralizing asset-backed debt securities are required at certain specified times to be placed into segregated accounts. Deposits to the segregated accounts are considered restricted cash and are included in Prepaid expenses and other and Other assets in our consolidated balance sheets.

Cash, cash equivalents and restricted cash are included in the following line items in the consolidated balance sheets:

(dollars in millions)

At December 31,	2021	2020	Increase / (Decrease)
Cash and cash equivalents	\$ 2,921	\$ 22,171	\$ (19,250)
Restricted cash:			
Prepaid expenses and other	1,094	1,195	(101)
Other assets	146	132	14
Cash, cash equivalents and restricted cash	\$ 4,161	\$ 23,498	\$ (19,337)

Investments in Debt and Equity Securities

Investments in equity securities that are not accounted for under equity method accounting or result in consolidation are to be measured at fair value. For investments in equity securities without readily determinable fair values, Verizon elects the measurement alternative permitted under GAAP to measure these investments at cost, less any impairment, plus or minus changes resulting from observable price changes in orderly transactions for an identical or similar investment of the same issuer. For investments in debt securities without quoted prices, Verizon uses an alternative matrix pricing method. Investments in equity securities that do not result in consolidation of the investee are included in Investments in unconsolidated businesses and debt securities are included in Other assets in our consolidated balance sheets.

Allowance for Credit Losses

Prior to January 1, 2020, accounts receivable were recorded at cost less an allowance for doubtful accounts. The gross amount of accounts receivable and corresponding allowance for doubtful accounts were presented separately in the consolidated balance sheets. We maintained allowances for uncollectible accounts receivable, including our direct-channel device payment plan agreement receivables, for estimated losses resulting from the failure or inability of our customers to make required payments. Indirect-channel device payment receivables are considered financial instruments and were initially recorded at fair value net of imputed interest, and credit losses were recorded as incurred. However, receivable balances were assessed quarterly for impairment and an allowance was recorded if the receivable was considered impaired. Subsequent to January 1, 2020, accounts receivable are recorded at amortized cost less an allowance for credit losses that are not expected to be recovered. The gross amount of accounts receivable and corresponding allowance for credit losses are presented separately in the consolidated balance sheets. We maintain allowances for credit losses resulting from the expected failure or inability of our customers to make required payments. We recognize the allowance for credit losses at inception and reassess quarterly based on management's expectation of the asset's collectability. The allowance is based on multiple factors including historical experience with bad debts, the credit quality of the customer base, the aging of such receivables and current macroeconomic conditions, such as the COVID-19 pandemic, as well as management's expectations of conditions in the future, if applicable. Our allowance for credit losses is based on management's assessment of the collectability of assets pooled together with similar risk characteristics.

We pool our device payment plan agreement receivables based on the credit quality indicators and shared risk characteristics of "new customers" and "existing customers." New customers are defined as customers who have been with Verizon for less than 210 days. Existing customers are defined as customers who have been with Verizon for 210 days or more. We record an allowance to reduce the receivables to the amount that is expected to be collectible. For device payment plan agreement receivables, we record bad debt expense based on a default and loss calculation using our proprietary loss model. The expected loss rate is determined based on customer credit scores and other qualitative factors as noted above. The loss rate is assigned individually on a customer by customer basis and the custom credit scores are then aggregated by vintage and used in our proprietary loss model to calculate the weighted-average loss rate used for determining the allowance balance.

We monitor the collectability of our wireless service receivables as one overall pool. Wireline service receivables are disaggregated and pooled by the following customer groups: consumer, small and medium business, global enterprise, public sector and wholesale. For wireless service receivables and wireline consumer and small and medium business receivables, the allowance is calculated based on a 12 month rolling average write-off balance multiplied by the average life-cycle of an account from billing to write-off. The risk of loss is assessed over the contractual life of the receivables and we adjust the historical loss amounts for current and future conditions based on management's qualitative considerations. For global enterprise, public sector and wholesale wireline receivables, the allowance for credit losses is based on historical write-off experience and individual customer credit risk, if applicable. We consider multiple factors in determining the allowance as discussed above.

[Table of Contents](#)

Inventories

Inventory consists of wireless and wireline equipment held for sale, which is carried at the lower of cost (determined principally on either an average cost or first-in, first-out basis) or net realizable value.

Plant and Depreciation

We record property, plant and equipment at cost. Property, plant and equipment are generally depreciated on a straight-line basis.

Leasehold improvements are amortized over the shorter of the estimated life of the improvement or the remaining term of the related lease, calculated from the time the asset was placed in service.

When depreciable assets are retired or otherwise disposed of, the related cost and accumulated depreciation are deducted from the property, plant and equipment accounts and any gains or losses on disposition are recognized in Selling, general and administrative expense.

We capitalize and depreciate network software purchased or developed within property, plant and equipment assets. We also capitalize interest associated with the acquisition or construction of network-related assets. Capitalized interest is reported as a reduction in interest expense and depreciated as part of the cost of the network-related assets.

Computer Software and Cloud Computing Costs

We capitalize the cost of internal-use network and non-network software and defer the costs associated with cloud computing arrangements that have a useful life and term in excess of one year. Subsequent additions, modifications or upgrades to internal-use network and non-network software are capitalized only to the extent that they add significant new functionality. Planning, software maintenance and training costs for internal-use software and cloud computing arrangements are expensed in the period in which they are incurred. We capitalize interest associated with the development of internal-use network and non-network software. Capitalized non-network internal-use software costs are amortized using the straight-line method over a period of 5 to 7 years and are included in Other intangible assets, net in our consolidated balance sheets. Costs incurred in implementing a cloud computing arrangement are deferred during the application-development stage and recorded as Prepaid expense and Other in our consolidated balance sheets. Once a project is substantially complete and ready for its intended use, we stop deferring the related cloud computing arrangement costs.

For a discussion of our impairment policy for capitalized software costs, see "Goodwill and Other Intangible Assets" below. Also, see Note 4 for additional information of internal-use non-network software reflected in our consolidated balance sheets. Similar to capitalized software costs, deferred costs associated with cloud computing arrangements are subject to impairment testing.

Goodwill and Other Intangible Assets

Goodwill

Goodwill is the excess of the acquisition cost of businesses over the fair value of the identifiable net assets acquired. Impairment testing for goodwill is performed annually in the fourth quarter or more frequently if impairment indicators are present.

To determine if goodwill is potentially impaired, we have the option to perform a qualitative assessment. However, we may elect to bypass the qualitative assessment and perform a quantitative impairment test even if no indications of a potential impairment exist. It is our policy to perform quantitative impairment assessment at least every three years.

Under the qualitative assessment, we consider several qualitative factors, including the business enterprise value of the reporting unit from the last quantitative test and the excess of fair value over carrying value from this test, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and Earnings before interest, taxes, depreciation and amortization (EBITDA) margin results, projections and recent merger and acquisition activity), the recent and projected financial performance of the reporting unit, as well as other factors.

The quantitative impairment test for goodwill is performed at the reporting unit level and compares the fair value of the reporting unit (calculated using a combination of a market approach and a discounted cash flow method, as a form of the income approach) to its carrying value. Estimated fair values of reporting units are Level 3 measures in the fair value hierarchy, see "Fair Value Measurements" discussion below for additional information. The market approach includes the use of comparative multiples of guideline companies to corroborate discounted cash flow results. The discounted cash flow method is based on the present value of two components, projected cash flows and a terminal value. The terminal value represents the expected normalized future cash flows of the reporting unit beyond the cash flows from the discrete projection period. The fair value of the reporting unit is calculated based on the sum of the present value of the cash flows from the discrete period and the present value of the terminal value. The discount rate represents our estimate of the weighted-average cost of capital, or expected return, that a marketplace participant would have required as of the valuation date. If the carrying value exceeds the fair value, an impairment charge is booked for the excess carrying value over fair value, limited to the total amount of goodwill of that reporting unit. During the fourth quarter each year, we update our five-year strategic planning review for each of our reporting units. Those plans consider current economic conditions and trends, estimated future operating results, our view of growth-rates and anticipated future economic and regulatory conditions.

See Note 4 for additional information regarding our goodwill impairment testing.

Intangible Assets Not Subject to Amortization

A significant portion of our intangible assets are wireless licenses that provide our wireless operations with the exclusive right to utilize designated radio frequency spectrum to provide wireless communication services. While licenses are issued for only a fixed time, generally ten years, such licenses are subject to renewal by the Federal Communications Commission (FCC). License renewals have occurred routinely and at nominal cost. Moreover, we have determined that there are currently no legal, regulatory, contractual, competitive, economic or other factors that limit the useful life of our wireless licenses. As a result, we treat the wireless licenses as an indefinite-lived intangible asset. We re-evaluate the useful life determination for wireless licenses each year to determine whether events and circumstances continue to support an indefinite useful life. We aggregate our wireless licenses into one single unit of accounting, as we utilize our wireless licenses on an integrated basis as part of our nationwide wireless network.

We test our wireless licenses for potential impairment annually or more frequently if impairment indicators are present. We have the option to first perform a qualitative assessment to determine whether it is necessary to perform a quantitative impairment test. However, we may elect to bypass the qualitative assessment in any period and proceed directly to performing the quantitative impairment test. It is our policy to perform quantitative impairment assessment at least every three years.

As part of our assessment we considered several qualitative factors including the business enterprise value of our combined wireless business, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and EBITDA margin results, projections and recent merger and acquisition activity), the recent and projected financial performance of our combined wireless business as a whole, as well as other factors. See Note 4 for additional information regarding our impairment tests.

Our quantitative impairment assessment consisted of comparing the estimated fair value of our aggregate wireless licenses to the aggregated carrying amount as of the test date. Under our quantitative assessment, we estimated the fair value of our wireless licenses using the Greenfield approach. The Greenfield approach is an income based valuation approach that values the wireless licenses by calculating the cash flow generating potential of a hypothetical start-up company that goes into business with no assets except the wireless licenses to be valued. A discounted cash flow analysis is used to estimate what a marketplace participant would be willing to pay to purchase the aggregated wireless licenses as of the valuation date. If the estimated fair value of the aggregated wireless licenses is less than the aggregated carrying amount of the wireless licenses, then an impairment charge is recognized.

Interest expense incurred while qualifying activities are performed to ready wireless licenses for their intended use is capitalized as part of wireless licenses. The capitalization period ends when the development is discontinued or substantially completed and the license is ready for its intended use.

Wireless licenses can be purchased through public auctions conducted by the FCC. Deposits required to participate in these auctions and purchase licenses are recorded within Deposits for wireless licenses in our consolidated balance sheets until the corresponding licenses are received and within Net cash used in investing activities in our consolidated statements of cash flows.

Intangible Assets Subject to Amortization and Long-Lived Assets

Our intangible assets that do not have indefinite lives (primarily customer lists and non-network internal-use software) are amortized over their estimated useful lives. All of our intangible assets subject to amortization and other long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If any indications of impairment are present, we would test for recoverability by comparing the carrying amount of the asset group to the net undiscounted cash flows expected to be generated from the asset group. If those net undiscounted cash flows do not exceed the carrying amount, we would perform the next step, which is to determine the fair value of the asset and record an impairment, if any. We re-evaluate the useful life determinations for these intangible assets each year to determine whether events and circumstances warrant a revision to their remaining useful lives.

See Note 4 for information related to the carrying amount of goodwill, wireless licenses and other intangible assets, as well as the major components and average useful lives of our other acquired intangible assets.

Leases

We lease network equipment including towers, distributed antenna systems, small cells, real estate, connectivity mediums which include dark fiber, equipment, and other various types of assets for use in our operations under both operating and finance leases. We assess whether an arrangement is a lease or contains a lease at inception. For arrangements considered leases or that contain a lease that is accounted for separately, we determine the classification and initial measurement of the right-of-use asset and lease liability at the lease commencement date, which is the date that the underlying asset becomes available for use.

For both operating and finance leases, we recognize a right-of-use asset, which represents our right to use the underlying asset for the lease term, and a lease liability, which represents the present value of our obligation to make payments arising over the lease term. The present value of the lease payments is calculated using the incremental borrowing rate for operating and finance leases. The incremental borrowing rate is determined using a portfolio approach based on the rate of interest that the Company would have to pay to borrow an amount equal to the lease payments on a collateralized basis over a similar term. Management uses the unsecured borrowing rate and risk-adjusts that rate to approximate a collateralized rate, which is updated on a quarterly basis.

[Table of Contents](#)

In those circumstances where the Company is the lessee, we account for non-lease components associated with our leases (e.g., common area maintenance costs) and lease components as a single lease component for substantially all of our asset classes. Additionally, in arrangements where we are the lessor, we have customer premise equipment for which we account for non-lease components (e.g., service revenue) and lease components as combined components under the revenue recognition guidance in Topic 606 as the service revenues are the predominant components in the arrangements.

Rent expense for operating leases is recognized on a straight-line basis over the term of the lease and is included in either Cost of services or Selling, general and administrative expense in our consolidated statements of income, based on the use of the facility or equipment on which rent is being paid. Variable rent payments related to both operating and finance leases are expensed in the period incurred. Our variable lease payments consist of payments dependent on various external indicators, including real estate taxes, common area maintenance charges and utility usage.

Operating leases with a term of 12 months or less are not recorded in our consolidated balance sheets; we recognize rent expense for these leases on a straight-line basis over the lease term.

We recognize the amortization of the right-of-use asset for our finance leases on a straight-line basis over the shorter of the lease term or the useful life of the right-of-use asset in Depreciation and amortization expense in our consolidated statements of income. The interest expense related to finance leases is recognized using the effective interest method based on the discount rate determined at lease commencement and is included within Interest expense in our consolidated statements of income.

See Note 6 for additional information related to leases, including disclosure required under ASU 2016-02, Leases (Topic 842).

Fair Value Measurements

Fair value of financial and non-financial assets and liabilities is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The three-tier hierarchy for inputs used in measuring fair value, which prioritizes the inputs used in the methodologies of measuring fair value for assets and liabilities, is as follows:

Level 1 — Quoted prices in active markets for identical assets or liabilities

Level 2 — Observable inputs other than quoted prices in active markets for identical assets and liabilities

Level 3 — Unobservable pricing inputs in the market

Financial assets and financial liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurements. Our assessment of the significance of a particular input to the fair value measurements requires judgment and may affect the valuation of the assets and liabilities being measured and their categorization within the fair value hierarchy.

Income Taxes

Our effective tax rate is based on pre-tax income, statutory tax rates, tax laws and regulations and tax planning strategies available to us in the various jurisdictions in which we operate.

Deferred income taxes are provided for temporary differences in the basis between financial statement and income tax assets and liabilities. Deferred income taxes are recalculated annually at tax rates in effect for the years in which those tax assets and liabilities are expected to be realized or settled. We record valuation allowances to reduce our deferred tax assets to the amount that is more likely than not to be realized.

We use a two-step approach for recognizing and measuring tax benefits taken or expected to be taken in a tax return. The first step is recognition: we determine whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, we presume that the position will be examined by the appropriate

taxing authority that has full knowledge of all relevant information. The second step is measurement: a tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in one or more of the following: an increase in a liability for income taxes payable, a reduction of an income tax refund receivable, a reduction in a deferred tax asset or an increase in a deferred tax liability.

Significant management judgment is required in evaluating our tax positions and in determining our effective tax rate.

Stock-Based Compensation

We measure and recognize compensation expense for all stock-based compensation awards made to employees and directors based on estimated fair values. See Note 10 for additional information.

Foreign Currency Translation and Transactions

The functional currency of our foreign operations is generally the local currency. For these foreign entities, we translate their financial statements into U.S. dollars using average exchange rates for the period for income statement amounts and using end-of-period exchange rates

for assets and liabilities. We record these translation adjustments in Accumulated other comprehensive loss, a separate component of Equity, in our consolidated balance sheets. We record exchange gains and losses resulting from the conversion of transaction currency to functional currency as a component of Other income (expense), net.

Employee Benefit Plans

Pension and postretirement health care and life insurance benefits earned during the year, as well as interest on projected benefit obligations, are accrued. Prior service costs and credits resulting from changes in plan benefits are generally amortized over the average remaining service period of the employees expected to receive benefits. Expected return on plan assets is determined by applying the return on assets assumption to the actual fair value of plan assets. Actuarial gains and losses are recognized in Other income (expense), net in the year in which they occur. These gains and losses are measured annually as of December 31 or upon a remeasurement event. Verizon management employees no longer earn pension benefits or earn service towards the Company retiree medical subsidy. See Note 11 for additional information.

We recognize a pension or a postretirement plan's funded status as either an asset or liability in the consolidated balance sheets. Also, we measure any unrecognized prior service costs and credits that arise during the period as a component of Accumulated other comprehensive income, net of applicable income tax.

Derivative Instruments

We enter into derivative transactions primarily to manage our exposure to fluctuations in foreign currency exchange rates and interest rates. We employ risk management strategies, which may include the use of a variety of derivatives including cross currency swaps, forward starting interest rate swaps, interest rate swaps, treasury rate locks, interest rate caps and foreign exchange forwards. We do not hold derivatives for trading purposes.

We measure all derivatives at fair value and recognize them as either assets or liabilities in our consolidated balance sheets. Our derivative instruments are valued primarily using models based on readily observable market parameters for all substantial terms of our derivative contracts and thus are classified as Level 2. Changes in the fair values of derivative instruments applied as economic hedges are recognized in earnings in the current period. For fair value hedges, the change in the fair value of the derivative instruments is recognized in earnings, along with the change in the fair value of the hedged item. For cash flow hedges, the change in the fair value of the derivative instruments is reported in Other comprehensive income (loss) and recognized in earnings when the hedged item is recognized in earnings. For net investment hedges of certain of our foreign operations, the change in the fair value of the hedging instruments is reported in Other comprehensive income (loss) as part of the cumulative translation adjustment and partially offsets the impact of foreign currency changes on the value of our net investment.

Cash flows from derivatives, which are designated as accounting hedges or applied as economic hedges, are presented consistently with the cash flow classification of the related hedged items. See Note 9 for additional information.

Variable Interest Entities

VIEs are entities that lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, have equity investors that do not have the ability to make significant decisions relating to the entity's operations through voting rights, do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity. We consolidate the assets and liabilities of VIEs when we are deemed to be the primary beneficiary. The primary beneficiary is the party that has the power to make the decisions that most significantly affect the economic performance of the VIE and has the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE.

Recently Adopted Accounting Standards

The following ASU was issued by the Financial Accounting Standards Board (FASB), and has been recently adopted by Verizon.

Description	Date of Adoption	Effect on Financial Statements
ASU 2021-08, Business Combinations (Topic 805): Accounting for Contract Assets and Contract Liabilities from Contracts with Customers		
In October 2021, the FASB issued ASU 2021-08. The guidance requires entities to recognize and measure contract assets and contract liabilities acquired in a business combination in accordance with Topic 606. The standard is effective for fiscal years beginning after December 15, 2022, including interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. The guidance is applied retrospectively to all business combinations for which the acquisition date occurs on or after the beginning of the fiscal year of adoption.	11/1/2021	Verizon has elected to early adopt this Topic effective November 1, 2021, and has retroactively applied this guidance to all business combinations that took place on or after January 1, 2021. The adoption resulted in the recognition of contract liabilities at amounts consistent with those recorded by TracFone Wireless, Inc. (Tracfone) immediately before the acquisition date. The adoption had no impact on other business combinations in 2021. See Note 3 for additional information on the acquisition of Tracfone.
ASU 2020-04, Reference Rate Reform (Topic 848)		
Topic 848 provides temporary optional guidance to ease the potential burden in accounting for reference rate reform. Topic 848 provides optional expedients and exceptions for applying U.S. GAAP to transactions affected by reference rate reform if certain criteria are met.	03/12/2020	Topic 848 was effective for the Company beginning on March 12, 2020, and we will apply the amendments prospectively through December 31, 2022. There was no impact to our consolidated financial statements for the current period as a result of adopting this standard update.

On January 1, 2020, we adopted ASU 2016-13, Financial Instruments - Credit Losses (Topic 326) using the modified retrospective approach. The cumulative after-tax effect of the changes made to our consolidated financial statements for the adoption of Topic 326 was as follows:

	At December 31, 2019	Adjustments due to Topic 326	At January 1, 2020
(dollars in millions)			
Retained earnings	53,147	(200)	52,947

See Note 8 for additional information related to credit losses, including disclosures required under Topic 326.

On January 1, 2019, we adopted Topic 842 using the modified retrospective approach. The cumulative after-tax effect of the changes made to our consolidated financial statements for the adoption of Topic 842 was as follows:

	At December 31, 2018	Adjustments due to Topic 842	At January 1, 2019
(dollars in millions)			
Retained earnings	\$ 43,542	\$ 410	\$ 43,952
Noncontrolling interests	1,565	1	1,566

Note 2. Revenue and Contract Costs

We earn revenue from contracts with customers, primarily through the provision of telecommunications and other services and through the sale of wireless equipment.

Revenue by Category

We have two reportable segments that we operate and manage as strategic business units, Consumer and Business. Revenue is disaggregated by products and services within Consumer, and customer groups (Small and Medium Business, Global Enterprise, Public Sector and Other, and Wholesale) within Business. See Note 13 for additional information on revenue by segment.

Corporate and other primarily includes insurance captives as well as the historical results of the divested Verizon Media. On September 1, 2021, we completed the sale of Verizon Media to an affiliate of Apollo Global Management Inc. Under our ownership, Verizon Media generated revenues from contracts with customers under Topic 606 of approximately \$5.3 billion, \$7.0 billion and \$7.5 billion for the years ended December 31, 2021, 2020 and 2019, respectively. See Note 3 for additional information on the sale of Verizon Media.

We also earn revenues that are not accounted for under Topic 606 from leasing arrangements (such as those for towers and equipment), captive reinsurance arrangements primarily related to wireless device insurance and the interest on equipment financed under a device payment plan agreement when sold to the customer by an authorized agent. As allowed by the practical expedient within Topic 842, we have elected to combine the lease and non-lease components for those arrangements of customer premise equipment where we are the lessor as components accounted for under Topic 606. Revenues from arrangements that were not accounted for under Topic 606 were approximately \$3.1 billion, \$2.9 billion and \$3.0 billion for the years ended December 31, 2021, 2020 and 2019, respectively.

Remaining Performance Obligations

When allocating the total contract transaction price to identified performance obligations, a portion of the total transaction price may relate to service performance obligations which were not satisfied or are partially satisfied as of the end of the reporting period. Below we disclose information relating to these unsatisfied performance obligations. We apply the practical expedient available under Topic 606 that provides the option to exclude the expected revenues arising from unsatisfied performance obligations related to contracts that have an original expected duration of one year or less. This situation primarily arises with respect to certain month-to-month service contracts. At December 31, 2021, month-to-month service contracts represented approximately 93% of our wireless postpaid contracts and 86% of our wireline Consumer and Small and Medium Business contracts, compared to December 31, 2020, for which month-to-month service contracts represented approximately 90% of our wireless postpaid contracts and 75% of our wireline Consumer and Small and Medium Business contracts.

Additionally, certain contracts provide customers the option to purchase additional services. The fees related to these additional services are recognized when the customer exercises the option (typically on a month-to-month basis).

Contracts for wireless services, with or without promotional credits that require maintenance of service, are generally either month-to-month and cancellable at any time (typically under a device payment plan) or considered to contain terms ranging from greater than one month to up to thirty months (typically under a fixed-term plan). Additionally, customers may incur charges based on usage or additional optional services purchased in conjunction with entering into a contract that can be cancelled at any time and therefore are not included in the transaction price. The transaction price allocated to service performance obligations, which are not satisfied or are partially satisfied as of the end of the reporting period, are generally related to contracts that are not accounted for as month-to-month contracts.

Our Consumer group customers also include traditional wholesale resellers that purchase and resell wireless service under their own brands to their respective customers. Reseller arrangements generally include a stated contract term, which typically extends longer than two years and, in some cases, include a periodic minimum revenue commitment over the contract term for which revenues will be recognized in future periods.

Consumer customer contracts for wireline services are generally month-to-month; however, they may have a service term of two years or shorter than twelve months. Certain contracts with Business customers for wireline services extend into future periods, contain fixed monthly fees and usage-based fees, and can include annual commitments in each year of the contract or commitments over the entire specified contract term; however, a significant number of contracts for wireline services with our Business customers have a contract term that is twelve months or less.

Additionally, there are certain contracts with Business customers for wireline and telematics services that have a contractual minimum fee over the total contract term. We cannot predict the time period when revenue will be recognized related to those contracts; thus, they are excluded from the time bands below. These contracts have varying terms spanning over approximately nine years ending in August 2031 and have aggregate contract minimum payments totaling \$2.4 billion.

At December 31, 2021, the transaction price related to unsatisfied performance obligations for total Verizon that is expected to be recognized for 2022, 2023 and thereafter was \$17.0 billion, \$8.3 billion and \$2.3 billion, respectively. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations and changes in the timing and scope of contracts, arising from contract modifications.

Accounts Receivable and Contract Balances

The timing of revenue recognition may differ from the time of billing to our customers. Receivables presented in our consolidated balance sheets represent an unconditional right to consideration. Contract balances represent amounts from an arrangement when either Verizon has performed, by transferring goods or services to the customer in advance of receiving all or partial consideration for such goods and services from the customer, or the customer has made payment to Verizon in advance of obtaining control of the goods and/or services promised to the customer in the contract.

The following table presents information about receivables from contracts with customers:

(dollars in millions)	At		
	December 31,	At December 31,	At January 1,
	2021	2020	2020
Receivables ⁽¹⁾	\$ 10,758	\$ 12,029	\$ 12,078
Device payment plan agreement receivables ⁽²⁾	12,888	10,358	11,741

⁽¹⁾ Balances do not include receivables related to the following contracts: leasing arrangements (such as those for towers and equipment), captive reinsurance arrangements primarily related to wireless device insurance and the interest on equipment financed under a device payment plan agreement when sold to the customer by an authorized agent.

⁽²⁾ Included in device payment plan agreement receivables presented in Note 8. Receivables derived from the sale of equipment on a device payment plan through an authorized agent.

[Table of Contents](#)

The following table presents information about contract balances:

	At		
	December 31,	At December 31,	At January 1,
(dollars in millions)	2021	2020	2020
Contract asset	\$ 934	\$ 937	\$ 1,150
Contract liability	7,229	5,598	5,307

Contract assets primarily relate to our rights to consideration for goods or services provided to customers but for which we do not have an unconditional right at the reporting date. Under a fixed-term plan, total contract revenue is allocated between wireless service and equipment revenues. In conjunction with these arrangements, a contract asset is created, which represents the difference between the amount of equipment revenue recognized upon sale and the amount of consideration received from the customer when the performance obligation related to the transfer of control of the equipment is satisfied. The contract asset is reclassified to accounts receivable as wireless services are provided and billed. We have the right to bill the customer as service is provided over time, which results in our right to the payment being unconditional. The contract asset balances are presented in our consolidated balance sheets as Prepaid expenses and other and Other assets. We recognize the allowance for credit losses at inception and reassess quarterly based on management's expectation of the asset's collectability.

Contract assets remained relatively flat during the year ended December 31, 2021. Contract assets decreased \$213 million during the year ended December 31, 2020 and was primarily due to reclassifications to accounts receivable due to billings on existing contracts and impairment charges of \$75 million, partially offset by new contracts driven by customer activity related to wireless.

Contract liabilities arise when we bill our customers and receive consideration in advance of providing the goods or services promised in the contract. We typically bill service one month in advance, which is the primary component of the contract liability balance. Contract liabilities are recognized as revenue when services are provided to the customer. The contract liability balances are presented in our consolidated balance sheets as Other current liabilities and Other liabilities.

Contract liabilities increased \$1.6 billion during the year ended December 31, 2021. The change in contract liabilities was primarily due to increases in sales promotions recognized over time and upfront fees, increases in deferred revenue related to advanced billings, as well as the acquisition of Tracfone, partially offset by the satisfaction of performance obligations related to wireless and Fios services, as well as the sale of Verizon Media. Contract liabilities increased \$291 million during the year ended December 31, 2020. The change in contract liabilities was primarily due to increases in sales promotions recognized over time and upfront fees, as well as increases in deferred revenue related to advanced billings, partially offset by the satisfaction of performance obligations related to wireless and Fios services.

Revenue recognized during both the years ended December 31, 2021 and 2020 related to contract liabilities existing at January 1, 2021 and 2020 were \$4.3 billion, respectively, as performance obligations related to services were satisfied.

The balance of contract assets and contract liabilities recorded in our consolidated balance sheets were as follows:

	At December 31,	At December 31,
(dollars in millions)	2021	2020
Assets		
Prepaid expenses and other	\$ 739	\$ 733
Other assets	195	204
Total	\$ 934	\$ 937
Liabilities		
Other current liabilities	\$ 6,053	\$ 4,843
Other liabilities	1,176	755
Total	\$ 7,229	\$ 5,598

Contract Costs

As discussed in Note 1, Topic 606 requires the recognition of an asset for incremental costs to obtain a customer contract, which are then amortized to expense over the respective periods of expected benefit. We recognize an asset for incremental commission expenses paid to internal and external sales personnel and agents in conjunction with obtaining customer contracts. We only defer these costs when we have determined the commissions are incremental costs that would not have been incurred absent the customer contract and are expected to be recoverable. Costs to obtain a contract are amortized and recorded ratably as commission expense over the period representing the transfer of goods or services to which the assets relate. Costs to obtain wireless contracts are amortized over both of our Consumer and Business customers' estimated device upgrade cycles, as such costs are typically incurred each time a customer upgrades. Costs to obtain wireline contracts are amortized as expense over the estimated customer relationship period for our Consumer customers. Incremental costs to obtain wireline contracts for our Business customers are insignificant. Costs to obtain contracts are recorded in Selling, general and administrative expense.

[Table of Contents](#)

We also defer costs incurred to fulfill contracts that: (1) relate directly to the contract; (2) are expected to generate resources that will be used to satisfy our performance obligation under the contract; and (3) are expected to be recovered through revenue generated under the contract. Contract fulfillment costs are expensed as we satisfy our performance obligations and recorded in Cost of services. These costs principally relate to direct costs that enhance our wireline business resources, such as costs incurred to install circuits.

We determine the amortization periods for our costs incurred to obtain or fulfill a customer contract at a portfolio level due to the similarities within these customer contract portfolios.

Other costs, such as general costs or costs related to past performance obligations, are expensed as incurred.

Collectively, costs to obtain a contract and costs to fulfill a contract are referred to as deferred contract costs, and amortized over a two-to six-year period. Deferred contract costs are classified as current or non-current within Prepaid expenses and other and Other assets, respectively.

The balances of deferred contract costs included in our consolidated balance sheets were as follows:

(dollars in millions)	At December 31, 2021	At December 31, 2020
Assets		
Prepaid expenses and other	\$ 2,432	\$ 2,472
Other assets	2,259	2,070
Total	\$ 4,691	\$ 4,542

For the years ended December 31, 2021 and 2020, we recognized expense of \$3.0 billion and \$3.1 billion, respectively, associated with the amortization of deferred contract costs, primarily within Selling, general and administrative expense in our consolidated statements of income.

We assess our deferred contract costs for impairment on a quarterly basis. We recognize an impairment charge to the extent the carrying amount of a deferred cost exceeds the remaining amount of consideration we expect to receive in exchange for the goods and services related to the cost, less the expected costs related directly to providing those goods and services that have not yet been recognized as expenses. There have been no impairment charges recognized for the years ended December 31, 2021 and 2020.

Note 3. Acquisitions and Divestitures

Spectrum License Transactions

In March 2020, the FCC's incentive auction, Auction 103, for spectrum licenses in the upper 37 GHz, 39 GHz, and 47 GHz bands concluded. Verizon participated in this incentive auction and was the high bidder on 4,940 licenses, which primarily consisted of 37 GHz and, to a lesser extent, 39 GHz spectrum. As an incumbent licensee, our 39 GHz licenses provided us with incentive payments that were applied towards the purchase price of spectrum in the auction. The value of the licenses won by Verizon amounted to \$3.4 billion, of which \$1.8 billion was settled with the relinquished 39 GHz licenses. The remaining balance was settled in cash of \$1.6 billion, of which \$101 million was paid during the fourth quarter in 2019. In connection with the incentive auction, a pre-tax net loss of \$1.2 billion (\$914 million after-tax) was recorded in Selling, general and administrative expense in the consolidated statement of income during 2020 because the exchange of the previously held licenses for new licenses had commercial substance. See Note 4 for additional information. The new reconfigured licenses were received in the second quarter 2020 and are included in Wireless licenses in our consolidated balance sheets.

In September 2020, the FCC completed Auction 105 for Priority Access Licenses. Verizon participated in the auction and was the high bidder on 557 licenses in the 3.5 GHz band valued at approximately \$1.9 billion for the licenses. Verizon made payments for these licenses in 2020 and received them from the FCC in March 2021. Upon receiving, these wireless licenses, including capitalized interest, based on qualifying activities that occurred, were reclassified from Deposits for wireless licenses to Wireless licenses in our consolidated balance sheet.

In February 2021, the FCC concluded Auction 107 for C-Band wireless spectrum. Verizon was the winning bidder on 3,511 licenses, consisting of contiguous C-Band spectrum bands ranging between 140 and 200 megahertz of C-Band spectrum in all 406 markets available in the auction. Verizon paid \$45.5 billion for the licenses it won, of which \$44.6 billion was paid in the first quarter of 2021. In accordance with the rules applicable to the auction, Verizon is required to make additional payments to acquire the licenses. The payments are for our allocable share of clearing costs incurred by, and incentive payments due to, the incumbent license holders associated with the auction, which are estimated to be \$7.7 billion. During 2021, we made payments of \$1.3 billion primarily related to certain obligations for projected clearing costs. In January 2022, we made additional payments of \$1.4 billion for obligations related to accelerated clearing incentives, which were accrued as of December 31, 2021 in our consolidated balance sheet. We expect to continue to make payments related to clearing cost and incentive payment obligations through 2024. These payments are dependent on the incumbent license holders accelerated clearing of the spectrum for Verizon's use and, therefore, the final timing and amounts could differ based on the incumbent holders' execution of their clearing process. In accordance with the FCC order, the clearing must be completed by December 2025.

The carrying value of the wireless spectrum won in Auction 107 will consist of all payments required to participate and purchase licenses in the auction, including Verizon's allocable share of clearing costs incurred by, and incentive payments due to, the incumbent license holders associated with the auction that we are obligated to pay in order to acquire the licenses. The licenses were received from the FCC in July

[Table of Contents](#)

2021. Upon receiving, these wireless licenses, including capitalized interest, based on qualifying activities that occurred, were reclassified from Deposits for wireless licenses to Wireless licenses in our consolidated balance sheet. The average remaining renewal period for these acquired licenses was 15 years.

See Note 7 for additional information on significant debt transactions.

During 2021 and 2020, we entered into and completed various other wireless license acquisitions for cash consideration of \$95 million and \$360 million, respectively. During 2021, we recognized a pre-tax loss in connection with the sale of certain wireless licenses of \$223 million (\$167 million after tax).

Business Acquisitions

In 2021, we completed the acquisitions of Tracfone and Bluegrass Cellular (Bluegrass). The aggregate impact to total operating revenues arising from these acquisitions amounted to less than 1% for the year ended December 31, 2021.

TracFone Wireless, Inc.

In September 2020, we entered into a purchase agreement (Tracfone Purchase Agreement) with América Móvil to acquire Tracfone, a leading provider of prepaid and value mobile services in the U.S. The transaction closed on November 23, 2021 (the Acquisition Date). The acquisition positions Verizon as the leading prepaid, value and premium wireless carrier by expanding Verizon's portfolio, bringing enhanced access of our wireless network and comprehensive suite of mobility products and services to a new customer base.

In accordance with the terms of the Tracfone Purchase Agreement, Verizon acquired all of Tracfone's outstanding stock in exchange for approximately \$3.5 billion in cash, net of cash acquired and working capital and other adjustments, subject to customary adjustments, 57,596,544 shares of Verizon common stock valued at approximately \$3.0 billion, and up to an additional \$650 million in future cash contingent consideration related to the achievement of certain performance measures and other commercial arrangements. The fair value of the Verizon common stock was determined on the basis of its closing market price on the Acquisition Date. The estimated fair value of the contingent consideration as of the Acquisition Date was approximately \$542 million and represents a Level 3 measurement as defined in ASC 820, Fair Value Measurements and Disclosures. See Note 9 for additional information. The contingent consideration payable is based on the achievement of certain revenue and operational targets, measured over a two-year earn out period, as defined in the Tracfone Purchase Agreement. Payments related to the contingent consideration are expected to begin in 2022 and continue through 2024.

Tracfone's financial results are included in the consolidated results of Verizon from the Acquisition Date.

The Tracfone acquisition was accounted for as a business combination. We are currently assessing, as of the Acquisition Date, the identification and measurement of the assets acquired and liabilities assumed based on their fair values, which are determined using a combination of the income and market approaches, including market based assumptions. The purchase consideration was preliminarily allocated to the assets acquired and liabilities assumed based on their fair values as of the Acquisition Date.

The following table summarizes the preliminary allocation of the consideration paid and payable to the identified assets acquired and liabilities assumed as of the Acquisition Date. The purchase price allocation is preliminary and is subject to revision as additional information about the fair value of the assets acquired and liabilities assumed, including related deferred income taxes, become available.

[Table of Contents](#)

	November 23,
(dollars in millions)	2021
Consideration:	
Cash, net of cash acquired and working capital and other adjustments	\$ 3,491
Fair value of Verizon common stock (57,596,544 shares)	2,981
Fair value of contingent consideration to be paid	542
Total consideration	\$ 7,014
Assets acquired:	
Current assets	\$ 1,370
Property, plant and equipment, net	96
Goodwill	3,723
Other intangible assets	4,374
Other assets	731
Total assets acquired	\$ 10,294
Liabilities assumed:	
Current liabilities	1,433
Deferred income taxes	1,007
Other liabilities	840
Total liabilities assumed	\$ 3,280
Net assets acquired	\$ 7,014

Other intangible assets include \$2.3 billion related to customer relationships, with a weighted-average amortization period of 6 years, \$1.3 billion related to distribution relationships, with a weighted-average amortization period of 5 years, \$744 million related to trade names with a weighted-average amortization period of 16.5 years and \$110 million related to acquired technology, with a weighted-average amortization period of 10 years. The intangible assets were assigned preliminary estimated fair values using an income approach. The valuations are considered Level 3 fair value measurements due to the use of significant inputs not observable in the market, which include the discount rate, royalty rate and amount and timing of future cash flows.

Goodwill is calculated as the difference between the Acquisition Date fair value of the consideration paid and payable and the fair value of the net assets acquired, representing future economic benefits that we expect to achieve as a result of the acquisition. None of the goodwill resulting from the acquisition is deductible for tax purposes. The goodwill related to this acquisition is included within the Consumer segment.

Pursuant to the Tracfone Purchase Agreement, América Móvil agreed to indemnify Verizon against pre-acquisition tax matters. As of the Acquisition Date, we have recorded uncertain tax liabilities and offsetting indemnification assets of \$730 million, for the expected reimbursement of tax related matters that had not been resolved as of the Acquisition Date. The liabilities are presented in Other liabilities, and the indemnification assets are presented in Other assets, within our consolidated balance sheets. We expect that any additional liabilities that may arise related to these indemnified matters would be indemnified and reimbursed by América Móvil.

Pro forma financial information has not been disclosed for the acquisition of Tracfone as the impacts to both revenue and earnings would not have been significant to our consolidated balance sheets and statements of income.

Bluegrass Cellular

In October 2020, we entered into a definitive agreement to acquire certain assets of Bluegrass Cellular, a rural wireless operator serving central Kentucky. Bluegrass provides wireless service to 210,000 customers in 34 counties in rural service areas 3, 4, and 5 in Central Kentucky. The transaction closed in March 2021. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$412 million, net of cash acquired, which is subject to customary closing adjustments.

The financial results of Bluegrass are included in the consolidated results of Verizon from the date of acquisition.

The acquisition of Bluegrass was accounted for as a business combination. We are currently assessing the identification and measurement of the assets acquired and liabilities assumed based on their fair values as of the close of the acquisition. Preliminarily, we recorded approximately \$141 million of plant, property and equipment, \$135 million of intangible assets and \$92 million of goodwill. Goodwill is calculated as the difference between the acquisition date fair value of the consideration transferred and the fair value of the net assets acquired. The goodwill represents future economic benefits that we expect to achieve as a result of the acquisition. The goodwill related to this acquisition is included within the Consumer segment.

Blue Jeans Network, Inc.

In April 2020, we entered into a definitive purchase agreement to acquire Blue Jeans Network, Inc. (BlueJeans), an enterprise-grade video conferencing and event platform, whose services are sold to Business customers globally. The transaction closed in May 2020. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$397 million, net of cash acquired.

The acquisition of BlueJeans was accounted for as a business combination. The consideration was allocated to the assets acquired and liabilities assumed based on their fair values as of the close of the acquisition. We recorded approximately \$246 million of goodwill and \$190 million of other intangible assets, which primarily consisted of customer lists and internally developed technology. Goodwill is calculated as the difference between the acquisition date fair value of the consideration transferred and the fair value of the net assets acquired. The goodwill represents future economic benefits that we expect to achieve as a result of the acquisition. The goodwill related to this acquisition is included within the Business segment.

Verizon Media Divestiture

On May 2, 2021, Verizon entered into a definitive agreement with an affiliate of Apollo Global Management Inc. (the Apollo Affiliate) pursuant to which we agreed to sell Verizon Media in return for consideration of \$4.3 billion in cash, subject to customary adjustments, \$750 million in non-convertible preferred limited partnership units of the Apollo Affiliate and 10% of the fully-diluted common limited partnership units of the Apollo Affiliate.

On September 1, 2021, we completed the sale of Verizon Media. As of the close of the transaction, cash proceeds, the fair value of the non-convertible preferred limited partnership units of the Apollo Affiliate and the fair value of 10% of the fully-diluted common limited partnership units of the Apollo Affiliate were \$4.3 billion, \$496 million, and \$124 million, respectively. We recorded a pre-tax gain on sale of approximately \$1.0 billion (after-tax \$1.0 billion) in Selling general and administrative expense in our consolidated statement of income for the year ended December 31, 2021. In addition, we incurred \$346 million of various costs associated with this disposition which are primarily recorded in Selling general and administrative expense in our consolidated statement of income for the year ended December 31, 2021.

Upon the closing of the transaction, Verizon's preferred limited partnership interest in the Apollo Affiliate and 10% common interest in the Apollo Affiliate were recognized at their initial fair value of \$496 million and \$124 million, respectively. The fair values were both estimated using a combination of the market approach and the income approach. The valuations are both considered Level 3 fair value measurements due to the use of significant judgment and unobservable inputs, which include the amount and timing of future cash flows, and a discount rate reflecting risks inherent in the future cash flows and market prices. Verizon's preferred limited partnership interest is accounted for at cost, and is subject to impairment and other changes resulting from observable price changes in orderly transactions for identical or similar investments of the issuer. On September 28, 2021, the Apollo Affiliate redeemed \$100 million of Verizon's preferred limited partnership interest reducing the carrying value of our preferred interest as of December 31, 2021 to \$396 million. The redemption is reflected within Net cash used in investing activities in our consolidated statement of cash flows for the year ended December 31, 2021. Verizon's 10% common interest in the Apollo Affiliate is accounted for as an equity method investment. The post-sale results of Verizon's common ownership interest in the Apollo Affiliate are recorded through the equity method of accounting, within Corporate and other.

The following table summarizes the assets and liabilities which were disposed as a result of the closing of the transaction:

	September 1,
(dollars in millions)	2021
Assets:	
Cash, cash equivalents and restricted cash	\$ 168
Accounts receivable	1,597
Prepaid expenses and other	134
Property, plant and equipment, net	1,235
Other intangible assets, net	2,579
Other assets	221
Total assets	\$ 5,934
Liabilities:	
Accounts payable and accrued liabilities	\$ 1,411
Other current liabilities	315
Other liabilities	310
Total liabilities	\$ 2,036

The operating results of Verizon Media are included within our Corporate and other segment for all periods presented through the date of the sale. See Note 2 for additional information on revenues generated by Verizon Media under Topic 606.

In connection with the closing of the transaction, we entered into Transition Services Agreements with the Apollo Affiliate, under which Verizon will continue to provide and receive specified administrative and technical services to support operations for up to 12 months and 18 months, respectively.

Other

During 2021 and 2020, we completed various other acquisitions for cash consideration of approximately \$51 million and \$127 million, respectively.

In December 2021, we completed the sale of our investment in the Complex Media business. In connection with this transaction, we recorded a pre-tax gain of \$131 million in Equity in earnings (losses) of unconsolidated businesses in our consolidated statement of income for the year ended December 31, 2021.

In November 2020, Verizon entered into an agreement to sell our Huffington Post business. In connection with this transaction, we recorded a pre-tax loss of \$126 million in Selling, general and administrative expense in our consolidated statement of income for the year ended December 31, 2020. The transaction closed in February 2021.

Note 4. Wireless Licenses, Goodwill and Other Intangible Assets

Wireless Licenses

The carrying amounts of Wireless licenses, as well as wireless spectrum for which licenses had not yet been received, are as follows:

	(dollars in millions)	
At December 31,	2021	2020
Wireless licenses	\$ 147,619	\$ 96,097
Deposits for wireless licenses	—	2,772

At December 31, 2021 and 2020, approximately \$54.9 billion and \$6.4 billion, respectively, of wireless licenses were under development for commercial service for which we were capitalizing interest costs. We recorded approximately \$1.6 billion and \$242 million of capitalized interest on wireless licenses for the years ended December 31, 2021 and 2020, respectively.

In July 2021, we received the wireless licenses won in connection with the FCC's auction for C-Band wireless spectrum, Auction 107. As a result, these wireless licenses, including capitalized interest, based on qualifying activities that occurred, were reclassified from Deposits for wireless licenses to Wireless licenses in our consolidated balance sheet. See Note 3 for additional information regarding spectrum license transactions.

In the first quarter of 2020, we reclassified substantially all of our 39 GHz wireless licenses, including capitalized interest, with a carrying value of \$2.8 billion to assets held for sale in connection with the FCC's incentive auction, Auction 103. As a result, these wireless licenses were adjusted down to their fair value of \$1.6 billion resulting in a pre-tax loss of \$1.2 billion (\$914 million after-tax) in 2020. The new reconfigured licenses were received in the second quarter 2020 and had a value of \$3.4 billion. See Note 3 for additional information regarding spectrum license transactions.

During 2021 and 2020, we renewed various wireless licenses in accordance with FCC regulations with an average renewal period of 11 years and 10 years, respectively. See Note 1 for additional information.

As discussed in Note 1, we test our wireless licenses for potential impairment annually or more frequently if impairment indicators are present. In 2021, our quantitative impairment test consisted of comparing the estimated fair value of our aggregate wireless licenses estimated using the Greenfield approach to the aggregated carrying amount of the licenses as of the test date. In 2020 and 2019, we performed a qualitative assessment to determine whether it was more likely than not that the fair value of our wireless licenses was less than the carrying amount. Our annual assessments in 2021, 2020 and 2019 indicated that the fair value of our wireless licenses exceeded the carrying value and, therefore, did not result in impairment.

Our strategy requires significant capital investments primarily to acquire wireless spectrum, put the spectrum into service, provide additional capacity for growth in our networks, invest in the fiber that supports our businesses, evolve and maintain our networks and develop and maintain significant advanced information technology systems and data system capabilities.

Goodwill

Changes in the carrying amount of Goodwill are as follows:

	(dollars in millions)			
	Consumer	Business	Other	Total
Balance at January 1, 2020 ⁽¹⁾	\$ 17,104	\$ 7,269	\$ 16	\$ 24,389
Acquisitions ⁽²⁾	118	254	—	372
Reclassifications, adjustments and other	—	12	—	12
Balance at December 31, 2020 ⁽¹⁾	17,222	7,535	16	24,773
Acquisitions ⁽³⁾	3,818	—	34	3,852
Reclassifications, adjustments and other	2	(20)	(4)	(22)
Balance at December 31, 2021	\$ 21,042	\$ 7,515	\$ 46	\$ 28,603

⁽¹⁾ Goodwill is net of accumulated impairment charges of \$4.8 billion, related to our historical Media reporting unit, which included Verizon Media. On September 1, 2021, we completed the sale of Verizon Media. See Note 3 for additional information.

⁽²⁾ Changes in goodwill due to acquisitions is related to BlueJeans and an other insignificant transaction. See Note 3 for additional information.

⁽³⁾ Changes in goodwill due to acquisitions is related to Tracfone, Bluegrass and other insignificant transactions. See Note 3 for additional information.

In the fourth quarter of 2021, we performed quantitative impairment assessments for our Consumer and Business reporting units. Our 2021 quantitative impairment assessments indicate that the fair values for our Consumer and Business reporting units exceeded their carrying values and therefore did not result in an impairment. We performed qualitative impairment assessments for our Consumer and Business reporting units during the fourth quarters of 2020 and 2019, which indicated that it was more likely than not that the fair values of our Consumer and Business reporting units exceeded their respective carrying values and therefore did not result in impairment.

We performed a quantitative impairment assessment for our historical Media reporting unit in 2019. During the fourth quarter of 2019, consistent with our accounting policy, we applied a combination of a market approach and a discounted cash flow method reflecting current assumptions and inputs, including our revised projections, discount rate and expected growth rates, which resulted in the determination that the fair value of the historical Media reporting unit was less than its carrying amount. As a result, we recorded a non-cash goodwill impairment charge of approximately \$186 million (\$176 million after-tax) in the fourth quarter of 2019 in our consolidated statement of income. The goodwill balance of the historical Media reporting unit had been fully written off as a result of this impairment charge.

Other Intangible Assets

The following table displays the composition of Other intangible assets, net as well as the respective amortization period:

(dollars in millions)

	2021			2020		
At December 31,	Gross ⁽¹⁾ Amount	Accumulated Amortization	Net Amount	Gross Amount	Accumulated Amortization	Net Amount
Customer lists (5 to 13 years)	\$ 4,201	\$ (1,126)	\$ 3,075	\$ 4,021	\$ (1,961)	\$ 2,060
Non-network internal-use software (5 to 7 years)	21,310	(14,897)	6,413	21,685	(15,104)	6,581
Other (4 to 25 years)	2,974	(785)	2,189	1,771	(999)	772
Total	\$ 28,485	\$ (16,808)	\$ 11,677	\$ 27,477	\$ (18,064)	\$ 9,413

⁽¹⁾ Other intangible assets are net of assets disposed as a result of the closing of the Verizon Media sale on September 1, 2021 and includes assets acquired as a result of the acquisition of Tracfone on November 23, 2021. See Note 3 for additional information.

The amortization expense for Other intangible assets was as follows:

Years	(dollars in millions)
2021	\$ 2,087
2020	2,445
2019	2,311

[Table of Contents](#)

Estimated annual amortization expense for Other intangible assets is as follows:

Years	(dollars in millions)
2022	\$ 2,570
2023	2,328
2024	1,998
2025	1,771
2026	1,468

Note 5. Property, Plant and Equipment

The following table displays the details of Property, plant and equipment, which is stated at cost:

		(dollars in millions)	
At December 31,	Lives (years)	2021	2020
Land	-	\$ 673	\$ 608
Buildings and equipment	7 to 45	33,361	32,933
Central office and other network equipment	3 to 50	162,697	160,369
Cable, poles and conduit	7 to 50	60,276	56,814
Leasehold improvements	5 to 20	9,587	9,497
Work in progress	-	13,057	8,576
Furniture, vehicles and other	3 to 20	10,246	10,940
		289,897	279,737
Less accumulated depreciation		190,201	184,904
Property, plant and equipment, net		\$ 99,696	\$ 94,833

Note 6. Leasing Arrangements

We enter into various lease arrangements for network equipment including towers, distributed antenna systems, small cells, real estate and connectivity mediums including dark fiber, equipment, and other various types of assets for use in our operations. Our leases have remaining lease terms ranging from 1 year to 30 years, some of which include options that we can elect to extend the leases term for up to 25 years, and some of which include options to terminate the leases. For the majority of leases entered into during the current period, we have concluded it is not reasonably certain that we would exercise the options to extend the lease or terminate the lease. Therefore, as of the lease commencement date, our lease terms generally do not include these options. We include options to extend the lease when it is reasonably certain that we will exercise that option.

During March 2015, we completed a transaction with American Tower Corporation (American Tower) pursuant to which American Tower acquired the exclusive rights to lease and operate approximately 11,300 of our wireless towers for an upfront payment of \$5.0 billion. We have subleased capacity on the towers from American Tower for a minimum of 10 years at current market rates in 2015, with options to renew. We continue to include the towers in Property, plant and equipment, net in our consolidated balance sheets and depreciate them accordingly. In addition to the rights to lease and operate the towers, American Tower assumed the interest in the underlying ground leases related to these towers. While American Tower can renegotiate the terms of and is responsible for paying the ground leases, we are still the primary obligor for these leases and accordingly, the present value of these ground leases are included in our operating lease right-of-use assets and operating lease liabilities. We do not expect to be required to make ground lease payments unless American Tower defaults, which we determined to be remote.

[Table of Contents](#)

The components of net lease cost were as follows:

		(dollars in millions)		
Years Ended December 31,	Classification	2021	2020	2019
Operating lease cost ⁽¹⁾	Cost of services			
	Selling, general and administrative expense	\$ 5,248	\$ 5,016	\$ 4,746
Finance lease cost:				
Amortization of right-of-use assets	Depreciation and amortization expense	259	309	330
Interest on lease liabilities	Interest expense	34	39	38
Short-term lease cost ⁽¹⁾	Cost of services			
	Selling, general and administrative expense	21	22	40
Variable lease cost ⁽¹⁾	Cost of services			
	Selling, general and administrative expense	307	295	218
Sublease income	Service revenues and other	(193)	(167)	(171)
Total net lease cost		\$ 5,676	\$ 5,514	\$ 5,201
Gain on sale and leaseback transaction, net	Selling, general and administrative expense	\$ —	\$ —	\$ (391)

⁽¹⁾ All operating lease costs, including short-term and variable lease costs, are split between Cost of services and Selling, general and administrative expense in the consolidated statements of income based on the use of the facility or equipment that the rent is being paid on. See Note 1 for additional information. Variable lease costs represent payments that are dependent on a rate or index, or on usage of the asset.

Supplemental disclosure for the statements of cash flows related to operating and finance leases were as follows:

		(dollars in millions)		
Years Ended December 31,		2021	2020	2019
Cash Flows from Operating Activities				
Cash paid for amounts included in the measurement of lease liabilities				
Operating cash flows for operating leases		\$ (4,658)	\$ (4,813)	\$ (4,392)
Operating cash flows for finance leases		(34)	(39)	(38)

Supplemental lease cash flow disclosures				
Operating lease right-of-use assets obtained in exchange for new operating lease liabilities		9,778	3,800	3,510
Right-of-use assets obtained in exchange for new finance lease liabilities		461	562	564

Supplemental disclosures for the balance sheet related to finance leases were as follows:

	(dollars in millions)	
At December 31,	2021	2020
Assets		
Property, plant and equipment, net	\$ 1,046	\$ 1,127
Liabilities		
Debt maturing within one year	\$ 400	\$ 368
Long-term debt	925	916
Total Finance lease liabilities	\$ 1,325	\$ 1,284

The weighted-average remaining lease term and the weighted-average discount rate of our leases were as follows:

At December 31,	2021	2020
Weighted-average remaining lease term (years)		
Operating Leases	9	8
Finance Leases	4	4
Weighted-average discount rate		
Operating Leases	3.1 %	3.5 %
Finance Leases	2.2 %	2.5 %

The Company's maturity analysis of operating and finance lease liabilities as of December 31, 2021 were as follows:

(dollars in millions)

Years	Operating Leases	Finance Leases
2022	\$ 4,383	\$ 402
2023	4,169	344
2024	3,908	275
2025	3,521	155
2026	3,173	150
Thereafter	12,335	69
Total lease payments	31,489	1,395
Less interest	4,427	70
Present value of lease liabilities	27,062	1,325
Less current obligation	3,859	400
Long-term obligation at December 31, 2021	\$ 23,203	\$ 925

As of December 31, 2021, we have contractually obligated lease payments amounting to \$2.0 billion primarily for office facility operating leases and small cell colocation and fiber operating leases that have not yet commenced. We have legally obligated lease payments for various other operating leases that have not yet commenced for which the total obligation was not significant. We have certain rights and obligations for these leases, but have not recognized an operating lease right-of-use asset or an operating lease liability since they have not yet commenced.

Real Estate Transaction

On July 23, 2019, Verizon completed a sale-leaseback transaction for buildings and real estate. We received total gross proceeds of approximately \$1.0 billion. The proceeds received as a result of this transaction were classified in Other, net within Cash Flows from Investing Activities in our consolidated statement of cash flows for the year ended December 31, 2019. The net gain as a result of this transaction is included in the components of net lease cost table above. This lease was included as part of the Media sale and has been assigned to the Apollo Affiliate.

Note 7. Debt

Outstanding long-term debt obligations as of December 31, 2021 and 2020 are as follows:

(dollars in millions)

At December 31,	Maturities	Interest Rates %	2021	2020
Verizon Communications	< 5 Years	0.75 - 5.82	\$ 18,406	\$ 17,936

Plus short-term notes payable			—	320
Total debt			\$ 150,868	\$ 129,062

N/A - not applicable

⁽¹⁾ The debt obligations bore interest at a floating rate based on the Compounded Secured Overnight Financing Rate (SOFR) for the interest period or the London Interbank Offered Rate (LIBOR) plus an applicable interest margin per annum, as applicable. Compounded SOFR is calculated using the SOFR Index published by the Federal Reserve Bank of New York in accordance with the terms of the notes. The Compounded SOFR for the interest period ending in December 2021 was 0.049%. The one-month and three-month LIBOR at December 31, 2021 was 0.101% and 0.209%, respectively.

⁽²⁾ In November 2021, \$141 million of 8.750% GTE LLC notes matured and were repaid. In November 2021, GTE LLC distributed its assets and liabilities to Verizon Communications and was dissolved. Verizon Communications is now the successor obligor on the remaining outstanding balance of \$250 million.

Maturities of long-term debt (secured and unsecured) outstanding, including current maturities, excluding unamortized debt issuance costs, at December 31, 2021 are as follows:

Years	(dollars in millions)
2022	\$ 7,069
2023	6,133
2024	10,014
2025	6,903
2026	8,390
Thereafter	111,725

During 2021, we received \$41.4 billion of proceeds from long-term borrowings, which included \$8.4 billion of proceeds from asset-backed debt transactions. The net proceeds were primarily used to finance the purchase of wireless licenses won in connection with the FCC's auction for C-Band wireless spectrum, Auction 107, and fund certain renewable energy projects. We used \$18.9 billion of cash to repay, redeem and repurchase long-term borrowings and finance lease obligations, including \$4.8 billion to prepay and repay asset-backed, long-term borrowings. The net proceeds of approximately \$1.0 billion from the green bond issued in 2021 are expected to be used to fund certain renewable energy projects.

During 2020, we received \$31.5 billion of proceeds from long-term borrowings, which included \$5.6 billion of proceeds from asset-backed debt transactions. The net proceeds were a result of the liquidity strategy that we pursued at the beginning of the COVID-19 pandemic to maintain a higher cash balance in order to further protect the Company against the economic uncertainties associated with the COVID-19

[Table of Contents](#)

pandemic and to opportunistically raise cash to finance future obligations at a time when we believed that market conditions were favorable. We used \$17.2 billion of cash to repay, redeem and repurchase long-term borrowings and finance lease obligations, including \$7.4 billion to prepay and repay asset-backed, long-term borrowings. The net proceeds from the green bond issued in 2020 have been fully allocated to certain renewable energy projects.

2021 Significant Debt Transactions

Debt or equity financing may be needed to fund additional investments or development activities or to maintain an appropriate capital structure to ensure our financial flexibility.

The following tables show the significant transactions involving the senior unsecured debt securities of Verizon and its subsidiaries that occurred during the year ended December 31, 2021.

Exchange Offers

(dollars in millions)	Principal Amount Exchanged	Principal Amount Issued
Verizon 0.750% - 4.150% notes and floating rate notes, due 2024 - 2026	\$ 4,480	\$ —
Verizon 2.355% notes due 2032 ⁽¹⁾	—	4,664
Total ⁽²⁾	\$ 4,480	\$ 4,664

⁽¹⁾ The principal amount issued in exchange does not include either an insignificant amount of cash paid in lieu of the issuance of fractional new notes or accrued and unpaid interest paid on the old notes accepted for exchange to the date of exchange.

⁽²⁾ The debt exchange offers above meet the criteria to be accounted for as a modification of debt. As a result, the excess of the principal amount of new notes issued over the principal amount of notes exchanged of \$184 million was recorded as a discount to Long-term debt in the consolidated balance sheets.

Tender Offers

(dollars in millions)	Principal Amount Purchased	Cash Consideration ⁽¹⁾
Verizon 4.522% - 5.012% notes due 2048 - 2055	\$ 3,686	\$ 4,919

⁽¹⁾ The total cash consideration includes the tender offer consideration, plus any accrued and unpaid interest to the date of purchase.

Repayments, Redemptions and Repurchases

(dollars in millions)	Principal Repaid/ Redeemed/ Repurchased	Amount Paid ⁽¹⁾
Verizon 2.946% notes due 2022	\$ 713	\$ 730
Verizon 2.450% notes due 2022	794	819
Verizon 5.150% notes due 2023	3,190	3,519
Verizon 4.150% notes due 2024	478	515
GTE LLC 8.750% debentures due 2021	141	141
Open market repurchases of various Verizon and subsidiary notes	2,712	3,354
Total	\$ 8,028	\$ 9,078

⁽¹⁾ Represents amount paid to repay, redeem or repurchase, excluding interest.

Issuances

(dollars in millions)		Principal Amount	
		Issued	Net Proceeds ⁽¹⁾
Verizon 0.750% notes due 2024	\$	1,750	\$ 1,746
Verizon floating rate (Compounded SOFR + 0.500%) notes due 2024		750	748
Verizon 1.450% notes due 2026		2,750	2,737
Verizon floating rate (Compounded SOFR + 0.790%) notes due 2026		750	748
Verizon 2.100% notes due 2028		3,000	2,988
Verizon 2.550% notes due 2031		4,250	4,216
Verizon 3.400% notes due 2041		3,750	3,726
Verizon 3.550% notes due 2051		4,500	4,426
Verizon 3.700% notes due 2061		3,500	3,439
Verizon 2.850% notes due 2041 ⁽²⁾		1,000	991
Verizon 0.375% notes due 2029 ⁽³⁾	€	1,000	1,186
Verizon 0.750% notes due 2032 ⁽³⁾	€	1,000	1,181
Verizon 1.125% notes due 2035 ⁽³⁾	€	750	878
Verizon 2.375% notes due 2028 ⁽³⁾	C\$	1,000	800
Verizon 4.050% notes due 2051 ⁽³⁾	C\$	500	399
Verizon 2.350% notes due 2028 ⁽³⁾	A\$	600	463
Verizon 3.000% notes due 2031 ⁽³⁾	A\$	500	385
Verizon 3.850% notes due 2041 ⁽³⁾	A\$	150	116
Verizon 0.193% bonds due 2028 ⁽³⁾	CHF	375	403
Verizon 0.555% bonds due 2031 ⁽³⁾	CHF	325	349
Total			\$ 31,925

⁽¹⁾ Net proceeds were net of underwriting discounts and other issuance costs. In addition, for securities denominated in a currency other than the U.S. dollar, net proceeds are shown on a U.S. dollar equivalent basis.

⁽²⁾ An amount equal to the net proceeds from this green bond is expected to be used to fund, in whole or in part, certain renewable energy projects, including new and existing investments made by us during the period from December 1, 2020 through the maturity date of the green bond.

⁽³⁾ See Note 9 for additional information on derivative transactions related to the issuances.

Commercial Paper Program

In 2021, we issued and repaid \$3.4 billion in commercial paper. As of December 31, 2021, we had no commercial paper outstanding. These transactions were recorded within Other, net cash flow from financing in our consolidated statements of cash flows.

Asset-Backed Debt

As of December 31, 2021, the carrying value of our asset-backed debt was \$14.2 billion. Our asset-backed debt includes Asset-Backed Notes (ABS Notes) issued to third-party investors (Investors) and loans (ABS Financing Facilities) received from banks and their conduit facilities (collectively, the Banks). Our consolidated asset-backed debt bankruptcy remote legal entities (each, an ABS Entity or collectively, the ABS Entities) issue the debt or are otherwise party to the transaction documentation in connection with our asset-backed debt transactions. Under the terms of our asset-backed debt, Cellco Partnership (Cellco), a wholly-owned subsidiary of Verizon, and certain other affiliates of Verizon (collectively, the Originators) transfer device payment plan agreement receivables to one of the ABS Entities, which in turn transfers such receivables to another ABS Entity that issues the debt. Verizon

entities retain the equity interests and residual interests, as applicable, in the ABS Entities, which represent the rights to all funds not needed to make required payments on the asset-backed debt and other related payments and expenses.

Our asset-backed debt is secured by the transferred device payment plan agreement receivables and future collections on such receivables. The device payment plan agreement receivables transferred to the ABS Entities and related assets, consisting primarily of restricted cash, will only be available for payment of asset-backed debt and expenses related thereto, payments to the Originators in respect of additional transfers of device payment plan agreement receivables, and other obligations arising from our asset-backed debt transactions, and will not be available to pay other obligations or claims of Verizon's creditors until the associated asset-backed debt and other obligations are satisfied. The Investors or Banks, as applicable, which hold our asset-backed debt have legal recourse to the assets securing the debt, but do not have any recourse to Verizon with respect to the payment of principal and interest on the debt. Under a parent support agreement, Verizon has agreed to guarantee certain of the payment obligations of Cellco and the Originators to the ABS Entities.

Cash collections on the device payment plan agreement receivables collateralizing our asset-backed debt securities are required at certain specified times to be placed into segregated accounts. Deposits to the segregated accounts are considered restricted cash and are included in Prepaid expenses and other and Other assets in our consolidated balance sheets.

Proceeds from our asset-backed debt transactions are reflected in Cash flows from financing activities in our consolidated statements of cash flows. The asset-backed debt issued and the assets securing this debt are included in our consolidated balance sheets.

[Table of Contents](#)

ABS Notes

During the year ended December 31, 2021, we completed the following ABS Notes transactions:

(dollars in millions)	Interest Rates %	Expected Weighted- average Life to Maturity (in years)	Principal Amount Issued
May 2021			
A Senior class notes	0.500	2.99	\$ 1,500
B Junior class notes	0.690	2.99	119
C Junior class notes	0.890	2.99	81
May 2021 total			1,700
November 2021			
A Senior class notes	0.990	2.96	1,247
B Junior class notes	1.280	2.96	76
C Junior class notes	1.380	2.96	77
November 2021 total			1,400
Total			\$ 3,100

Under the terms of each series of ABS Notes, there is a revolving period that is two years or up to three years, as applicable, during which we may transfer additional receivables to the ABS Entity. During the year ended December 31, 2021, we made aggregate principal repayments of \$3.3 billion on ABS Notes that have entered the amortization period, including principal payments made in connection with clean-up redemptions. During the year ended December 31, 2020, we made aggregate principal repayments of \$3.4 billion on ABS Notes that had entered the amortization period, including principal payments made in connection with clean-up redemptions. In January 2022, we made a principal payment of \$179 million in connection with a clean-up redemption.

In January 2022, we issued \$1.7 billion aggregate principal amount of senior and junior ABS Notes through an ABS Entity.

ABS Financing Facilities

In March 2021, we borrowed an additional \$1.0 billion under the loan agreement outstanding in connection with the ABS Financing Facility that we originally entered into in 2016 and previously amended and restated in 2019 and 2020 (2020 ABS Financing Facility). In May 2021, the aggregate outstanding balance of \$1.5 billion was fully repaid and there was no outstanding balance under the 2020 ABS Financing Facility as of December 31, 2021.

In December 2021, we entered into an ABS financing facility with a number of financial institutions (2021 ABS Financing Facility). Two loan agreements were entered into in connection with the 2021 ABS Financing Facility in December 2021. Under the terms of the 2021 ABS Financing Facility, the financial institutions make advances under asset-backed loans backed by device payment plan agreement receivables of both Consumer customers and Business customers. Two loan agreements are outstanding in connection with the 2021 ABS Financing Facility, one with a final maturity date in December 2025 and the other in December 2026, and each loan agreement bears interest at floating rates. There is a one or two year revolving period, as set forth in the applicable loan agreement, which may be extended with the approval of the financial institutions. Under the loan agreements, we have the right to prepay all or a portion of the advances at any time without penalty, but in certain cases, with breakage costs. Subject to certain conditions, we may also remove receivables from the ABS Entity. In December 2021, we borrowed \$4.3 billion under the loan agreements. The aggregate outstanding balance under the 2021 ABS Financing Facility was \$4.3 billion as of

December 31, 2021. In January 2022, we prepaid an aggregate of \$515 million of the two loans outstanding under the 2021 loan agreement.

Variable Interest Entities

The ABS Entities meet the definition of a VIE for which we have determined that we are the primary beneficiary as we have both the power to direct the activities of the entity that most significantly impact the entity's performance and the obligation to absorb losses or the right to receive benefits of the entity. Therefore, the assets, liabilities and activities of the ABS Entities are consolidated in our financial results and are included in amounts presented on the face of our consolidated balance sheets.

[Table of Contents](#)

The assets and liabilities related to our asset-backed debt arrangements included in our consolidated balance sheets were as follows:

	At December 31,	At December 31,
(dollars in millions)	2021	2020
Assets		
Accounts receivable, net	\$ 10,705	\$ 9,257
Prepaid expenses and other	1,094	1,128
Other assets	5,455	2,950
Liabilities		
Accounts payable and accrued liabilities	10	8
Debt maturing within one year	5,024	4,191
Long-term debt	9,178	6,413

See Note 8 for additional information on device payment plan agreement receivables used to secure asset-backed debt.

Long-Term Credit Facilities

			At December 31, 2021		
(dollars in millions)	Maturities	Facility Capacity	Unused Capacity	Principal Amount Outstanding	
Verizon revolving credit facility ⁽¹⁾	2024	\$ 9,500	\$ 9,418	N/A	
Various export credit facilities ⁽²⁾	2024 - 2029	7,000	—	\$ 4,676	
Total		\$ 16,500	\$ 9,418	\$ 4,676	

N/A - not applicable

⁽¹⁾ The revolving credit facility does not require us to comply with financial covenants or maintain specified credit ratings, and it permits us to borrow even if our business has incurred a material adverse change. The revolving credit facility provides for the issuance of letters of credit.

⁽²⁾ During both 2021 and 2020, we drew down \$1.0 billion from these facilities, respectively. These credit facilities are used to finance equipment-related purchases. Borrowings under certain of these facilities amortize semi-annually in equal installments up to the applicable maturity dates. Maturities reflect maturity dates of principal amounts outstanding. Any amounts borrowed under these facilities and subsequently repaid cannot be reborrowed.

In November 2021, we repaid \$500 million under an export credit facility entered into in July 2017.

Non-Cash Transactions

During the years ended December 31, 2021, 2020 and 2019, we financed, primarily through alternative financing arrangements, the purchase of approximately \$461 million, \$1.7 billion, and \$563 million, respectively, of long-lived assets consisting primarily of network equipment. As of December 31, 2021 and 2020, \$1.3 billion and \$1.6 billion, respectively, relating to these financing arrangements, including those entered into in prior years and liabilities assumed through acquisitions, remained outstanding. These purchases are non-cash financing activities and therefore are not reflected within Capital expenditures in our consolidated statements of cash flows.

Debt Extinguishment Losses

During the years ended December 31, 2021, 2020 and 2019, we recorded debt extinguishment losses of \$3.6 billion, \$121 million and \$3.7 billion, respectively. The losses are recorded in Other income (expense), net in our consolidated statements of income. The total losses are reflected as an adjustment to reconcile net income to Net cash used in operating activities and the portion of the losses representing cash payments are reflected within Net cash used in financing activities in our consolidated statements of cash flows.

Guarantees

We guarantee the debentures of our operating telephone company subsidiaries. As of December 31, 2021, \$765 million aggregate principal amount of these obligations remained outstanding. Each guarantee will remain in place for the life of the obligation unless terminated pursuant to its terms, including the operating telephone company no longer being a wholly-owned subsidiary of Verizon.

Debt Covenants

We and our consolidated subsidiaries are in compliance with all of our restrictive covenants in our debt agreements.

Note 8. Device Payment Plan Agreement and Wireless Service Receivables

The following table presents information about accounts receivable, net of allowances, recorded in our consolidated balance sheet:

	At December 31, 2021			
(dollars in millions)	Device payment plan agreement	Wireless service	Other receivables ⁽¹⁾	Total
Accounts receivable	\$ 13,287	\$ 4,872	\$ 6,583	\$ 24,742
Less Allowance for credit losses	504	130	262	896
Accounts receivable, net of allowance	\$ 12,783	\$ 4,742	\$ 6,321	\$ 23,846

⁽¹⁾ Other receivables primarily include wireline receivables and other receivables, the allowances for which are individually insignificant.

Under the Verizon device payment program, our eligible wireless customers purchase wireless devices under a device payment plan agreement. Customers that activate service on devices purchased under the device payment program pay lower service fees as compared to those under our fixed-term service plans, and their device payment plan charge is included on their wireless monthly bill. We no longer offer Consumer customers new fixed-term, subsidized service plans for devices; however, we continue to offer subsidized plans to our Business customers. We also continue to service existing plans for customers who have not yet purchased and activated devices under the Verizon device payment program.

Wireless Device Payment Plan Agreement Receivables

The following table displays device payment plan agreement receivables, net, recognized in our consolidated balance sheets:

	(dollars in millions)	
At December 31,	2021	2020
Device payment plan agreement receivables, gross	\$ 21,303	\$ 17,959
Unamortized imputed interest	(358)	(453)
Device payment plan agreement receivables, at amortized cost	20,945	17,506
Allowance ⁽¹⁾	(759)	(940)
Device payment plan agreement receivables, net	\$ 20,186	\$ 16,566
Classified in our consolidated balance sheets:		
Accounts receivable, net	\$ 12,783	\$ 11,601
Other assets	7,403	4,965
Device payment plan agreement receivables, net	\$ 20,186	\$ 16,566

⁽¹⁾ Includes allowance for both short-term and long-term device payment plan agreement receivables.

Included in our device payment plan agreement receivables, net at December 31, 2021 and December 31, 2020, are net device payment plan agreement receivables of \$16.0 billion and \$12.1 billion, respectively, which have been transferred to ABS Entities and continue to be reported in our consolidated balance sheets. See Note 7 for additional information. We believe the carrying value of these receivables approximate their fair value using a Level 3 expected cash flow model.

For indirect channel wireless contracts with customers, we impute risk adjusted interest on the device payment plan agreement receivables. We record the imputed interest as a reduction to the related accounts receivable. Interest income, which is included within Service revenues and other in our consolidated statements of income, is recognized over the financed device payment term.

Promotions

In connection with certain device payment plan agreements, we may offer a promotion to allow our customers to upgrade to a new device after paying down a certain specified portion of the required device payment plan agreement amount as well as trading in their device in good working order. When a customer enters into a device payment plan agreement with the right to upgrade to a new device, we account for this trade-in right as a guarantee obligation. We recognize a liability measured at fair value for the customer's right to trade in the device which is determined by considering several factors, including the weighted-average selling prices obtained in recent resales of similar devices eligible for trade-in. At December 31, 2021 and December 31, 2020, the amount of the guarantee liability was \$77 million and insignificant, respectively.

We may offer certain promotions that allow a customer to trade in their owned device in connection with the purchase of a new device. Under these types of promotions, the customer receives a credit for the value of the trade-in device. At December 31, 2021 and December 31, 2020, the amount of trade-in liability was \$366 million and \$70 million, respectively.

In addition, we may provide the customer with additional future billing credits that will be applied against the customer's monthly bill as long as service is maintained. These future billing credits are accounted for as consideration payable to a customer and are included in the determination of total transaction price, resulting in a contract liability.

[Table of Contents](#)

Device payment plan agreement receivables, net, does not reflect the trade-in liability, additional future credits or the guarantee liability.

Origination of Device Payment Plan Agreements

When originating device payment plan agreements, we use internal and external data sources to create a credit risk score to measure the credit quality of a customer and to determine eligibility for the device payment program. Verizon's experience has been that the payment attributes of longer tenured customers are highly predictive for estimating their reliability to make future payments. Customers with longer tenures tend to exhibit similar risk characteristics to other customers with longer tenures, and receivables due from customers with longer tenures tend to perform better than receivables from customers that have not previously been Verizon customers. As a result of this experience, we make initial lending decisions based upon whether the customers are "established customers" or "short-tenured customers." If a Consumer customer has been a customer for 45 days or more, or if a Business customer has been a customer for 12 months or more, the customer is considered an "established customer." For established customers, the credit decision and ongoing credit monitoring processes rely on a combination of internal and external data sources. If a Consumer customer has been a customer less than 45 days, or a Business customer has been a customer for less than 12 months, the customer is considered a "short-tenured customer." For short-tenured customers, the credit decision and credit monitoring processes rely more heavily on external data sources.

Internal data and/or external credit data are obtained from the credit reporting agencies, if available, to create a custom credit risk score for Consumer customers. The custom credit risk score is generated automatically from the applicant's credit data using proprietary custom credit models. The credit risk score measures the likelihood that the potential customer will become severely delinquent and be disconnected for non-payment. For a small portion of short-tenured customer applications, a traditional credit report is not available from one of the national credit reporting agencies because the potential customer does not have sufficient credit history. In those instances, alternative credit data is used for the risk assessment. For Business customers, we also verify the existence of the business with external data sources.

Based on the custom credit risk score, we assign each customer a credit class, each of which has specified offers of credit. This includes an account level spending limit and a maximum amount of credit allowed per device for Consumer customers or a required down payment percentage for Business customers.

Credit Quality Information

Subsequent to origination, we assess indicators for the quality of our wireless device payment plan agreement portfolio using two models, one for new customers and one for existing customers. The model for new customers pools all Consumer and Business wireless customers based on less than 210 days as "new customers." The model for existing customers pools all Consumer and Business wireless customers based on 210 days or more as "existing customers."

The following table presents device payment plan agreement receivables, at amortized cost, as of December 31, 2021, by credit quality indicator and year of origination:

	Year of Origination					
			Prior to 2020			
(dollars in millions)	2021	2020		(1)		Total
New customers	\$ 2,545	\$ 589	\$ 10	\$		3,144
Existing customers	13,983	3,736	82			17,801
Total	\$ 16,528	\$ 4,325	\$ 92	\$		20,945

⁽¹⁾ Includes accounts that have been suspended at a point in time.

The data presented in the table above was last updated on December 31, 2021.

We assess indicators for the quality of our wireless service receivables portfolio as one overall pool. As of December 31, 2021, wireless service receivables, at amortized cost, originating in 2021 and 2020 were \$4.8 billion and an insignificant amount, respectively.

Allowance for Credit Losses

The credit quality indicators are used in determining the estimated amount and the timing of expected credit losses for the device payment plan agreement and wireless service receivables portfolios.

For device payment plan agreement receivables, we record bad debt expense based on a default and loss calculation using our proprietary loss model. The expected loss rate is determined based on customer credit scores and other qualitative factors as noted above. The loss rate is assigned individually on a customer by customer basis and the custom credit scores are then aggregated by vintage and used in our proprietary loss model to calculate the weighted-average loss rate used for determining the allowance balance.

We monitor the collectability of our wireless service receivables as one overall pool. Wireline service receivables are disaggregated and pooled by the following customer groups: consumer, small and medium business, global enterprise, public sector and wholesale. For wireless service receivables and wireline consumer and small and medium business receivables, the allowance is calculated based on a 12 month rolling average write-off balance multiplied by the average life-cycle of an account from billing to write-off. The risk of loss is assessed over the contractual life of the receivables and is adjusted based on the historical loss amounts for current and future conditions based on management's qualitative considerations. For global enterprise, public sector and wholesale wireline receivables, the allowance for credit losses is based on historical write-off experience and individual customer credit risk, if applicable.

[Table of Contents](#)

Activity in the allowance for credit losses by portfolio segment of receivables were as follows:

(dollars in millions)	Device Payment Plan Agreement Receivables ⁽¹⁾	Wireless Service Plan Receivables
Balance at January 1, 2021	\$ 940	\$ 262
Current period provision for expected credit losses	434	185
Write-offs charged against the allowance	(653)	(383)
Recoveries collected	38	66
Balance at December 31, 2021	\$ 759	\$ 130

⁽¹⁾ Includes allowance for both short-term and long-term device payment plan agreement receivables.

We monitor delinquency and write-off experience based on the quality of our device payment plan agreement and wireless service receivables portfolios. The extent of our collection efforts with respect to a particular customer are based on the results of our proprietary custom internal scoring models that analyze the customer's past performance to predict the likelihood of the customer falling further delinquent. These custom scoring models assess a number of variables, including origination characteristics, customer account history and payment patterns. Since our customers' behaviors may be impacted by general economic conditions, we analyzed whether changes in macroeconomic conditions impact our credit loss experience and have concluded that our credit loss estimates are generally not materially impacted by reasonable and supportable forecasts of future economic conditions. Based on the score derived from these models, accounts are grouped by risk category to determine the collection strategy to be applied to such accounts. For device payment plan agreement receivables and wireless service receivables, we consider an account to be delinquent and in default status if there are unpaid charges remaining on the account on the day after the bill's due date. The risk class determines the speed and severity of the collections effort including initiatives taken to facilitate customer payment.

The balance and aging of the device payment plan agreement receivables, at amortized cost, were as follows:

(dollars in millions)	At December 31, 2021
Unbilled	\$ 19,777
Billed:	
Current	963
Past due	205
Device payment plan agreement receivables, at amortized cost	\$ 20,945

Note 9. Fair Value Measurements and Financial Instruments

Recurring Fair Value Measurements

The following table presents the balances of assets and liabilities measured at fair value on a recurring basis as of December 31, 2021:

	(dollars in millions)			
	Level 1 ⁽¹⁾	Level 2 ⁽²⁾	Level 3 ⁽³⁾	Total
Assets:				
Prepaid expenses and other:				
Fixed income securities	\$ —	\$ 18	\$ —	\$ 18
Interest rate swaps	—	188	—	188

⁽¹⁾ Quoted prices in active markets for identical assets or liabilities.

⁽²⁾ Observable inputs other than quoted prices in active markets for identical assets and liabilities.

⁽³⁾ Unobservable pricing inputs in the market.

[Table of Contents](#)

Certain of our equity investments do not have readily determinable fair values and are excluded from the tables above. Such investments are measured at cost, less any impairment, plus or minus changes resulting from observable price changes in orderly transactions for an identical or similar investment of the same issuer and are included in Investments in unconsolidated businesses in our consolidated balance sheets. As of December 31, 2021 and December 31, 2020, the carrying amount of our investments without readily determinable fair values were \$808 million and \$402 million, respectively. During 2021, there were approximately \$66 million of adjustments due to observable price changes and insignificant impairment charges. Cumulative adjustments due to observable price changes and impairment charges were approximately \$143 million and \$63 million, respectively.

Verizon has a liability for contingent consideration related to its acquisition of Tracfone, completed in November 2021. The fair value is calculated using a probability-weighted discounted cash flow model and represents a Level 3 measurement. Level 3 instruments include valuation based on unobservable inputs reflecting our own assumptions, consistent with reasonably available assumptions made by other market participants. Subsequent to the acquisition date, at each reporting date, the contingent consideration liability is remeasured to fair value with changes recorded within Selling, general and administrative expense in our consolidated statements of income.

Fixed income securities consist primarily of investments in municipal bonds. The valuation of the fixed income securities are based on the quoted prices for similar assets in active markets or identical assets in inactive markets or models that apply inputs from observable market data. The valuation determines that these securities are classified as Level 2.

Derivative contracts are valued using models based on readily observable market parameters for all substantial terms of our derivative contracts and thus are classified within Level 2. We use mid-market pricing for fair value measurements of our derivative instruments. Our derivative instruments are recorded on a gross basis.

We recognize transfers between levels of the fair value hierarchy as of the end of the reporting period.

Fair Value of Short-term and Long-term Debt

The fair value of our debt is determined using various methods, including quoted prices for identical debt instruments, which is a Level 1 measurement, as well as quoted prices for similar debt instruments with comparable terms and maturities, which is a Level 2 measurement.

The fair value of our short-term and long-term debt, excluding finance leases, was as follows:

(dollars in millions)	Fair Value				
	Carrying Amount	Level 1	Level 2	Level 3	Total
At December 31, 2020	\$ 127,778	\$ 103,967	\$ 52,785	\$ —	\$ 156,752
At December 31, 2021	149,543	106,599	62,606	—	169,205

Derivative Instruments

We enter into derivative transactions primarily to manage our exposure to fluctuations in foreign currency exchange rates and interest rates. We employ risk management strategies, which may include the use of a variety of derivatives including interest rate swaps, cross currency swaps, forward starting interest rate swaps, treasury rate locks, interest rate caps, swaptions and foreign exchange forwards. We do not hold derivatives for trading purposes.

The following table sets forth the notional amounts of our outstanding derivative instruments:

		(dollars in millions)	
At December 31,		2021	2020
Interest rate swaps	\$	19,779	\$ 17,768
Cross currency swaps		32,502	26,288
Forward starting interest rate swaps		1,000	2,000
Foreign exchange forwards		932	1,405

[Table of Contents](#)

The following tables summarize the activities of our designated derivatives:

	(dollars in millions)	
At December 31,	2021	2020
Interest Rate Swaps:		
Notional value entered into	\$ 6,050	\$ 10,168
Notional value settled	4,018	9,488
Ineffective portion gain recognized in Interest expense	2	46
Cross Currency Swaps:		
Notional value entered into	6,214	4,817
Notional value settled	—	1,600
Pre-tax gain (loss) recognized in Other comprehensive loss	(2,285)	1,810
Forward Starting Interest Rate Swaps:		
Notional value entered into	—	—
Notional value settled	1,000	1,000
Pre-tax gain (loss) recognized in Other comprehensive loss	258	(486)
Treasury Rate Locks:		
Notional value entered into	4,650	5,500
Notional value settled	4,650	5,500
Pre-tax gain (loss) recognized in Other comprehensive loss	251	(41)

	(dollars in millions)	
At December 31,	2021	2020
Other, net Cash Flows from Operating Activities:		
Cash received for settlement of interest rate swaps	\$ 107	\$ 764
Cash paid for settlement of forward starting interest rate swaps	(237)	(293)
Cash received (paid) for settlement of treasury rate locks	251	(41)

Interest Rate Swaps

We enter into interest rate swaps to achieve a targeted mix of fixed and variable rate debt. We principally receive fixed rates and pay variable rates, resulting in a net increase or decrease to Interest expense. These swaps are designated as fair value hedges and hedge against interest rate risk exposure of designated debt issuances. We record the interest rate swaps at fair value in our consolidated balance sheets as assets and liabilities. Changes in the fair value of the interest rate swaps are recorded to Interest expense, which are offset by changes in the fair value of the hedged debt due to changes in interest rates.

In January 2022, we entered into interest rate swaps with a total notional value of \$500 million.

The following amounts were recorded in Long-term debt in our consolidated balance sheets related to cumulative basis adjustments for fair value hedges:

At December 31,		2021	(do
Carrying amount of hedged liabilities	\$	20,027	\$
Cumulative amount of fair value hedging adjustment included in the carrying amount of the hedged liabilities		(113)	
Cumulative amount of fair value hedging adjustment remaining for which hedge accounting has been discontinued		575	

Cross Currency Swaps

We have entered into cross currency swaps designated as cash flow hedges to exchange our British Pound Sterling, Euro, Swiss Franc, Canadian Dollar and Australian Dollar-denominated cash flows into U.S. dollars and to fix our cash payments in U.S. dollars, as well as to mitigate the impact of foreign currency transaction gains or losses. A portion of the gains recognized in Other comprehensive income (loss) was reclassified to Other income (expense), net to offset the related pre-tax foreign currency transaction gain or loss on the underlying hedged item. See Note 14 for additional information.

Forward Starting Interest Rate Swaps

We have entered into forward starting interest rate swaps designated as cash flow hedges in order to manage our exposure to interest rate changes on future forecasted transactions. We hedge our exposure to the variability in future cash flows based on the expected maturities of the related forecasted debt issuance. We recognize gains and losses resulting from interest rate movements in Other comprehensive income (loss).

Treasury Rate Locks

We enter into treasury rate locks to mitigate our interest rate risk. We recognize gains and losses resulting from interest rate movements in Other comprehensive income (loss).

Net Investment Hedges

We have designated certain foreign currency debt instruments as net investment hedges to mitigate foreign exchange exposure related to non-U.S. dollar net investments in certain foreign subsidiaries against changes in foreign exchange rates. In March 2021, we de-designated the existing net investment hedge and designated a new net investment hedge using a different Euro-denominated note. The notional amount of Euro-denominated debt designated as a net investment hedge was €750 million as of both December 31, 2021 and 2020.

Undesignated Derivatives

We also have the following derivative contracts which we use as economic hedges but for which we have elected not to apply hedge accounting.

The following table summarizes the activity of our derivatives not designated in hedging relationships:

	(dollars in millions)	
At December 31,	2021	2020
Foreign Exchange Forwards:		
Notional value entered into	\$ 12,604	\$ 14,030
Notional value settled	13,077	13,755
Pre-tax gain (loss) recognized in Other income (expense), net	(62)	142
Treasury Rate Locks:		
Notional value entered into	—	1,625
Notional value settled	—	1,625
Pre-tax gain recognized in Interest expense	—	15
Swaptions:		
Notional value sold	2,000	—
Notional value settled	2,000	—
Pre-tax gain recognized in Interest expense	11	—

Foreign Exchange Forwards

We enter into British Pound Sterling and Euro foreign exchange forwards to mitigate our foreign exchange rate risk related to non-functional currency denominated monetary assets and liabilities of international subsidiaries.

Treasury Rate Locks

We enter into treasury rate locks to mitigate our interest rate risk.

Swaptions

We enter into swaptions to achieve a targeted mix of fixed and variable rate debt.

In January 2022, we sold payer swaptions with a notional amount of \$1.0 billion to enter into future pay-floating interest rate swaps indexed to SOFR that were not designated in hedging relationships.

Concentrations of Credit Risk

Financial instruments that subject us to concentrations of credit risk consist primarily of temporary cash investments, short-term and long-term investments, trade receivables, including device payment plan agreement receivables, certain notes receivable, including lease receivables, and derivative contracts.

Counterparties to our derivative contracts are major financial institutions with whom we have negotiated derivatives agreements (ISDA master agreements) and credit support annex (CSA) agreements which provide rules for collateral exchange. The CSA agreements contain rating based thresholds such that we or our counterparties may be required to hold or post collateral based upon changes in outstanding positions as compared to established thresholds and changes in credit ratings. We do not offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments recognized at fair value. At December 31, 2021, we held and posted \$0.1 billion and an insignificant amount, respectively, of collateral related to derivative contracts under collateral exchange agreements, which were recorded as Other current liabilities and Prepaid expenses and other, respectively, in our consolidated balance sheet. At December 31, 2020, we held \$0.2 billion of collateral related to derivative contracts under collateral exchange arrangements, which were recorded as Other current liabilities in our consolidated balance sheet. While we may be exposed to credit losses due to the nonperformance of our counterparties, we consider the risk

remote and do not expect that any such nonperformance would result in a significant effect on our results of operations or financial condition due to our diversified pool of counterparties.

Note 10. Stock-Based Compensation

Verizon Long-Term Incentive Plan

In May 2017, Verizon's shareholders approved the 2017 Long-Term Incentive Plan (the 2017 Plan) and terminated Verizon's authority to grant new awards under the Verizon 2009 Long-Term Incentive Plan (the 2009 Plan). The 2017 Plan provides for broad-based equity grants to employees, including executive officers, and permits the granting of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance stock units and other awards. Upon approval of the 2017 Plan, Verizon reserved for issuance under the 2017 Plan the number of shares that were remaining but not issued under the 2009 Plan. Shares subject to outstanding awards under the 2009 Plan that expire, are canceled or otherwise terminated will also be available for awards under the 2017 Plan. As of December 31, 2021, 76 million shares are reserved for future issuance under the 2017 Plan.

Restricted Stock Units

Restricted Stock Units (RSUs) granted under the 2017 Plan generally vest in three equal installments on each anniversary of the grant date. The RSUs that are paid in stock upon vesting and are thus classified as equity awards are measured using the grant date fair value of Verizon common stock and are not remeasured at the end of each reporting period. The RSUs that are settled in cash are classified as liability awards and the liability is measured at its fair value at the end of each reporting period. All RSUs granted under the 2017 Plan have dividend equivalent units (DEUs), which will be paid to participants if, and only to the extent the applicable RSU award vests, and is paid at the time the RSU award is paid, and in the same proportion as the RSU award. In 2020, Verizon announced a broad-based program that provides for the annual award of cash-settled RSUs under the 2017 Plan to all full-time and part-time employees who meet eligibility requirements on the annual grant date.

We estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. We use historical data to estimate forfeitures and recognize that estimated compensation cost of restricted stock units, net of estimated forfeitures, on a straight-line basis over the vesting period.

Performance Stock Units

The 2017 Plan also provides for grants of Performance Stock Units (PSUs) that generally vest at the end of the third year after the grant. As defined by the 2017 Plan, the Human Resources Committee of the Board of Directors determines the number of PSUs a participant earns based on the extent to which the corresponding performance goals have been achieved over the three-year performance cycle. The PSUs that are paid in stock upon vesting and are classified as equity awards are measured using the grant date fair value of Verizon common stock and are not remeasured at the end of each reporting period. The PSUs that are settled in cash and are classified as liability awards are measured at its fair value at the end of each reporting period and, therefore, will fluctuate based on the price of Verizon common stock as well as performance relative to the targets. All PSUs granted under the 2017 Plan have dividend equivalent units (DEUs), which will be paid to participants if, and only to the extent the applicable PSU award vests, and is paid at the time that PSU award is paid, and in the same proportion as the PSU award. The granted and cancelled activity for the PSU award includes adjustments for the performance goals achieved.

The following table summarizes Verizon's Restricted Stock Unit and Performance Stock Unit activity:

(shares in thousands)	Restricted Stock Units		Performance Stock Units	
	Equity Awards	Liability Awards	Equity Awards	Liability Awards
Outstanding January 1, 2019	10,577	19,926	—	16,905
Granted	3,169	5,814	—	4,593
Payments	(6,397)	(9,429)	—	(3,255)
Cancelled/Forfeited	(90)	(1,598)	—	(2,692)
Outstanding December 31, 2019	7,259	14,713	—	15,551
Granted	3,638	15,161	4,358	1,389
Payments	(3,814)	(9,311)	—	(7,160)
Cancelled/Forfeited	(182)	(1,004)	(116)	(143)
Outstanding December 31, 2020	6,901	19,559	4,242	9,637

Outstanding December 31, 2021	6,779	17,290	8,640	4,465

As of December 31, 2021, unrecognized compensation expense related to the unvested portion of Verizon's RSUs and PSUs was approximately \$773 million and is expected to be recognized over approximately 2 years.

The equity awards granted in 2021 and 2020 have weighted-average grant date fair values of \$55.39 and \$57.38 per unit, respectively. During 2021, 2020 and 2019, we paid \$986 million, \$961 million and \$737 million, respectively, to settle RSUs and PSUs classified as liability awards.

Stock-Based Compensation Expense

After-tax compensation expense for stock-based compensation related to RSUs and PSUs described above included in Net income attributable to Verizon was \$625 million, \$780 million and \$872 million for 2021, 2020 and 2019, respectively.

Note 11. Employee Benefits

We maintain non-contributory defined benefit pension plans for certain employees. In addition, we maintain postretirement health care and life insurance plans for certain retirees and their dependents, which are both contributory and non-contributory, and include a limit on our share of the cost for certain current and future retirees. In accordance with our accounting policy for pension and other postretirement benefits, operating expenses include service costs associated with pension and other postretirement benefits while other credits and/or charges based on actuarial assumptions, including projected discount rates, an estimated return on plan assets, and impact from health care trend rates are reported in Other income (expense), net. These estimates are updated in the fourth quarter to reflect actual return on plan assets and updated actuarial assumptions or upon a remeasurement event. The adjustment is recognized in the income statement during the fourth quarter or upon a remeasurement event pursuant to our accounting policy for the recognition of actuarial gains and losses.

Pension and Other Postretirement Benefits

Pension and other postretirement benefits for certain employees are subject to collective bargaining agreements. Modifications in benefits have been bargained from time to time, and we may also periodically amend the benefits in the management plans. The following tables summarize benefit costs, as well as the benefit obligations, plan assets, funded status and rate assumptions associated with pension and postretirement health care and life insurance benefit plans.

Obligations and Funded Status

	(dollars in millions)			
	Pension		Health Care and Life	
At December 31,	2021	2020	2021	2020

Prior service cost (benefit)	\$ 402	\$ 463	\$ (1,889)	\$ (2,783)
Total	\$ 402	\$ 463	\$ (1,889)	\$ (2,783)

[Table of Contents](#)

The accumulated benefit obligation for all defined benefit pension plans was \$20.1 billion and \$22.2 billion at December 31, 2021 and 2020, respectively.

Actuarial gain/loss, Net

The net actuarial gain in 2021 is primarily the result of a \$1.1 billion gain due to an increase in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 2.6% at December 31, 2020 to a weighted-average of 2.9% at December 31, 2021.

The net actuarial loss in 2020 is primarily the result of a \$3.2 billion loss due to a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 3.3% at December 31, 2019 to a weighted-average of 2.6% at December 31, 2020.

Plan Amendments

The reclassifications from the amounts recorded in Accumulated other comprehensive income (loss) as a result of collective bargaining agreements and plan amendments made in 2016, 2017 and 2018 resulted in a net decrease to net periodic benefit cost and net increase to pre-tax income of approximately \$708 million during 2021, 2020 and 2019.

Information for pension plans with an accumulated benefit obligation in excess of plan assets follows:

		(dollars in millions)	
At December 31,		2021	2020
Accumulated benefit obligation	\$	456	\$ 22,116
Fair value of plan assets		—	20,064

Information for pension plans with a projected benefit obligation in excess of plan assets follows:

		(dollars in millions)	
At December 31,		2021	2020
Projected benefit obligation	\$	456	\$ 22,178
Fair value of plan assets		—	20,064

Net Periodic Benefit Cost (Income)

The following table summarizes the components of net periodic benefit cost (income) related to our pension and postretirement health care and life insurance plans:

(dollars in millions)

Years Ended December 31,	Pension			Health Care and Life		
	2021	2020	2019	2021	2020	2019
Service cost - Cost of services	\$ 247	\$ 245	\$ 202	\$ 94	\$ 89	\$ 78
Service cost - Selling, general and administrative expense	35	60	45	18	21	18
Service cost	282	305	247	112	110	96
Amortization of prior service cost (credit)	61	61	61	(894)	(966)	(971)
Expected return on plan assets	(1,234)	(1,186)	(1,130)	(22)	(28)	(37)
Interest cost	394	505	695	289	429	629
Remeasurement loss (gain), net	(1,419)	744	606	(960)	866	(480)
Other components	(2,198)	124	232	(1,587)	301	(859)
Total	\$ (1,916)	\$ 429	\$ 479	\$ (1,475)	\$ 411	\$ (763)

The service cost component of net periodic benefit cost (income) is recorded in Cost of services and Selling, general and administrative expense in the consolidated statements of income while the other components, including mark-to-market adjustments, if any, are recorded in Other income (expense), net.

[Table of Contents](#)

Other pre-tax changes in plan assets and benefit obligations recognized in Other comprehensive (income) loss are as follows:

(dollars in millions)

	Pension			Health Care and Life		
At December 31,	2021	2020	2019	2021	2020	2019
Prior service cost (benefit)	\$ —	\$ —	\$ —	\$ —	\$ —	\$ (22)
Reversal of amortization items						
Prior service cost (benefit)	(61)	(61)	(61)	894	966	971
Total recognized in Other comprehensive loss (income) (pre-tax)	\$ (61)	\$ (61)	\$ (61)	\$ 894	\$ 966	\$ 949

Assumptions

The weighted-average assumptions used in determining benefit obligations follow:

	Pension		Health Care and Life	
At December 31,	2021	2020	2021	2020
Discount Rate	3.00 %	2.60 %	2.90 %	2.50 %
Rate of compensation increases	3.00 %	3.00 %	N/A	N/A

N/A - not applicable

The weighted-average assumptions used in determining net periodic cost follow:

	Pension			Health Care and Life		
At December 31,	2021	2020	2019	2021	2020	2019
Discount rate in effect for determining service cost	3.20 %	3.30 %	4.60 %	3.00 %	3.50 %	4.60 %
Discount rate in effect for determining interest cost	1.90	2.40	3.80	1.80	2.80	4.00
Expected return on plan assets	6.50	6.50	6.80	4.20	4.50	4.30
Rate of compensation increases	3.00	3.00	3.00	N/A	N/A	N/A

N/A - not applicable

In determining our pension and other postretirement benefit obligations, we used a weighted-average discount rate of 2.9% in 2021. The rates were selected to approximate the composite interest rates available on a selection of high-quality bonds available in the market at December 31, 2021. The bonds selected had maturities that coincided with the time periods during which benefits payments are expected to occur, were non-callable and available in sufficient quantities to ensure marketability (at least \$300 million par outstanding).

In order to project the long-term target investment return for the total portfolio, estimates are prepared for the total return of each major asset class over the subsequent 10-year period. Those estimates are based on a combination of factors including the current market interest rates and valuation levels, consensus earnings expectations and historical long-term risk premiums. To determine the aggregate return for the pension trust, the projected return of each individual asset class is then weighted according to the allocation to that investment area in the trust's long-term asset allocation policy.

The assumed health care cost trend rates are as follows:

At December 31,	Health Care and Life		
	2021	2020	2019
Weighted-average healthcare cost trend rate assumed for next year	6.20 %	6.20 %	6.30 %
Rate to which cost trend rate gradually declines	4.50	4.50	4.50
Year the rate reaches the level it is assumed to remain thereafter	2029	2029	2027

Plan Assets

The Company's overall investment strategy is to achieve a mix of assets that allows us to meet projected benefit payments while taking into consideration risk and return. While target allocation percentages will vary over time, the current target allocation for plan assets is designed so that 45% to 55% of the assets have the objective of achieving a return in excess of the growth in liabilities (comprised of public equities, private equities, real estate, hedge funds, high yield bonds and emerging market debt) and 44% to 54% of the assets are invested as liability hedging assets (where interest rate sensitivity of the liability hedging assets better match the interest rate sensitivity of the liability) and a maximum of 10% is in cash. This allocation will shift as funded status improves to a higher allocation of liability hedging assets. Target policies will be revisited periodically to ensure they are in line with fund objectives. Both active and passive management approaches are used depending on perceived market efficiencies and various other factors. Due to our diversification and risk control processes, there are no significant concentrations of risk, in terms of sector, industry, geography or company names.

Pension and healthcare and life plans assets do not include significant amounts of Verizon common stock.

Total investments at fair value	364	324	40	—
Investments measured at NAV	208			
Total	\$ 572	\$ 324	\$ 40	\$ —

The following are general descriptions of asset categories, as well as the valuation methodologies and inputs used to determine the fair value of each major category of assets.

Cash and cash equivalents include short-term investment funds (less than 90 days to maturity), primarily in diversified portfolios of investment grade money market instruments and are valued using quoted market prices or other valuation methods. The carrying value of cash equivalents approximates fair value due to the short-term nature of these investments.

Investments in securities traded on national and foreign securities exchanges are valued by the trustee at the last reported sale prices on the last business day of the year or, if no sales were reported on that date, at the last reported bid prices. Government obligations, corporate bonds, international bonds and asset-backed debt are valued using matrix prices with input from independent third-party valuation sources. Over-the-counter securities are valued at the bid prices or the average of the bid and ask prices on the last business day of the year from published sources or, if not available, from other sources considered reliable such as multiple broker quotes.

Commingled funds not traded on national exchanges are priced by the custodian or fund's administrator at their net asset value (NAV). Commingled funds held by third-party custodians appointed by the fund managers provide the fund managers with a NAV. The fund managers have the responsibility for providing this information to the custodian of the respective plan.

The investment manager of the entity values venture capital, corporate finance and natural resource limited partnership investments. Real estate investments are valued at amounts based upon appraisal reports prepared by either independent real estate appraisers or the investment manager using discounted cash flows or market comparable data. Loans secured by mortgages are carried at the lesser of the unpaid balance or appraised value of the underlying properties. The values assigned to these investments are based upon available and current market information and do not necessarily represent amounts that might ultimately be realized. Because of the inherent uncertainty of valuation, estimated fair values might differ significantly from the values that would have been used had a ready market for the securities existed. These differences could be material.

Forward currency contracts, futures, and options are valued by the trustee at the exchange rates and market prices prevailing on the last business day of the year. Both exchange rates and market prices are readily available from published sources. These securities are classified by the asset class of the underlying holdings.

Hedge funds are valued by the custodian at NAV based on statements received from the investment manager. These funds are valued in accordance with the terms of their corresponding offering or private placement memoranda.

Commingled funds, hedge funds, venture capital, corporate finance, natural resource and real estate limited partnership investments for which

[Table of Contents](#)

fair value is measured using the NAV per share as a practical expedient are not leveled within the fair value hierarchy but are included in total investments.

Employer Contributions

In 2021, we made no discretionary contribution to our qualified pension plans, \$58 million of contributions to our nonqualified pension plans and \$885 million of contributions to our other postretirement benefit plans. No qualified pension plans contributions are expected to be made in 2022. Nonqualified pension plans contributions are estimated to be approximately \$60 million and contributions to our other postretirement benefit plans are estimated to be approximately \$860 million in 2022.

Estimated Future Benefit Payments

The benefit payments to retirees are expected to be paid as follows:

(dollars in millions)

Year	Pension Benefits	Health Care and Life
2022	\$ 2,049	\$ 906
2023	1,648	883
2024	1,097	862
2025	1,066	850
2026	1,034	840
2027 to 2031	5,097	4,139

Savings Plan and Employee Stock Ownership Plans

We maintain four leveraged employee stock ownership plans (ESOP). We match a certain percentage of eligible employee contributions to certain savings plans with shares of our common stock from this ESOP. At December 31, 2021, the number of allocated shares of common stock in this ESOP was 44 million. There were no unallocated shares of common stock in this ESOP at December 31, 2021. All leveraged ESOP shares are included in earnings per share computations.

Total savings plan costs were \$690 million in 2021, \$730 million in 2020 and \$897 million in 2019.

Severance Benefits

The following table provides an analysis of our severance liability:

(dollars in millions)

Year	Beginning of Year	Charged to Expense	Payments	Other	End of Year
2019	\$ 2,156	\$ 260	\$ (1,847)	\$ (4)	\$ 565
2020	565	309	(248)	(24)	602
2021	602	233	(258)	(29)	548

Severance, Pension and Benefits (Credits) Charges

During 2021, in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur, we recorded net pre-tax pension and benefits credits of \$2.4 billion in our pension and postretirement benefit plans. The credits were recorded in Other income (expense), net in our consolidated statement of income and were primarily driven by a credit of \$1.1 billion due to an increase in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 2.6% at December 31, 2020 to a weighted-average of 2.9% at December 31, 2021, a credit of \$847 million due to the difference between our estimated and our actual return on assets and a

credit of \$453 million due to other actuarial assumption adjustments. During 2021, we also recorded net pre-tax severance charges of \$233 million in Selling, general and administrative expense in our consolidated statements of income.

During 2020, we recorded net pre-tax pension and benefits charges of \$1.6 billion in our pension and postretirement benefit plans. The charges were recorded in Other income (expense), net in our consolidated statement of income and were primarily driven by a charge of \$3.2 billion due to a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 3.3% at December 31, 2019 to a weighted-average of 2.6% at December 31, 2020, partially offset by a credit of \$1.6 billion due to the difference between our estimated and our actual return on assets. During 2020, we also recorded net pre-tax severance charges of \$309 million in Selling, general and administrative expense in our consolidated statements of income.

During 2019, we recorded net pre-tax pension and benefits charges of \$126 million in our pension and postretirement benefit plans. The charges were recorded in Other income (expense), net in our consolidated statement of income and were primarily driven by a charge of \$4.3 billion due to a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefits plans from a weighted-average of 4.4% at December 31, 2018 to a weighted-average of 3.3% at December 31, 2019, partially offset by a credit of \$2.3 billion due to the difference between our estimated return on assets and our actual return on assets and a

[Table of Contents](#)

credit of \$1.9 billion due to other assumption adjustments, of which \$1.6 billion related to healthcare claims experience. During 2019, we also recorded net pre-tax severance charges of \$260 million in Selling, general and administrative expense in our consolidated statements of income.

Note 12. Taxes

The components of income before provision for income taxes are as follows:

	(dollars in millions)		
Years Ended December 31,	2021	2020	2019
Domestic	\$ 27,607	\$ 22,844	\$ 21,655
Foreign	1,813	1,123	1,078
Total	\$ 29,420	\$ 23,967	\$ 22,733

The components of the provision for income taxes are as follows:

	(dollars in millions)		
Years Ended December 31,	2021	2020	2019
Current			
Federal	\$ 1,876	\$ 2,826	\$ 518
Foreign	248	159	221
State and Local	414	1,081	974
Total	2,538	4,066	1,713
Deferred			
Federal	3,354	1,432	1,150
Foreign	(97)	1	(13)
State and Local	1,007	120	95
Total	4,264	1,553	1,232
Total income tax provision	\$ 6,802	\$ 5,619	\$ 2,945

The following table shows the principal reasons for the difference between the effective income tax rate and the statutory federal income tax rate:

Years Ended December 31,	2021	2020	2019
Statutory federal income tax rate	21.0 %	21.0 %	21.0 %
State and local income tax rate, net of federal tax benefits	3.8	3.9	3.7
Affiliate stock disposition	—	—	(9.9)
Noncontrolling interest	(0.4)	(0.5)	(0.5)
Divestitures	(0.6)	0.1	(0.1)
Tax credits	(0.5)	(0.8)	(1.3)
Other, net	(0.2)	(0.3)	0.1
Effective income tax rate	23.1 %	23.4 %	13.0 %

The effective income tax rate for 2021 was 23.1% compared to 23.4% for 2020. The decrease in the effective income tax rate was primarily due to the sale of Verizon Media in the current period, partially offset by the non-recurring tax benefit recognized in

2020 from a series of legal entity restructurings. The increase in the provision for income taxes was primarily due to the increase in income before income taxes in the current period.

The effective income tax rate for 2020 was 23.4% compared to 13.0% for 2019. The increase in the effective income tax rate and the provision for income taxes was primarily due to the recognition of a \$2.2 billion tax benefit in connection with the disposition of preferred stock representing a minority interest in a foreign affiliate in 2019 that did not reoccur in 2020.

The amounts of cash taxes paid by Verizon are as follows:

		(dollars in millions)		
Years Ended December 31,		2021	2020	2019
Income taxes, net of amounts refunded	\$	3,040	\$ 2,725	\$ 3,583
Employment taxes		1,225	618	1,044
Property and other taxes		1,756	2,093	1,551
Total	\$	6,021	\$ 5,436	\$ 6,178

Deferred Tax Assets and Liabilities

Deferred taxes arise because of differences in the book and tax bases of certain assets and liabilities. Significant components of deferred tax assets and liabilities are as follows:

	(dollars in millions)	
At December 31,	2021	2020
Deferred Tax Assets		
Employee benefits	\$ 4,388	\$ 5,218
Tax loss and credit carry forwards	2,224	2,848
Other - assets	7,314	6,096
	13,926	14,162
Valuation allowances	(1,574)	(2,183)
Deferred tax assets	12,352	11,979
Deferred Tax Liabilities		
Spectrum and other intangible amortization	24,935	22,726
Depreciation	19,893	18,009
Other - liabilities	8,041	6,867
Deferred tax liabilities	52,869	47,602
Net deferred tax liability	\$ 40,517	\$ 35,623

At December 31, 2021, undistributed earnings of our foreign subsidiaries indefinitely invested outside the U.S. amounted to approximately \$5.5 billion. The majority of Verizon's cash flow is generated from domestic operations and we are not dependent on foreign cash or earnings to meet our funding requirements, nor do we intend to repatriate these undistributed foreign earnings to fund U.S. operations. Furthermore, a portion of these undistributed earnings represents amounts that legally must be kept in reserve in accordance with certain foreign jurisdictional requirements and are unavailable for distribution or repatriation. As a result, we have not provided U.S. deferred taxes on these undistributed earnings because we intend that they will remain indefinitely reinvested outside of the U.S. and therefore unavailable for use in funding U.S. operations. Determination of the amount of unrecognized deferred taxes related to these undistributed earnings is not practicable.

At December 31, 2021, we had net after-tax loss and credit carry forwards for income tax purposes of approximately \$2.2 billion that primarily relate to state and foreign taxes. Of these net after-tax loss and credit carry forwards, approximately \$1.7 billion will expire between 2022 and 2041 and approximately \$554 million may be carried forward indefinitely.

During 2021, the valuation allowance decreased approximately \$609 million primarily due to the sale of Verizon Media. The \$1.6 billion valuation allowance at December 31, 2021, is primarily related to state and foreign net operating losses and credits.

Unrecognized Tax Benefits

A reconciliation of the beginning and ending balance of unrecognized tax benefits is as follows:

	(dollars in millions)		
	2021	2020	2019
Balance at January 1,	\$ 2,944	\$ 2,870	\$ 2,871
Additions based on tax positions related to the current year	150	160	149
Additions for tax positions of prior years	621	258	297
Reductions for tax positions of prior years	(330)	(166)	(300)
Settlements	(163)	(46)	(58)
Lapses of statutes of limitations	(88)	(132)	(89)
Balance at December 31,	\$ 3,134	\$ 2,944	\$ 2,870

Included in the total unrecognized tax benefits at December 31, 2021, 2020 and 2019 is \$2.8 billion, \$2.5 billion and \$2.4 billion, respectively, that if recognized, would favorably affect the effective income tax rate.

We recognized the following net after-tax (benefit) expenses related to interest and penalties in the provision for income taxes:

Years Ended December 31,	(dollars in millions)
2021	\$ (21)
2020	5
2019	35

[Table of Contents](#)

The after-tax accruals for the payment of interest and penalties in the consolidated balance sheets are as follows:

At December 31,	(dollars in millions)	
2021	\$	551
2020		388

The increase in unrecognized tax benefits was primarily related to the acquisition of Tracfone, and was partially offset by the resolution of issues with the Internal Revenue Service (IRS) involving tax years 2013-2014 as well as lapses of statutes of limitations in various jurisdictions. The uncertain tax benefits related to the acquisition of Tracfone involve pre-acquisition tax matters and are the subject of an indemnity from América Móvil for which a corresponding indemnity asset has been established. Verizon and/or its subsidiaries file income tax returns in the U.S. federal jurisdiction, and various state, local and foreign jurisdictions. As a large taxpayer, we are under audit by the IRS and multiple state and foreign jurisdictions for various open tax years. The IRS is currently examining the Company's U.S. income tax returns for tax years 2015-2018 and Celco's U.S. income tax return for tax years 2017-2018. Tax controversies are ongoing for tax years as early as 2006. The amount of the liability for unrecognized tax benefits will change in the next twelve months due to the expiration of the statute of limitations in various jurisdictions and it is reasonably possible that various current tax examinations will conclude or require reevaluations of the Company's tax positions during this period. An estimate of the range of the possible change cannot be made until these tax matters are further developed or resolved.

Note 13. Segment Information

Reportable Segments

We have two reportable segments that we operate and manage as strategic business units - Consumer and Business. We measure and evaluate our reportable segments based on segment operating income, consistent with the chief operating decision maker's assessment of segment performance.

Our segments and their principal activities consist of the following:

Segment	Description
Verizon Consumer Group	Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the U.S. under the Verizon brand and through wholesale and other arrangements. We also provide fixed wireless access (FWA) broadband through our wireless networks. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios.
Verizon Business Group	Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various IoT services and products. We also provide FWA broadband through our wireless networks. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world.

Our Consumer segment's wireless and wireline products and services are available to our retail customers, as well as resellers that purchase wireless network access from us on a wholesale basis. Our Business segment's wireless and wireline products and services are organized by the primary customer groups targeted by these offerings: Small and Medium Business, Global Enterprise, Public Sector and Other, and Wholesale.

Corporate and other primarily includes insurance captives, investments in unconsolidated businesses and development stage businesses that support our strategic initiatives, as well as unallocated corporate expenses, certain pension and other employee benefit related costs and interest and financing expenses. Corporate and other also includes the historical results of divested businesses including Verizon Media, and other adjustments and gains and losses that are not allocated in assessing segment performance due to their nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and losses from these transactions that are not individually significant are included in segment results as these items are included in the chief operating decision maker's assessment of segment performance.

We completed the sale of Verizon Media on September 1, 2021. See Note 3 for additional information on the sale of Verizon Media.

The reconciliation of segment operating revenues and expenses to consolidated operating revenues and expenses below includes the effects of special items that the chief operating decision maker does not consider in assessing segment performance, primarily because of their nature.

[Table of Contents](#)

The following tables provides operating financial information for our two reportable segments:

(dollars in millions)

2021	Consumer	Business	Total Reportable Segments
External Operating Revenues			
Service	\$ 67,723	\$ —	\$ 67,723
Wireless equipment	19,781	—	19,781

Selling, general and administrative expense	16,639	8,188	24,827
Depreciation and amortization expense	11,353	4,105	15,458
Total Operating Expenses	62,095	27,681	89,776
Operating Income	\$ 28,961	\$ 3,762	\$ 32,723

⁽¹⁾ Service and other revenues and Wireless equipment revenues included in our Business segment amounted to approximately \$27.9 billion and \$3.5 billion, respectively, for the year ended December 31, 2019.

The following table provides Fios revenues for our two reportable segments:

	(dollars in millions)		
Years Ended December 31,	2021	2020	2019
Consumer	\$ 11,558	\$ 11,082	\$ 11,175
Business	1,136	1,057	967
Total Fios revenue	\$ 12,694	\$ 12,139	\$ 12,142

The following table provides Wireless service revenue for our reportable segments and includes intersegment activity:

	(dollars in millions)		
Years Ended December 31,	2021	2020	2019
Consumer	\$ 56,103	\$ 53,605	\$ 53,791
Business	12,366	11,805	11,188
Total Wireless service revenue	\$ 68,469	\$ 65,410	\$ 64,979

Reconciliation to Consolidated Financial Information

A reconciliation of the reportable segment operating revenues to consolidated operating revenues is as follows:

	(dollars in millions)		
Years Ended December 31,	2021	2020	2019
Operating Revenues			
Total reportable segments	\$ 126,342	\$ 119,495	\$ 122,499
Corporate and other	7,722	9,334	9,812
Reconciling items:			
Eliminations	(451)	(537)	(443)
Consolidated Operating Revenues	\$ 133,613	\$ 128,292	\$ 131,868

[Table of Contents](#)

A reconciliation of the total reportable segments' operating income to consolidated income before provision for income taxes is as follows:

	(dollars in millions)		
Years Ended December 31,	2021	2020	2019
Operating Income			
Total reportable segments	\$ 33,392	\$ 32,629	\$ 32,723
Corporate and other	(449)	(1,472)	(1,403)
Reconciling items:			
Severance charges	(209)	(221)	(204)
Other components of net periodic pension and benefit charges (Note 11)	(769)	(817)	(813)
Loss on spectrum licenses (Note 3)	(223)	(1,195)	—
Impairment charges	—	—	(186)
Net gain (loss) from dispositions of assets and businesses	706	(126)	261
Consolidated operating income	32,448	28,798	30,378
Equity in earnings (losses) of unconsolidated businesses	145	(45)	(15)
Other income (expense), net	312	(539)	(2,900)
Interest expense	(3,485)	(4,247)	(4,730)
Income Before Provision For Income Taxes	\$ 29,420	\$ 23,967	\$ 22,733

No single customer accounted for more than 10% of our total operating revenues during the years ended December 31, 2021, 2020 and 2019. International operating revenues were not significant during the years ended December 31, 2021, 2020 and 2019. As of December 31, 2021 and 2020, international long-lived assets were not significant.

The chief operating decision maker does not review disaggregated assets on a segment basis; therefore, such information is not presented. Depreciation included in the measure of segment profitability is primarily allocated based on proportional usage.

Note 14. Equity and Comprehensive Income

Equity

In December 2019, 46,100 preferred shares of a foreign affiliate of Verizon was sold for cash consideration of \$51 million and is reflected in non-controlling interests. The preferred shares pay cumulative dividends of 8.25% per annum.

Common Stock

In February 2020, the Verizon Board of Directors authorized a share buyback program to repurchase up to 100 million shares of Verizon's common stock. The program will terminate when the aggregate number of shares purchased reaches 100 million, or a new share repurchase plan superseding the current plan is authorized, whichever is sooner. During the years ended December 31, 2021, 2020, and 2019, Verizon did not repurchase any shares of Verizon's common stock under our current or previously authorized share buyback programs. At December 31, 2021, the maximum number of shares that could be purchased by or on behalf of Verizon under our share buyback program was 100 million.

Common stock has been used from time to time to satisfy some of the funding requirements of employee and shareholder plans. During the years ended December 31, 2021, 2020, and 2019, we issued 2.1 million, 2.3 million and 3.8 million common shares from treasury stock, respectively, which had an insignificant aggregate value.

In connection with our acquisition of Tracfone in November 2021, we issued approximately 57.6 million shares of Verizon common shares from treasury stock valued at approximately \$3.0 billion. See Note 3 for additional information.

Accumulated Other Comprehensive Income (Loss)

Comprehensive income consists of net income and other gains and losses affecting equity that, under U.S. GAAP, are excluded from net income. Significant changes in the components of Other comprehensive loss, net of provision for income taxes are described below.

[Table of Contents](#)

The changes in the balances of Accumulated other comprehensive income (loss) by component are as follows:

(dollars in millions)	Foreign currency translation adjustments	Unrealized gains (losses) on cash flow hedges	Unrealized gains (losses) on marketable securities	Defined benefit pension and postretirement plans	Total
Balance at January 1, 2019	\$ (600)	\$ (80)	\$ 20	\$ 3,030	\$ 2,370
Other comprehensive income (loss)	16	(699)	8	—	(675)
Amounts reclassified to net income	—	(37)	(1)	(659)	(697)
Net other comprehensive income (loss)	16	(736)	7	(659)	(1,372)
Balance at December 31, 2019	(584)	(816)	27	2,371	998
Other comprehensive income (loss)	180	953	7	—	1,140
Amounts reclassified to net income	—	(1,524)	(9)	(676)	(2,209)
Net other comprehensive income (loss)	180	(571)	(2)	(676)	(1,069)
Balance at December 31, 2020	(404)	(1,387)	25	1,695	(71)
Other comprehensive income (loss)	(141)	(1,318)	(8)	—	(1,467)
Amounts reclassified to net income	—	1,233	(1)	(621)	611
Net other comprehensive income (loss)	(141)	(85)	(9)	(621)	(856)
Balance at December 31, 2021	\$ (545)	\$ (1,472)	\$ 16	\$ 1,074	\$ (927)

The amounts presented above in Net other comprehensive income (loss) are net of taxes. The amounts reclassified to net income related to unrealized gains (losses) on cash flow hedges in the table above are included in Other income (expense), net and Interest expense in our consolidated statements of income. See Note 9 for additional information. The amounts reclassified to net income related to unrealized gains (losses) on marketable securities in the table above are included in Other income (expense), net in our consolidated statements of income. The amounts reclassified to net income related to defined benefit pension and postretirement plans in the table above are included in Other income (expense), net in our consolidated statements of income. See Note 11 for additional information.

Note 15. Additional Financial Information

The following tables provide additional financial information related to our consolidated financial statements:

Income Statement Information

	(dollars in millions)		
Years Ended December 31,	2021	2020	2019
Depreciation expense	\$ 14,119	\$ 14,275	\$ 14,371
Interest costs on debt balances	5,148	4,632	5,221
Net amortization of debt discount	178	170	165
Capitalized interest costs	(1,841)	(555)	(656)
Advertising expense	3,394	3,107	3,071

	(dollars in millions)		
Years Ended December 31,	2021	2020	2019
Other income (expense), net			
Interest income	\$ 48	\$ 65	\$ 121
Other components of net periodic benefit (cost) income	3,785	(425)	627
Early debt extinguishment costs	(3,541)	(129)	(3,604)
Other, net	20	(50)	(44)
	<u>\$ 312</u>	<u>\$ (539)</u>	<u>\$ (2,900)</u>

Balance Sheet Information

	(dollars in millions)	
At December 31,	2021	2020
Prepaid expenses and other		
Prepaid taxes	\$ 1,093	\$ 1,200
Deferred contract costs	2,432	2,472
Restricted cash	1,094	1,195
Other prepaid expense and other	2,287	1,843
	<u>\$ 6,906</u>	<u>\$ 6,710</u>
Accounts payable and accrued liabilities		
Accounts payable	\$ 8,040	\$ 6,667
Accrued expenses	9,123	6,050
Accrued vacation, salaries and wages	4,485	5,057
Interest payable	1,561	1,452
Taxes payable	1,624	1,432
	<u>\$ 24,833</u>	<u>\$ 20,658</u>
Other current liabilities		
Dividends payable	\$ 2,709	\$ 2,618
Contract liability	6,053	4,843
Other	2,263	2,167
	<u>\$ 11,025</u>	<u>\$ 9,628</u>

As of December 31, 2021 and 2020, Property, plant and equipment includes approximately \$5.9 billion and \$4.1 billion of additions that have not yet been paid.

Cash Flow Information

	(dollars in millions)		
Years Ended December 31,	2021	2020	2019
Cash Paid			
Interest, net of amounts capitalized	\$ 3,435	\$ 4,420	\$ 4,714
Income taxes, net of amounts refunded	3,040	2,725	3,583
Other, net Cash Flows from Operating Activities			
Changes in device payment plan agreement non-current receivables	\$ (2,438)	\$ 558	\$ 23
Early debt extinguishment costs	3,541	129	3,604
Loss on spectrum licenses	223	1,195	—
Gain on disposition of Media business	(1,051)	—	—
Other, net	(368)	898	(134)
	\$ (93)	\$ 2,780	\$ 3,493
Other, net Cash Flows from Financing Activities			
Net debt related costs ⁽¹⁾	\$ (2,309)	\$ (1,055)	\$ (1,797)
Other, net	(1,523)	(1,657)	(1,120)
	\$ (3,832)	\$ (2,712)	\$ (2,917)

⁽¹⁾ These costs include the premium paid for the early extinguishment of debt, fees paid in connection with exchange and tender offers, and settlements of associated instruments.

Note 16. Commitments and Contingencies

In the ordinary course of business, Verizon is involved in various commercial litigation and regulatory proceedings at the state and federal level. Where it is determined, in consultation with counsel based on litigation and settlement risks, that a loss is probable and estimable in a given matter, the Company establishes an accrual. In none of the currently pending matters is the amount of accrual material. An estimate of the reasonably possible loss or range of loss in excess of the amounts already accrued cannot be made at this time due to various factors typical in contested proceedings, including: (1) uncertain damage theories and demands; (2) a less than complete factual record; (3) uncertainty concerning legal theories and their resolution by courts or regulators; and (4) the unpredictable nature of the opposing party and its demands. We continuously monitor these proceedings as they develop and adjust any accrual or disclosure as needed. We do not

[Table of Contents](#)

expect that the ultimate resolution of any pending regulatory or legal matter in future periods will have a material effect on our financial condition, but it could have a material effect on our results of operations for a given reporting period.

Verizon is currently involved in approximately 20 federal district court actions alleging that Verizon is infringing various patents. Most of these cases are brought by non-practicing entities and effectively seek only monetary damages; a small number are brought by companies that have sold products and could seek injunctive relief as well. These cases have progressed to various stages and a small number may go to trial in the coming 12 months if they are not otherwise resolved.

In connection with the execution of agreements for the sales of businesses and investments, Verizon ordinarily provides representations and warranties to the purchasers pertaining to a variety of nonfinancial matters, such as ownership of the securities being sold, as well as indemnity from certain financial losses. From time to time, counterparties may make claims under these provisions, and Verizon will seek to defend against those claims and resolve them in the ordinary course of business.

Subsequent to the sale of Verizon Information Services Canada in 2004, we continue to provide a guarantee to publish directories, which was issued when the directory business was purchased in 2001 and had a 30-year term (before extensions). The preexisting guarantee continues, without modification, despite the subsequent sale of Verizon Information Services Canada and the spin-off of our domestic print and internet yellow pages directories business. The possible financial impact of the guarantee, which is not expected to be adverse, cannot be reasonably estimated as a variety of the potential outcomes available under the guarantee result in costs and revenues or benefits that may offset each other. We do not believe performance under the guarantee is likely.

As of December 31, 2021, letters of credit totaling approximately \$674 million, which were executed in the normal course of business and support several financing arrangements and payment obligations to third parties, were outstanding.

During 2021, Verizon entered into seven renewable energy purchase agreements (REPAs) with third parties, in addition to 13 signed in previous years. Each of the REPAs is based on the expected operation of a renewable energy-generating facility and has a fixed price term of 12 to 18 years from the commencement of the facility's entry into commercial operation, which is expected to occur through 2024, as applicable. The REPAs generally are expected to be financially settled based on the prevailing market price as energy is generated by the facilities.

We have various unconditional purchase obligations, which represent agreements to purchase goods or services that are enforceable and legally binding. We estimate that these unconditional purchase obligations, for contracts with terms in excess of one year, total \$29.8 billion, and primarily represent commitments to purchase network equipment, software and services, content, marketing services and other items which will be used or sold in the ordinary course of business from a variety of suppliers. Of this total amount, \$10.2 billion is attributable to 2022, \$8.7 billion is attributable to 2023, \$5.6 billion is attributable to 2024, \$4.2 billion is attributable to 2025, \$482 million is attributable to 2026 and \$641 million is attributable to years thereafter. These amounts do not represent our entire anticipated purchases in the future, but represent only those items that are the subject of contractual obligations. Our commitments are generally determined based on the noncancelable quantities to which we are contractually obliged. Since the commitments to purchase programming services from television networks and broadcast stations have no minimum volume requirement, we estimated our obligation based on number of subscribers at December 31, 2021, and applicable rates stipulated in the contracts in effect at that time. We also purchase products and services as needed with no firm commitment.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the registrant's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934), as of the end of the period covered by this Annual Report, that ensure that information relating to the registrant which is required to be disclosed in this report is recorded, processed, summarized and reported within required time periods using the criteria for effective internal control established in Internal Control–Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the registrant's disclosure controls and procedures were effective as of December 31, 2021.

Changes in Internal Control over Financial Reporting

In the ordinary course of business, we routinely review our system of internal control over financial reporting and make changes to our systems and processes that are intended to ensure an effective internal control environment. In the third quarter of 2020, we began a multi-year implementation of a new global enterprise resource planning (ERP) system, which will replace many of our existing core financial systems. The new ERP system is designed to enhance the flow of financial information, facilitate data analysis and accelerate information reporting. The implementation is expected to occur in phases over the next several years.

[Table of Contents](#)

As the phased implementation of the new ERP system continues, we could have changes to our processes and procedures which, in turn, could result in changes to our internal controls over financial reporting. As such changes occur, we will evaluate quarterly whether such changes materially affect our internal control over financial reporting.

There were no changes in the Company's internal control over financial reporting during the fourth quarter 2021 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Annual Report on Internal Control over Financial Reporting

The management of Verizon Communications Inc. is responsible for establishing and maintaining adequate internal control over financial reporting of the company. Management has evaluated internal control over financial reporting of the company using the criteria for effective internal control established in Internal Control–Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013.

In accordance with guidance issued by the Securities and Exchange Commission, companies are permitted to exclude acquisitions from their first assessment of internal control over financial reporting following the date of acquisition. Based on those guidelines, management's assessment of the effectiveness of the Company's internal control over financial reporting excluded TracFone Wireless, Inc. (Tracfone), which the Company acquired in the fourth quarter of 2021. See Note 3 to the consolidated financial statements for additional information on the Company's acquisition of Tracfone. We have included the financial results of this acquisition in the consolidated financial statements from the date of acquisition. Tracfone represented approximately 3% of consolidated total assets as of December 31, 2021, and less than 1% of consolidated total revenues for the year then ended.

Management has assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2021. Based on this assessment, management believes that the internal control over financial reporting of the company is effective as of December 31, 2021. In connection with this assessment, there were no material weaknesses in the company's internal control over financial reporting identified by management. The company's independent registered public accounting firm, Ernst & Young LLP, has provided an attestation report on the company's internal control over financial reporting and is included in Item 8 of this Annual Report.

Item 9B. Other Information

None.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Set forth below is information with respect to our current executive officers.

Name	Age	Office	Held Since
Hans Vestberg	56	Chairman and Chief Executive Officer	2019
Manon Brouillette	53	Executive Vice President and Group CEO - Verizon Consumer	2022
Matthew D. Ellis	50	Executive Vice President and Chief Financial Officer	2016
Tami A. Erwin	57	Executive Vice President and Group CEO - Verizon Business	2019
Samantha Hammock	43	Executive Vice President and Chief Human Resources Officer	2021
Kyle Malady	54	Executive Vice President and Chief Technology Officer	2019
Rima Qureshi	57	Executive Vice President and Chief Strategy Officer	2017
		Executive Vice President and Chief Administrative, Legal and Public Policy Officer	
Craig L. Silliman	54	Officer	2019
Anthony T. Skiadas	53	Senior Vice President and Controller	2013

Each of the above officers has held the indicated office or other high-level managerial positions with the Company or one of its subsidiaries for at least five years, with the exception of Hans Vestberg, who has been with the Company since 2017, Manon Brouillette, who has been with the Company since 2021, Samantha Hammock, who has been with the Company since 2020, and Rima Qureshi, who has been with the Company since 2017. Officers are not elected for a fixed term of office and may be removed from office at any time at the discretion of the Board of Directors.

Hans Vestberg is the Chairman and Chief Executive Officer of Verizon. Mr. Vestberg joined the Company in April 2017 as Executive Vice President and President - Global Networks and Technology. He began serving in his current role of Chief Executive Officer in August 2018 and was elected Chairman in March 2019. Prior to joining Verizon, Mr. Vestberg served for six years as President and Chief Executive Officer of Ericsson, a multinational networking and telecommunications equipment and services company headquartered in Sweden.

[Table of Contents](#)

Manon Brouillette is the Executive Vice President and Group CEO – Verizon Consumer. Ms. Brouillette joined the Company in July 2021 as Chief Operating Officer and Deputy CEO of Verizon Consumer Group. She began serving in her current role in January 2022. Prior to joining Verizon, Ms. Brouillette spent 14 years at Vidéotron, a Canadian telecommunications company that provides home broadband, pay television, telephony services and wireless communications, where she served as President and Chief Executive Officer for five years.

Samantha Hammock is the Executive Vice President and Chief Human Resources Officer of Verizon. Ms. Hammock joined the Company in December 2020 as Senior Vice President of Global Talent and began serving in her current role in December 2021. Prior to joining Verizon, Ms. Hammock spent 14 years at the American Express Company, a globally integrated payments company and provider of credit and charge cards to consumers and businesses around the world, where she served as Head of Talent and Learning from April 2020 to December 2020, Chief Learning Officer from 2017 to April 2020, and Vice President, Leadership Strategy, from 2016 to April 2020.

Rima Qureshi is the Executive Vice President and Chief Strategy Officer of Verizon. Ms. Qureshi joined the Company in November 2017. Prior to joining Verizon, Ms. Qureshi served as President and Chief Executive Officer of Ericsson North America from 2016 to 2017 and as Senior Vice President and Chief Strategy Officer and head of mergers and acquisitions of Ericsson from 2014 to 2016. Ms. Qureshi also served as Vice President of Ericsson's CDMA Mobile Systems Group, Senior Vice President of Strategic Projects, Chairman of Ericsson's Northern Europe, Russia and Central Asia Group and Chairman of Ericsson's Modem division before becoming Chief Strategy Officer.

For other information required by this item, see the sections entitled "Governance — Item 1: Election of Directors — Nominees for election and — Election process, — Our governance framework — Where to find more information, — Board committees — Audit Committee and — Other risk-related matters — Business conduct and ethics" and "Additional information — Delinquent Section 16(a) Reports" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2022 Annual Meeting of Shareholders, which are incorporated herein by reference.

Item 11. Executive Compensation

For information with respect to executive compensation, see the sections entitled "Governance — Non-employee Director compensation" and "Executive Compensation — Compensation discussion and analysis, — Compensation Committee Report and — Compensation tables" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2022 Annual Meeting of Shareholders, which are incorporated by reference herein. There were no relationships to be disclosed under paragraph (e)(4) of Item 407 of Regulation S-K.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

For information with respect to the security ownership of certain beneficial owners, the Directors and Executive Officers, see the section entitled "Stock ownership — Security ownership of certain beneficial owners and management" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2022 Annual Meeting of Shareholders, which is incorporated herein by reference.

The following table provides information as of December 31, 2021 for (i) all equity compensation plans previously approved by the Company's shareholders, and (ii) all equity compensation plans not previously approved by the Company's shareholders. Since May 4, 2017, the Company has only issued awards under the 2017 Verizon Communications, Inc. Long-Term Incentive Plan (2017 LTIP), which provides for awards of stock options, restricted stock, restricted stock units, performance stock units and other equity-based hypothetical stock units to employees of Verizon and its subsidiaries. No new awards are permitted to be issued under any other equity compensation plan. In accordance with SEC rules, the table does not include outstanding awards that are payable solely in cash by the terms of the award, and such awards do not reduce the number of shares remaining for issuance under the 2017 LTIP.

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)		Weighted-average exercise price of outstanding options, warrants and rights (b)	
Equity compensation plans approved by security holders	15,418,509	(1)	\$ —	(2)
Equity compensation plans not approved by security holders	100,883	(4)	—	
Total	15,519,392		\$ —	

⁽¹⁾ This amount includes: 15,418,509 of common stock subject to outstanding restricted stock units and performance stock units, including dividend equivalents accrued on such awards through December 31, 2021. This does not include performance stock units, deferred stock units and deferred share equivalents payable solely in cash.

⁽²⁾ Verizon's outstanding restricted stock units, performance stock units and deferred stock units do not have exercise prices associated with the settlement of these awards.

⁽³⁾ This number reflects the number of shares of common stock that remained available for future issuance under the 2017 LTIP.

⁽⁴⁾ This number reflects shares subject to deferred stock units credited to the Verizon Income Deferral Plan, which were awarded in 2002 under the Verizon Communications Broad-Based Incentive Plan. No new awards are permitted to be issued under this plan.

Item 13. Certain Relationships and Related Transactions, and Director Independence

For information with respect to certain relationships and related transactions and Director independence, see the sections entitled "Governance — Our governance framework — Other risk-related matters — Related person transactions and — Item 1: Election of Directors — Our Board's independence" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2022 Annual Meeting of Shareholders, which are incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

Our independent registered public accounting firm is Ernst & Young LLP, New York, NY, Auditor Firm ID: 42.

For information with respect to principal accounting fees and services, see the section entitled "Audit matters — Item 3: Ratification of appointment of independent registered public accounting firm" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2022 Annual Meeting of Shareholders, which is incorporated herein by reference.

PART I

Item 1. Business

General

Verizon Communications Inc. (Verizon or the Company) is a holding company that, acting through its subsidiaries, is one of the world's leading providers of communications, technology, information and entertainment products and services to consumers, businesses and government entities. With a presence around the world, we offer data, video and voice services and solutions on our networks and platforms that are designed to meet customers' demand for mobility, reliable network connectivity, security and control.

Our principal executive offices are located at 1095 Avenue of the Americas, New York, New York 10036 (telephone number 212-395-1000).

We have two reportable segments that we operate and manage as strategic business units - Verizon Consumer Group (Consumer) and Verizon Business Group (Business).

Verizon Consumer Group

Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the United States (U.S.) under the Verizon brand and through wholesale and other arrangements. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios. In 2020, the Consumer segment's revenues were \$88.5 billion, representing approximately 69% of Verizon's consolidated revenues. As of December 31, 2020, Consumer had approximately 94 million wireless retail connections, approximately 7 million broadband connections, which includes Fios and Digital Subscriber Line (DSL) internet connections, and approximately 4 million Fios video connections.

Verizon Business Group

Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various Internet of Things (IoT) services and products. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world. In 2020, the Business segment's revenues were \$31.0 billion, representing approximately 24% of Verizon's consolidated revenues. As of December 31, 2020, Business had approximately 27 million wireless retail postpaid connections and approximately 482 thousand broadband connections, which includes Fios and DSL internet connections.

Additional discussion of our reportable segments is included in Item 7. under the headings "Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview" and - "Segment Results of Operations" and in Note 13 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries.

Service and Product Offerings

Our Consumer segment's wireless and wireline products and services are available to our retail customers, as well as resellers that purchase wireless network access from us on a wholesale basis. Our Business segment's wireless and wireline products and services are organized by the primary customer groups targeted by these offerings: Small and Medium Business, Global Enterprise, Public Sector and Other, and Wholesale.

Wireless

We offer wireless services and equipment to customers of both Consumer and Business.

Wireless Services

Our Consumer and Business segments provide a wide variety of wireless services accessible on a broad range of devices. Customers can obtain our wireless services on a postpaid or prepaid basis. Retail (non-wholesale) postpaid accounts primarily represent retail customers that are directly served and managed by Verizon and use Verizon branded services. A single account may include monthly wireless services for a variety of connected devices. Our postpaid service is generally billed one month in advance for a monthly access charge in return for access to and usage of network services. Our prepaid service is offered only to Consumer customers and enables individuals to obtain wireless services without credit verification by paying for all services in advance. Approximately 96% of our Consumer retail connections were postpaid connections as of December 31, 2020.

We offer various postpaid and prepaid service plans tailored to the needs of our customers. Depending on those needs at a particular time, our plans may include features related to, among other things: unlimited or metered domestic and/or international voice, data, and texting; the ability to share data allowances and/or use data allowances in different periods; high definition voice and video features; the ability to use a device as a Wi-Fi hotspot; and varying data rates depending on the plan and usage on that plan. Our service offerings vary from time to time

[Table of Contents](#)

based on customer needs, technology changes and market conditions and may be provided as standard plans or as part of limited time promotional offers.

Access to the internet is available on all smartphones and nearly all basic phones. In addition, our customers can access the internet at broadband speeds on notebook computers and tablets that are either wireless-enabled or that are used in conjunction with separate dedicated devices that provide a mobile Wi-Fi connection.

We no longer offer Consumer customers new fixed-term, subsidized service plans for devices; however, we continue to offer subsidized plans to our Business customers. We also continue to service existing plans for customers who have not yet purchased and activated devices under the Verizon device payment program.

Wireless Equipment

Consumer and Business offer several categories of wireless equipment to customers, including a variety of smartphones and other handsets, wireless-enabled internet devices, such as tablets and other wireless-enabled connected devices, such as smart watches. In certain cases, we permit customers to acquire equipment from us using device payment plans, which permit the customer to pay for the device in installments over time.

Verizon Consumer Group

In addition to the wireless services and equipment discussed above, Consumer sells residential fixed connectivity solutions, including internet, video and voice services, and wireless network access to resellers on a wholesale basis.

Residential Fixed Services. We provide residential fixed connectivity solutions to customers over our 100% fiber-optic network through our Verizon Fios product portfolio, and over a traditional copper-based network to customers who are not served by Fios. As of December 31, 2020, we have commercially launched fifth-generation (5G) fixed wireless technology for the home (5G Home) in 12 U.S. markets. In addition, in 2020, we launched our Long-Term Evolution (LTE) Home fixed wireless access internet service in rural parts of 189 markets across 48 U.S. states.

We offer residential fixed services tailored to the needs of our customers. Depending on those needs at a particular time, our services may include features related to, among other things: internet access at different speed tiers using fiber-optic, copper or wireless technology; video services that may feature a variety of channel options, video on demand products, cloud-based services and digital video recording capabilities; over-the-top video services; and voice services.

Network Access Services. We sell network access to mobile virtual network operators (MVNOs) on a wholesale basis, who in turn resell wireless service under their own brand(s) to consumers. Our largest such arrangement is with TracFone Wireless Inc. (Tracfone), a provider of prepaid and value mobile services in the U.S. In September 2020, we entered into a purchase agreement with América Móvil to acquire Tracfone. The transaction is subject to regulatory approvals and closing conditions and is expected to close in the second half of 2021.

Verizon Business Group

In addition to the wireless services and equipment discussed above, our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various IoT products and services.

Small and Medium Business

Small and Medium Business offers wireless services and equipment, conferencing services, tailored voice and networking products, Fios services, Internet Protocol (IP) networking, advanced voice solutions and security and managed information technology (IT) services to our U.S.-based small and medium businesses that do not meet the requirements to be categorized as

Global Enterprise, as described below. In 2020, Small and Medium Business revenues were \$11.1 billion, representing approximately 36% of Business's total revenues.

In addition to the wireless services and equipment discussed above, Small and Medium Business provides fixed connectivity solutions comparable to the residential fixed services provided by Consumer, as well as business services and connectivity similar to the products and services offered by Global Enterprise, in each case with features and pricing designed to address the needs of small and medium businesses.

Global Enterprise

Global Enterprise offers services to large businesses, which are identified based on their size and volume of business with Verizon, as well as non-U.S. public sector customers. In 2020, Global Enterprise revenues were \$10.4 billion, representing approximately 34% of Business's total revenues.

Global Enterprise offers a broad portfolio of connectivity, security and professional services designed to enable our customers to optimize their business operations, mitigate business risks and capitalize on data. These services include the following:

[Table of Contents](#)

- *Network Services.* We offer a portfolio of network connectivity products to help our customers connect with their employees, partners, vendors and customers. These products include private networking services, private cloud connectivity services, virtual and software defined networking services and internet access services.
- *Advanced Communications Services.* We offer a suite of services to our customers to help them communicate with their employees, partners, vendors, constituents and customers. These products include IP-based voice and video services, unified communications and collaboration tools and customer contact center solutions.
- *Security services.* We offer a suite of management and data security services that help our customers protect, detect and respond to security threats to their networks, data, applications and infrastructure.
- *Core services.* We provide a portfolio of domestic and global voice and data solutions utilizing traditional telecommunications technology, including voice calling, messaging services, conferencing, contact center solutions and private line and data access networks. Core services also include the provision of customer premises equipment, and installation, maintenance and site services.
- *IoT services.* We provide the network access required to deliver various IoT products and services. We work with companies that purchase network access from us to connect their devices, bundled together with their own solutions, which they sell to end users. We are building IoT capabilities by leveraging business models that monetize usage on our networks at the connectivity, platform and solution layers.

Public Sector and Other

Public Sector and Other offers wireless products and services as well as wireline connectivity and managed solutions to U.S. federal, state and local governments and educational institutions. These services include business services and connectivity similar to the products and services offered by Global Enterprise, in each case, with features and pricing designed to address the needs of governments and educational institutions. In 2020, Public Sector and Other revenues were \$6.4 billion, representing approximately 21% of Business's total revenues.

Public Sector and Other also includes solutions that support fleet tracking management, compliance management, field service management, asset tracking and other types of mobile resource management in the U.S. and around the world.

Wholesale

Wholesale offers wireline communications services including data, voice, local dial tone and broadband services primarily to local, long distance, and wireless carriers that use our facilities to provide services to their customers. In 2020, Wholesale revenues were \$3.1 billion, representing approximately 10% of Business's total revenues. A portion of Wholesale revenues are generated by a few large telecommunications companies, most of which compete directly with us. Wholesale's services include:

- *Data services.* We offer a portfolio of data services to enhance our Wholesale customers' networks and provide connections to their end-users and subscribers.
- *Voice services.* We provide switched access services that allow carriers to complete their end-user calls that originate or terminate within our territory. In addition, we provide originating and terminating voice services throughout the U.S. and globally utilizing our time-division multiplexing and Voice over Internet Protocol (VoIP) networks.
- *Local services.* We offer an array of local dial tone and broadband services to competitive local exchange carriers, some of which are offered to comply with telecommunications regulations. In addition, we offer services such as colocation, resale and unbundled network elements in compliance with applicable regulations.

Distribution

We use a combination of direct, indirect and alternative distribution channels to market and distribute our products and services to Consumer customers.

Our direct channel, including our company-operated stores, is a core component of our distribution strategy. Our sales and service centers and business direct sales teams also represent significant distribution channels for our services. In addition, we have a robust digital channel and omni-channel experience for our customers in order to offer choice and convenience.

Our indirect channel includes agents that sell our wireless and wireline products and services at retail locations throughout the U.S., as well as through the internet. The majority of these sales are made under exclusive selling arrangements with us. We also have relationships with high-profile national retailers that sell our wireless and wireline products and services, as well as convenience store chains that sell our wireless prepaid products and services.

In addition to our direct channel, our Business segment has additional distribution channels that include business solution fulfillment provided by resellers, non-stocked device fulfillment performed by distributors and integrated mobility services provided by system integrators and resellers.

Competition and Related Trends

The telecommunications industry is highly competitive. We expect competition to remain intense as traditional and non-traditional participants seek increased market share.

With respect to our wireless connectivity products and services, we compete against other national wireless service providers, including AT&T Inc. and T-Mobile USA, Inc., as well as various regional wireless service providers. We also compete for retail activations with resellers that buy bulk wholesale service from wireless service providers, including Verizon, and resell it to their customers. Resellers include cable companies and others. Competition remains intense as a result of high rates of smartphone penetration in the wireless market, increased network investment by our competitors, the development and deployment of new technologies, such as 5G, the introduction of new products and services, offerings that include additional bundled premium content, new market entrants, the availability of additional licensed and unlicensed spectrum and regulatory changes. Competition may also increase as smaller, stand-alone wireless service providers merge or transfer licenses to larger, better capitalized wireless service providers and as MVNOs resell wireless communication services. In addition, DISH Network has committed to deploy a facilities-based 5G broadband network in each of its license areas capable of serving at least 70 percent of the U.S. population by June 2023, which could result in additional competitive pressures in the U.S. wireless industry.

We also face competition from other communications and technology companies seeking to increase their brand recognition and capture customer revenue with respect to the provision of wireless products and services, in addition to non-traditional offerings in mobile data. For example, Microsoft Corporation, Alphabet Inc., Apple Inc. and others are offering alternative means for making wireless voice calls that, in certain cases, can be used in lieu of the wireless provider's voice service, as well as alternative means of accessing video content.

With respect to our wireline connectivity services, we compete against cable companies, wireless service providers, domestic and foreign telecommunications providers, satellite television companies, internet service providers, over-the-top (OTT) providers and other companies that offer network services and managed enterprise solutions. Cable operators have increased the size and capacity of their networks in order to deliver digital products and services. Several major cable operators offer bundles with wireless services through strategic relationships. Customers have an increasing number of choices for obtaining video content from various online services. We expect the market will continue to shift from traditional linear video to OTT offerings. We expect customer migration from traditional voice services to wireless services to continue as a growing number of customers place greater value on mobility and wireless companies position their services as a landline alternative. We also face increasing competition from cable operators and other providers of VoIP services as well as internet portal providers.

We believe that the following are the most important competitive factors and trends in the telecommunications industry:

- *Network reliability, speed and coverage.* We consider networks that consistently provide high-quality, fast and reliable service to be a key differentiator in the market and driver of customer satisfaction. Lower prices, improved service quality and new service offerings, which in many cases include video content, have led to increased customer usage of connectivity services. We and other network-based providers must ensure that our networks can meet these increasing capacity usage requirements and offer highly reliable national coverage.
- *Pricing.* With respect to wireless services and equipment, pricing plays an important role in the wireless competitive landscape. As the demand for wireless services continues to grow, wireless service providers are offering a range of service plans at competitive prices. Many wireless service providers also bundle wireless service offerings with other content and offer promotional pricing and incentives, some of which may be targeted specifically to customers of Verizon. We and other wireless service providers, as well as equipment manufacturers, offer device payment options, which provide customers with the ability to pay for their device over a period of time, and some providers offer device leasing arrangements. In addition, aggressive device promotions have become more common in an effort to gain a greater share of subscribers interested in changing carriers. Pricing also plays an important role in the wireline competitive landscape, as traditional service providers compete aggressively in offerings such as IP Networking, Core Voice and other legacy products. In addition, as non-traditional modes of providing wireline communication services

emerge, new entrants attempt to capture market share from incumbents using competitive pricing. For example, VoIP and portal-based voice and video calling is often free or nearly free for customers and supported by advertising revenues.

- *Customer service.* We believe that high-quality customer service is a key factor in retaining customers and attracting new customers, including those of other providers. Our customer service, retention and satisfaction programs are based on providing customers with convenient and easy-to-use products and services and focusing on their needs in order to promote long-term relationships and minimize churn.

Customer service is highly valued by our Business customers. We provide Global Enterprise and Public Sector and Other customers with ready access to their system and performance information, and we conduct proactive testing of our networks to identify issues before they affect our customers. We service our Small and Medium Business customers through service representatives and online support, as well as through store-based representatives for small business customers. For Wholesale customers, we pursue service improvement through continued system automation initiatives.

- *Product differentiation.* Customer and revenue growth are increasingly dependent on the development of new and enhanced products and services, as the delivery of new and innovative products and services has been accelerating. Customers are shifting their focus from access to applications and are seeking ways to leverage their broadband, video and wireless connections. To compete effectively, providers need to continuously review, improve and refine their product portfolio and develop and rapidly

[Table of Contents](#)

deploy new products and services tailored to the needs of customers. We continue to pursue the development and rapid deployment of new and innovative products and services, both independently and in collaboration with application providers, content providers and device manufacturers. Features such as wireless and wireline inter-operability are becoming increasingly important, driven by both customer demand and technological advancement.

- *Sales and distribution.* A key to achieving sales success in the consumer and small and medium business sectors of the wireless industry is the reach and quality of sales channels and distribution points. We seek to optimally vary distribution channels among our company-operated stores selling wireless products and services, outside sales teams and telemarketing, web-based sales and fulfillment capabilities, our extensive indirect distribution network of retail outlets and our sale of wireless service to resellers, which resell wireless services to their end-users.

In addition to these competitive factors and trends, companies with a global presence are increasingly competing with us in our Business segment. A relatively small number of telecommunications and integrated service providers with global operations serve customers in the global enterprise market and, to a lesser extent, the global wholesale market. We compete with these providers for large contracts to provide integrated solutions to global enterprises and government customers. Many of these companies have strong market presence, brand recognition and existing customer relationships, all of which contribute to intensifying competition that may affect our future revenue growth.

In the Small and Medium Business market, customer purchasing behaviors and preferences continue to evolve. Solution speed and simplicity with user interfaces that have a consumer-like "look and feel" are becoming key differentiators for customers who are seeking full life-cycle offers that simplify the process of starting, running and growing their businesses. Several major cable operators also offer bundles with wireless services through strategic relationships.

In the Global Enterprise and Public Sector and Other markets, competition levels remain high, primarily as a result of increased industry focus on technology convergence. We compete in this area with system integrators, carriers, and hardware and software providers. In addition, some of the largest information technology services companies are making strategic acquisitions, divesting non-strategic assets and forging new alliances to improve their cost structure. Many new alliances and acquisitions have focused on emerging fields, such as cloud computing, software defined networking, communication applications and other computing tasks via networks, rather than by the use of in-house machines.

Our Wholesale business competes with traditional carriers for long-haul, voice and IP services. In addition, mobile video and data needs are driving a greater need for wireless backhaul. Network providers, cable companies and niche players are competitors for this business opportunity.

Verizon Media

Our media business, Verizon Media Group (Verizon Media), includes diverse media and technology brands that serve both consumers and businesses. Verizon Media provides consumers with owned and operated and third-party search properties as well as mail, news, finance, sports and entertainment offerings, and provides other businesses and partners access to consumers through digital advertising, content delivery and video streaming platforms. In 2020, Verizon Media's revenues were \$7.0 billion.

Verizon Media Products and Solutions

Ad Platform

Our Verizon Media Ad Platform provides advertisers and publishers with a simplified suite of intelligent advertising solutions across desktop, mobile and television devices. Verizon Media's business is comprised primarily of search advertising, display advertising and Ecommerce.

- *Search advertising.* Our search properties serve as a guide for users to discover information on the internet. Verizon Media serves click-based search advertisements generated by proprietary algorithmic technology, as well as

advertisements from partners. Verizon Media provides the underlying search products that facilitate user searches within Verizon Media and third-party partner properties.

- *Display advertising.* Display advertising is made up of both graphical and performance-based advertising and takes the form of impression-based contracts, time-based contracts and performance-based contracts. Verizon Media display ads leverage proprietary data signals to identify and engage users on Verizon Media properties and across the web. Through the Verizon Media Ad Platform, we provide customers the ability to buy advertising inventory and measure campaigns across screens and advertising formats using self-serve technology or our managed services. We also provide publishers with the ability to monetize their ad inventory.
- *Ecommerce.* Our Ecommerce offering includes different types of business models, including facilitating transactions between businesses and consumers, enabling businesses that facilitate transactions for other businesses and facilitating transactions between consumers.

Subscription Memberships

Our paid subscription offerings include premium content and services across our mail, news, finance, sports and entertainment properties, privacy and security solutions and computer protection.

[Table of Contents](#)

Verizon Media Platform

As the digital platform reshapes the delivery of media and entertainment content, there is an increasing need for stable, high-quality video delivery platforms. Our Media Platform offers a scalable platform for delivering content, including live broadcasts, video on demand, games, software and websites to our customers on their devices at any time. This platform is targeted at media and entertainment companies and other businesses that deliver their digital products and services through the internet.

Global Network and Technology

Our global network architecture is used by Consumer, Business and Verizon Media. Our network technology platforms include both wireless and wireline technologies.

Network Evolution

We are evolving the architecture of our networks to a next-generation multi-use platform, providing improved efficiency and virtualization, increased automation and opportunities for edge computing services that will support both our fiber-based and radio access network technologies. We call this the Intelligent Edge Network. We expect that this new architecture will simplify operations by eliminating legacy network elements, speed the deployment of 5G wireless technology and create new opportunities in the business market in a cost efficient manner.

5G Deployment

Over the past several years, we have been leading the development of 5G wireless technology industry standards and the ecosystems for fixed and mobile 5G wireless services. We expect that 5G technology will provide higher throughput and lower latency than the current fourth-generation (4G) (LTE) technology and enable our networks to handle more traffic as the number of internet-connected devices grows. As of December 31, 2020, we have launched our 5G Ultra Wideband Network in 61 U.S. markets. We have commercially launched 5G Home in 12 of those markets.

We also launched our 5G Nationwide Network in October 2020, which is available in over 2,700 cities across the U.S. covering approximately 230 million people. 5G Nationwide uses low and mid-band spectrum and dynamic spectrum sharing (DSS) technology, which allows 5G service to run simultaneously with 4G LTE on multiple spectrum bands. With DSS, whenever customers move outside Verizon's high-band Ultra Wideband coverage area, their 5G-enabled devices will remain on 5G technology using the lower spectrum bands where the 5G Nationwide network is available. This allows us to more fully and effectively utilize our current spectrum resources to serve both 4G and 5G customers.

4G LTE

The wireless network technology platform that carries the majority of our wireless traffic is 4G LTE, which provides higher data throughput performance for data services at a lower cost compared to that offered by 3G technology. As of December 31, 2020, our 4G LTE network is available in over 700 markets covering approximately 327 million people, including those in areas served by our LTE in Rural America partners. Under this program, we have collaborated with wireless carriers in rural areas to build and operate a 4G LTE network using each carrier's network assets with our core 4G LTE equipment and 700 Megahertz (MHz) C Block and Advanced Wireless Services (AWS) spectrum. In 2020, we launched LTE Home Internet, a home broadband internet service that leverages the Verizon 4G LTE network.

Wireless Network Reliability and Build-Out

We consider the reliability, coverage and speed of our wireless network to be key factors for our continued success. We believe that steady and consistent network and platform investments provide the foundation for innovative products and services. As we design and deploy our network, we focus on the number of successful data sessions the network enables, delivering on our advertised throughput speeds, and the number of calls that are connected on the first attempt and completed without being dropped. We utilize three strategies to maintain the quality of our network: increasing the density of our network elements, deploying new technologies as they are developed and putting additional wireless spectrum into service.

We have been densifying our network by utilizing small cell technology, in-building solutions and distributed antenna systems. Network densification enables us to add capacity to address increasing mobile video consumption and the growing demand for IoT products and services on our 4G LTE and 5G networks. We are also utilizing existing network capabilities to handle increased traffic without interrupting the quality of the customer experience. We continue to deploy advanced technologies to increase both network capacity and data rates.

In order to build and upgrade our existing 4G LTE network and deploy our 5G network, we must complete a variety of steps, which can include securing rights to a large number of sites as well as obtaining zoning and other governmental approvals and fiber facilities, for our macro and small cells, in-building systems and antennas and related radio equipment that comprise distributed antenna systems. We have relationships with a wide variety of vendors that supply various products and services that support our wireless network operations. We utilize tower site management firms as lessors or managers of a portion of our existing leased and owned tower sites.

Our networks in the U.S. include various elements of redundancy designed to enhance the reliability of the services provided to our customers. To mitigate the impact of power disruptions on our operations, we have battery backup at every switch and every macro cell. We also utilize backup generators at a majority of our macro cells and at every switch location. In addition, we have a fleet of portable backup

[Table of Contents](#)

generators that can be deployed, if needed. We further enhance reliability by using a fully redundant Multiprotocol Label Switching backbone network in critical locations.

In addition to our own network coverage, we have roaming agreements with a number of wireless service providers to enable our customers to receive wireless service in nearly all other areas in the U.S. where wireless service is available. We also offer a variety of international wireless voice and data services to our customers through roaming arrangements with wireless service providers outside the U.S.

Fios

Residential broadband service has seen significant growth in bandwidth demand over the past several years, and we believe that demand will continue to grow. We expect the continued emergence of new video services, new data applications and the proliferation of IP devices in the home will continue to drive new network requirements for increased data speeds and throughput. We believe that the Passive Optical Network (PON) technology underpinning Fios positions us well to meet these demands in a cost-effective and efficient manner.

While deployed initially as a consumer broadband network, our PON infrastructure is also experiencing more widespread application in the Business segment, especially as businesses increasingly migrate to Ethernet-based access services.

Global IP

Verizon owns and operates one of the largest global fiber-optic networks in the world, providing connectivity to Business customers in more than 180 countries. Our global IP network includes long-haul, metro and submarine assets that span over 1 million route miles and enable and support international operations.

Global business is rapidly evolving to an "everything-as-a-service" model in which Business customers seek cloud-based, converged enterprise solutions delivered securely via managed and professional services. We are continuing to deploy packet optical transport technology in order to create a global network platform to meet this demand.

Spectrum

The spectrum licenses we hold can be used for mobile wireless voice, video and data communications services. We are licensed by the Federal Communications Commission (FCC) to provide these wireless services on portions of the 800 MHz band, also known as cellular spectrum, the 1800-1900 MHz band, also known as Personal Communication Services (PCS) spectrum, portions of the 700 MHz upper C band and AWS 1 and 3 spectrum in the 1700 and 2100 MHz bands, in areas that, collectively, cover nearly all of the population of the U.S. We have also deployed 4G technologies in 3.5 Gigahertz (GHz) shared spectrum, using LTE/Citizens Broadband Radio Service, and in 5 GHz unlicensed spectrum, using LTE/Licensed Assisted Access. All of this spectrum is collectively called low and mid-band spectrum. We are using our low and mid-band spectrum to provide 3G, 4G LTE and 5G wireless services. We are increasingly reallocating spectrum previously used for 3G service to provide 4G LTE service. We are also utilizing low and mid-band spectrum, through DSS, for 5G to complement our spectrum licenses in the 28 and 39 GHz band, collectively called millimeter wave spectrum.

Millimeter wave and low and mid-band spectrum are being used for our 5G technology deployment. We anticipate that we will need additional spectrum to meet future demand. This increasing demand is driven by growth in customer connections and the increased usage of wireless broadband services that use more bandwidth and require faster rates of speed, as well as the wider deployment of 5G mobile and fixed services. We can meet our future 4G and 5G spectrum needs by acquiring licenses or leasing spectrum from other licensees, or by acquiring new spectrum licenses from the FCC, if and when future FCC spectrum auctions occur.

From time to time we have exchanged spectrum licenses with other wireless service providers through secondary market swap transactions. We expect to continue to pursue similar opportunities to trade spectrum licenses in order to meet capacity and expansion needs in the future. In certain cases, we have entered into intra-market spectrum swaps designed to increase the amount

of contiguous spectrum within frequency bands in a specific market. Contiguous spectrum improves network performance and efficiency. These swaps, as well as any spectrum purchases, require us to obtain governmental approvals.

Information regarding spectrum license transactions is included in Note 3 to the consolidated financial statements of Verizon Communications Inc. and Subsidiaries.

Human Capital Resources

At Verizon, we know that our people are one of our most valuable assets. In order to realize our core business strategy, we have developed human capital programs and practices that support, develop and care for our employees from the time they join our team through the entirety of their careers with Verizon. These programs are centered on the following principles:

- Attract the right talent for our future and maintain a diverse workforce that has a capacity for learning and brings high-value skills and expertise to the Company.
- Develop our employees to their full potential through best-in-class educational programs and exceptional development experiences, creating a culture of continuous learning and engagement.

[Table of Contents](#)

- Inspire individuals to build a career at Verizon by providing meaningful work and upskilling opportunities and establishing an inspiring and inclusive work environment for all.

Verizon is committed to being an employer of choice. With approximately 132,200 employees measured on a full-time equivalent basis as of December 31, 2020, we know that we need employees with diverse backgrounds, experiences and perspectives to help us understand and connect more meaningfully to the diverse customers and communities we serve. Our human capital programs and practices are designed to create a workplace where employees are empowered to share their authentic selves and feel seen and heard as vital contributors to Verizon's corporate purpose. In addition, Verizon has extensive on-the-job training opportunities, tuition reimbursement programs and career development support to enable our employees to maximize their potential and thrive professionally. Guided by our long-standing commitment to diversity and inclusion, our hiring and outreach programs have resulted in a strong representation of women and people of color. As of December 31, 2020, Verizon's global workforce was approximately 66.2% male, 33.7% female and 0.1% unknown or undeclared, and the race/ethnicity of our U.S. workforce was 53.9% White, 19.3% Black, 11.3% Hispanic, 9.4% Asian, 0.4% American Indian/Alaskan Native, 0.3% Native Hawaiian/Pacific Islander, 2.5% two or more races, and 2.9% unknown or undeclared. Women represented 37.9% of U.S. senior leadership (vice president level and above). People of color represented 34.6% of U.S. senior leadership.

Verizon respects our employees' rights to freedom of association and collective bargaining in compliance with applicable law, including the right to join or not join labor unions. We have a long history of working with the Communications Workers of America and the International Brotherhood of Electrical Workers—the two unions that in total represent approximately 22.5% of our employees as of December 31, 2020. In addition, where applicable outside of the U.S., we engage with employee representative bodies such as works council. Verizon meets with U.S. national and local union leaders, as well as works council leaders outside the U.S., to talk about key business topics, including safety, customer service, plans to improve operational processes, our business performance and the impacts that changing technology and competition are having on our customers, employees and business strategy.

In 2020, Verizon employees across the Company came together in new ways in response to the health and humanitarian crisis brought on by the novel coronavirus (COVID-19) pandemic. Soon after COVID-19 was first identified, Verizon took many broad-ranging steps to support our employees and their families so that the Company could continue providing our essential services to our customers and communities. Some of these measures included temporarily moving over 115,000 of our employees to remote work arrangements and temporarily closing nearly 70% of our Company-owned retail store locations or moving to appointment-only store access; limiting our customer-focused field operations for a period of time; enhancing safety protocols for employees working outside their homes; launching a COVID-19 leave of absence policy and expanded family care assistance for employees; and providing additional compensation to employees in front line roles that could not be done from home for a period of time. In an effort to foster transparency and provide support during this unprecedented time, Verizon launched a daily live webcast with current information on the Company's actions to address the impacts of COVID-19 as well as a number of broad ranging resources for employees. In addition, Verizon re-trained over 20,000 frontline employees to temporarily serve in other roles, such as customer service or telesales, which not only promoted the health and safety of our employees, but also provided opportunities for learning and career development.

For a discussion of the oversight provided by the Verizon Board of Directors over the Company's human capital management practices, see the section entitled "Governance — Our Approach to Governance — Our Approach to Strategy and Risk Oversight — Oversight of Human Capital Management" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2021 Annual Meeting of Shareholders.

Patents, Trademarks and Licenses

We own or have licenses to various patents, copyrights, trademarks, domain names and other intellectual property rights necessary to conduct our business. We actively pursue the filing and registration of patents, copyrights, trademarks and domain names to protect our intellectual property rights within the United States and abroad. We also actively grant licenses, in exchange for appropriate fees or other consideration and subject to appropriate safeguards and restrictions, to other companies that enable them to utilize certain of our intellectual property rights and proprietary technology as part of their products and services. Such licenses

enable the licensees to take advantage of Verizon's brands and the results of Verizon's research and development efforts. While these licenses result in valuable consideration for Verizon, we do not believe that the loss of such consideration, or the expiration of any of our intellectual property rights, would have a material effect on our results of operations.

We periodically receive offers from third parties to purchase or obtain licenses for patents and other intellectual property rights in exchange for royalties or other payments. We also periodically receive notices alleging that our products or services infringe on third-party patents or other intellectual property rights. These claims, whether against us directly or against third-party suppliers of products or services that we sell to our customers, if successful, could require us to pay damages or royalties, rebrand, or cease offering the relevant products or services.

Regulatory and Competitive Trends

Regulatory and Competitive Landscape

Verizon operates in a regulated and highly competitive market, as described above. Some of our competitors are subject to fewer regulatory constraints than Verizon. For many services offered by Verizon, the FCC is our primary regulator. The FCC has jurisdiction over interstate telecommunications services and other matters under the Communications Act of 1934, as amended (Communications Act or Act). Other Verizon services are subject to state and local regulation.

Federal, State and Local Regulation

Wireless Services

The FCC regulates several aspects of our wireless operations. Generally, the FCC has jurisdiction over the construction, operation, acquisition and transfer of wireless communications systems. All wireless services require use of radio frequency spectrum, the assignment and distribution of which is subject to FCC oversight. Verizon anticipates that it will need additional spectrum to meet future demand. We can meet our needs for licensed spectrum by purchasing licenses or leasing spectrum from others, or by participating in a competitive bidding process to acquire new spectrum from the FCC. Those processes are subject to certain reviews, approvals and potential conditions.

Today, Verizon holds FCC spectrum licenses that allow it to provide a wide range of mobile and fixed communications services, including both voice and data services. FCC spectrum licenses typically have a term of 10 years, at which time they are subject to renewal. While the FCC has routinely renewed all of Verizon's wireless licenses, challenges could be raised in the future. If a wireless license was revoked or not renewed, Verizon would not be permitted to provide services on the spectrum covered by that license. Some of our licenses require us to comply with so-called "open access" FCC regulations, which generally require licensees of particular spectrum to allow customers to use devices and applications of their choice, subject to certain technical limitations. The FCC has also imposed certain specific mandates on wireless carriers, including construction and geographic coverage requirements, technical operating standards, provision of enhanced 911 services, roaming obligations and requirements for wireless tower and antenna facilities.

The Act generally preempts regulation by state and local governments of the entry of, or the rates charged by, wireless carriers. The Act does not prohibit states from regulating the other "terms and conditions" of wireless service. For example, some states impose reporting requirements. Several states also have laws or regulations that address safety issues (e.g., use of wireless handsets while driving) and taxation matters. In addition, wireless tower and antenna facilities are often subject to state and local zoning and land use regulation, and securing approvals for new or modified facilities is often a lengthy and expensive process.

Broadband

Verizon offers many different broadband services. The FCC recognizes broadband internet access services as "information services" subject to a "light touch" regulatory approach rather than to the traditional, utilities-style regulations. However, a number of states have taken steps to regulate broadband and two of those cases related to regulations in California and Vermont are being litigated in the courts. Regardless of regulation, Verizon remains committed to the open internet, which provides consumers with competitive choices and unblocked access to lawful websites and content. Our commitment to our customers can be found on our website at <https://www.verizon.com/about/our-company/verizon-broadband-commitment>.

Wireline Voice

Verizon offers many different wireline voice services, including traditional telephone service and other services that rely on technologies such as VoIP. For regulatory purposes, legacy telephone services are generally considered to be "common carrier" services. Common carrier services are subject to heightened regulatory oversight with respect to rates, terms and conditions and other aspects of the services. The FCC has not decided the regulatory classification of VoIP but has said VoIP service providers must comply with certain rules, such as 911 capabilities and law enforcement assistance requirements.

State public utility commissions regulate Verizon's telephone operations with respect to certain telecommunications intrastate matters. Verizon operates as an "incumbent local exchange carrier" in nine states and the District of Columbia. These incumbent operations are subject to various levels of pricing flexibility and other state oversight and requirements. Verizon also has other wireline operations that are more lightly regulated.

Video

Verizon offers a multichannel video service that is regulated like traditional cable service. The FCC has a body of rules that apply to cable operators, and these rules also generally apply to Verizon. In areas where Verizon offers its facilities-based multichannel

video services, Verizon has been required to obtain a cable franchise from local government entities, or in some cases a state-wide franchise, and comply with certain one-time and ongoing obligations as a result.

Privacy and Data Security

We are subject to local, state, federal, and international laws and regulations relating to privacy and data security that impact all parts of our business, including wireline, wireless, broadband and the development and roll out of new products, such as those in the media and IoT space. At the federal level, our voice business is subject to the FCC's privacy requirements. Oversight of broadband internet access privacy and data security is governed by the Federal Trade Commission (FTC). Europe's General Data Protection Regulation, which went into effect in May 2018, and the California Consumer Privacy Act, which went into effect in January 2020, both include significant penalties for non-compliance. In addition, other new privacy laws took effect in 2020, including in Brazil and Maine. Generally, attention to privacy and data security requirements is increasing at all levels of government globally, and privacy-related legislation has been introduced or is under consideration in many locations. These regulations could have a significant impact on our businesses.

Public Safety and Cybersecurity

The FCC plays a role in addressing public safety concerns by regulating emergency communications services and mandating widespread availability of both media (broadcast/cable) and wireless emergency alerting services. In response to cyber attacks that have occurred or could

[Table of Contents](#)

occur in the future, however, the FCC or other regulators may attempt to increase regulation of the cybersecurity practices of providers. The FCC is also addressing the use by American companies of equipment produced by certain companies deemed to cause potential national security risks. Verizon does not currently use equipment in its networks from vendors under such restrictions. In addition, due to recent natural disasters, federal and state agencies may attempt to impose regulations to ensure continuity of service during disasters; for example, the California Public Utilities Commission has imposed regulations on back-up power for communications facilities.

Intercarrier Compensation and Network Access

The FCC regulates some of the rates that carriers pay each other for the exchange of voice traffic (particularly traditional wireline traffic) over different networks and other aspects of interconnection for some voice services. The FCC also regulates some of the rates and terms and conditions for certain wireline "business data services" and other services and network facilities. Verizon is both a seller and a buyer of these services, and both makes and receives interconnection payments. The FCC has focused in recent years on whether changes in the rates, terms and conditions for both the exchange of traffic and for business data services may be appropriate.

Regulatory Response to the COVID-19 Pandemic

Since the time that COVID-19 began to spread throughout the world in 2020, Verizon has been subject to various international, federal, state and local policies, regulations and initiatives aimed at reducing the transmission of the disease and protecting the health and safety of the world's population. In addition, governments have imposed a wide variety of consumer protection measures that limit how certain businesses, including telecommunications companies, can operate their business and interact with their customers. Because the severity, magnitude and duration of the COVID-19 pandemic and its economic consequences are uncertain and rapidly changing, the impact of the crisis and the governmental responses to the crisis on our business in 2021 and beyond remains uncertain and difficult to predict.

Information About Our Executive Officers

See Part III, Item 10. "Directors, Executive Officers and Corporate Governance" of this Annual Report on Form 10-K for information about our executive officers.

Information on Our Internet Website

We make available, free of charge on our website, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports at <https://www.verizon.com/about/investors> as soon as reasonably practicable after such reports are electronically filed with the Securities and Exchange Commission (SEC). These reports and other information are also available on the SEC's website at <https://www.sec.gov>. We periodically provide other information for investors on our website, including news and announcements regarding our financial performance, information on corporate governance and details related to our annual meeting of shareholders. We encourage investors, the media, our customers, business partners and other stakeholders to review the information we post on this channel. Website references in this report are provided as a convenience and do not constitute, and should not be viewed as, incorporation by reference of the information contained on, or available through, the websites. Therefore, such information should not be considered part of this report.

Cautionary Statement Concerning Forward-Looking Statements

In this report we have made forward-looking statements. These statements are based on our estimates and assumptions and are subject to risks and uncertainties. Forward-looking statements include the information concerning our possible or assumed future results of operations. Forward-looking statements also include those preceded or followed by the words "anticipates," "believes," "estimates," "expects," "hopes" or similar expressions. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required by law. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

The following important factors, along with those discussed elsewhere in this report and in other filings with the SEC, could affect future results and could cause those results to differ materially from those expressed in the forward-looking statements:

- cyber attacks impacting our networks or systems and any resulting financial or reputational impact;
- natural disasters, terrorist attacks or acts of war, or significant litigation and any resulting financial or reputational impact;
- the impact of the COVID-19 pandemic on our operations, our employees and the ways in which our customers use our networks and other products and services;
- disruption of our key suppliers' or vendors' provisioning of products or services, including as a result of the COVID-19 pandemic;
- material adverse changes in labor matters and any resulting financial or operational impact;
- the effects of competition in the markets in which we operate;
- failure to take advantage of developments in technology and address changes in consumer demand;

[Table of Contents](#)

- performance issues or delays in the deployment of our 5G network resulting in significant costs or a reduction in the anticipated benefits of the enhancement to our networks;
- the inability to implement our business strategy;
- adverse conditions in the U.S. and international economies;
- changes in the regulatory environment in which we operate, including any increase in restrictions on our ability to operate our networks or businesses;
- our high level of indebtedness;
- an adverse change in the ratings afforded our debt securities by nationally accredited ratings organizations or adverse conditions in the credit markets affecting the cost, including interest rates, and/or availability of further financing;
- significant increases in benefit plan costs or lower investment returns on plan assets;
- changes in tax laws or treaties, or in their interpretation; and
- changes in accounting assumptions that regulatory agencies, including the SEC, may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings.

Item 1A. Risk Factors

The following discussion of "Risk Factors" identifies factors that may adversely affect our business, operations, financial condition or future performance. This information should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Result of Operations" and the consolidated financial statements and related notes. The following discussion of risks is not all-inclusive but is designed to highlight what we believe are the material factors to consider when evaluating our business and expectations. These factors could cause our future results to differ materially from our historical results and from expectations reflected in forward-looking statements.

Operational Risks

Cyber attacks impacting our networks or systems could have an adverse effect on our business.

Cyber attacks, including through the use of malware, computer viruses, dedicated denial of services attacks, credential harvesting, social engineering and other means for obtaining unauthorized access to or disrupting the operation of our networks and systems and those of our suppliers, vendors and other service providers, could have an adverse effect on our business. Cyber attacks may cause equipment failures, loss of information, including sensitive personal information of customers or employees or valuable technical and marketing information, as well as disruptions to our or our customers' operations. Cyber attacks against companies, including Verizon, have increased in frequency, scope and potential harm in recent years. They may occur alone or in conjunction with physical attacks, especially where disruption of service is an objective of the attacker. The development and maintenance of systems to prevent such attacks is costly and requires ongoing monitoring and updating to address their increasing prevalence and sophistication. While, to date, we have not been subject to cyber attacks that, individually or in the aggregate, have been material to Verizon's operations or financial condition, the preventive actions we take to reduce the risks associated with cyber attacks, including protection of our systems and networks, may be insufficient to repel or mitigate the effects of a major cyber attack in the future.

The inability to operate or use our networks and systems or those of our suppliers, vendors and other service providers as a result of cyber attacks, even for a limited period of time, may result in significant expenses to Verizon and/or a loss of market share to other communications providers. The costs associated with a major cyber attack on Verizon could include expensive incentives offered to existing customers and business partners to retain their business, increased expenditures on cybersecurity measures and

the use of alternate resources, lost revenues from business interruption and litigation. Further, certain of Verizon's businesses, such as those offering security solutions and infrastructure and cloud services to business customers, could be negatively affected if our ability to protect our own networks and systems is called into question as a result of a cyber attack. Our presence in the IoT industry, which includes offerings of telematics products and services, could also increase our exposure to potential costs and expenses and reputational harm in the event of cyber attacks impacting these products or services. In addition, a compromise of security or a theft or other compromise of valuable information, such as financial data and sensitive or private personal information, could result in lawsuits and government claims, investigations or proceedings. Any of these occurrences could damage our reputation, adversely impact customer and investor confidence and result in a material adverse effect on Verizon's results of operation or financial condition.

Natural disasters, terrorist acts or acts of war could cause damage to our infrastructure and result in significant disruptions to our operations.

Our business operations are subject to interruption by power outages, terrorist attacks, other hostile acts and natural disasters, including an increasing prevalence of wildfires and intensified storm activities. Such events could cause significant damage to our infrastructure upon which our business operations rely, resulting in degradation or disruption of service to our customers, as well as significant recovery time and expenditures to resume operations. Our system redundancy may be ineffective or inadequate to sustain our operations through all such events.

[Table of Contents](#)

We are implementing, and will continue to implement, measures to protect our infrastructure and operations from the impacts of these events in the future, but these measures and our overall disaster recovery planning may not be sufficient for all eventualities. These events could also damage the infrastructure of the suppliers that provide us with the equipment and services that we need to operate our business and provide products to our customers. These occurrences could result in lost revenues from business interruption, damage to our reputation and reduced profits.

Public health crises, including the COVID-19 pandemic, could materially adversely affect our business, financial condition and results of operations.

We are subject to risks related to public health crises, such as the COVID-19 pandemic, which had an adverse effect on our operating results in 2020. Our business is based on our ability to provide products and services to customers throughout the United States and around the world and the ability of those customers to use and pay for those products and services for their businesses and in their daily lives. As a result, our business, financial condition and results of operations could be materially adversely affected by a crisis, like the COVID-19 pandemic, that significantly impacts the way customers use and are able to pay for our products and services, the way our employees are able to provide services to our customers, and the ways that our partners and suppliers are able to provide products and services to us. For example, public and private sector policies and initiatives to reduce the transmission of COVID-19 and initiatives Verizon has taken in response to the health crisis to promote the health and safety of our employees and provide critical infrastructure and connectivity to our customers, along with the related global slowdown in economic activity, resulted in decreased revenues, increased costs and lower earnings per share during 2020. In addition, such a crisis could significantly increase the probability or consequences of the risks our business faces in ordinary circumstances, such as risks associated with our supplier and vendor relationships, risks of an economic slowdown, regulatory risks, and the costs and availability of financing. Because the severity, magnitude and duration of the COVID-19 pandemic and its economic consequences are uncertain and rapidly changing, the impact on our business, financial condition and results of operations in 2021 and beyond remains uncertain and difficult to predict. In addition, the ultimate impact of the COVID-19 pandemic on our business, financial condition and results of operations depends on many factors, including those discussed above, that are not within our control.

We depend on key suppliers and vendors to provide equipment that we need to operate our business.

We depend on various key suppliers and vendors to provide us, directly or through other suppliers, with equipment and services, such as fiber, switch and network equipment, smartphones and other wireless devices that we need in order to operate our business and provide products to our customers. For example, our smartphone and other device suppliers often rely on one vendor for the manufacture and supply of critical components, such as chipsets, used in their devices, and there are a limited number of companies capable of supplying the network infrastructure equipment on which we depend. These suppliers or vendors could fail to provide equipment or service on a timely basis, or fail to meet our performance expectations, for a number of reasons, including, for example, disruption to the global supply chain as a result of the COVID-19 pandemic. If such failures occur, we may be unable to provide products and services as and when requested by our customers, or we may be unable to continue to maintain or upgrade our networks. Because of the cost and time lag that can be associated with transitioning from one supplier to another, our business could be substantially disrupted if we were required to, or chose to, replace the products or services of one or more major suppliers with products or services from another source, especially if the replacement became necessary on short notice. Any such disruption could increase our costs, decrease our operating efficiencies and have a material adverse effect on our business, results of operations and financial condition.

The suppliers and vendors on which we rely may also be subject to litigation with respect to technology on which we depend, including litigation involving claims of patent infringement. Such claims are frequently made in the communications industry. We are unable to predict whether our business will be affected by any such litigation. We expect our dependence on key suppliers to continue as we develop and introduce more advanced generations of technology.

A significant portion of our workforce is represented by labor unions, and we could incur additional costs or experience work stoppages as a result of the renegotiation of our labor contracts.

As of December 31, 2020, approximately 22.5% of our workforce is represented by the Communications Workers of America or the International Brotherhood of Electrical Workers. While we have labor contracts in place with these unions, with subsequent

negotiations we could incur additional costs and/or experience work stoppages, which could adversely affect our business operations. In addition, while a small percentage of the workforce of our wireless and other businesses outside of wireline is represented by unions for bargaining, we cannot predict what level of success unions may have in further organizing this workforce or the potentially negative impact it could have on our operations.

Economic and Strategic Risks

We face significant competition that may reduce our profits.

We face significant competition in our industries. The rapid development of new technologies, services and products has eliminated many of the traditional distinctions among wireless, cable, internet and local and long distance communication services and brought new competitors to our markets, including other telecommunications companies, cable companies, wireless service providers, satellite providers and application and device providers. While these changes have enabled us to offer new types of products and services, they have also allowed other providers to broaden the scope of their own competitive offerings. If we are unable to compete effectively, we could experience lower than expected revenues and earnings. A projected sustained decline in any of our reporting units' revenues and earnings could have a significant impact on its fair value and has caused us in the past, and may cause us in the future, to record goodwill impairment charges. The amount of any impairment charge could be significant and could have a material adverse impact on our results of operations for the period in

[Table of Contents](#)

which the charge is taken. In addition, wireless service providers are significantly altering the financial relationships with their customers through commercial offers that vary service and device pricing, promotions, incentives and levels of service provided – in some cases specifically targeting our customers. Our ability to compete effectively will depend on, among other things, our network quality, capacity and coverage, the pricing of our products and services, the quality of our customer service, our development of new and enhanced products and services, the reach and quality of our sales and distribution channels, our ability to market our products and services effectively and our capital resources. It will also depend on how successfully we anticipate and respond to various factors affecting our industries, including new technologies and business models, changes in consumer preferences and demand for existing services, demographic trends and economic conditions. If we are not able to respond successfully to these competitive challenges, we could experience reduced profits.

If we are not able to take advantage of developments in technology and address changing consumer demand on a timely basis, we may experience a decline in the demand for our services, be unable to implement our business strategy and experience reduced profits.

Our industries are rapidly changing as new technologies are developed that offer consumers an array of choices for their communications needs and allow new entrants into the markets we serve. In order to grow and remain competitive, we will need to adapt to future changes in technology, enhance our existing offerings and introduce new offerings to address our customers' changing demands. If we are unable to meet future challenges from competing technologies on a timely basis or at an acceptable cost, we could lose customers to our competitors. We may not be able to accurately predict technological trends or the success of new services in the market.

The deployment of our 5G network is subject to a variety of risks, including those related to equipment and spectrum availability, unexpected costs, and regulatory permitting requirements that could cause deployment delays or network performance issues. These issues could result in significant costs or reduce the anticipated benefits of the enhancements to our networks. If our services fail to gain acceptance in the marketplace, or if costs associated with the implementation and introduction of these services materially increase, our ability to retain and attract customers could be adversely affected.

In addition to introducing new offerings and technologies, such as 5G technology, we must phase out outdated and unprofitable technologies and services. If we are unable to do so on a cost-effective basis, we could experience reduced profits. In addition, there could be legal or regulatory restraints on our ability to phase out current services.

Adverse conditions in the U.S. and international economies could impact our results of operations.

Unfavorable economic conditions, such as a recession or economic slowdown in the U.S. or elsewhere, could negatively affect the affordability of and demand for some of our products and services. In difficult economic conditions, consumers may seek to reduce discretionary spending by forgoing purchases of our products, electing to use fewer higher margin services, dropping down in price plans or obtaining lower-cost products and services offered by other companies. Similarly, under these conditions, the business customers that we serve may delay purchasing decisions, delay full implementation of service offerings or reduce their use of services. In addition, adverse economic conditions may lead to an increased number of our consumer and business customers that are unable to pay for services. If these events were to occur, it could have a material adverse effect on our results of operations.

Regulatory and Legal Risks

Changes in the regulatory framework under which we operate could adversely affect our business prospects or results of operations.

Our domestic operations are subject to regulation by the FCC and other federal, state and local agencies, and our international operations are regulated by various foreign governments and international bodies. These regulatory regimes frequently restrict or impose conditions on our ability to operate in designated areas and provide specified products or services. We are frequently required to maintain licenses for our operations and conduct our operations in accordance with prescribed standards. We are often involved in regulatory and other governmental proceedings or inquiries related to the application of these requirements. It is impossible to predict with any certainty the outcome of pending federal and state regulatory proceedings relating to our

operations, or the reviews by federal or state courts of regulatory rulings. Without relief, existing laws and regulations may inhibit our ability to expand our business and introduce new products and services. Similarly, we cannot guarantee that we will be successful in obtaining the licenses needed to carry out our business plan or in maintaining our existing licenses. For example, the FCC grants wireless licenses for terms generally lasting 10 years, subject to renewal. The loss of, or a material limitation on, certain of our licenses could have a material adverse effect on our business, results of operations and financial condition.

New laws or regulations or changes to the existing regulatory framework at the federal, state and local, or international level, such as those described below, new laws or regulations enacted to address the potential impacts of climate change, or requirements limiting our ability to discontinue service to customers could restrict the ways in which we manage our wireline and wireless networks and operate our Consumer, Business and Verizon Media businesses, impose additional costs, impair revenue opportunities and potentially impede our ability to provide services in a manner that would be attractive to us and our customers.

- *Privacy and data protection* - we are subject to federal, state and international laws related to privacy and data protection. Europe's General Data Protection Regulation, which went into effect in May 2018, and the California Consumer Privacy Act, which went into effect in January 2020, both include significant penalties for non-compliance. In addition, other new privacy laws took effect in 2020, including in Brazil and Maine. Generally, attention to privacy and data security requirements is increasing at all levels of

[Table of Contents](#)

government globally, and privacy-related legislation has been introduced or is under consideration in many locations. These regulations could have a significant impact on our businesses.

- *Regulation of broadband internet access services* - In its 2015 Title II Order, the FCC nullified its longstanding "light touch" approach to regulating broadband internet access services and "reclassified" these services as telecommunications services subject to utilities-style common carriage regulation. The FCC repealed the 2015 Title II Order in December 2017, and returned to its traditional light-touch approach for these services. The 2017 order has been affirmed in part by the D.C. Circuit but may be revisited by future FCC commissions or by Congress and further appeals and challenges are possible; the outcome and timing of these or any other challenge remains uncertain. Several states have also adopted or are considering adopting laws or executive orders that would impose net neutrality and other requirements on some of our services (in some cases different from the FCC's 2015 rules). The enforceability and effect of these state rules is uncertain.
- *"Open Access"* - we hold certain wireless licenses that require us to comply with so-called "open access" FCC regulations, which generally require licensees of particular spectrum to allow customers to use devices and applications of their choice. Moreover, certain services could be subject to conflicting regulation by the FCC and/or various state and local authorities, which could significantly increase the cost of implementing and introducing new services.

The further regulation of broadband, wireless and our other activities and any related court decisions could restrict our ability to compete in the marketplace and limit the return we can expect to achieve on past and future investments in our networks.

We are subject to a significant amount of litigation, which could require us to pay significant damages or settlements.

We are subject to a substantial amount of litigation, including, from time to time, shareholder derivative suits, patent infringement lawsuits, antitrust class actions, wage and hour class actions, personal injury claims, property claims, and lawsuits relating to our advertising, sales, billing and collection practices. In addition, our wireless business also faces personal injury and wrongful death lawsuits relating to alleged health effects of wireless phones or radio frequency transmitters. We may incur significant expenses in defending these lawsuits. In addition, we may be required to pay significant awards or settlements.

Financial Risks

Verizon has significant debt, which could increase further if Verizon incurs additional debt in the future and does not retire existing debt.

As of December 31, 2020, Verizon had approximately \$118.5 billion of outstanding unsecured indebtedness, \$9.4 billion of unused borrowing capacity under our existing revolving credit facility and \$10.6 billion of outstanding secured indebtedness. Verizon's debt level and related debt service obligations could have negative consequences, including:

- requiring Verizon to dedicate significant cash flow from operations to the payment of principal, interest and other amounts payable on our debt, which would reduce the funds we have available for other purposes, such as working capital, capital expenditures, dividend payments and acquisitions;
- making it more difficult or expensive for Verizon to obtain any necessary future financing for working capital, capital expenditures, debt service requirements, debt refinancing, acquisitions or other purposes;
- reducing Verizon's flexibility in planning for or reacting to changes in our industries and market conditions;
- making Verizon more vulnerable in the event of a downturn in our business; and
- exposing Verizon to increased interest rate risk to the extent that our debt obligations are subject to variable interest rates.

Adverse changes in the credit markets and other factors could increase our borrowing costs and the availability of financing.

We require a significant amount of capital to operate and grow our business. We fund our capital needs in part through borrowings in the public and private credit markets. Adverse changes in the credit markets, including increases in interest rates, could increase our cost of borrowing and/or make it more difficult for us to obtain financing for our operations or refinance existing indebtedness. In addition, our ability to obtain funding under asset-backed debt transactions is subject to our ability to continue to originate a sufficient amount of assets eligible to be securitized. Our borrowing costs also can be affected by short- and long-term debt ratings assigned by independent rating agencies, which are based, in significant part, on our performance as measured by customary credit metrics. A decrease in these ratings would likely increase our cost of borrowing and/or make it more difficult for us to obtain financing. A severe disruption in the global financial markets could impact some of the financial institutions with which we do business, and such instability could also affect our access to financing.

Increases in costs for pension benefits and active and retiree healthcare benefits may reduce our profitability and increase our funding commitments.

With approximately 132,200 employees and approximately 190,000 retirees as of December 31, 2020 eligible to participate in Verizon's benefit plans, the costs of pension benefits and active and retiree healthcare benefits have a significant impact on our profitability. Our costs of maintaining these plans, and the future funding requirements for these plans, are affected by several factors, including the legislative and regulatory uncertainty regarding the potential modification of the Patient Protection and Affordable Care Act, increases in healthcare costs, decreases in investment returns on funds held by our pension and other benefit plan trusts and changes in the discount rate and mortality assumptions used to calculate pension and other postretirement expenses. If we are unable to limit future increases in the costs of our benefit plans, those costs could reduce our profitability and increase our funding commitments.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principal properties do not lend themselves to simple description by character and location. Our total gross investment in property, plant and equipment was approximately \$280 billion at December 31, 2020 and \$266 billion at December 31, 2019, including the effect of retirements, but before deducting accumulated depreciation. Our gross investment in property, plant and equipment consisted of the following:

At December 31,	2020	2019
Network equipment	77.6 %	77.3 %
Land, buildings and building equipment	12.0 %	12.0 %
Furniture and other	10.4 %	10.7 %
	100.0 %	100.0 %

Network equipment consists primarily of cable (aerial, buried, underground or undersea) and the related support structures of poles and conduit, wireless plant, switching equipment, network software, transmission equipment and related facilities. Land, buildings and building equipment consists of land and land improvements, central office buildings or any other buildings that house network equipment, and buildings that are used for administrative and other purposes. Substantially all the switching centers are located on land and in buildings we own due to their critical role in the networks and high set-up and relocation costs. We also maintain facilities throughout the U.S. comprised of administrative and sales offices, customer care centers, retail sales locations, garage work centers, switching centers, cell sites and data centers. Furniture and other consists of telephone equipment, furniture, data processing equipment, office equipment, motor vehicles, plant under construction and leasehold improvements.

Item 3. Legal Proceedings

Verizon is not subject to any administrative or judicial proceeding arising under any Federal, State or local provisions that have been enacted or adopted regulating the discharge of materials into the environment or primarily for the purpose of protecting the environment that is likely to result in monetary sanctions of \$1 million or more.

Item 4. Mine Safety Disclosures

None.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The principal market for trading in the common stock of Verizon is the New York Stock Exchange under the symbol "VZ". As of December 31, 2020, there were 510,654 shareholders of record.

Stock Repurchases

In February 2020, the Verizon Board of Directors authorized a share buyback program to repurchase up to 100 million shares of Verizon's common stock. The program will terminate when the aggregate number of shares purchased reaches 100 million, or a new share repurchase plan superseding the current plan is authorized, whichever is sooner. Under the program, shares may be repurchased in privately negotiated transactions, on the open market, or otherwise, including through plans complying with Rule 10b5-1 under the Exchange Act. The timing and number of shares purchased under the program, if any, will depend on market conditions and the Company's capital allocation priorities.

During the years ended December 31, 2020 and 2019, Verizon did not repurchase any shares of Verizon's common stock under our current or previously authorized share buyback programs. At December 31, 2020, the maximum number of shares that could be purchased by or on behalf of Verizon under our share buyback program was 100 million.

Stock Performance Graph

vz-20201231_g1.jpg

	2015	2016	2017	2018	2019	2020
Verizon	\$ 100.0	\$ 120.7	\$ 125.6	\$ 139.7	\$ 159.1	\$ 158.9
S&P 500	100.0	112.0	136.4	130.4	171.4	203.0
S&P 500 Telecom Services	100.0	123.5	121.9	106.7	141.5	174.9

The graph compares the cumulative total returns of Verizon, the S&P 500 Stock Index and the S&P 500 Telecommunications Services Index over a five-year period. It assumes \$100 was invested on December 31, 2015 with dividends being reinvested.

Item 6. Selected Financial Data

None.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Verizon Communications Inc. (Verizon or the Company) is a holding company that, acting through its subsidiaries, is one of the world's leading providers of communications, technology, information and entertainment products and services to consumers, businesses and government entities. With a presence around the world, we offer data, video and voice services and solutions on our networks and platforms that are designed to meet customers' demand for mobility, reliable network connectivity, security and control.

To compete effectively in today's dynamic marketplace, we are focused on the capabilities of our high-performing networks to drive growth based on delivering what customers want and need in the new digital world. During 2020, we focused on leveraging our network leadership; retaining and growing our high-quality customer base while balancing profitability; enhancing ecosystems in growth businesses; and driving monetization of our networks, platforms and solutions. We are creating business value by earning customers', employees' and shareholders' trust, limiting our environmental impact and continuing our customer base growth while creating social benefit through our products and services. Our strategy requires significant capital investments primarily to acquire wireless spectrum, put the spectrum into service, provide additional capacity for growth in our networks, invest in the fiber that supports our businesses, evolve and maintain our networks and develop and maintain significant advanced information technology systems and data system capabilities. We believe that steady and consistent investments in our networks and platforms will drive innovative products and services and fuel our growth.

We are consistently deploying new network architecture and technologies to secure our leadership in both fourth-generation (4G) and fifth-generation (5G) wireless networks. We expect that our next-generation multi-use platform, which we call the Intelligent Edge Network, will simplify operations by eliminating legacy network elements, speed the deployment of 5G wireless technology and create new opportunities in the business market in a cost efficient manner. Our network leadership is the hallmark of our brand and the foundation for the connectivity, platforms and solutions upon which we build our competitive advantage.

Highlights of Our 2020 Financial Results

(dollars in millions)

vz-20201231_g2.jpgvz-20201231_g3.jpgvz-20201231_g4.jpgvz-20201231_g5.jpgvz-20201231_g6.jpg

Impacts of the Novel Coronavirus (COVID-19) Pandemic

This disclosure discusses the actions Verizon has taken in response to the COVID-19 pandemic and the impacts it has had on our business, as well as related known or expected trends. The disclosure in the remainder of this Management's Discussion & Analysis of Financial Condition and Results of Operations is qualified by the disclosure in this section on the impacts of the COVID-19 pandemic and, to the extent that the disclosure in the remainder of Management's Discussion & Analysis refers to a financial or performance metric that has been affected by a trend or activity, that reference is in addition to any impact discussed in this section on the impacts of the pandemic.

COVID-19 was identified in late 2019 and in 2020 spread throughout the world, including throughout the United States (U.S.). Public and private sector policies and initiatives to reduce the transmission of COVID-19 have varied significantly across the U.S., but at various times during the year ended December 31, 2020 a significant percentage of the U.S. population was subject to meaningful restrictions on activities, which included limitations on the operation of businesses including retail operations, requirements that individuals remain in or close to their homes, school closures, travel restrictions, limitations on large gatherings and other policies to promote or enforce physical distancing.

[Table of Contents](#)

Similar restrictions have been implemented in many other countries in which we operate. As described below, these restrictions and our responses to them have significantly impacted how our customers use our products and services, how they interact with us, and how our employees work and provide services to our customers. In addition, governments have imposed a wide variety of consumer protection measures that limit how certain businesses, including telecommunications companies, can operate their businesses and interact with their customers. The pandemic and governmental responses to the pandemic have also resulted in a slowdown of global economic activity, which has significantly impacted our customers. As a result, prior trends in our business may not be applicable to our operations during the pendency of the pandemic.

The impact of COVID-19 in the future will depend on the duration and severity of the pandemic and the related public policy actions, additional initiatives we may undertake in response to employee, market or regulatory needs or demands, the length and severity of the global economic slowdown, and whether and how our customers change their behaviors over the longer term.

Operations

In response to the pandemic beginning in the first quarter 2020, we began executing our business continuity plans and evolving our operations to protect the safety of our employees and customers and to continue to provide critical infrastructure and connectivity to our customers as they changed their ways of working and living. Some of the initiatives we took include:

- Moving over 115,000 of our 132,200 employees to remote work arrangements.
- Temporarily closing nearly 70% of our company-owned retail store locations and moving to appointment-only access to our remaining store locations.
- Limiting our customer-focused field operations based on the criticality of the services being provided or repaired.
- Enhancing our safety protocols for employees working outside their homes.
- Providing temporary additional compensation to employees in front line roles that cannot be done from home.
- Adjusting other compensation and benefits programs to address circumstances created by the pandemic.
- Taking the Federal Communication Commission's (FCC's) "Keep Americans Connected" pledge, through which we pledged to waive late fees for, and not terminate service to, any of our consumer or small business customers who informed us that they had been impacted financially by the COVID-19 pandemic through May 13, which we extended to June 30, 2020.
- Providing additional data allocations to permit wireless consumer and small business customers to remain connected during the first several months of the pandemic.
- Temporarily waiving activation and upgrade fees through digital distribution channels.
- Working with business customers to address payment needs during the crisis.
- Maintaining effective governance and internal controls in a remote work environment.

As some of the restrictions on physical movement and limitations on business and other activities described above eased to varying degrees in the second half of 2020, we resumed certain of our operations, with the health and safety of our employees and customers as our utmost priority, and modified some of our temporary policies. These initiatives include:

- Transitioning to facility access at limited capacity where feasible for those with remote work arrangements.
- Optimizing our sales channels to drive more activity through online and telesales to serve customers.
- Reopening temporarily closed company-owned retail store locations and introducing social distancing measures for employee and customer safety, such as touch-less retail, appointment scheduling and curbside pickup options.
- Continuous monitoring of stores, as well as temporary closures and cleaning of stores that have an identified COVID-19 exposure.
- Starting July 1, customers who had notified us that they had been financially impacted by the pandemic and had an unpaid balance were automatically enrolled in our "Stay Connected" repayment program, which allows customers to pay off their service balance over six months and extends any unpaid device payment plan agreements by the number of months unpaid.
- Resuming most customer-focused field operations.
- Discontinuing certain of our temporary compensation and benefits arrangements.

We expect that we will continue to revise our approach to these initiatives as the circumstances surrounding the pandemic evolve in 2021 in order to meet the needs of our employees, customers and the Company and continue to provide our innovative products and services.

Liquidity and Capital Resources

Verizon finished the fourth quarter 2020 in a strong financial position. As of December 31, 2020, our balance sheet included:

Cash and cash equivalents	\$	22.2 billion
Unsecured debt	\$	118.5 billion

As of December 31, 2020, our Cash and cash equivalents balance was \$22.2 billion compared to \$2.6 billion as of December 31, 2019. We made the decision at the beginning of the COVID-19 pandemic to maintain a higher cash balance in order to further protect the Company against the economic uncertainties associated with the COVID-19 pandemic and to opportunistically raise cash to finance future obligations at a time when we believed that market conditions were favorable. During the three months ended December 31, 2020, we redeemed \$566 million of unsecured notes maturing in 2021. As of December 31, 2020, we have less than \$150 million of unsecured notes maturing in 2021. As of December 31, 2020, we had not drawn down on our \$9.5 billion revolving credit facility and the unused borrowing capacity was approximately \$9.4 billion. The revolving credit facility does not require us to comply with financial covenants or maintain specified credit ratings, and it permits us to borrow even if our business has incurred a material adverse change. During the three months ended December 31, 2020, we issued \$12.0 billion aggregate principal amount of U.S dollar-denominated unsecured notes and £1.2 billion aggregate principal

[Table of Contents](#)

amount of Pound Sterling-denominated unsecured notes. In addition, we completed exchange offers with respect to 17 series of unsecured notes issued by Verizon, allowing us to exchange the notes accepted in the exchange offers for new unsecured Verizon notes having a later maturity date and, for certain of the accepted series of notes, cash. We also amended our revolving credit facility to extend the maturity date to 2024. We had no outstanding commercial paper as of December 31, 2020.

The COVID-19 pandemic, together with other dynamics in the marketplace, has caused borrowing costs to fluctuate significantly and, in certain cases, restricted the ability of borrowers to access the capital markets and other sources of financing. In order to provide financial flexibility and finance certain investments and projects, we may continue to utilize external financing arrangements that have been or may be affected by these market conditions. However, we believe that our cash on hand, the cash we expect to generate from our operations, and cash from other sources of financing available to us are, and will continue to be, sufficient to meet our ongoing operating, capital expenditure, debt service and investing requirements.

We expect to continue to have sufficient cash to fund our operations, although we could experience significant fluctuations in our cash flows from period to period during the pendency of the pandemic. The net cash generated from our operations provides our primary source of cash flows. While we have historically experienced consistently low levels of payment delinquencies among our consumer and business accounts, beginning late in the first quarter 2020, we started to see increases in delinquencies across our retail customer base and our small and medium business accounts. This change in delinquency rate moderated during the second quarter and improved to levels seen before the COVID-19 pandemic during the third and fourth quarters of 2020. Accordingly, our provision for credit losses increased in the first quarter 2020, but decreased in the second quarter of 2020 and remained flat in the third and fourth quarters of 2020. If these levels of delinquencies begin to grow again, they could have a material adverse impact on our cash flows. We could also experience fluctuations in our cash flows resulting from the ongoing impacts of the pandemic on macroeconomic conditions in the U.S. and our customers working to become current on their bills in the first quarter of 2021 and beyond.

In addition, we issue asset-backed debt secured by our device payment plan agreement receivables and the collections on such receivables. These transactions require us to comply with various tests, including delinquency and loss-related tests, which, if not met, would cause the asset-backed debt to amortize earlier and faster than otherwise expected. The holders of our asset-backed debt do not have any recourse to Verizon with respect to the payment of principal and interest on the debt. However, if an early amortization of our asset-backed debt occurs, including as a result of increased customer delinquencies or losses relating to the COVID-19 pandemic, all collections on the securitized device payment plan agreement receivables would be used to pay principal and interest on the asset-backed debt, and our financing cash flow requirements would increase for the twelve months immediately following an early amortization event.

Impacts on Financial Results

Our revenues and expenses in 2020 were impacted by the COVID-19 pandemic as a result of the actions we took to care for our employees and to keep our customers connected and as a result of our customers' changing activities as well as the restrictions on activities and the global economic slowdown, as described below. The impact of the COVID-19 pandemic on our 2020 results was primarily a result of decreases in wireless service revenue, wireless equipment revenue and advertising and search revenue at Verizon Media Group (Verizon Media), and the operational actions we took, as described above.

Revenues

The year ended December 31, 2020 included lower overage revenues and lower fees from activations and upgrades and fewer fees, as well as lower roaming revenues as our customers significantly reduced travel during the year. As a result of our decision to keep our customers connected during the crisis, we experienced fewer step ups in data plans in the first half of 2020. We saw the rate of step ups increase during the second half of 2020. During the first half of 2020, we also saw a reduction in advertising and search revenue in Verizon Media, as customers scaled back their advertising campaigns. This reduction moderated during the third quarter of 2020 and turned to revenue growth during the fourth quarter of 2020.

We have seen considerably less churn in the consumer wireless base and lower equipment volumes and upgrade rates since the beginning of the pandemic. As a result of changing customer behaviors, we experienced significantly lower equipment revenue during the year ended December 31, 2020.

Expenses

While certain expenses, such as wireless equipment cost, were lower during the year ended December 31, 2020 as a result of the revenue impacts discussed above, these decreases were partially offset by an increase in commission expense. The increase in commission expense was a result of an expansion of our compensation programs for both employees and agents early in the pandemic. This COVID-19 relief program did not qualify for deferral treatment as defined by Accounting Standards Update (ASU) 2014-09, "Revenue from Contracts with Customers;" however the costs were not materially different on a cash basis.

As a result of waiving late fees and keeping customers connected during the pandemic pursuant to our pledge, and pursuant to various state orders and laws, we saw increases in delinquencies across our retail customer base and certain of our business accounts. This change in the delinquency rate has since moderated, as discussed above; however, if the levels of delinquencies for our consumer and small and medium business customers begin to grow again, additional provisions to our allowance for credit losses may be required, which could be significant. We continue to monitor customer behavior and our expected loss assumptions and estimates.

[Table of Contents](#)

Other

Equity and debt markets experienced significant volatility during 2020 partially as a result of the pandemic, and federal governmental actions to stimulate the economy have significantly impacted interest rates. These circumstances could affect the funding level of our pension plans and our calculated liabilities under our pension and other postemployment benefit plans. Other impacts from the pandemic on our financial results in the first quarter of 2021 and beyond could result from a further slowdown in the global economy, additional regulatory or legislative initiatives that impact our relationships with our customers, and other initiatives we undertake to respond to the needs of our employees and our customers.

Business Overview

We have two reportable segments that we operate and manage as strategic business units - Verizon Consumer Group (Consumer) and Verizon Business Group (Business).

Revenue by Segment

vz-20201231_g7.jpgvz-20201231_g8.jpg
vz-20201231_g9.jpg

Note: Excludes eliminations.

Verizon Consumer Group

Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the U.S. under the Verizon brand and through wholesale and other arrangements. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios. Our Consumer segment's wireless and wireline products and services are available to our retail customers, as well as resellers that purchase wireless network access from us on a wholesale basis.

Customers can obtain our wireless services on a postpaid or prepaid basis. Our postpaid service is generally billed one month in advance for a monthly access charge in return for access to and usage of network services. Our prepaid service is offered only to Consumer customers and enables individuals to obtain wireless services without credit verification by paying for all services in advance. The Consumer segment also offers several categories of wireless equipment to customers, including a variety of smartphones and other handsets, wireless-enabled internet devices, such as tablets and other wireless-enabled connected devices, such as smart watches.

In addition to the wireless services and equipment discussed above, Consumer sells residential fixed connectivity solutions, including internet, video and voice services, and wireless network access to resellers on a wholesale basis. The Consumer segment's operating revenues for the year ended December 31, 2020 totaled \$88.5 billion, a decrease of \$2.5 billion, or 2.8%, compared to the year ended December 31, 2019. See "Segment Results of Operations" for additional information regarding our Consumer segment's operating performance and selected operating statistics.

Verizon Business Group

Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various Internet of Things (IoT) services and products, including solutions that support fleet tracking management, compliance management, field service management, asset tracking and other types of mobile resource management. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world. The Business segment's operating revenues for the year ended December 31, 2020 totaled \$31.0 billion, a decrease of \$481 million, or 1.5%, compared to the year ended

December 31, 2019. See "Segment Results of Operations" for additional information regarding our Business segment's operating performance and selected operating statistics.

[Table of Contents](#)

Corporate and Other

Corporate and other includes the results of our media business, Verizon Media, and other businesses, investments in unconsolidated businesses, insurance captives, unallocated corporate expenses, certain pension and other employee benefit related costs and interest and financing expenses. Corporate and other also includes the historical results of divested businesses and other adjustments and gains and losses that are not allocated in assessing segment performance due to their nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and losses from transactions that are not individually significant are included in segment results as these items are included in the chief operating decision maker's assessment of segment performance.

Verizon Media includes diverse media and technology brands that serve both consumers and businesses. Verizon Media provides consumers with owned and operated and third-party search properties as well as mail, news, finance, sports and entertainment offerings, and provides other businesses and partners access to consumers through digital advertising, content delivery and video streaming platforms. Verizon Media's total operating revenues were \$7.0 billion for the year ended December 31, 2020. This was a decrease of 5.6% from the year ended December 31, 2019.

Capital Expenditures and Investments

We continue to invest in our wireless networks, high-speed fiber and other advanced technologies to position ourselves at the center of growth trends for the future. During the year ended December 31, 2020, these investments included \$18.2 billion for capital expenditures. See "Cash Flows Used in Investing Activities" and "Operating Environment and Trends" for additional information. We believe that our investments aimed at expanding our portfolio of products and services will provide our customers with an efficient, reliable infrastructure for competing in the information economy.

Global Network and Technology

We are focusing our capital spending on adding capacity and density to our 4G LTE network, while also building our next generation 5G network. We are densifying our network by utilizing small cell technology, in-building solutions and distributed antenna systems. Network densification enables us to add capacity to address increasing mobile video consumption and the growing demand for IoT products and services on our 4G LTE and 5G networks. Over the past several years, we have been leading the development of 5G wireless technology industry standards and the ecosystems for fixed and mobile 5G wireless services. We expect that 5G technology will provide higher throughput and lower latency than the current 4G LTE technology and enable our networks to handle more traffic as the number of internet-connected devices grows. As of December 31, 2020, we have launched our 5G Ultra Wideband Network in 61 U.S. markets. We have commercially launched 5G Home in 12 of those markets. We also launched our 5G Nationwide Network in October 2020, which is available in over 2,700 cities across the U.S. covering approximately 230 million people. 5G Nationwide uses low and mid-band spectrum and dynamic spectrum sharing (DSS) technology, which allows 5G service to run simultaneously with 4G LTE on multiple spectrum bands. With DSS, whenever customers move outside Verizon's high-band Ultra Wideband coverage area, their 5G-enabled devices will remain on 5G technology using the lower spectrum bands where the 5G Nationwide network is available. This allows us to more fully and effectively utilize our current spectrum resources to serve both 4G and 5G customers.

To compensate for the shrinking market for traditional copper-based products, we continue to build fiber-based networks supporting data, video and advanced business services - areas where demand for reliable high-speed connections is growing. We are evolving the architecture of our networks to a next-generation multi-use platform, providing improved efficiency and virtualization, increased automation and opportunities for edge computing services that will support both our fiber-based and radio access network technologies. We call this the Intelligent Edge Network. We expect that this new architecture will simplify operations by eliminating legacy network elements, speed the deployment of 5G wireless technology and create new opportunities in the business market in a cost efficient manner.

Wireless Spectrum

In September 2020, Cellco Partnership (Cellco), a wholly-owned subsidiary of Verizon, filed an application to participate in FCC Auction 107, which relates to mid-band wireless spectrum known as C-Band. The auction commenced on December 8, 2020. On February 24, 2021, the FCC issued a final notice announcing the conclusion and results of the auction. In its final notice, the FCC

announced that Cellco was the winning bidder with respect to approximately \$45.5 billion of licenses. Down payments, in the amount of 20% of the cost of the spectrum licenses less the amount of the upfront payment made by bidders in October 2020, with respect to the auction are due on March 10, 2021, and final payments in the amount of 80% of the cost of the spectrum licenses are due on March 24, 2021. In accordance with the rules applicable to the auction, licensees also must pay their allocable shares of an estimated \$13.1 billion in associated clearing and incentive costs at the times contemplated by the auction rules.

Consolidated Results of Operations

In this section, we discuss our overall results of operations and highlight special items that are not included in our segment results. Our revenues and expenses in 2020 were impacted by the COVID-19 pandemic as a result of the actions we took to care for our employees and keep our customers connected and as a result of our customers' changing activities, restrictions on activities and the global economic slowdown. See "Overview" for more information. In "Segment Results of Operations," we review the performance of our two reportable segments in more detail. A detailed discussion of 2018 items and year-over-year comparisons between 2019 and 2018 that are not included in this Form 10-K can be found in the "Management's Discussion and Analysis of Financial Condition and Results of Operations" in our Annual Report on Form 10-K for the year ended December 31, 2019.

Consolidated Revenues

Years Ended December 31,	(dollars in millions)			
			Increase/(Decrease)	
	2020	2019	2020 vs. 2019	
Consumer	\$ 88,533	\$ 91,056	\$ (2,523)	(2.8)%
Business	30,962	31,443	(481)	(1.5)
Corporate and other	9,334	9,812	(478)	(4.9)
Eliminations	(537)	(443)	(94)	21.2
Consolidated Revenues	\$ 128,292	\$ 131,868	\$ (3,576)	(2.7)

Consolidated revenues decreased during 2020 compared to 2019, due to decreases in our Consumer segment, Business segment and Corporate and other.

Revenues for our segments are discussed separately below under the heading "Segment Results of Operations."

Corporate and other revenues decreased during 2020 compared to 2019, primarily due to a decrease of \$417 million in revenues within Verizon Media.

Consolidated Operating Expenses

Years Ended December 31,	(dollars in millions)			
			Increase/(Decrease)	
	2020	2019	2020 vs. 2019	
Cost of services	\$ 31,401	\$ 31,772	\$ (371)	(1.2)%
Cost of wireless equipment	19,800	22,954	(3,154)	(13.7)
Selling, general and administrative expense	31,573	29,896	1,677	5.6
Depreciation and amortization expense	16,720	16,682	38	0.2
Media goodwill impairment	—	186	(186)	nm
Consolidated Operating Expenses	\$ 99,494	\$ 101,490	\$ (1,996)	(2.0)

nm - not meaningful

Operating expenses for our segments are discussed separately below under the heading "Segment Results of Operations."

Cost of Services

Cost of services includes the following costs directly attributable to a service: salaries and wages, benefits, materials and supplies, content costs, contracted services, network access and transport costs, customer provisioning costs, computer systems support, costs to support our outsourcing contracts and technical facilities and traffic acquisition costs. Aggregate customer service costs, which include billing and service provisioning, are allocated between Cost of services and Selling, general and administrative expense.

Cost of services decreased during 2020 compared to 2019, primarily due to decreases in traffic acquisition costs due to the COVID-19 pandemic, as well as decreases in costs related to the device protection offerings to our wireless retail postpaid customers, roaming costs resulting from decreased travel due to the COVID-19 pandemic, regulatory fees and personnel costs. These decreases were partially offset by increases in customer premise equipment, digital content, other direct costs and rent expense as a result of adding capacity to the networks to support demand.

Cost of Wireless Equipment

Cost of wireless equipment decreased during 2020 compared to 2019, primarily as a result of declines in the number of wireless devices sold as a result of an elongation of the handset upgrade cycle as well as lower gross adds and upgrade volumes partially due to the COVID-19 pandemic. The decreases were partially offset by a shift to higher priced devices in the mix of wireless devices sold.

Selling, General and Administrative Expense

Selling, general and administrative expense includes salaries and wages and benefits not directly attributable to a service or product, the provision for credit losses, taxes other than income taxes, advertising and sales commission costs, call center and information technology costs, regulatory fees, professional service fees and rent and utilities for administrative space. Also included is a portion of the aggregate customer care costs as discussed above in "Cost of Services."

Selling, general and administrative expense increased during 2020 compared to 2019, primarily due to a \$1.2 billion loss resulting from the Auction 103 spectrum license auction and a net gain from dispositions of assets and businesses during 2019 (see "Special Items"), as well as an increase in sales commission expense. These increases were partially offset by decreases in personnel costs, advertising expenses and the provision for credit losses. The increase in sales commission expense during 2020 compared to 2019 was inclusive of a lower net deferral of

[Table of Contents](#)

commission costs in the current year compared to the prior year, as well as sales compensation while certain of our stores and agent locations were closed due to the COVID-19 pandemic.

Depreciation and Amortization Expense

Depreciation and amortization expense increased during 2020 compared to 2019, primarily due to the change in the mix of net depreciable assets.

Media Goodwill Impairment

The goodwill impairment charge recorded in 2019 for Verizon Media was a result of the Company's annual impairment test performed in the fourth quarter (see "Critical Accounting Estimates").

Other Consolidated Results

Other Income (Expense), Net

Additional information relating to Other income (expense), net is as follows:

		(dollars in millions)			
		Increase/(Decrease)			
Years Ended December 31,	2020	2019	2020 vs. 2019		
Interest income	\$ 65	\$ 121	\$ (56)	(46.3)%	
Other components of net periodic benefit (cost) income	(425)	627	(1,052)	nm	
Early debt extinguishment costs	(129)	(3,604)	3,475	96.4	
Other, net	(50)	(44)	(6)	(13.6)	
Total	\$ (539)	\$ (2,900)	\$ 2,361	81.4	

nm - not meaningful

Other income (expense), net reflects certain items not directly related to our core operations, including interest income, gains and losses from non-operating asset dispositions, debt extinguishment costs, components of net periodic pension and postretirement benefit costs and foreign exchange gains and losses. The change in Other income (expense), net during 2020 compared to 2019, was primarily driven by early debt redemption costs of \$129 million recorded during 2020, compared to \$3.6 billion recorded during 2019 (see "Special Items"), partially offset by pension and benefit charges of \$1.6 billion recorded during 2020, compared to pension and benefit charges of \$126 million recorded during 2019 (see "Special Items"). See Note 11 to the consolidated financial statements for additional information on the other components of net periodic benefit (cost) income.

Interest Expense

				(dollars in millions)	
				Increase/(Decrease)	
Years Ended December 31,	2020	2019	2020 vs. 2019		
Total interest costs on debt balances	\$ 4,802	\$ 5,386	\$ (584)	(10.8)%	
Less capitalized interest costs	555	656	(101)	(15.4)	
Total	\$ 4,247	\$ 4,730	\$ (483)	(10.2)	
Average debt outstanding ^{(1) (3)}	\$ 116,888	\$ 112,901			
Effective interest rate ^{(2) (3)}	4.1 %	4.8 %			

⁽¹⁾ The average debt outstanding is a financial measure and is calculated by applying a simple average of prior thirteen-month end balances of total short-term and long-term debt, net of discounts, premiums and unamortized debt issuance costs.

- ⁽²⁾ The effective interest rate is the rate of actual interest incurred on debt. It is calculated by dividing the total interest costs on debt balances by the average debt outstanding.
- ⁽³⁾ We believe that this measure is useful to management, investors and other users of our financial information in evaluating our debt financing cost and trends in our debt leverage management.

Total interest expense decreased during 2020 primarily due to lower interest rates as a result of our refinancing activities.

Provision for Income Taxes

		(dollars in millions)	
		Increase/(Decrease)	
Years Ended December 31,	2020	2019	2020 vs. 2019
Provision for income taxes	\$ 5,619	\$ 2,945	\$ 2,674 90.8 %
Effective income tax rate	23.4 %	13.0 %	

[Table of Contents](#)

The effective income tax rate is calculated by dividing the provision for income taxes by income before the provision for income taxes. The increase in the effective income tax rate and the provision for income taxes was primarily due to the recognition of a \$2.2 billion tax benefit in connection with the disposition of preferred stock representing a minority interest in a foreign affiliate in 2019 that did not reoccur in 2020. See "Cash Flows Provided by Operating Activities" for discussion of the receipt of the cash tax benefit in 2020.

A reconciliation of the statutory federal income tax rate to the effective income tax rate for each period is included in Note 12 to the consolidated financial statements.

Consolidated Net Income, Consolidated EBITDA and Consolidated Adjusted EBITDA

Consolidated earnings before interest, taxes, depreciation and amortization expenses (Consolidated EBITDA) and Consolidated Adjusted EBITDA, which are presented below, are non-generally accepted accounting principles (GAAP) measures that we believe are useful to management, investors and other users of our financial information in evaluating operating profitability on a more variable cost basis as they exclude the depreciation and amortization expense related primarily to capital expenditures and acquisitions that occurred in prior years, as well as in evaluating operating performance in relation to Verizon's competitors. Consolidated EBITDA is calculated by adding back interest, taxes, and depreciation and amortization expenses to net income.

Consolidated Adjusted EBITDA is calculated by excluding from Consolidated EBITDA the effect of the following non-operational items: equity in losses of unconsolidated businesses and other income and expense, net, as well as the effect of special items. We believe that this measure is useful to management, investors and other users of our financial information in evaluating the effectiveness of our operations and underlying business trends in a manner that is consistent with management's evaluation of business performance. We believe that Consolidated Adjusted EBITDA is widely used by investors to compare a company's operating performance to its competitors by minimizing impacts caused by differences in capital structure, taxes, and depreciation and amortization policies. Further, the exclusion of non-operational items and special items enables comparability to prior period performance and trend analysis. See "Special Items" for additional information.

It is management's intent to provide non-GAAP financial information to enhance the understanding of Verizon's GAAP financial information, and it should be considered by the reader in addition to, but not instead of, the financial statements prepared in accordance with GAAP. Each non-GAAP financial measure is presented along with the corresponding GAAP measure so as not to imply that more emphasis should be placed on the non-GAAP measure. We believe that providing these non-GAAP measures in addition to the GAAP measures allows management, investors and other users of our financial information to more fully and accurately assess both consolidated and segment performance. The non-GAAP financial information presented may be determined or calculated differently by other companies and may not be directly comparable to that of other companies.

	(dollars in millions)	
Years Ended December 31,	2020	2019
Consolidated Net Income	\$ 18,348	\$ 19,788
Add:		
Provision for income taxes	5,619	2,945
Interest expense ⁽¹⁾	4,247	4,730
Depreciation and amortization expense	16,720	16,682
Consolidated EBITDA	44,934	44,145
Add (Less):		
Other expense, net ⁽²⁾	539	2,900
Equity in losses of unconsolidated businesses ⁽³⁾	45	15
Severance charges	221	204
Loss on spectrum license transaction	1,195	—
Impairment charges	—	186
Net (gain) loss from dispositions of assets and businesses	126	(261)
Consolidated Adjusted EBITDA	\$ 47,060	\$ 47,189

⁽¹⁾ Includes Early debt redemption costs, where applicable. See "Special Items" for additional information.

⁽²⁾ Includes Pension and benefits mark-to-market adjustments and Early debt redemption costs, where applicable. See "Special Items" for additional information

⁽³⁾ Includes impairment charges, where applicable.

The changes in Consolidated Net Income, Consolidated EBITDA and Consolidated Adjusted EBITDA in the table above during 2020 compared to 2019, were primarily a result of the factors described in connection with operating revenues and operating expenses.

Segment Results of Operations

We have three segments that we operate and manage as strategic business units, Consumer, Business and Media, of which Consumer and Business are our reportable segments. We measure and evaluate our segments based on segment operating income. The use of segment operating income is consistent with the chief operating decision maker's assessment of segment performance.

[Table of Contents](#)

To aid in the understanding of segment performance as it relates to segment operating income, management uses the following operating statistics to evaluate the overall effectiveness of our segments. We believe these operating statistics are useful to investors and other users of our financial information because they provide additional insight into drivers of our segments' operating results, key trends and performance relative to our peers. These operating statistics may be determined or calculated differently by other companies and may not be directly comparable to those statistics of other companies.

Wireless retail connections are retail customer device postpaid and prepaid connections as of the end of the period. Retail connections under an account may include those from smartphones and basic phones (collectively, phones), as well as tablets and other internet devices, including wearables and retail IoT devices. Wireless retail connections are calculated by adding total retail postpaid and prepaid new connections in the period to prior period retail connections, and subtracting total retail postpaid and prepaid disconnects in the period.

Wireless retail postpaid connections are retail postpaid customer device connections as of the end of the period. Retail connections under an account may include those from phones, as well as tablets and other internet devices, including wearables and retail IoT devices. Wireless retail postpaid connections are calculated by adding retail postpaid new connections in the period to prior period retail postpaid connections, and subtracting retail postpaid disconnects in the period.

Fios internet connections are the total number of connections to the internet using Fios internet services as of the end of the period. Fios internet connections are calculated by adding Fios internet new connections in the period to prior period Fios internet connections, and subtracting Fios internet disconnects in the period.

Fios video connections are the total number of connections to traditional linear video programming using Fios video services as of the end of the period. Fios video connections are calculated by adding Fios video net additions in the period to prior period Fios video connections. Fios video net additions are calculated by subtracting the Fios video disconnects from the Fios video new connections.

Broadband connections are the total number of connections to the internet using Digital Subscriber Line (DSL) and Fios internet services as of the end of the period. Broadband connections are calculated by adding broadband net additions in the period to prior period broadband connections. Broadband net additions are calculated by subtracting the broadband disconnects from the broadband new connections.

Wireless retail connections, net additions are the total number of additional retail customer device postpaid and prepaid connections, less the number of device disconnects in the period. Wireless retail connections, net additions in each period presented are calculated by subtracting the total retail postpaid and prepaid disconnects, net of certain adjustments, from the total retail postpaid and prepaid new connections in the period.

Wireless retail postpaid connections, net additions are the total number of additional retail customer device postpaid connections, less the number of device disconnects in the period. Wireless retail postpaid connections, net additions in each period presented are calculated by subtracting the retail postpaid disconnects, net of certain adjustments, from the retail postpaid new connections in the period.

Wireless retail postpaid phone connections, net additions are the total number of additional retail customer postpaid phone connections, less the number of phone disconnects in the period. Wireless retail postpaid phone connections, net additions in each period presented are calculated by subtracting the retail postpaid phone disconnects, net of certain adjustments, from the retail postpaid phone new connections in the period.

Fios internet, net additions are the total number of additional Fios internet connections, less the number of disconnects in the period. Fios internet, net additions are calculated by subtracting the Fios internet disconnects from the Fios internet new connections in the period.

Wireless Churn is the rate at which service to retail, retail postpaid, or retail postpaid phone connections is terminated on average in the period. The churn rate in each period presented is calculated by dividing retail disconnections, retail postpaid disconnections, or retail postpaid phone disconnections by the average retail connections, average retail postpaid connections, or average retail postpaid phone connections, respectively, in the period.

Wireless retail postpaid ARPA is the calculated average retail postpaid service revenue per account (ARPA) from retail postpaid accounts in the period. Wireless retail postpaid service revenue does not include recurring device payment plan billings related to the Verizon device payment program, plan billings related to Total Mobile Protection packages or regulatory fees. Wireless retail postpaid ARPA in each period presented is calculated by dividing retail postpaid service revenue by the average retail postpaid accounts in the period.

Wireless retail postpaid accounts are wireless retail customers that are directly served and managed under the Verizon brand and use its services as of the end of the period. Accounts include unlimited plans, shared data plans and corporate accounts, as well as legacy single connection plans and family plans. A single account may include monthly wireless services for a variety of connected devices. Wireless retail postpaid accounts are calculated by adding retail postpaid new accounts to the prior period retail postpaid accounts.

Wireless retail postpaid connections per account is the calculated average number of retail postpaid connections per retail postpaid account as of the end of the period. Wireless retail postpaid connections per account is calculated by dividing the total number of retail postpaid connections by the number of retail postpaid accounts as of the end of the period.

[Table of Contents](#)

Wireless retail postpaid gross additions are new retail postpaid connections that have activated service on the wireless network in the period. Wireless retail postpaid gross additions are calculated as the total number of new retail postpaid phone, tablet and other device connections in the period.

Segment operating income margin reflects the profitability of the segment as a percentage of revenue. Segment operating income margin is calculated by dividing total segment operating income by total segment operating revenues.

Segment earnings before interest, taxes, depreciation and amortization (Segment EBITDA), which is presented below, is a non-GAAP measure and does not purport to be an alternative to operating income (loss) as a measure of operating performance. We believe this measure is useful to management, investors and other users of our financial information in evaluating operating profitability on a more variable cost basis as it excludes the depreciation and amortization expenses related primarily to capital expenditures and acquisitions that occurred in prior years, as well as in evaluating operating performance in relation to our competitors. Segment EBITDA is calculated by adding back depreciation and amortization expense to segment operating income (loss). Segment EBITDA margin is calculated by dividing Segment EBITDA by total segment operating revenues. You can find additional information about our segments in Note 13 to the consolidated financial statements.

Verizon Consumer Group

Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the U.S. under the Verizon brand and through wholesale and other arrangements. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios.

Our revenues and expenses in 2020 were impacted by the COVID-19 pandemic as a result of the actions we took to care for our employees and keep our customers connected and as a result of our customers' changing activities, restrictions on activities and the global economic slowdown. See "Overview" for more information.

Operating Revenues and Selected Operating Statistics

		(dollars in millions, except ARPA)			
		Increase/(Decrease)			
Years Ended December 31,	2020	2019	2020 vs. 2019

⁽¹⁾ As of end of period

⁽²⁾ Includes certain adjustments
nm - not meaningful

Consumer's total operating revenues decreased during 2020 compared to 2019, as a result of decreases in Service and Wireless equipment revenues, partially offset by an increase in Other revenue.

Service Revenue

Service revenue decreased during 2020 compared to 2019, primarily due to decreases in wireless service and wireline voice and video services.

Wireless service revenue decreased \$186 million, or 0.3%, during 2020 compared to 2019, primarily due to decreases in roaming and TravelPass revenues due to customers' changing activities during the COVID-19 pandemic and waived fees as part of

customer assistance initiatives that we undertook during the COVID-19 pandemic. The decrease was further driven by a decrease in data overage revenues resulting from waived charges as part of customer assistance initiatives we undertook to address the impacts of the COVID-19 pandemic and the shift of customer accounts to unlimited plans. These decreases were partially offset by growth from reseller accounts, increases in access revenues, customers shifting to higher priced plans, and growth in mobile security products included in certain protection packages. The growth from reseller accounts was partially due to customers' changing activities during the COVID-19 pandemic.

For the year ended December 31, 2020, Fios service revenue totaled \$10.4 billion and decreased \$95 million, or 0.9%, compared to 2019. This decrease was due to decreases in Fios video and voice revenues. The decrease in Fios video revenue reflects a one-time credit provided to customers related to regional sport networks during the COVID-19 pandemic and the ongoing shift from traditional linear video to over-the-top offerings. These decreases were partially offset by an increase in Fios internet connections, reflecting increased demand for higher broadband speeds as consumers work and learn from home during the COVID-19 pandemic.

Wireless Equipment Revenue

Wireless equipment revenue decreased during 2020 compared to 2019, as a result of overall declines in wireless device sales partially due to an elongation of the handset upgrade cycle as well as lower gross adds and upgrade volumes primarily due to the impacts of the COVID-19

[Table of Contents](#)

pandemic on our customers. These decreases were partially offset by a shift to higher priced units in the mix of wireless devices sold and a decline in promotions.

Other Revenue

Other revenue includes non-service revenues such as regulatory fees, cost recovery surcharges, revenues associated with our device protection offerings, leasing and interest on equipment financed under a device payment plan agreement when sold to the customer by an authorized agent.

Other revenue increased during 2020 compared to 2019, primarily due to pricing and subscriber increases related to our wireless device protection offerings, as well as cost recovery surcharges. These increases were partially offset by decreases in regulatory fees.

Operating Expenses

Years Ended December 31,	(dollars in millions)			
			Increase/(Decrease)	
	2020	2019	2020 vs. 2019	
Cost of services	\$ 15,610	\$ 15,884	\$ (274)	(1.7)%
Cost of wireless equipment	15,736	18,219	(2,483)	(13.6)
Selling, general and administrative expense	16,936	16,639	297	1.8
Depreciation and amortization expense	11,395	11,353	42	0.4
Total Operating Expenses	\$ 59,677	\$ 62,095	\$ (2,418)	(3.9)

Cost of Services

Cost of services decreased during 2020 compared to 2019, primarily due to decreases in costs related to the device protection offerings to our wireless retail postpaid customers, roaming costs, which were primarily driven by a significant decrease in international travel due to the COVID-19 pandemic, and regulatory fees. These decreases were partially offset by increases in digital content costs, other direct costs and rent expense as a result of adding capacity to the networks to support demand.

Cost of Wireless Equipment

Cost of wireless equipment decreased during 2020 compared to 2019, primarily as a result of declines in the number of wireless devices sold due to an elongation of the handset upgrade cycle as well as lower gross adds and upgrade volumes primarily due to the COVID-19 pandemic, and declines in the number of accessories sold partly due to the COVID-19 pandemic. These decreases were partially offset by a shift to higher priced devices and accessories in the mix of products sold.

Selling, General and Administrative Expense

Selling, general and administrative expense increased during 2020 compared to 2019, primarily due to increases in sales commission and advertising expenses, partially offset by decreases in the provision for credit losses and personnel costs. The increase in sales commission expense during 2020 compared to 2019 was inclusive of a lower net deferral of commission costs in the current year compared to the prior year, as well as sales compensation while certain of our stores and agent locations were closed due to the COVID-19 pandemic.

Depreciation and Amortization Expense

Depreciation and amortization expense increased during 2020 compared to 2019, driven by the change in the mix of total Verizon depreciable assets and Consumer's usage of those assets.

Segment Operating Income and EBITDA

(dollars in millions)				
Increase/(Decrease)				
Years Ended December 31,	2020	2019	2020 vs. 2019	
Segment Operating Income	\$ 28,856	\$ 28,961	\$ (105)	(0.4)%
Add Depreciation and amortization expense	11,395	11,353	42	0.4
Segment EBITDA	\$ 40,251	\$ 40,314	\$ (63)	(0.2)
Segment operating income margin	32.6 %	31.8 %		
Segment EBITDA margin	45.5 %	44.3 %		

The changes in the table above during the periods presented were primarily a result of the factors described in connection with operating revenues and operating expenses.

Verizon Business Group

Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various IoT services and products. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world. The Business segment is organized in four customer groups: Small and Medium Business, Global Enterprise, Public Sector and Other, and Wholesale.

Our revenues and expenses in 2020 were impacted by the COVID-19 pandemic as a result of the actions we took to care for our employees and keep our customers connected and as a result of our customers' changing activities, restrictions on activities and the global economic slowdown. See "Overview" for more information.

Operating Revenues and Selected Operating Statistics

(dollars in millions)				
Years Ended December 31,	2020	2019	Increase/(Decrease)	
			2020 vs. 2019	
Small and Medium Business	\$ 11,132	\$ 11,464	\$ (332)	(2.9)%
Global Enterprise	10,410	10,818	(408)	(3.8)
Public Sector and Other	6,362	5,922	440	7.4
Wholesale	3,058	3,239	(181)	(5.6)
Total Operating Revenues⁽¹⁾	\$ 30,962	\$ 31,443	\$ (481)	(1.5)
Connections ('000):⁽²⁾				
Wireless retail postpaid connections	26,507	25,148	1,359	5.4
Fios internet connections	335	326	9	2.8
Fios video connections	73	77	(4)	(5.2)
Broadband connections	482	489	(7)	(1.4)
Net Additions in Period ('000):⁽³⁾				
Wireless retail postpaid	1,518	1,413	105	7.4
Wireless retail postpaid phones	572	700	(128)	(18.3)
Churn Rate:				
Wireless retail postpaid	1.20 %	1.23 %		
Wireless retail postpaid phones	0.96 %	0.99 %		

⁽¹⁾ Service and other revenues included in our Business segment amounted to approximately \$28.1 billion and \$27.9 billion for the years ended December 31, 2020 and 2019, respectively. Wireless equipment revenues included in our Business segment amounted to approximately \$2.9 billion and \$3.5 billion for the years ended December 31, 2020 and 2019, respectively.

⁽²⁾ As of end of period

⁽³⁾ Includes certain adjustments

Business's total operating revenues decreased during 2020 compared to 2019, as a result of decreases in Small and Medium Business, Global Enterprise and Wholesale revenues, partially offset by an increase in Public Sector and Other revenue.

Small and Medium Business

Small and Medium Business offers wireless services and equipment, conferencing services, tailored voice and networking products, Fios services, Internet Protocol (IP) networking, advanced voice solutions and security and managed information technology services to our U.S.-based small and medium businesses that do not meet the requirements to be categorized as Global Enterprise, as described below.

Small and Medium Business revenues decreased during 2020 compared to 2019, primarily due to a decrease in wireless equipment revenue, declines related to the loss of voice and DSL service connections and a decrease in IP networking. Wireless equipment revenue decreased as a result of declines in the number of wireless devices sold primarily due to an elongation of the handset upgrade cycle as well as declines in activation volumes due to decreased demand and store closures resulting from the COVID-19 pandemic. The decreases were partially offset by a shift to higher priced units in the mix of wireless devices sold. These revenue decreases were partially offset by an increase in wireless retail postpaid service revenue of 4.4% during 2020 compared to 2019, as a result of increases in the amount of wireless retail postpaid connections, partially offset by lower roaming and usage due to the COVID-19 pandemic. Also contributing to the partial offset was an increase in revenue related to our wireless device protection package as well as an increase in revenue related to Fios services.

Fios revenues totaled \$926 million, which represents an increase of 1.2% during 2020 compared to 2019. The increase in Fios revenues during 2020 compared to 2019 reflects the increase in total connections, as well as increased demand for higher broadband speeds as a result of the transition to work and learn from home during the COVID-19 pandemic.

[Table of Contents](#)

Global Enterprise

Global Enterprise offers services to large businesses, which are identified based on their size and volume of business with Verizon, as well as non-U.S. public sector customers.

Global Enterprise revenues decreased during 2020 compared to 2019, primarily due to declines in traditional data and voice communication services as a result of competitive price pressures, as well as a decrease in wireless equipment revenue. Wireless equipment revenue decreased as a result of declines in the number of wireless devices sold due to an elongation of the handset upgrade cycle as well as declines in activation volumes partially due to the COVID-19 pandemic. In addition, wireless equipment revenue decreased due to a shift to lower priced units in the mix of wireless devices sold. The decreases in revenue were partially offset by an increase in advanced communication services revenue resulting primarily from the COVID-19 pandemic and the Blue Jeans Network, Inc. (BlueJeans) acquisition, and an increase in customer premise equipment revenues. See Note 3 to the consolidated financial statements for additional information on the BlueJeans acquisition.

Public Sector and Other

Public Sector and Other offers wireless products and services as well as wireline connectivity and managed solutions to U.S. federal, state and local governments and educational institutions. These services include business services and connectivity similar to the products and services offered by Global Enterprise, in each case, with features and pricing designed to address the needs of governments and educational institutions.

Public Sector and Other revenues increased during 2020 compared to 2019, driven by increases in wireless retail postpaid service revenue as a result of an increase in gross additions partially due to federal, state and educational agencies responding to the COVID-19 pandemic. In addition, the increases were driven by increases in wireless equipment revenue and advanced communication services revenues. Wireless equipment revenue increased as a result of an increase in the number of wireless devices sold primarily due to the COVID-19 pandemic, partially offset by a shift to lower priced units in the mix of wireless devices sold. The increases in revenue were partially offset by decreases in networking revenue and traditional voice communication services.

Wholesale

Wholesale offers wireline communications services including data, voice, local dial tone and broadband services primarily to local, long distance, and wireless carriers that use our facilities to provide services to their customers.

Wholesale revenues decreased during 2020 compared to 2019, primarily due to declines in core data resulting from the effect of technology substitution and continuing contraction of market rates due to competition, partially offset by an increase in traditional voice communication services due to the COVID-19 pandemic.

Operating Expenses

Years Ended December 31,	(dollars in millions)			
			Increase/(Decrease)	
	2020	2019	2020 vs. 2019	
Cost of services	\$ 10,659	\$ 10,655	\$ 4	— %
Cost of wireless equipment	4,064	4,733	(669)	(14.1)
Selling, general and administrative expense	8,380	8,188	192	2.3
Depreciation and amortization expense	4,086	4,105	(19)	(0.5)
Total Operating Expenses	\$ 27,189	\$ 27,681	\$ (492)	(1.8)

Cost of Services

Cost of services were unchanged during 2020 compared to 2019, which was due to an increase in customer premise equipment and other direct costs, which was fully offset by lower roaming costs primarily driven by a significant decrease in international travel due to the COVID-19 pandemic and decreases in costs related to the device protection offerings to our wireless retail postpaid customers and personnel costs.

Cost of Wireless Equipment

Cost of wireless equipment decreased during 2020 compared to 2019, primarily due to lower overall postpaid sales and a shift to lower priced units in the mix of wireless devices sold, partially offset by an increase in the net number of wireless devices sold to support distance learning programs.

Selling, General and Administrative Expense

Selling, general and administrative expense increased during 2020 compared to 2019, primarily driven by increases in personnel costs and sales commission expense. The increase in sales commission expense during 2020 compared to 2019 inclusive of a lower net deferral of commission costs in the current year compared to the prior year, as well as sales compensation while certain of our stores and agent locations were closed due to the COVID-19 pandemic. These increases were partially offset by a one-time international tax benefit.

Depreciation and Amortization Expense

Depreciation and amortization expense decreased during 2020 compared to 2019, driven by the change in the mix of total Verizon depreciable assets and the Business segment's usage of those assets.

Segment Operating Income and EBITDA

Years Ended December 31,			(dollars in millions)	
	2020	2019	Increase/ (Decrease)	
Segment Operating Income	\$ 3,773	\$ 3,762	\$ 11	0.3 %
Add Depreciation and amortization expense	4,086	4,105	(19)	(0.5)
Segment EBITDA	\$ 7,859	\$ 7,867	\$ (8)	(0.1)
Segment operating income margin	12.2 %	12.0 %		
Segment EBITDA margin	25.4 %	25.0 %		

The changes in the table above during the periods presented were primarily a result of the factors described in connection with operating revenues and operating expenses.

Special Items

Special items included in Income Before Provision For Income Taxes were as follows:

Years Ended December 31,	2020	
Severance, pension and benefits charges		
Selling, general and administrative expense	\$ 221	\$
Other income (expense), net	1,610	
Loss on spectrum license auction		
Selling, general and administrative expense	1,195	
Impairment charges		
Media goodwill impairment	—	
Equity in losses of unconsolidated businesses	—	
Early debt redemption costs		
Other income (expense), net	129	
Interest expense	(27)	
Net (gain) loss from dispositions of assets and businesses		
Selling, general and administrative expense	126	
Other income (expense), net	(7)	
Total	\$ 3,247	\$

The Consolidated Adjusted EBITDA non-GAAP measure presented in the Consolidated Net Income, Consolidated EBITDA and Consolidated Adjusted EBITDA discussion (see "Consolidated Results of Operations") excludes all of the amounts included above, as described below.

The income and expenses related to special items included in our consolidated results of operations were as follows:

Years Ended December 31,		(dollars in millions)	
		2020	
Within Total Operating Expenses	\$	1,542	\$
Within Equity in losses of unconsolidated businesses		—	
Within Other income (expense), net		1,732	3
Within Interest expense		(27)	
Total	\$	3,247	\$

Severance, Pension and Benefits Charges

During 2020, in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur, we recorded net pre-tax pension and benefits charges of \$1.6 billion in our pension and postretirement benefit plans. The charges were recorded in Other income (expense), net in our consolidated statement of income and were primarily driven by a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 3.3% at December

[Table of Contents](#)

31, 2019 to a weighted-average of 2.6% at December 31, 2020 (\$3.2 billion), partially offset by the difference between our estimated return on assets and our actual return on assets (\$1.6 billion). During 2020, we also recorded net pre-tax severance charges of \$221 million related to a voluntary offer under our existing separation plans in Selling, general and administrative expense in our consolidated statements of income.

During 2019, in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur, we recorded net pre-tax pension and benefits charges of \$126 million in our pension and postretirement benefit plans. The charges were recorded in Other income (expense), net in our consolidated statements of income and were primarily driven by a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 4.4% at December 31, 2018 to a weighted-average of 3.3% at December 31, 2019 (\$4.3 billion), partially offset by the difference between our estimated return on assets and our actual return on assets (\$2.3 billion) and other assumption adjustments of \$1.9 billion, of which \$1.6 billion related to healthcare claims experience. During 2019, we also recorded net pre-tax severance charges of \$204 million in Selling, general and administrative expense in our consolidated statements of income.

Due to the presentation of the other components of net periodic benefit cost, we recognize a portion of the pension and benefits charges in Other income (expense), net in our consolidated statements of income.

See Note 11 to the consolidated financial statements for additional information related to severance, pension and benefits charges.

Loss on Spectrum License Auction

During 2020, we recorded a pre-tax net loss of \$1.2 billion as a result of the conclusion of the FCC incentive auction, Auction 103, for spectrum licenses in the upper 37 Gigahertz (GHz), 39 GHz and 47 GHz bands. See Note 3 to the consolidated financial statements for additional information.

Impairment Charges

The impairment charges consist of write-downs of goodwill and other investments or assets. The goodwill impairment charge of \$186 million recorded during 2019 for Verizon Media was a result of the Company's annual impairment test performed in the fourth quarter (see "Critical Accounting Estimates"). In addition, we recorded an impairment charge of \$50 million in Equity in losses of unconsolidated businesses related to a media joint venture investment during 2019.

Early Debt Redemption Costs

During 2020 and 2019, we recorded early debt redemption costs of \$102 million and \$3.6 billion, respectively.

See Note 7 to the consolidated financial statements for additional information related to our early debt redemptions.

Net (Gain) Loss from Dispositions of Assets and Businesses

During 2020, we recorded a pre-tax net loss of \$119 million, primarily in connection with the sale of our Huffington Post business. During 2019, we recorded pre-tax net gains from dispositions of assets and businesses of \$261 million in connection with the sale of various real estate properties and businesses.

See Note 3 to the consolidated financial statements for additional information related to dispositions of assets and businesses.

Operating Environment and Trends

The telecommunications industry is highly competitive. We expect competition to remain intense as traditional and non-traditional participants seek increased market share. Our high-quality customer base and networks differentiate us from our competitors and give us the ability to plan and manage through changing economic and competitive conditions. We remain focused on executing on the fundamentals of the business: maintaining a high-quality customer base, delivering strong financial and operating results

and strengthening our balance sheet. We will continue to invest for growth, which we believe is the key to creating value for our shareholders. We continue to lead in 4G LTE performance while building momentum for our 5G network. Our strategy lays the foundation for the future through investments in our Intelligent Edge Network that enable efficiencies throughout our core infrastructure and deliver flexibility to meet customer requirements.

The U.S. wireless market has achieved a high penetration of smartphones, which reduces the opportunity for new phone connection growth for the industry. We expect future revenue growth in the industry to be driven by expanding existing customer relationships, increasing the number of ways customers can connect with wireless networks and services and increasing the penetration of other connected devices including wearables, tablets and IoT devices. We expect 5G technology will provide a significant opportunity for growth in the industry in 2021 and beyond. With respect to our wireless connectivity products and services, we compete against other national wireless service providers, including AT&T Inc. and T-Mobile USA, Inc., as well as various regional wireless service providers. We also compete for retail activations with resellers that buy bulk wholesale service from wireless service providers, including Verizon, and resell it to their customers. Resellers include cable companies and others. We face competition from other communications and technology companies seeking to increase their brand recognition and capture customer revenue with respect to the provision of wireless products and services, in addition to non-traditional offerings in mobile data. For example, Microsoft Corporation, Alphabet Inc., Apple Inc. and others are offering alternative

[Table of Contents](#)

means for making wireless voice calls that, in certain cases, can be used in lieu of the wireless provider's voice service, as well as alternative means of accessing video content.

With respect to wireless services and equipment, pricing plays an important role in the wireless competitive landscape. We compete in this area by offering our customers services and devices that we believe they will regard as the best available value for the price. As the demand for wireless services continues to grow, wireless service providers are offering a range of service plans at competitive prices. These service offerings will vary from time to time based on customer needs, technology changes and market conditions and may be provided as standard plans or as part of limited time promotional offers.

We expect future service revenue growth opportunities to arise from increased access revenue as customers shift to higher access plans, driven in part by attractive bundled content with premium brands, as well as from increased connections per account. Future service revenue growth opportunities will be dependent on expanding the penetration of our services, increasing the number of ways that our customers can connect with our networks and services and the development of new ecosystems. We and other wireless service providers, as well as equipment manufacturers, offer device payment options, which provide customers with the ability to pay for their device over a period of time, and some providers offer device leasing arrangements.

Current and potential competitors in the wireline service market include cable companies, wireless service providers, domestic and foreign telecommunications providers, satellite television companies, internet service providers, over-the-top providers and other companies that offer network services and managed enterprise solutions.

In addition, companies with a global presence are increasingly competing with us in our wireline services. A relatively small number of telecommunications and integrated service providers with global operations serve customers in the global enterprise market and, to a lesser extent, the global wholesale market. We compete with these providers for large contracts to provide integrated solutions to global enterprises and government customers. Many of these companies have strong market presence, brand recognition and existing customer relationships, all of which contribute to intensifying competition that may affect our future revenue growth.

Despite this challenging environment, we expect that we will be able to grow key aspects of our wireline services. We continue to provide network reliability and offer products, which include fiber-optic internet access, several video services, and voice services. Further, we will continue to offer our business and government customers more robust IP products and services, and advance our IoT strategies by leveraging business models that monetize usage on our networks at the connectivity, platform and solution layers.

The online advertising market continues to evolve as online users are migrating from traditional desktop to mobile and multiple-device usage. Also, there is a continued shift towards programmatic advertising which presents opportunities to connect online advertisers with the appropriate online users in a rapid environment. Our media business competes with other online search engines, advertising platforms, digital video services and social networks. We are experiencing pressure from search and desktop usage and believe the pressure in these sectors will continue. We are implementing initiatives to realize synergies across all of our media assets and build services around our core content pillars to diversify revenue and return to growth.

We will also continue to focus on cost efficiencies to ensure we have the maximum flexibility to adjust to changes in the competitive and economic environments and maximize returns to shareholders.

2021 Connection Trends

In our Consumer segment, we expect to continue to attract new customers and maintain high-quality retail postpaid customers, capitalizing on demand for data services and providing our customers new ways of using wireless services in their daily lives. We expect that future connection growth will be driven by smartphones, tablets and other connected devices such as wearables. We believe the combination of our wireless network performance and Mix & Match unlimited plans provides a superior customer experience, supporting increased penetration of data services and the continued attraction and retention of higher valued retail postpaid connections. We expect to manage churn by providing a consistent, reliable experience on our wireless service and focusing on improving the customer experience through simplified pricing and continued focus in our distribution channels. We

expect to continue to grow our Fios internet connections as we seek to increase our penetration rates within our Fios service areas, further supported by the demand for higher speed internet connections. In Fios video, the business continues to face ongoing pressure as observed throughout the linear television market. We expect to manage market pressure by offering customers a choice of video service, including options such as Mix & Match on Fios and other offerings. We have experienced continuing access line and DSL losses as customers have disconnected both primary and secondary lines and switched to alternative technologies such as wireless, Voice over Internet Protocol, and cable for voice and data services.

In our Business segment, we offer wireless products and services to business and government customers across the U.S. We continue to grow our retail connections while operating in a competitive environment. We expect to maintain connection growth in part by adding capacity and density to our 4G LTE network, in addition to leading the build-out of our 5G network. We expect this connection growth, combined with our industry-leading network assets, will provide additional opportunities to sell solutions, such as those around security, advanced communications and professional services. We expect to expand our existing services offered to business customers through our Intelligent Edge Network, our multi-use platform.

2021 Operating Revenue Trends

In our Consumer segment, we expect to see an acceleration of service revenue growth in 2021 as customers shift to higher access plans with additional services and increase the number of devices they connect with our networks and services. We expect Fios revenue to benefit in 2021 as growth in our broadband customer base offsets the impact of the shift from the triple-play bundle to standalone service.

In our Business segment, we expect wireless revenue to expand, driven by an increase in the number of connections. We expect that our Fios products, through increased penetration, will also contribute to revenue growth. Legacy traditional wireline services will continue to face secular pressures. In addition, certain products and services provided by our Public Sector and Global Enterprise groups experienced elevated demand during 2020 as a result of the COVID-19 pandemic. Demand for those products and services may return to more historical levels in 2021.

Our media business, Verizon Media, is primarily made up of digital advertising products. We expect Verizon Media revenue to grow in 2021 as the strong advertising trends from 2020 are expected to continue, with the exception of political advertising spend. We will continue the implementation of initiatives to realize synergies across all of our media assets and build services around our core content pillars. We expect positive growth in mobile services and products.

2021 Operating Expense and Cash Flow from Operations Trends

We expect our consolidated operating income margin and adjusted consolidated EBITDA margin to remain strong as we continue to undertake initiatives to reduce our overall cost structure by improving productivity and gaining efficiencies in our operations throughout the business in 2021 and beyond. Business Excellence initiatives include the adoption of the zero-based budgeting methodology, driving capital efficiencies from the architecture of the networks, evolving our Information Technology strategy and the continuing benefit from the Voluntary Separation Program. We believe our additional investments in our Business segment in both product simplification and continued focus on process improvements and new work tools will drive cost savings and create incremental growth opportunities in areas such as 5G and One Fiber. The goal of the Business Excellence initiative is to take \$10 billion of cumulative cash outflows out of the business over four years, beginning in 2018. As part of this initiative, we are focusing on both operating expenses and capital expenditures. Our Business Excellence initiatives produced cumulative cash savings of \$9.5 billion through the end of 2020 from a mix of capital and operational expenditure activities. The program remains on track to achieve our goal in 2021. We will continue to explore opportunities for additional savings beyond the program.

We create value for our shareholders by investing the cash flows generated by our business in opportunities and transactions that support continued profitable growth, thereby increasing customer satisfaction and usage of our products and services. In addition, we have used our cash flows to maintain and grow our dividend payout to shareholders. Verizon's Board of Directors increased the Company's quarterly dividend by 2.0% during 2020, making this the fourteenth consecutive year in which we have raised our dividend.

Our goal is to use our cash to create long-term value for our shareholders. We will continue to look for investment opportunities that will help us to grow the business, strengthen our balance sheet, acquire spectrum licenses (see "Cash Flows from Investing Activities"), pay dividends to our shareholders and, when appropriate, buy back shares of our outstanding common stock (see "Cash Flows from Financing Activities").

Capital Expenditures

Our 2021 capital program includes capital to fund advanced networks and services, including expanding our core networks, adding capacity and density to our 4G LTE network in order to stay ahead of our customers' increasing data demands and deploying our 5G network, transforming our structure to deploy the Intelligent Edge Network while reducing the cost to deliver services to our customers, and pursuing other opportunities to drive operating efficiencies. We expect that the new network architecture will simplify operations by eliminating legacy network elements, improve our 4G LTE coverage, speed the deployment of 5G technology, and create new enterprise opportunities in the business market. The level and the timing of the Company's capital expenditures within these broad categories can vary significantly as a result of a variety of factors outside of our control, such as material weather events, equipment availability from vendors and permits from local governments. We

believe that we have significant discretion over the amount and timing of our capital expenditures on a Company-wide basis as we are not subject to any agreement that would require significant capital expenditures on a designated schedule or upon the occurrence of designated events.

Consolidated Financial Condition

	(dollars in millions)	
Years Ended December 31,	2020	2019
Cash flows provided by (used in)		
Operating activities	\$ 41,768	\$ 35,746
Investing activities	(23,512)	(17,581)
Financing activities	1,325	(18,164)
Increase in cash, cash equivalents and restricted cash	\$ 19,581	\$ 1

We use the net cash generated from our operations to fund expansion and modernization of our networks, service and repay external financing, pay dividends, invest in new businesses and spectrum and, when appropriate, buy back shares of our outstanding common stock. Our sources of funds, primarily from operations and, to the extent necessary, from external financing arrangements, are sufficient to meet

[Table of Contents](#)

ongoing operating and investing requirements. We made the decision at the beginning of the COVID-19 pandemic to maintain a higher cash balance in order to further protect the Company against the economic uncertainties associated with the COVID-19 pandemic and to opportunistically raise cash to finance future obligations at a time when we believed that market conditions were favorable. We expect that our capital spending requirements will continue to be financed primarily through internally generated funds. Debt or equity financing may be needed to fund additional investments or development activities, including, for example, to complete our acquisition of TracFone Wireless, Inc. (Tracfone) or to acquire additional wireless spectrum, or to maintain an appropriate capital structure to ensure our financial flexibility. Our cash and cash equivalents are held both domestically and internationally, and are invested to maintain principal and provide liquidity. See "Market Risk" for additional information regarding our foreign currency risk management strategies.

Our available external financing arrangements include an active commercial paper program, credit available under credit facilities and other bank lines of credit, vendor financing arrangements, issuances of registered debt or equity securities, U.S. retail medium-term notes and other capital market securities that are privately-placed or offered overseas. In addition, we monetize our device payment plan agreement receivables through asset-backed debt transactions.

Cash Flows Provided By Operating Activities

Our primary source of funds continues to be cash generated from operations. Net cash provided by operating activities increased by \$6.0 billion during 2020 compared to 2019, primarily due to improvements in working capital, which includes the receipt of the \$2.2 billion cash tax benefit related to preferred shares in a foreign affiliate sold during the fourth quarter 2019 and lower wireless volumes, as well as the receipt of \$764 million relating to the settlement of interest rate swaps during 2020. In addition, an employee benefits contribution as well as severance payments as a result of the Voluntary Separation Program in 2019 did not repeat in 2020. These comparative increases were partially offset by lower earnings in 2020. We made a \$300 million discretionary employee benefits contribution during the first quarter 2019 to our defined benefit pension plan. As a result of the 2019 discretionary pension contribution and higher actual asset returns than expected returns in both 2019 and 2020, we expect that there will be no required pension funding through 2030, subject to changes in market conditions. The 2019 contribution also improved the funded status of our qualified pension plan.

Cash Flows Used In Investing Activities

Capital Expenditures

Capital expenditures continue to relate primarily to the use of capital resources to increase the operating efficiency and productivity of our networks, maintain our existing infrastructure, facilitate the introduction of new products and services and enhance responsiveness to competitive challenges.

Capital expenditures, including capitalized software, were \$18.2 billion and \$17.9 billion for 2020 and 2019, respectively. Capital expenditures increased approximately \$253 million, or 1.4%, during 2020 compared to 2019, primarily due to increased focus on 5G technology deployment.

Acquisitions of Wireless Licenses

During 2020 and 2019, we invested \$2.1 billion and \$898 million, respectively, in acquisitions of wireless licenses.

In March 2020, the FCC completed an incentive auction, Auction 103, for spectrum licenses. Through December 31, 2020, we paid approximately \$1.6 billion, including \$101 million paid in December 2019.

In 2019, the FCC completed two millimeter wave spectrum license auctions, Auction 101 and Auction 102. We paid approximately \$521 million for spectrum licenses in connection with these auctions.

During 2020 and 2019, we entered into and completed various other wireless license acquisitions for cash consideration of \$360 million and an insignificant amount, respectively.

Acquisitions of Businesses, Net of Cash Acquired

During 2020 and 2019, we invested \$520 million and an insignificant amount, respectively, in acquisitions of businesses, net of cash acquired.

In April 2020, we entered into a definitive purchase agreement to acquire BlueJeans, an enterprise-grade video conferencing and event platform, whose services are sold to Business customers globally. The transaction closed in May 2020. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$397 million, net of cash acquired.

During 2020, we completed various other acquisitions for approximately \$127 million in cash consideration.

See "Acquisitions and Divestitures" for information on our acquisitions.

Other, Net

In September 2020, the FCC completed Auction 105 for Priority Access Licenses. Through December 31, 2020, we paid a cash deposit of approximately \$1.9 billion for the licenses. See Note 3 to the consolidated financial statements for additional information.

[Table of Contents](#)

During 2019, we received gross proceeds of approximately \$1.0 billion for a sale-leaseback transaction for buildings and real estate. See Note 6 to the consolidated financial statements for additional information.

Cash Flows Provided by (Used In) Financing Activities

We seek to maintain a mix of fixed and variable rate debt to lower borrowing costs within reasonable risk parameters and to protect against earnings and cash flow volatility resulting from changes in market conditions. During 2020, net cash provided by financing activities was \$1.3 billion. During 2019, net cash used in financing activities was \$18.2 billion.

2020

During 2020, our net cash provided by financing activities of \$1.3 billion was primarily driven by \$31.5 billion provided by proceeds from long-term borrowings, which included \$5.6 billion of proceeds from our asset-backed debt transactions. These cash flows provided by financing activities were partially offset by \$17.2 billion used for repayments, redemptions and repurchases of long-term borrowings and finance lease obligations, which included \$7.4 billion used for prepayments and repayments of asset-backed long-term borrowings, \$10.2 billion used for dividend payments and \$2.7 billion used for other financing activities.

Proceeds from and Repayments, Redemptions, and Repurchases of Long-Term Borrowings

At December 31, 2020, our total debt increased to \$129.1 billion as compared to \$111.5 billion at December 31, 2019. Our effective interest rate was 4.1% and 4.8% during the years ended December 31, 2020 and 2019, respectively. The substantial majority of our total debt portfolio consists of fixed rate indebtedness, therefore, changes in interest rates do not have a material effect on our interest payments. See also "Market Risk" and Note 7 to the consolidated financial statements for additional information.

At December 31, 2020, approximately \$29.0 billion, or 22.5%, of the aggregate principal amount of our total debt portfolio consisted of foreign denominated debt, primarily Euro and British Pound Sterling. We have entered into cross currency swaps on substantially all of our foreign denominated debt in order to fix our future interest and principal payments in U.S. dollars and mitigate the impact of foreign currency transaction gains or losses. See "Market Risk" for additional information.

Verizon may continue to acquire debt securities issued by Verizon and its affiliates in the future through open market purchases, redemptions, privately negotiated transactions, tender offers, exchange offers, or otherwise, upon such terms and at such prices as Verizon may from time to time determine, for cash or other consideration.

Other, Net

Other, net financing activities during 2020 includes \$827 million in payments related to vendor financing arrangements and \$748 million in cash paid on debt exchanges. See Note 15 to the consolidated financial statements for additional information.

Dividends

The Verizon Board of Directors assesses the level of our dividend payments on a periodic basis taking into account such factors as long-term growth opportunities, internal cash requirements and the expectations of our shareholders. During the third quarter of 2020, the Board increased our quarterly dividend payment by 2.0% to \$0.6275 from \$0.6150 per share from the previous quarter. This is the fourteenth consecutive year that Verizon's Board of Directors has approved a quarterly dividend increase.

As in prior periods, dividend payments were a significant use of capital resources. During 2020, we paid \$10.2 billion in dividends.

2019

During 2019, our net cash used in financing activities of \$18.2 billion was primarily driven by:

- \$23.9 billion used for repayments, redemptions and repurchases of long-term borrowings and finance lease obligations, which included \$6.3 billion used for prepayments and repayments of asset-backed long-term borrowings;

- \$10.0 billion used for dividend payments; and
- \$1.8 billion used for net debt related costs.

These uses of cash were partially offset by proceeds from long-term borrowings of \$18.7 billion, which included \$8.6 billion of proceeds from our asset-backed debt transactions.

Proceeds from and Repayments, Redemptions, and Repurchases of Long-Term Borrowings

At December 31, 2019, our total debt was \$111.5 billion, and during the year ended December 31, 2019, our effective interest rate was 4.8%. The substantial majority of our total debt portfolio consisted of fixed rate indebtedness, therefore, changes in interest rates did not have a material effect on our interest payments. See "Market Risk" and Note 7 to the consolidated financial statements for additional information.

At December 31, 2019, approximately \$23.5 billion, or 21.1%, of the aggregate principal amount of our total debt portfolio consisted of foreign denominated debt, primarily Euro and British Pound Sterling. We have entered into cross currency swaps on substantially all of our foreign denominated debt in order to fix our future interest and principal payments in U.S. dollars and mitigate the impact of foreign currency transaction gains or losses. See "Market Risk" for additional information.

[Table of Contents](#)

Other, Net

Other, net financing activities during 2019, included early debt redemption costs. See "Special Items" for additional information, as well as cash paid on debt exchanges and derivative-related transactions. See Note 15 to the consolidated financial statements for additional information.

Dividends

During the third quarter of 2019, the Board increased our quarterly dividend payment by 2.1% to \$0.6150 per share.

As in prior periods, dividend payments were a significant use of capital resources. During 2019, we paid \$10.0 billion in dividends.

Asset-Backed Debt

As of December 31, 2020, the carrying value of our asset-backed debt was \$10.6 billion. Our asset-backed debt includes Asset-Backed Notes (ABS Notes) issued to third-party investors (Investors) and loans (ABS Financing Facilities) received from banks and their conduit facilities (collectively, the Banks). Our consolidated asset-backed debt bankruptcy remote legal entities (each, an ABS Entity or collectively, the ABS Entities) issue the debt or are otherwise party to the transaction documentation in connection with our asset-backed debt transactions. Under the terms of our asset-backed debt, Cellco and certain other affiliates of Verizon (collectively, the Originators) transfer device payment plan agreement receivables to one of the ABS Entities, which in turn transfers such receivables to another ABS Entity that issues the debt. Verizon entities retain the equity interests in the ABS Entities, which represent the rights to all funds not needed to make required payments on the asset-backed debt and other related payments and expenses.

Our asset-backed debt is secured by the transferred device payment plan agreement receivables and future collections on such receivables. The device payment plan agreement receivables transferred to the ABS Entities and related assets, consisting primarily of restricted cash, will only be available for payment of asset-backed debt and expenses related thereto, payments to the Originators in respect of additional transfers of device payment plan agreement receivables, and other obligations arising from our asset-backed debt transactions, and will not be available to pay other obligations or claims of Verizon's creditors until the associated asset-backed debt and other obligations are satisfied. The Investors or Banks, as applicable, which hold our asset-backed debt have legal recourse to the assets securing the debt, but do not have any recourse to Verizon with respect to the payment of principal and interest on the debt. Under a parent support agreement, Verizon has agreed to guarantee certain of the payment obligations of Cellco and the Originators to the ABS Entities.

Cash collections on the device payment plan agreement receivables collateralizing our asset-backed debt securities are required at certain specified times to be placed into segregated accounts. Deposits to the segregated accounts are considered restricted cash and are included in Prepaid expenses and other, and Other assets in our consolidated balance sheets.

Proceeds from our asset-backed debt transactions are reflected in Cash flows from financing activities in our consolidated statements of cash flows. The asset-backed debt issued and the assets securing this debt are included in our consolidated balance sheets.

See Note 7 to the consolidated financial statements for additional information.

In May 2020, we amended and restated our outstanding ABS financing facility originally entered into in 2016, and previously amended and restated in 2019, with a number of financial institutions (ABS Financing Facility). One loan agreement is outstanding in connection with the ABS Financing Facility, and such loan agreement was amended and restated in May 2020. Under the loan agreement, we have the right to prepay all or a portion of the advances at any time without penalty, but in certain cases, with breakage costs. During 2020, we borrowed \$1.3 billion and prepaid \$4.0 billion under the loan agreement.

Long-Term Credit Facilities

		At December 31, 2020			
(dollars in millions)	Maturities	Facility Capacity	Unused Capacity	Principal Amount Outstanding	
Verizon revolving credit facility ⁽¹⁾	2024	\$ 9,500	\$ 9,392		N/A
Various export credit facilities ⁽²⁾	2022-2028	7,500	1,000	\$	4,882
Total		\$ 17,000	\$ 10,392	\$	4,882

N/A - not applicable

⁽¹⁾ The revolving credit facility does not require us to comply with financial covenants or maintain specified credit ratings, and it permits us to borrow even if our business has incurred a material adverse change. The revolving credit facility provides for the issuance of letters of credit.

⁽²⁾ During 2020 and 2019, we drew down \$1.0 billion and \$1.5 billion from these facilities, respectively. These credit facilities are used to finance equipment-related purchases. Borrowings under certain of these facilities amortize semi-annually in equal installments up to the applicable maturity dates. Maturities reflect maturity dates of principal amounts outstanding. Any amounts borrowed under these facilities and subsequently repaid cannot be reborrowed.

2021 Credit Agreement

Delayed Draw Term Loan Credit Agreement

On February 24, 2021 (the Effective Date), Verizon entered into a \$25.0 billion Delayed Draw Term Loan Credit Agreement (the Credit Agreement) with two financial institutions, which includes initial commitments of \$12.5 billion from each of these parties. The Credit Agreement provides Verizon with the ability to borrow up to \$25.0 billion for general corporate purposes, including any potential acquisition of spectrum. The loans under the Credit Agreement are available during the period (the Availability Period) beginning on the Effective Date and ending on the earlier of (i) May 28, 2021, and (ii) the receipt by the two financial institutions of written notice by Verizon of its election to terminate commitments pursuant to the Credit Agreement. The availability of the loans under the Credit Agreement, which have not yet been funded, is subject to the satisfaction (or waiver) of the conditions that certain representations of Verizon are accurate in all material respects and the absence of certain event of default. The loans under the Credit Agreement are to be made in a single borrowing on the funding date and will mature and be payable in full on the date that is 364 days after the funding date unless extended pursuant to the terms of the Credit Agreement. The two financial institutions may syndicate their commitments under the Credit Agreement, subject to the terms of the Credit Agreement.

Interest Rate and Fees

The loans under the Credit Agreement will bear interest at a rate equal to, at the option of Verizon, (i) the base rate (defined as the greater of the rate last quoted by the Wall Street Journal as the "prime rate", the federal funds rate plus 0.500%, and the one-month London Inter-Bank Offered Rate (LIBOR) plus 1.000%, subject to a floor of 1.000%) or (ii) LIBOR, in each case plus a margin to be determined by reference to Verizon's credit ratings and ranging from 0.000% to 0.125% in the case of base rate loans and 0.625% to 1.125% in the case of LIBOR loans. Additional margin of 0.125% is added to the loan on December 31, 2021.

Verizon will pay a commitment fee on the daily actual unused commitment of each lender starting on the date that is 60 days after the Effective Date through the last day of the Availability Period. This fee accrues at a rate determined by reference to Verizon's credit ratings and ranges from 0.070% to 0.125% per annum.

Prepayments

The Credit Agreement requires Verizon to reduce unused commitments and prepay the loans with 100% of the net cash proceeds received from issuances or sales of equity and incurrences of borrowed money indebtedness, subject to certain exceptions.

Covenants and Events of Default

The Credit Agreement contains certain negative covenants, including a negative pledge covenant, a merger or similar transaction covenant and an accounting changes covenant, and affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. An event of default may result in the inability to borrow in certain circumstances or the acceleration of any outstanding loan under the Credit Agreement, as applicable.

Common Stock

Common stock has been used from time to time to satisfy some of the funding requirements of employee and shareholder plans. During the years ended December 31, 2020 and 2019, we issued 2.3 million and 3.8 million common shares from Treasury stock, respectively, which had an insignificant aggregate value.

In February 2020, the Verizon Board of Directors authorized a share buyback program to repurchase up to 100 million shares of Verizon's common stock. The program will terminate when the aggregate number of shares purchased reaches 100 million, or a new share repurchase plan superseding the current plan is authorized, whichever is sooner. The program permits Verizon to repurchase shares over time, with the amount and timing of repurchases depending on market conditions and corporate needs. There were no repurchases of common stock during 2020 and 2019 under our current or previously authorized share buyback program.

Credit Ratings

Verizon's credit ratings did not change in 2020 or 2019.

Securities ratings assigned by rating organizations are expressions of opinion and are not recommendations to buy, sell or hold securities. A securities rating is subject to revision or withdrawal at any time by the assigning rating organization. Each rating should be evaluated independently of any other rating.

Covenants

Our credit agreements contain covenants that are typical for large, investment grade companies. These covenants include requirements to pay interest and principal in a timely fashion, pay taxes, maintain insurance with responsible and reputable insurance companies, preserve our corporate existence, keep appropriate books and records of financial transactions, maintain our properties, provide financial and other reports to our lenders, limit pledging and disposition of assets and mergers and consolidations, and other similar covenants.

We and our consolidated subsidiaries are in compliance with all of our restrictive covenants in our debt agreements.

Change In Cash, Cash Equivalents and Restricted Cash

Our Cash and cash equivalents at December 31, 2020 totaled \$22.2 billion, a \$19.6 billion increase compared to December 31, 2019, primarily as a result of the factors discussed above.

Restricted cash at December 31, 2020 totaled \$1.3 billion, relatively flat compared to restricted cash at December 31, 2019, primarily related to cash collections on the device payment plan agreement receivables that are required at certain specified times to be placed into segregated accounts.

Free Cash Flow

Free cash flow is a non-GAAP financial measure that reflects an additional way of viewing our liquidity that, we believe, when viewed with our GAAP results, provides management, investors and other users of our financial information with a more complete understanding of factors and trends affecting our cash flows. Free cash flow is calculated by subtracting capital expenditures (including capitalized software) from net cash provided by operating activities. We believe it is a more conservative measure of cash flow since purchases of fixed assets are necessary for ongoing operations. Free cash flow has limitations due to the fact that it does not represent the residual cash flow available for discretionary expenditures. For example, free cash flow does not incorporate payments made on finance lease obligations or cash payments for business acquisitions or wireless licenses. Therefore, we believe it is important to view free cash flow as a complement to our entire consolidated statements of cash flows.

The following table reconciles net cash provided by operating activities to free cash flow:

	(dollars in millions)	
Years Ended December 31,	2020	2019
Net cash provided by operating activities	\$ 41,768	\$ 35,746
Less Capital expenditures (including capitalized software)	18,192	17,939
Free cash flow	\$ 23,576	\$ 17,807

The increase in free cash flow during 2020 is a reflection of the increase in operating cash flows, partially offset by the increase in capital expenditures discussed above.

Employee Benefit Plans Funded Status and Contributions

Employer Contributions

We operate numerous qualified and nonqualified pension plans and other postretirement benefit plans. These plans primarily relate to our domestic business units. We made no discretionary contribution to our qualified pension plan in 2020. In 2019, we made contributions of \$300 million to our qualified pension plans. During 2020 and 2019 we made contributions of \$57 million and \$71 million to our nonqualified pension plans, respectively.

The Company's overall investment strategy is to achieve a mix of assets that allows us to meet projected benefit payments while taking into consideration risk and return. In an effort to reduce the risk of our portfolio strategy and better align assets with liabilities, we have adopted a liability driven pension strategy that seeks to better match the interest rate sensitivity of the liability hedging assets with the interest rate sensitivity of the liability. We expect that the strategy will reduce the likelihood that assets will decline at a time when liabilities increase (referred to as liability hedging), with the goal to reduce the risk of underfunding to the plan and its participants and beneficiaries; however, we also expect the strategy to result in lower asset returns. Nonqualified pension contributions are estimated to be approximately \$70 million in 2021.

Contributions to our other postretirement benefit plans generally relate to payments for benefits on an as-incurred basis since these other postretirement benefit plans do not have funding requirements similar to the pension plans. We contributed \$709 million and \$449 million to our other postretirement benefit plans in 2020 and 2019, respectively. Contributions to our other postretirement benefit plans are estimated to be approximately \$800 million in 2021.

Leasing Arrangements

See Note 6 to the consolidated financial statements for a discussion of leasing arrangements.

Contractual Obligations

The following table provides a summary of our contractual obligations and commercial commitments at December 31, 2020. Additional detail about these items is included in the notes to the consolidated financial statements.

(dollars in millions)

Contractual Obligations	Payments Due By Period				
	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
Long-term debt ⁽¹⁾	\$ 128,062	\$ 5,227	\$ 16,156	\$ 12,814	\$ 93,865
Finance lease obligations ⁽²⁾	1,366	373	591	301	101
Total long-term debt, including current maturities	129,428	5,600	16,747	13,115	93,966
Interest on long-term debt ⁽¹⁾	73,688	4,702	8,941	8,131	51,914
Operating lease obligations ⁽²⁾	24,994	4,327	7,485	5,212	7,970
Purchase obligations ⁽³⁾	24,585	8,179	10,835	4,051	1,520
Other long-term liabilities ⁽⁴⁾	4,076	798	1,659	1,619	—
Finance obligations ⁽⁵⁾	1,256	286	590	380	—
Total contractual obligations	\$ 258,027	\$ 23,892	\$ 46,257	\$ 32,508	\$ 155,370

⁽¹⁾ Items included in long-term debt with variable coupon rates exclude unamortized debt issuance costs, and are described in Note 7 to the consolidated financial statements.

⁽²⁾ See Note 6 to the consolidated financial statements for additional information.

⁽³⁾ Items included in purchase obligations are primarily commitments to purchase content and network services, equipment, software and marketing services, which will be used or sold in the ordinary course of business. These amounts do not represent our entire anticipated purchases in the future, but represent only those items that are the subject of contractual obligations. We also purchase products and services as needed with no firm commitment. For this reason, the amounts presented in this table alone do not provide a reliable indicator of our expected future cash outflows or changes in our expected cash position. See Note 16 to the consolidated financial statements for additional information.

⁽⁴⁾ Other long-term liabilities represent estimated postretirement benefit and qualified pension plan contributions. Estimated qualified pension plan contributions include expected minimum funding contributions, which commence after 2030 based on the plan's current funded status. Estimated postretirement benefit payments include expected future postretirement benefit payments. These estimated amounts: (1) are subject to change based on changes to assumptions and future plan performance, which could impact the timing or amounts of these payments; and (2) exclude expectations beyond 5 years due to uncertainty of the timing and amounts. See Note 11 to the consolidated financial statements for additional information.

⁽⁵⁾ Represents future minimum payments under the sublease arrangement for our tower transaction. See Note 6 to the consolidated financial statements for additional information.

We are not able to make a reasonable estimate of when the unrecognized tax benefits balance of \$2.9 billion and related interest and penalties will be settled with the respective taxing authorities until issues or examinations are further developed. See Note 12 to the consolidated financial statements for additional information.

Guarantees

We guarantee the debentures of our operating telephone company subsidiaries as well as the debt obligations of GTE LLC, as successor in interest to GTE Corporation, that were issued and outstanding prior to July 1, 2003. See Note 7 to the consolidated financial statements for additional information.

In connection with the execution of agreements for the sale of businesses and investments, Verizon ordinarily provides representations and warranties to the purchasers pertaining to a variety of nonfinancial matters, such as ownership of the securities being sold, as well as financial losses. See Note 16 to the consolidated financial statements for additional information.

As of December 31, 2020, letters of credit totaling approximately \$677 million, which were executed in the normal course of business and support several financing arrangements and payment obligations to third parties, were outstanding. See Note 16 to the consolidated financial statements for additional information.

Other Future Obligations

During 2020, Verizon entered into 12 renewable energy purchase agreements (REPA) with third parties, in addition to one signed in 2019. See Note 16 to the consolidated financial statements for additional information. Under our REPA arrangements, we plan to purchase up to an aggregate of nearly 1.7 gigawatts of capacity across multiple states, including Illinois, Indiana, Maryland, New York, North Carolina, Ohio, Pennsylvania, Texas and West Virginia.

Critical Accounting Estimates and Recently Issued Accounting Standards

Critical Accounting Estimates

A summary of the critical accounting estimates used in preparing our financial statements is as follows:

Wireless Licenses and Goodwill

Wireless licenses and Goodwill are a significant component of our consolidated assets. Both our wireless licenses and goodwill are treated as indefinite-lived intangible assets and, therefore are not amortized, but rather are tested for impairment annually in the fourth fiscal quarter, unless there are events requiring an earlier assessment or changes in circumstances during an interim period providing impairment indicators are present. We believe our estimates and assumptions are reasonable and represent appropriate marketplace considerations as of the valuation date. Although we use consistent methodologies in developing the assumptions and estimates underlying the fair value calculations used in our impairment tests, these estimates and assumptions are uncertain by nature, may change over time and can vary from actual results. It is possible that in the future there may be changes in our estimates and assumptions, including the timing and amount of future cash flows, margins, growth rates, market participant assumptions, comparable benchmark companies and related multiples and discount rates, which could result in different fair value estimates. Significant and adverse changes to any one or more of the above-noted estimates and assumptions could result in a goodwill impairment for one or more of our reporting units.

Wireless Licenses

The carrying value of our wireless licenses was approximately \$96.1 billion as of December 31, 2020. We aggregate our wireless licenses into one single unit of accounting, as we utilize our wireless licenses on an integrated basis as part of our nationwide wireless network. Our wireless licenses provide us with the exclusive right to utilize certain radio frequency spectrum to provide wireless communication services. There are currently no legal, regulatory, contractual, competitive, economic or other factors that limit the useful life of our wireless licenses.

In the first quarter of 2020, we reclassified substantially all of our 39 GHz wireless licenses, including capitalized interest, with a carrying value of \$2.8 billion to assets held for sale in connection with the FCC's incentive auction, Auction 103. As a result, these wireless licenses were adjusted down to their fair value of \$1.6 billion resulting in a pre-tax loss of \$1.2 billion (\$914 million after-tax).

During the fourth quarter of 2020 and 2019, we performed a qualitative impairment assessment as our annual impairment test to determine whether it is more likely than not that the fair value of our wireless licenses was less than the carrying amount. As part of our assessment we considered several qualitative factors including the business enterprise value of our combined wireless business, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and EBITDA margin results, projections and recent merger and acquisition activity), the recent and projected financial performance of our combined wireless business as a whole, as well as other factors. Our annual impairment tests in 2020 and 2019 indicated that it is more likely than not that the fair value of our wireless licenses remained above their carrying value and, therefore, did not result in an impairment.

Goodwill

To determine if goodwill is potentially impaired, we have the option to perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If we elect not to conduct the qualitative assessment or if indications of a potential impairment exist, the determination of whether an impairment has occurred requires the determination of the fair value of each the reporting unit being assessed.

Under the qualitative assessment, we consider several qualitative factors, including the business enterprise value of the reporting unit from the last quantitative test and the excess of fair value over carrying value from this test, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and

EBITDA margin results, projections and recent merger and acquisition activity), the recent and projected financial performance of the reporting unit, as well as other factors.

Under our quantitative assessment, the fair value of the reporting unit is calculated using a market approach and a discounted cash flow method, as a form of the income approach. The market approach includes the use of comparative multiples to corroborate discounted cash flow results. The discounted cash flow method is based on the present value of two components-projected cash flows and a terminal value. The terminal value represents the expected normalized future cash flows of the reporting unit beyond the cash flows from the discrete projection period. The fair value of the reporting unit is calculated based on the sum of the present value of the cash flows from the discrete period and the present value of the terminal value. The discount rate represented our estimate of the weighted-average cost of capital (WACC), or expected return, that a marketplace participant would have required as of the valuation date. The application of our goodwill impairment test required key assumptions underlying our valuation model. The discounted cash flow analysis factored in assumptions on discount rates and terminal growth rates to reflect risk profiles of key strategic revenue and cost initiatives, as well as revenue and EBITDA growth relative to history and market trends and expectations. The market multiples approach incorporated significant judgment involved in the selection comparable public company multiples and benchmarks. The selection of companies was influenced by differences in growth and profitability, and volatility in market prices of peer companies. These valuation inputs are inherently uncertain, and an adverse change in one or a combination of these inputs could trigger a goodwill impairment loss in the future.

A projected sustained decline in a reporting unit's revenues and earnings could have a significant negative impact on its fair value and may result in impairment charges. Such a decline could be driven by, among other things: (1) further anticipated decreases in service pricing, sales volumes and long-term growth rate as a result of competitive pressures or other factors; or (2) the inability to achieve or delays in achieving

[Table of Contents](#)

the goals in strategic initiatives. Also, adverse changes to macroeconomic factors, such as increases to long-term interest rates, would also negatively impact the fair value of the reporting unit.

At December 31, 2020, the balance of our goodwill was approximately \$24.8 billion, of which \$17.2 billion was in our Consumer reporting unit and \$7.5 billion was in our Business reporting unit. We performed qualitative impairment assessments for our Consumer and Business reporting units during the fourth quarter of 2020. Our qualitative assessments indicated that it was more likely than not that the fair values for our Consumer and Business reporting units exceeded their respective carrying values and, therefore, did not result in an impairment.

In November 2018, we announced a strategic reorganization of our business, which resulted in changes to our segments and reporting units effective April 1, 2019. As a result, we performed impairment assessments of the reporting units impacted by the strategic reorganization, specifically our historical Wireless, historical Wireline and historical Connect reporting units on March 31, 2019, immediately before our strategic reorganization became effective. Our impairment assessments indicated that the fair value for each of our historical Wireless, historical Wireline and historical Connect reporting units exceeded their respective carrying values, and therefore did not result in a goodwill impairment. We then performed quantitative assessments of our Consumer and Business reporting units on April 1, 2019, immediately following our strategic reorganization. Our impairment assessments indicated that the fair value for each of our Consumer and Business reporting units exceeded their respective carrying values and therefore, did not result in a goodwill impairment. Our Media reporting unit was not impacted by the strategic reorganization and there was no indicator of impairment as of the reorganization date.

We performed qualitative impairment assessments for our Consumer and Business reporting units during the fourth quarter of 2019. Our qualitative assessments indicated that it was more likely than not that the fair values of our Consumer and Business reporting units exceeded their respective carrying values and, therefore, did not result in an impairment.

We performed a quantitative impairment assessment for our Media reporting unit in 2019. In connection with Verizon's annual budget process during the fourth quarter of 2019, the leadership at both Verizon Media and Verizon completed a comprehensive five-year strategic planning review of Verizon Media's business prospects resulting in unfavorable adjustments to Verizon Media's financial projections. These revised projections were used as a key input into Verizon Media's annual goodwill impairment test performed in the fourth quarter of 2019.

During the fourth quarter of 2019, consistent with our accounting policy, we applied a combination of a market approach and a discounted cash flow method reflecting current assumptions and inputs, including our revised projections, discount rate and expected growth rates, which resulted in the determination that the fair value of the Media reporting unit was less than its carrying amount. As a result, we recorded a non-cash goodwill impairment charge of approximately \$186 million (\$176 million after-tax) in the fourth quarter of 2019 in our consolidated statement of income. The goodwill balance of the Media reporting unit had been fully written off as a result of the impairment charge.

At December 31, 2019, the balance of our goodwill was approximately \$24.4 billion, of which \$17.1 billion was in our Consumer reporting unit and \$7.3 billion was in our Business reporting unit.

Pension and Other Postretirement Benefit Plans

We maintain benefit plans for most of our employees, including, for certain employees, pension and other postretirement benefit plans. At December 31, 2020, in the aggregate, pension plan benefit obligations exceeded the fair value of pension plan assets, which will result in future pension plan expense. Other postretirement benefit plans have larger benefit obligations than plan assets, resulting in expense. Significant benefit plan assumptions, including the discount rate used, the long-term rate of return on plan assets, the determination of the substantive plan and health care trend rates are periodically updated and impact the amount of benefit plan income, expense, assets and obligations. Changes to one or more of these assumptions could significantly impact our accounting for pension and other postretirement benefits. A sensitivity analysis of the impact of changes in these assumptions on the benefit obligations and expense (income) recorded, as well as on the funded status due to an increase or a decrease in the actual versus expected return on plan assets as of December 31, 2020 and for the year then ended pertaining to Verizon's pension and postretirement benefit plans, is provided in the table below.

(dollars in millions)	Percentage point change	Increase/(decrease) at December 31, 2020*
Pension plans discount rate	+0.50 \$	(1,258)
	-0.50	1,416
Rate of return on pension plan assets	+1.00	(182)
	-1.00	182
Postretirement plans discount rate	+0.50	(920)
	-0.50	1,032
Rate of return on postretirement plan assets	+1.00	(6)
	-1.00	6

* In determining its pension and other postretirement obligation, the Company used a weighted-average discount rate of 2.6%. The rate was selected to approximate the composite interest rates available on a selection of high-quality bonds available in the market at December 31, 2020. The bonds selected had maturities that coincided with the time periods during which benefit payments are expected to occur, were non-callable and available in sufficient quantities to ensure marketability (at least \$300 million par outstanding).

The annual measurement date for both our pension and other postretirement benefits is December 31. We use the full yield curve approach to estimate the interest cost component of net periodic benefit cost for pension and other postretirement benefits. The full yield curve approach

[Table of Contents](#)

refines our estimate of interest cost by applying the individual spot rates from a yield curve composed of the rates of return on several hundred high-quality fixed income corporate bonds available at the measurement date. These individual spot rates align with the timing of each future cash outflow for benefit payments and therefore provide a more precise estimate of interest cost.

Income Taxes

Our current and deferred income taxes and associated valuation allowances are impacted by events and transactions arising in the normal course of business as well as in connection with the adoption of new accounting standards, changes in tax laws and rates, acquisitions and dispositions of businesses and non-recurring items. As a global commercial enterprise, our income tax rate and the classification of income taxes can be affected by many factors, including estimates of the timing and realization of deferred income tax assets and the timing and amount of income tax payments. We account for tax benefits taken or expected to be taken in our tax returns in accordance with the accounting standard relating to the uncertainty in income taxes, which requires the use of a two-step approach for recognizing and measuring tax benefits taken or expected to be taken in a tax return. We review and adjust our liability for unrecognized tax benefits based on our best judgment given the facts, circumstances and information available at each reporting date. To the extent that the final outcome of these tax positions is different than the amounts recorded, such differences may impact income tax expense and actual tax payments. We recognize any interest and penalties accrued related to unrecognized tax benefits in income tax expense. Actual tax payments may materially differ from estimated liabilities as a result of changes in tax laws as well as unanticipated transactions impacting related income tax balances. See Note 12 to the consolidated financial statements for additional information.

Property, Plant and Equipment

Our Property, plant and equipment balance represents a significant component of our consolidated assets. We record Property, plant and equipment at cost. We depreciate Property, plant and equipment on a straight-line basis over the estimated useful life of the assets. We expect that a one year increase in estimated useful lives of our Property, plant and equipment would result in a decrease to our 2020 depreciation expense of \$2.7 billion and that a one year decrease would result in an increase of approximately \$4.5 billion in our 2020 depreciation expense.

Accounts Receivable

Prior to January 1, 2020, accounts receivable were recorded at cost less an allowance for doubtful accounts. The gross amount of accounts receivable and corresponding allowance for doubtful accounts were presented separately in the consolidated balance sheets. We maintained allowances for uncollectible accounts receivable, including our direct-channel device payment plan agreement receivables, for estimated losses resulting from the failure or inability of our customers to make required payments. Indirect-channel device payment receivables are considered financial instruments and were initially recorded at fair value net of imputed interest, and credit losses were recorded as incurred. However, receivable balances were assessed quarterly for impairment and an allowance was recorded if the receivable was considered impaired. Subsequent to January 1, 2020, accounts receivable are recorded at amortized cost less an allowance for credit losses that are not expected to be recovered. The gross amount of accounts receivable and corresponding allowance for credit losses are presented separately in the consolidated balance sheets. We maintain allowances for credit losses resulting from the expected failure or inability of our customers to make required payments. We recognize the allowance for credit losses at inception and reassess quarterly based on management's expectation of the asset's collectability. The allowance is based on multiple factors including historical experience with bad debts, the credit quality of the customer base, the aging of such receivables and current macroeconomic conditions, such as the COVID-19 pandemic, as well as management's expectations of conditions in the future, if applicable. Our allowance for credit losses is based on management's assessment of the collectability of assets pooled together with similar risk characteristics.

We record an allowance to reduce the receivables to the amount that is expected to be collectible. For device payment plan agreement receivables, we record bad debt expense based on a default and loss calculation using our proprietary loss model. The expected loss rate is determined based on customer credit scores and other qualitative factors as noted above. The loss rate is assigned individually on a customer by customer basis and the custom credit scores are then aggregated by vintage and used in our proprietary loss model to calculate the weighted-average loss rate used for determining the allowance balance.

We monitor the collectability of our wireless service receivables as one overall pool. Wireline service receivables are disaggregated and pooled by the following customer groups: consumer, small and medium business, global enterprise, public sector and wholesale. For wireless service receivables and wireline consumer and small and medium business receivables, the allowance is calculated based on a 12 month rolling average write-off balance multiplied by the average life-cycle of an account from billing to write-off. The risk of loss is assessed over the contractual life of the receivables and we adjust the historical loss amounts for current and future conditions based on management's qualitative considerations. For global enterprise, public sector and wholesale wireline receivables, the allowance for credit losses is based on historical write-off experience and individual customer credit risk, if applicable. We consider multiple factors in determining the allowance as discussed above.

If there is a deterioration of our customers' financial condition or if future actual default rates on receivables in general differ from those currently anticipated, we may have to adjust our allowance for credit losses, which would affect earnings in the period the adjustments are made.

Acquisitions and Divestitures

Blue Jeans Network, Inc.

In April 2020, we entered into a definitive purchase agreement to acquire BlueJeans, an enterprise-grade video conferencing and event platform, whose services are sold to Business customers globally. The transaction closed in May 2020. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$397 million, net of cash acquired. See Note 3 to the consolidated financial statements for additional information.

TracFone Wireless, Inc.

In September 2020, we entered into a purchase agreement (Tracfone Purchase Agreement) with América Móvil to acquire Tracfone, a provider of prepaid and value mobile services in the U.S. Under the terms of the Tracfone Purchase Agreement, we will acquire all of the stock of Tracfone for approximately \$3.1 billion in cash and \$3.1 billion in Verizon common stock, subject to customary adjustments, at closing. The number of shares issued will be based on an average trading price determined as of the closing date and is subject to a minimum number of shares issuable of 47,124,445 and a maximum number of shares issuable of 57,596,544. The Tracfone Purchase Agreement also includes up to an additional \$650 million in future cash consideration related to the achievement of certain performance measures and other commercial arrangements. The transaction is subject to regulatory approvals and closing conditions and is expected to close in the second half of 2021.

Bluegrass Cellular

In October 2020, we entered into a definitive agreement to acquire certain assets of Bluegrass Cellular, a rural wireless operator serving central Kentucky. Bluegrass Cellular provides wireless service to 210,000 customers in 34 counties in rural service areas 3, 4, and 5 in Central Kentucky. The transaction is subject to regulatory approvals and closing conditions and is expected to close in the first quarter of 2021.

Spectrum License Transactions

From time to time, we enter into agreements to buy, sell or exchange spectrum licenses. We believe these spectrum license transactions have allowed us to continue to enhance the reliability of our wireless network while also resulting in a more efficient use of spectrum. See Note 3 to the consolidated financial statements for additional information regarding our spectrum license transactions.

Other

From time to time, we enter into strategic agreements to acquire various other businesses and investments. See Note 3 to the consolidated financial statements for additional information.

In November 2020, Verizon entered into an agreement to sell our Huffington Post business. In connection with this transaction, we recorded a pre-tax loss of \$126 million in Selling, general and administrative expense in our consolidated statement of income for the year ended December 31, 2020. The transaction closed in February 2021.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to various types of market risk in the normal course of business, including the impact of interest rate changes, foreign currency exchange rate fluctuations, changes in investment, equity and commodity prices and changes in corporate tax rates. We employ risk management strategies, which may include the use of a variety of derivatives including cross currency swaps, forward starting interest rate swaps, interest rate swaps, interest rate caps, treasury rate locks and foreign exchange forwards. We do not hold derivatives for trading purposes.

It is our general policy to enter into interest rate, foreign currency and other derivative transactions only to the extent necessary to achieve our desired objectives in optimizing exposure to various market risks. Our objectives include maintaining a mix of fixed and variable rate debt to lower borrowing costs within reasonable risk parameters and to protect against earnings and cash flow

volatility resulting from changes in market conditions. We do not hedge our market risk exposure in a manner that would completely eliminate the effect of changes in interest rates and foreign exchange rates on our earnings.

Counterparties to our derivative contracts are major financial institutions with whom we have negotiated derivatives agreements (ISDA master agreements) and credit support annex (CSA) agreements which provide rules for collateral exchange. The CSA agreements contain rating based thresholds such that we or our counterparties may be required to hold or post collateral based upon changes in outstanding positions as compared to established thresholds and changes in credit ratings. We do not offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments recognized at fair value. At December 31, 2020, we held \$0.2 billion of collateral related to derivative contracts under collateral exchange agreements, which were recorded as Other current liabilities in our consolidated balance sheet. At December 31, 2019, we held an insignificant amount of collateral related to derivative contracts under collateral exchange arrangements, which were recorded as Other current liabilities in our consolidated balance sheet. While we may be exposed to credit losses due to the nonperformance of our counterparties, we consider the risk remote and do not expect that any such nonperformance would result in a significant effect on our results of operations or financial condition due to our diversified pool of counterparties. See Note 9 to the consolidated financial statements for additional information regarding the derivative portfolio.

Interest Rate Risk

We are exposed to changes in interest rates, primarily on our short-term debt and the portion of long-term debt that carries floating interest rates. As of December 31, 2020, approximately 83% of the aggregate principal amount of our total debt portfolio consisted of fixed rate indebtedness, including the effect of interest rate swap agreements designated as hedges. The impact of a 100-basis-point change in interest rates affecting our floating rate debt would result in a change in annual interest expense, including our interest rate swap agreements that are designated as hedges, of approximately \$227 million. The interest rates on our existing long-term debt obligations are unaffected by changes to our credit ratings.

Certain of our floating rate debt and our interest rate derivative transactions utilize interest rates that are linked to LIBOR as the benchmark rate. LIBOR is the subject of recent U.S. and international regulatory guidance and proposals for reform. These reforms and other pressures may cause LIBOR to become unavailable or to perform or be reported differently than in the past. The consequences of these developments cannot be entirely predicted but could include an increase in the cost of our floating rate debt or exposure under our interest rate derivative transactions. We do not anticipate a significant impact to our financial position given our current mix of variable and fixed-rate debt, taking into account the impact of our interest rate hedging.

The table that follows summarizes the fair values of our long-term debt, including current maturities, and interest rate swap derivatives as of December 31, 2020 and 2019. The table also provides a sensitivity analysis of the estimated fair values of these financial instruments assuming 100-basis-point upward and downward shifts in the yield curve. Our sensitivity analysis does not include the fair values of our commercial paper and bank loans, if any, because they are not significantly affected by changes in market interest rates.

(dollars in millions)				
Long-term debt and related derivatives	Fair Value	Fair Value assuming		Fair Value assuming - 100 basis point shift
		+ 100 basis point shift		
At December 31, 2020	\$ 155,695	\$ 142,420	\$	170,423
At December 31, 2019	128,633	119,288		139,980

Interest Rate Swaps

We enter into interest rate swaps to achieve a targeted mix of fixed and variable rate debt. We principally receive fixed rates and pay variable rates that are currently based on LIBOR, resulting in a net increase or decrease to Interest expense. These swaps are designated as fair value hedges and hedge against interest rate risk exposure of designated debt issuances. At December 31, 2020, the fair value of the asset and liability of these contracts were \$787 million and \$303 million, respectively. At December 31, 2019, the fair value of the asset and liability of these contracts were \$568 million and \$173 million, respectively. At December 31, 2020 and 2019, the total notional amount of the interest rate swaps was \$17.8 billion and \$17.0 billion, respectively.

Forward Starting Interest Rate Swaps

We have entered into forward starting interest rate swaps designated as cash flow hedges in order to manage our exposure to interest rate changes on future forecasted transactions. At December 31, 2020 and 2019, the fair value of the liability of these contracts was \$797 million and \$604 million, respectively. At December 31, 2020 and 2019, the total notional amount of the forward starting interest rate swaps was \$2.0 billion and \$3.0 billion, respectively.

Interest Rate Caps

We also have interest rate caps which we use as an economic hedge but for which we have elected not to apply hedge accounting. We enter into interest rate caps to mitigate our interest exposure to interest rate increases on our ABS Financing Facilities and ABS Notes. The fair value of the asset and liability of these contracts was insignificant at both December 31, 2020 and 2019. At

December 31, 2020, there was no outstanding total notional amount for these contracts and, at December 31, 2019, the total notional amount of these contracts was \$679 million.

Treasury Rate Locks

We enter into treasury rate locks to mitigate our interest rate risk. There was no outstanding notional amount for treasury rate locks at December 31, 2020 or 2019.

Foreign Currency Translation

The functional currency for our foreign operations is primarily the local currency. The translation of income statement and balance sheet amounts of our foreign operations into U.S. dollars is recorded as cumulative translation adjustments, which are included in Accumulated other comprehensive income (loss) in our consolidated balance sheets. Gains and losses on foreign currency transactions are recorded in the consolidated statements of income in Other income (expense), net. At December 31, 2020, our primary translation exposure was to the British Pound Sterling, Euro, Australian Dollar, Canadian Dollar and Japanese Yen.

Cross Currency Swaps

We have entered into cross currency swaps designated as cash flow hedges to exchange our British Pound Sterling, Euro, Swiss Franc, Canadian Dollar and Australian Dollar-denominated cash flows into U.S. dollars and to fix our cash payments in U.S. dollars, as well as to mitigate the impact of foreign currency transaction gains or losses. The fair value of the asset of these contracts was \$1.4 billion and \$211 million at December 31, 2020 and 2019, respectively. At December 31, 2020 and 2019, the fair value of the liability of these contracts was \$196 million and \$912 million, respectively. At December 31, 2020 and 2019, the total notional amount of the cross currency swaps was \$26.3 billion and \$23.1 billion, respectively.

Foreign Exchange Forwards

We also have foreign exchange forwards which we use as an economic hedge but for which we have elected not to apply hedge accounting. We enter into British Pound Sterling and Euro foreign exchange forwards to mitigate our foreign exchange rate risk related to non-functional currency denominated monetary assets and liabilities of international subsidiaries, as well as foreign exchange risk related to debt settlements. At both December 31, 2020 and 2019, the fair value of the asset and liability of these contracts was insignificant. At December 31, 2020 and 2019, the total notional amount of the foreign exchange forwards was \$1.4 billion and \$1.1 billion, respectively.

Item 8. Financial Statements and Supplementary Data

Report of Management on Internal Control Over Financial Reporting

We, the management of Verizon Communications Inc., are responsible for establishing and maintaining adequate internal control over financial reporting of the company. Management has evaluated internal control over financial reporting of the company using the criteria for effective internal control established in Internal Control–Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013.

Management has assessed the effectiveness of the company’s internal control over financial reporting as of December 31, 2020. Based on this assessment, we believe that the internal control over financial reporting of the company is effective as of December 31, 2020. In connection with this assessment, there were no material weaknesses in the company’s internal control over financial reporting identified by management. The company’s financial statements included in this Annual Report have been audited by Ernst & Young LLP, independent registered public accounting firm. Ernst & Young LLP has also provided an attestation report on the company’s internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Verizon Communications Inc.:

Opinion on Internal Control Over Financial Reporting

We have audited Verizon Communications Inc. and subsidiaries' (Verizon) internal control over financial reporting as of December 31, 2020, based on criteria established in Internal Control–Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Verizon maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of Verizon as of December 31, 2020 and 2019, the related consolidated statements of income, comprehensive income, cash flows, and changes in equity for each of the three years in the period ended December 31, 2020, and the related notes and financial statement schedule listed in the Index at Item 15(a) and our report dated February 25, 2021 expressed an unqualified opinion thereon.

Basis for Opinion

Verizon's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Report of Management on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on Verizon's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to Verizon in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

February 25, 2021

Reporting of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of Verizon Communications Inc.:

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Verizon Communications Inc. and subsidiaries (Verizon) as of December 31, 2020 and 2019, the related consolidated statements of income, comprehensive income, cash flows, and changes in equity for each of the three years in the period ended December 31, 2020, and the related notes and the financial statement schedule listed in the Index at Item 15(a) (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of Verizon at December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2020, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), Verizon's internal control over financial reporting as of December 31, 2020, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 25, 2021 expressed an unqualified opinion thereon.

Adoption of New Accounting Standard

As discussed in Note 1 to the consolidated financial statements, effective January 1, 2019, Verizon changed its method of accounting for leases due to the adoption of Accounting Standards Update (ASU) No. 2016-02, Leases (Topic 842), and the related amendments, using the modified retrospective method.

Basis for Opinion

These financial statements are the responsibility of Verizon's management. Our responsibility is to express an opinion on Verizon's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to Verizon in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matter

The critical audit matter communicated below is a matter arising from the current period audit of the financial statements that was communicated or required to be communicated to the audit committee and that: (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective or complex judgments. The communication of the critical audit matter does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

[Table of Contents](#)

Description of the Matter

Valuation of Emp

The Company's sponsored pension and other employee benefit plans had a combined liability of \$22.2 billion and a combined net pension liability of \$20.1 billion, including a net pension obligation of \$16.2 billion. As of December 31, 2019, the Company's financial statements used actuarial assumptions to measure employee benefit obligations at the end of the fourth quarter and the actual return on plan assets.

Auditing the employee benefit obligations is the highly judgmental task that requires the auditor to exercise significant professional judgment in the discount rate, health care cost trends and mortality rates. These assumptions are used to measure the benefit obligation.

How We Addressed the Matter in Our Audit

We obtained an understanding of the operating effectiveness of the controls over management's calculation of the data inputs provided to the actuaries.

To test the employee benefit obligations, we included, among other things, significant actuarial assumptions underlying data used in the actuarial assumptions, current economic conditions, employee benefit plan terms, service cost, interest payments, contributions, and other factors involved in an actuarial valuation. Management's measurement of the benefit obligation that reflects the market value of plan assets and is used to measure the net pension liability. As part of this assessment, we reviewed the prior year project and the amount paid to the prior year's actuaries for health care cost trends, mortality rates, and other factors. We evaluated the actuarial assumptions and whether any adjustments were necessary to the accuracy of the data inputs provided to management.

Notes to Consolidated Financial Statements

Verizon Communications Inc. and Subsidiaries

Note 1. Description of Business and Summary of Significant Accounting Policies

Description of Business

Verizon Communications Inc. (Verizon or the Company) is a holding company that, acting through its subsidiaries, is one of the world's leading providers of communications, technology, information and entertainment products and services to consumers, businesses and government entities. With a presence around the world, we offer data, video and voice services and solutions on our networks and platforms that are designed to meet customers' demand for mobility, reliable network connectivity, security and control.

We have two reportable segments that we operate and manage as strategic business units - Verizon Consumer Group (Consumer) and Verizon Business Group (Business).

Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the United States (U.S.) under the Verizon brand and through wholesale and other arrangements. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios. Our Consumer segment's wireless and wireline products and services are available to our retail customers, as well as resellers that purchase wireless network access from us on a wholesale basis.

Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various Internet of Things (IoT) services and products. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world.

Consolidation

The method of accounting applied to investments, whether consolidated or equity, involves an evaluation of all significant terms of the investments that explicitly grant or suggest evidence of control or influence over the operations of the investee. The consolidated financial statements include our controlled subsidiaries, as well as variable interest entities (VIE) where we are deemed to be the primary beneficiary. For controlled subsidiaries that are not wholly-owned, the noncontrolling interests are included in Net income and Total equity. Investments in businesses that we do not control, but have the ability to exercise significant influence over operating and financial policies, are accounted for using the equity method. Equity method investments are included in Investments in unconsolidated businesses in our consolidated balance sheets. All significant intercompany accounts and transactions have been eliminated.

Basis of Presentation

We have reclassified certain prior year amounts to conform to the current year presentation.

Use of Estimates

We prepare our financial statements using U.S. generally accepted accounting principles (GAAP), which requires management to make estimates and assumptions that affect reported amounts and disclosures. These estimates and assumptions take into account historical and forward-looking factors that the Company believes are reasonable, including but not limited to the potential impacts arising from the novel coronavirus (COVID-19) pandemic and public and private sector policies and initiatives aimed at reducing

its transmission. As the extent and duration of the impacts from COVID-19 remain unclear, the Company's estimates and assumptions may evolve as conditions change. Actual results could differ significantly from those estimates.

Examples of significant estimates include the allowance for credit losses, the recoverability of intangible assets, property, plant and equipment, and other long-lived assets, the incremental borrowing rate for the lease liability, fair value measurements, including those related to financial instruments, goodwill, spectrum licenses and intangible assets, unrecognized tax benefits, valuation allowances on tax assets, pension and postretirement benefit obligations, contingencies and the identification and valuation of assets acquired and liabilities assumed in connection with business combinations.

Revenue Recognition

We earn revenue from contracts with customers, primarily through the provision of telecommunications and other services and through the sale of wireless equipment. These services include a variety of communication and connectivity services for our Consumer and Business customers including other carriers that use our facilities to provide services to their customers, as well as professional and integrated managed services for our large enterprises and government customers. We account for these revenues under Accounting Standards Update (ASU) 2014-09, "Revenue from Contracts with Customers" (Topic 606), which we adopted on January 1, 2018, using the modified retrospective approach. This standard update, along with related subsequently issued updates, clarifies the principles for recognizing revenue and develops a common revenue standard for GAAP. The standard update also amended prior guidance for the recognition of costs to obtain and fulfill

[Table of Contents](#)

contracts with customers such that incremental costs of obtaining and direct costs of fulfilling contracts with customers are deferred and amortized consistent with the transfer of the related good or service.

We also earn revenues that are not accounted for under Topic 606 from leasing arrangements (such as those for towers and equipment), captive reinsurance arrangements primarily related to wireless device insurance and the interest on equipment financed under a device payment plan agreement when sold to the customer by an authorized agent.

Nature of Products and Services

Telecommunications

Service

We offer wireless services through a variety of plans on a postpaid or prepaid basis. For wireless service, we recognize revenue using an output method, either as the service allowance units are used or as time elapses, because it reflects the pattern by which we satisfy our performance obligation through the transfer of service to the customer. Monthly service is generally billed in advance, which results in a contract liability. See Note 2 for additional information. For postpaid plans, where monthly usage exceeds the allowance, the overage usage represents options held by the customer for incremental services and the usage-based fee is recognized when the customer exercises the option (typically on a month-to-month basis).

For our contracts related to wireline communication and connectivity services, in general, fixed monthly fees for service are billed one month in advance, which results in a contract liability, and service revenue is recognized over the enforceable contract term as the service is rendered, as the customer simultaneously receives and consumes the benefits of the services through network access and usage. While substantially all of our wireline service revenue contracts are the result of providing access to our networks, revenue from services that are not fixed in amount and, instead, are based on usage are generally billed in arrears and recognized as the usage occurs.

Equipment

We sell wireless devices and accessories under the Verizon brand and other brands. Equipment revenue is generally recognized when the products are delivered to and accepted by the customer, as this is when control passes to the customer. In addition to offering the sale of equipment on a standalone basis, we have two primary offerings through which customers pay for a wireless device, in connection with a service contract: fixed-term plans and device payment plans.

Under a fixed-term plan, the customer is sold the wireless device without any upfront charge or at a discounted price in exchange for entering into a fixed-term service contract (typically for a term of 24 months or less).

Under a device payment plan, the customer is sold the wireless device in exchange for a non-interest-bearing installment note, which is repaid by the customer, typically over a 24-month term, and concurrently enters into a month-to-month contract for wireless service. We may offer certain promotions that provide billing credits applied over a specified term, contingent upon the customer maintaining service. The credits are included in the transaction price, which are allocated to the performance obligations based on their relative selling price and are recognized when earned.

A financing component exists in both our fixed-term plans and device payment plans because the timing of the payment for the device, which occurs over the contract term, differs from the satisfaction of the performance obligation, which occurs at contract inception upon transfer of the device to the customer. We periodically assess, at the contract level, the significance of the financing component inherent in our fixed-term and device payment plan receivable based on qualitative and quantitative considerations related to our customer classes. These considerations include assessing the commercial objective of our plans, the term and duration of financing provided, interest rates prevailing in the marketplace, and credit risks of our customer classes, all of which impact our selection of appropriate discount rates. Based on current facts and circumstances, we determined that the financing component in our existing wireless device payments and fixed-term contracts sold through the direct channel is not significant and therefore is not accounted for separately. See Note 8 for additional information on the interest on equipment financed on a device payment plan agreement when sold to the customer by an authorized agent in our indirect channel.

Wireless Contracts

For our wireless contracts, total contract revenue, which represents the transaction price for wireless service and wireless equipment, is allocated between service and equipment revenue based on their estimated standalone selling prices. We estimate the standalone selling price of the device or accessory to be its retail price excluding subsidies or conditional purchase discounts. We estimate the standalone selling price of wireless service to be the price that we offer to customers on month-to-month contracts that can be cancelled at any time without penalty (i.e., when there is no fixed-term for service) or when service is procured without the concurrent purchase of a wireless device. In addition, we also assess whether the service term is impacted by certain legally enforceable rights and obligations in our contract with customers, such as penalties that a customer would have to pay to early terminate a fixed-term contract or billing credits that would cease if the month-to-month wireless service is canceled. The assessment of these legally enforceable rights and obligations involves judgment and impacts our determination of the transaction price and related disclosures.

From time to time, we may offer certain promotions that provide our customers on device payment plans with the right to upgrade to a new device after paying a specified portion of their device payment plan agreement amount and trading in their device in good working order. We account for this trade-in right as a guarantee obligation. The full amount of the trade-in right's fair value is recognized as a guarantee liability and results in a reduction to the revenue recognized upon the sale of the device. The guarantee liability was insignificant at December 31,

[Table of Contents](#)

2020 and 2019. The total transaction price is reduced by the guarantee, which is accounted for outside the scope of Topic 606, and the remaining transaction price is allocated between the performance obligations within the contract.

Our fixed-term plans generally include the sale of a wireless device at subsidized prices. This results in the creation of a contract asset at the time of sale, which represents the recognition of equipment revenue in excess of amounts billed.

For our device payment plans, billing credits are accounted for as consideration payable to a customer and are included in the determination of total transaction price, resulting in a contract liability.

We may provide a right of return on our products and services for a short time period after a sale. These rights are accounted for as variable consideration when determining the transaction price, and accordingly we recognize revenue based on the estimated amount to which we expect to be entitled after considering expected returns. Returns and credits are estimated at contract inception and updated at the end of each reporting period as additional information becomes available. We also may provide credits or incentives on our products and services for contracts with resellers, which are accounted for as variable consideration when estimating the amount of revenue to recognize.

Wireline Contracts

Total consideration for wireline services that are bundled in a single contract is allocated to each performance obligation based on our standalone selling price for each service. While many contracts include one or more service performance obligations, the revenue recognition pattern is generally not impacted by the allocation since the services are generally satisfied over the same period of time. We estimate the standalone selling price to be the price of the services when sold on a standalone basis without any promotional discount. In addition, we also assess whether the service term is impacted by certain legally enforceable rights and obligations in our contract with customers such as penalties that a customer would have to pay to early terminate a fixed-term contract. The assessment of these legally enforceable rights and obligations involves judgment and impacts our determination of transaction price and related disclosures.

We may provide performance-based credits or incentives on our products and services for contracts with our Business customers, which are accounted for as variable consideration when estimating the transaction price. Credits are estimated at contract inception and are updated at the end of each reporting period as additional information becomes available.

Wireless and Wireline Contracts

For offers that include third-party providers, we evaluate whether we are acting as the principal or as the agent with respect to the goods or services provided to the customer. This principal-versus-agent assessment involves judgment and focuses on whether the facts and circumstances of the arrangement indicate that the goods or services were controlled by us prior to transferring them to the customer. To evaluate if we have control, we consider various factors including whether we are primarily responsible for fulfillment, bear risk of loss and have discretion over pricing.

Other

Advertising revenues are generated through display advertising and search advertising. Display advertising revenue is generated by the display of graphical advertisements and other performance-based advertising. Search advertising revenue is generated when a consumer clicks on a text-based advertisement on the search results page. Our media business, Verizon Media Group (Verizon Media), primarily earns revenue through display advertising on Verizon Media properties, as well as on third-party properties through our advertising platforms, search advertising and subscription arrangements. Revenue for display and search advertising contracts is recognized as ads are delivered, while subscription contracts are recognized over time. We are generally the principal in transactions carried out through our advertising platforms, and therefore report gross revenue based on the amount billed to our customers. The control and transfer of digital advertising inventory occurs in a rapid, real-time environment, where our proprietary technology enables us to identify, enhance, verify and solely control digital advertising inventory that we then sell to our customers. Our control is further supported by us being primarily responsible to our customers for fulfillment and the fact that we can exercise a level of discretion over pricing.

We offer telematics services including smart fleet management and optimization software. Telematics service revenue is generated primarily through subscription contracts. We recognize revenue over time for our subscription contracts.

We report taxes collected from customers on behalf of governmental authorities on revenue-producing transactions on a net basis.

Maintenance and Repairs

We charge the cost of maintenance and repairs, including the cost of replacing minor items not constituting substantial betterments, principally to Cost of services as these costs are incurred.

Advertising Costs

Costs for advertising products and services, as well as other promotional and sponsorship costs, are charged to Selling, general and administrative expense in the periods in which they are incurred. See Note 15 for additional information.

Earnings Per Common Share

Basic earnings per common share are based on the weighted-average number of shares outstanding during the period. Where appropriate, diluted earnings per common share include the dilutive effect of shares issuable under our stock-based compensation plans.

There were a total of approximately 2 million outstanding dilutive securities, primarily consisting of restricted stock units, included in the computation of diluted earnings per common share for the years ended December 31, 2020 and 2019. There were a total of approximately 4 million outstanding dilutive securities, primarily consisting of restricted stock units, included in the computation of diluted earnings per common share for the years ended December 31, 2018.

Cash, Cash Equivalents and Restricted Cash

We consider all highly liquid investments with an original maturity of 90 days or less when purchased to be cash equivalents. Cash equivalents are stated at cost, which approximates quoted market value and includes amounts held in money market funds.

Cash collections on the device payment plan agreement receivables collateralizing asset-backed debt securities are required at certain specified times to be placed into segregated accounts. Deposits to the segregated accounts are considered restricted cash and are included in Prepaid expenses and other and Other assets in our consolidated balance sheets.

Cash, cash equivalents and restricted cash are included in the following line items in the consolidated balance sheets:

				(dollars in millions)
At December 31,	2020	2019	Increase / (Decrease)	
Cash and cash equivalents	\$ 22,171	\$ 2,594	\$ 19,577	
Restricted cash:				
Prepaid expenses and other	1,195	1,221	(26)	
Other assets	132	102	30	
Cash, cash equivalents and restricted cash	\$ 23,498	\$ 3,917	\$ 19,581	

Investments in Debt and Equity Securities

Investments in equity securities that are not accounted for under equity method accounting or result in consolidation are to be measured at fair value. For investments in equity securities without readily determinable fair values, Verizon elects the measurement alternative permitted under GAAP to measure these investments at cost, less any impairment, plus or minus changes resulting from observable price changes in orderly transactions for an identical or similar investment of the same issuer. For investments in debt securities without quoted prices, Verizon uses an alternative matrix pricing method. Investments in equity securities that do not result in consolidation of the investee are included in Investments in unconsolidated businesses and debt securities are included in Other assets in our consolidated balance sheets.

Allowance for Credit Losses

Prior to January 1, 2020, accounts receivable were recorded at cost less an allowance for doubtful accounts. The gross amount of accounts receivable and corresponding allowance for doubtful accounts were presented separately in the consolidated balance sheets. We maintained allowances for uncollectible accounts receivable, including our direct-channel device payment plan agreement receivables, for estimated losses resulting from the failure or inability of our customers to make required payments. Indirect-channel device payment receivables are considered financial instruments and were initially recorded at fair value net of imputed interest, and credit losses were recorded as incurred. However, receivable balances were assessed quarterly for impairment and an allowance was recorded if the receivable was considered impaired. Subsequent to January 1, 2020, accounts receivable are recorded at amortized cost less an allowance for credit losses that are not expected to be recovered. The gross amount of accounts receivable and corresponding allowance for credit losses are presented separately in the consolidated balance

sheets. We maintain allowances for credit losses resulting from the expected failure or inability of our customers to make required payments. We recognize the allowance for credit losses at inception and reassess quarterly based on management's expectation of the asset's collectability. The allowance is based on multiple factors including historical experience with bad debts, the credit quality of the customer base, the aging of such receivables and current macroeconomic conditions, such as the COVID-19 pandemic, as well as management's expectations of conditions in the future, if applicable. Our allowance for credit losses is based on management's assessment of the collectability of assets pooled together with similar risk characteristics.

We pool our device payment plan agreement receivables based on the credit quality indicators and shared risk characteristics of "new customers" and "existing customers." New customers are defined as customers who have been with Verizon for less than 210 days if they are classified as a Consumer segment customer, or less than 12 months if they are classified as a Business segment customer. Existing customers are defined as customers who have been with Verizon for more than 210 days if they are in Consumer, or more than 12 months if they are in Business. We record an allowance to reduce the receivables to the amount that is expected to be collectible. For device payment plan agreement receivables, we record bad debt expense based on a default and loss calculation using our proprietary loss model. The expected loss rate is determined based on customer credit scores and other qualitative factors as noted above. The loss rate is assigned individually on a customer by customer basis and the custom credit scores are then aggregated by vintage and used in our proprietary loss model to calculate the weighted-average loss rate used for determining the allowance balance.

[Table of Contents](#)

We monitor the collectability of our wireless service receivables as one overall pool. Wireline service receivables are disaggregated and pooled by the following customer groups: consumer, small and medium business, global enterprise, public sector and wholesale. For wireless service receivables and wireline consumer and small and medium business receivables, the allowance is calculated based on a 12 month rolling average write-off balance multiplied by the average life-cycle of an account from billing to write-off. The risk of loss is assessed over the contractual life of the receivables and we adjust the historical loss amounts for current and future conditions based on management's qualitative considerations. For global enterprise, public sector and wholesale wireline receivables, the allowance for credit losses is based on historical write-off experience and individual customer credit risk, if applicable. We consider multiple factors in determining the allowance as discussed above.

Inventories

Inventory consists of wireless and wireline equipment held for sale, which is carried at the lower of cost (determined principally on either an average cost or first-in, first-out basis) or net realizable value.

Plant and Depreciation

We record property, plant and equipment at cost. Property, plant and equipment are generally depreciated on a straight-line basis.

Leasehold improvements are amortized over the shorter of the estimated life of the improvement or the remaining term of the related lease, calculated from the time the asset was placed in service.

When depreciable assets are retired or otherwise disposed of, the related cost and accumulated depreciation are deducted from the property, plant and equipment accounts and any gains or losses on disposition are recognized in Selling, general and administrative expense.

We capitalize and depreciate network software purchased or developed within property, plant and equipment assets. We also capitalize interest associated with the acquisition or construction of network-related assets. Capitalized interest is reported as a reduction in interest expense and depreciated as part of the cost of the network-related assets.

In connection with our ongoing review of the estimated useful lives of property, plant and equipment during 2018, we determined that the average useful lives of certain assets would be increased. These changes in estimates were applied prospectively in 2018 and resulted in a decrease to depreciation expense of \$271 million for the year ended December 31, 2018. While the timing and extent of current deployment plans are subject to ongoing analysis and modification, we believe that the current estimates of useful lives are reasonable.

Computer Software and Cloud Computing Costs

We capitalize the cost of internal-use network and non-network software and defer the costs associated with cloud computing arrangements that have a useful life and term in excess of one year. Subsequent additions, modifications or upgrades to internal-use network and non-network software are capitalized only to the extent that they add significant new functionality. Planning, software maintenance and training costs for internal-use software and cloud computing arrangements are expensed in the period in which they are incurred. We capitalize interest associated with the development of internal-use network and non-network software. Capitalized non-network internal-use software costs are amortized using the straight-line method over a period of 5 to 7 years and are included in Other intangible assets, net in our consolidated balance sheets. Costs incurred in implementing a cloud computing arrangement are deferred during the application-development stage and recorded as Prepaid expense and Other in our consolidated balance sheets. Once a project is substantially complete and ready for its intended use, we stop deferring the related cloud computing arrangement costs.

For a discussion of our impairment policy for capitalized software costs, see "Goodwill and Other Intangible Assets" below. Also, see Note 4 for additional information of internal-use non-network software reflected in our consolidated balance sheets. Similar to capitalized software costs, deferred costs associated with cloud computing arrangements are subject to impairment testing.

Goodwill and Other Intangible Assets

Goodwill

Goodwill is the excess of the acquisition cost of businesses over the fair value of the identifiable net assets acquired. Impairment testing for goodwill is performed annually in the fourth quarter or more frequently if impairment indicators are present.

To determine if goodwill is potentially impaired, we have the option to perform a qualitative assessment. However, we may elect to bypass the qualitative assessment and perform a quantitative impairment test even if no indications of a potential impairment exist.

Under the qualitative assessment, we consider several qualitative factors, including the business enterprise value of the reporting unit from the last quantitative test and the excess of fair value over carrying value from this test, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and Earnings before interest, taxes, depreciation and amortization (EBITDA) margin results, projections and recent merger and acquisition activity), the recent and projected financial performance of the reporting unit, as well as other factors.

The quantitative impairment test for goodwill is performed at the reporting unit level and compares the fair value of the reporting unit (calculated using a combination of a market approach and a discounted cash flow method, as a form of the income approach) to its carrying

[Table of Contents](#)

value. Estimated fair values of reporting units are Level 3 measures in the fair value hierarchy, see Fair Value Measurements discussion below for additional information. The market approach includes the use of comparative multiples of guideline companies to corroborate discounted cash flow results. The discounted cash flow method is based on the present value of two components, a projected cash flows and a terminal value. The terminal value represents the expected normalized future cash flows of the reporting unit beyond the cash flows from the discrete projection period. The fair value of the reporting unit is calculated based on the sum of the present value of the cash flows from the discrete period and the present value of the terminal value. The discount rate represents our estimate of the weighted-average cost of capital, or expected return, that a marketplace participant would have required as of the valuation date. If the carrying value exceeds the fair value, an impairment charge is booked for the excess carrying value over fair value, limited to the total amount of goodwill of that reporting unit. During the fourth quarter each year, we update our five-year strategic planning review for each of our reporting units. Those plans consider current economic conditions and trends, estimated future operating results, our view of growth-rates and anticipated future economic and regulatory conditions.

See Note 4 for additional information regarding our goodwill impairment testing.

Intangible Assets Not Subject to Amortization

A significant portion of our intangible assets are wireless licenses that provide our wireless operations with the exclusive right to utilize designated radio frequency spectrum to provide wireless communication services. While licenses are issued for only a fixed time, generally ten years, such licenses are subject to renewal by the Federal Communications Commission (FCC). License renewals have occurred routinely and at nominal cost. Moreover, we have determined that there are currently no legal, regulatory, contractual, competitive, economic or other factors that limit the useful life of our wireless licenses. As a result, we treat the wireless licenses as an indefinite-lived intangible asset. We re-evaluate the useful life determination for wireless licenses each year to determine whether events and circumstances continue to support an indefinite useful life. We aggregate our wireless licenses into one single unit of accounting, as we utilize our wireless licenses on an integrated basis as part of our nationwide wireless network.

We test our wireless licenses for potential impairment annually or more frequently if impairment indicators are present. We have the option to first perform a qualitative assessment to determine whether it is necessary to perform a quantitative impairment test. However, we may elect to bypass the qualitative assessment in any period and proceed directly to performing the quantitative impairment test.

As part of our qualitative assessment, we consider several qualitative factors including the business enterprise value of our combined wireless business, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and EBITDA margin results, projections and recent merger and acquisition activity), the recent and projected financial performance of our combined wireless business, as well as other factors. See Note 4 for additional information regarding our impairment tests.

Our quantitative assessment consists of comparing the estimated fair value of our aggregate wireless licenses to the aggregated carrying amount as of the test date. Using a quantitative assessment, we estimate the fair value of our aggregate wireless licenses using the Greenfield approach. The Greenfield approach is an income based valuation approach that values the wireless licenses by calculating the cash flow generating potential of a hypothetical start-up company that goes into business with no assets except the wireless licenses to be valued. A discounted cash flow analysis is used to estimate what a marketplace participant would be willing to pay to purchase the aggregated wireless licenses as of the valuation date. If the estimated fair value of the aggregated wireless licenses is less than the aggregated carrying amount of the wireless licenses, then an impairment charge is recognized.

Interest expense incurred while qualifying activities are performed to ready wireless licenses for their intended use is capitalized as part of wireless licenses. The capitalization period ends when the development is discontinued or substantially completed and the license is ready for its intended use.

Wireless licenses can be purchased through public auctions conducted by the FCC. Deposits required to participate in these auctions and purchase licenses are recorded within Other assets in our consolidated balance sheets until the corresponding licenses are received and within Net cash used in investing activities in our consolidated statements of cash flows.

Intangible Assets Subject to Amortization and Long-Lived Assets

Our intangible assets that do not have indefinite lives (primarily customer lists and non-network internal-use software) are amortized over their estimated useful lives. All of our intangible assets subject to amortization and other long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If any indications of impairment are present, we would test for recoverability by comparing the carrying amount of the asset group to the net undiscounted cash flows expected to be generated from the asset group. If those net undiscounted cash flows do not exceed the carrying amount, we would perform the next step, which is to determine the fair value of the asset and record an impairment, if any. We re-evaluate the useful life determinations for these intangible assets each year to determine whether events and circumstances warrant a revision to their remaining useful lives.

For information related to the carrying amount of goodwill, wireless licenses and other intangible assets, as well as the major components and average useful lives of our other acquired intangible assets, see Note 4.

[Table of Contents](#)

Leases

We lease network equipment including towers, distributed antenna systems, small cells, real estate, connectivity mediums which include dark fiber, equipment, and other various types of assets for use in our operations under both operating and finance leases. We assess whether an arrangement is a lease or contains a lease at inception. For arrangements considered leases or that contain a lease that is accounted for separately, we determine the classification and initial measurement of the right-of-use asset and lease liability at the lease commencement date, which is the date that the underlying asset becomes available for use.

For both operating and finance leases, we recognize a right-of-use asset, which represents our right to use the underlying asset for the lease term, and a lease liability, which represents the present value of our obligation to make payments arising over the lease term. The present value of the lease payments is calculated using the incremental borrowing rate for operating and finance leases. The incremental borrowing rate is determined using a portfolio approach based on the rate of interest that the Company would have to pay to borrow an amount equal to the lease payments on a collateralized basis over a similar term. Management uses the unsecured borrowing rate and risk-adjusts that rate to approximate a collateralized rate, which is updated on a quarterly basis.

In those circumstances where the Company is the lessee, we account for non-lease components associated with our leases (e.g., common area maintenance costs) and lease components as a single lease component for substantially all of our asset classes. Additionally, in arrangements where we are the lessor, we have customer premise equipment for which we account for non-lease components (e.g., service revenue) and lease components as combined components under the revenue recognition guidance in Topic 606 as the service revenues are the predominant components in the arrangements.

Rent expense for operating leases is recognized on a straight-line basis over the term of the lease and is included in either Cost of services or Selling, general and administrative expense in our consolidated statements of income, based on the use of the facility or equipment on which rent is being paid. Variable rent payments related to both operating and finance leases are expensed in the period incurred. Our variable lease payments consist of payments dependent on various external indicators, including real estate taxes, common area maintenance charges and utility usage.

Operating leases with a term of 12 months or less are not recorded on the balance sheet; we recognize rent expense for these leases on a straight-line basis over the lease term.

We recognize the amortization of the right-of-use asset for our finance leases on a straight-line basis over the shorter of the lease term or the useful life of the right-of-use asset in Depreciation and amortization expense in our consolidated statements of income. The interest expense related to finance leases is recognized using the effective interest method based on the discount rate determined at lease commencement and is included within Interest expense in our consolidated statements of income.

See Note 6 for additional information related to leases, including disclosure required under ASU 2016-02, ASU 2018-01, ASU 2018-10, ASU 2018-11, ASU 2018-20 and ASU 2019-01, Leases (Topic 842).

Fair Value Measurements

Fair value of financial and non-financial assets and liabilities is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The three-tier hierarchy for inputs used in measuring fair value, which prioritizes the inputs used in the methodologies of measuring fair value for assets and liabilities, is as follows:

Level 1 — Quoted prices in active markets for identical assets or liabilities

Level 2 — Observable inputs other than quoted prices in active markets for identical assets and liabilities

Level 3 — Unobservable pricing inputs in the market

Financial assets and financial liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurements. Our assessment of the significance of a particular input to the fair value measurements requires

judgment and may affect the valuation of the assets and liabilities being measured and their categorization within the fair value hierarchy.

Income Taxes

Our effective tax rate is based on pre-tax income, statutory tax rates, tax laws and regulations and tax planning strategies available to us in the various jurisdictions in which we operate.

Deferred income taxes are provided for temporary differences in the basis between financial statement and income tax assets and liabilities. Deferred income taxes are recalculated annually at tax rates in effect for the years in which those tax assets and liabilities are expected to be realized or settled. We record valuation allowances to reduce our deferred tax assets to the amount that is more likely than not to be realized.

We use a two-step approach for recognizing and measuring tax benefits taken or expected to be taken in a tax return. The first step is recognition: we determine whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, we presume that the position will be examined by the appropriate taxing authority that has full knowledge of all relevant information. The second step is measurement: a tax position that meets the more-likely-than-not recognition

[Table of Contents](#)

threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in one or more of the following: an increase in a liability for income taxes payable, a reduction of an income tax refund receivable, a reduction in a deferred tax asset or an increase in a deferred tax liability.

Significant management judgment is required in evaluating our tax positions and in determining our effective tax rate.

Stock-Based Compensation

We measure and recognize compensation expense for all stock-based compensation awards made to employees and directors based on estimated fair values. See Note 10 for additional information.

Foreign Currency Translation and Transactions

The functional currency of our foreign operations is generally the local currency. For these foreign entities, we translate their financial statements into U.S. dollars using average exchange rates for the period for income statement amounts and using end-of-period exchange rates for assets and liabilities. We record these translation adjustments in Accumulated other comprehensive income (loss), a separate component of Equity, in our consolidated balance sheets. We record exchange gains and losses resulting from the conversion of transaction currency to functional currency as a component of Other income (expense), net.

Employee Benefit Plans

Pension and postretirement health care and life insurance benefits earned during the year, as well as interest on projected benefit obligations, are accrued. Prior service costs and credits resulting from changes in plan benefits are generally amortized over the average remaining service period of the employees expected to receive benefits. Expected return on plan assets is determined by applying the return on assets assumption to the actual fair value of plan assets. Actuarial gains and losses are recognized in Other income (expense), net in the year in which they occur. These gains and losses are measured annually as of December 31 or upon a remeasurement event. Verizon management employees no longer earn pension benefits or earn service towards the Company retiree medical subsidy. See Note 11 for additional information.

We recognize a pension or a postretirement plan's funded status as either an asset or liability in the consolidated balance sheets. Also, we measure any unrecognized prior service costs and credits that arise during the period as a component of Accumulated other comprehensive income, net of applicable income tax.

Derivative Instruments

We enter into derivative transactions primarily to manage our exposure to fluctuations in foreign currency exchange rates and interest rates. We employ risk management strategies, which may include the use of a variety of derivatives including cross currency swaps, forward starting interest rate swaps, interest rate swaps, treasury rate locks, interest rate caps and foreign exchange forwards. We do not hold derivatives for trading purposes.

We measure all derivatives at fair value and recognize them as either assets or liabilities in our consolidated balance sheets. Our derivative instruments are valued primarily using models based on readily observable market parameters for all substantial terms of our derivative contracts and thus are classified as Level 2. Changes in the fair values of derivative instruments applied as economic hedges are recognized in earnings in the current period. For fair value hedges, the change in the fair value of the derivative instruments is recognized in earnings, along with the change in the fair value of the hedged item. For cash flow hedges, the change in the fair value of the derivative instruments is reported in Other comprehensive income (loss) and recognized in earnings when the hedged item is recognized in earnings. For net investment hedges of certain of our foreign operations, the change in the fair value of the hedging instruments is reported in Other comprehensive income (loss) as part of the cumulative translation adjustment and partially offsets the impact of foreign currency changes on the value of our net investment.

Cash flows from derivatives, which are designated as accounting hedges or applied as economic hedges, are presented consistently with the cash flow classification of the related hedged items. See Note 9 for additional information.

Variable Interest Entities

VIEs are entities that lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, have equity investors that do not have the ability to make significant decisions relating to the entity's operations through voting rights, do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity. We consolidate the assets and liabilities of VIEs when we are deemed to be the primary beneficiary. The primary beneficiary is the party that has the power to make the decisions that most significantly affect the economic performance of the VIE and has the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE.

Recently Adopted Accounting Standards

The following ASUs were issued by the Financial Accounting Standards Board (FASB), and have been recently adopted by Verizon.

Description	Date of Adoption	Effect on Financial Statements
ASU 2016-13, ASU 2018-19, ASU 2019-04, and ASU 2019-05, Financial Instruments - Credit Losses (Topic 326)		
In June 2016, the FASB issued Topic 326 which requires certain financial assets to be measured at amortized cost net of an allowance for estimated credit losses, such that the net receivable represents the present value of expected cash collection. In addition, this standard update requires that certain financial assets be measured at amortized cost reflecting an allowance for estimated credit losses expected to occur over the life of the assets. The estimate of credit losses must be based on all relevant information including historical information, current conditions, and reasonable and supportable forecasts that affect the collectability of the amounts. An entity applies the update through a cumulative effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective (January 1, 2020). A prospective transition approach is required for debt securities for which an other-than-temporary impairment has been recognized before the effective date. Early adoption of this standard is permitted.	1/1/2020	We adopted Topic 326 beginning on January 1, 2020 using the modified retrospective approach with a cumulative effect adjustment to opening retained earnings recorded at the beginning of the period of adoption. Therefore upon adoption, we recognized and measured estimated credit losses without revising comparative period information or disclosures. We recorded the pre-tax cumulative effect of \$265 million (\$200 million net of tax) as a reduction to the January 1, 2020 opening balance of retained earnings, which was related to the timing of expected credit loss recognition for certain device payment plan receivables based upon reasonable and supportable forecasts of the future economic condition as of January 1, 2020. Additionally, the adoption of the standard impacted the consolidated balance sheet by presenting financial assets measured at amortized cost separate from the allowance for estimated credit losses. There is no significant impact to our operating results upon the adoption of this standard update.
ASU 2020-04, Reference Rate Reform (Topic 848)		
Topic 848 provides temporary optional guidance to ease the potential burden in accounting for reference rate reform. Topic 848 provides optional expedients and exceptions for applying U.S. GAAP to transactions affected by reference rate reform if certain criteria are met.	3/12/2020	Topic 848 was effective for the Company beginning on March 12, 2020, and we will apply the amendments prospectively through December 31, 2022. There was no impact to our consolidated financial statements for the current period as a result of adopting this standard update.

The cumulative after-tax effect of the changes made to our consolidated balance sheet for the adoption of Topic 326 were as follows:

(dollars in millions)	At December 31, 2019	Adjustments due to	
		Topic 326	At January 1, 2020
Allowance for credit losses	\$ —	\$ 919	\$ 919
Allowance for doubtful accounts	733	(733)	—
Other assets	10,141	(79)	10,062
Deferred income taxes	34,703	(65)	34,638
Retained earnings	53,147	(200)	52,947

See Note 8 for additional information related to credit losses, including disclosures required under Topic 326.

Opening Equity Balance Sheet Adjustments from Accounting Standards Adopted in 2019 and 2018

On January 1, 2019, we adopted Topic 842 using the modified retrospective approach. The cumulative after-tax effect of the changes made to our consolidated balance sheet for the adoption of Topic 842 was as follows:

(dollars in millions)	At December 31, 2018	Adjustments due to Topic 842	At January 1, 2019
Retained earnings	\$ 43,542	\$ 410	\$ 43,952
Noncontrolling interests	1,565	1	1,566

On January 1, 2018, we adopted Topic 606, ASU 2018-02, Income Statement-Reporting Comprehensive Income and other ASUs. We adopted Topic 606 using the modified retrospective method. We early adopted ASU 2018-02, which allows a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from Tax Cuts and Jobs Act (TCJA). The

[Table of Contents](#)

cumulative after-tax effect of the changes made to our consolidated balance sheet for the adoption of Topic 606, ASU 2018-02 and other ASUs was as follows:

(dollars in millions)	Adjustments due to				At January 1, 2018
	At December 31, 2017	Topic 606	ASU 2018-02	Other ASUs	
Retained earnings	\$ 35,635	\$ 2,890	\$ (652)	\$ (6)	\$ 37,867
Accumulated other comprehensive income	2,659	—	652	(22)	3,289
Noncontrolling interests	1,591	44	—	—	1,635

Note 2. Revenue and Contract Costs

We earn revenue from contracts with customers, primarily through the provision of telecommunications and other services and through the sale of wireless equipment.

Revenue by Category

We have two reportable segments that we operate and manage as strategic business units, Consumer and Business. Revenue is disaggregated by products and services within Consumer, and customer groups (Small and Medium Business, Global Enterprise, Public Sector and Other, and Wholesale) within Business. See Note 13 for additional information on revenue by segment.

Corporate and other includes the results of our media business, Verizon Media, and other businesses. Verizon Media generated revenues from contracts with customers under Topic 606 of approximately \$7.0 billion, \$7.5 billion and \$7.7 billion for the years ended December 31, 2020, 2019 and 2018, respectively.

We also earn revenues that are not accounted for under Topic 606 from leasing arrangements (such as those for towers and equipment), captive reinsurance arrangements primarily related to wireless device insurance and the interest on equipment financed under a device payment plan agreement when sold to the customer by an authorized agent. As allowed by the practical expedient within Topic 842, we have elected to combine the lease and non-lease components for those arrangements of customer premise equipment where we are the lessor as components accounted for under Topic 606. Revenues from arrangements that were not accounted for under Topic 606 were approximately \$3.0 billion, \$3.1 billion and \$4.5 billion for the years ended December 31, 2020, 2019 and 2018, respectively.

Remaining Performance Obligations

When allocating the total contract transaction price to identified performance obligations, a portion of the total transaction price may relate to service performance obligations which were not satisfied or are partially satisfied as of the end of the reporting period. Below we disclose information relating to these unsatisfied performance obligations. We apply the practical expedient available under Topic 606 that provides the option to exclude the expected revenues arising from unsatisfied performance obligations related to contracts that have an original expected duration of one year or less. This situation primarily arises with respect to certain month-to-month service contracts. At December 31, 2020, month-to-month service contracts represented approximately 90% of our wireless postpaid contracts and 75% of our wireline Consumer and Small and Medium Business contracts, compared to December 31, 2019, for which month-to-month service contracts represented approximately 88% of our wireless postpaid contracts and 61% of our wireline Consumer and Small and Medium Business contracts.

Additionally, certain contracts provide customers the option to purchase additional services. The fees related to these additional services are recognized when the customer exercises the option (typically on a month-to-month basis).

Contracts for wireless services are generally either month-to-month and cancellable at any time (typically under a device payment plan) or contain terms ranging from greater than one month to up to two years (typically under a fixed-term plan). Additionally, customers may incur charges based on usage or additional optional services purchased in conjunction with entering into a contract

that can be cancelled at any time and therefore are not included in the transaction price. The transaction price allocated to service performance obligations, which are not satisfied or are partially satisfied as of the end of the reporting period, are generally related to contracts that are not accounted for as month-to-month contracts.

Our Consumer group customers also include traditional wholesale resellers that purchase and resell wireless service under their own brands to their respective customers. Reseller arrangements generally include a stated contract term, which typically extends longer than two years and, in some cases, include a periodic minimum revenue commitment over the contract term for which revenues will be recognized in future periods.

Consumer customer contracts for wireline services are generally month-to-month; however, they may have a service term of two years or shorter than twelve months. Certain contracts with Business customers for wireline services extend into future periods, contain fixed monthly fees and usage-based fees, and can include annual commitments in each year of the contract or commitments over the entire specified contract term; however, a significant number of contracts for wireline services with our Business customers have a contract term that is twelve months or less.

[Table of Contents](#)

Additionally, there are certain contracts with Business customers for wireline and telematics services and certain Verizon Media contracts with customers that have a contractual minimum fee over the total contract term. We cannot predict the time period when revenue will be recognized related to those contracts; thus, they are excluded from the time bands below. These contracts have varying terms spanning over approximately five years ending in July 2026 and have aggregate contract minimum payments totaling \$2.6 billion.

At December 31, 2020, the transaction price related to unsatisfied performance obligations for total Verizon that is expected to be recognized for 2021, 2022 and thereafter was \$17.4 billion, \$6.9 billion and \$1.5 billion, respectively. Remaining performance obligation estimates are subject to change and are affected by several factors, including terminations and changes in the timing and scope of contracts, arising from contract modifications.

Accounts Receivable and Contract Balances

The timing of revenue recognition may differ from the time of billing to our customers. Receivables presented in our consolidated balance sheets represent an unconditional right to consideration. Contract balances represent amounts from an arrangement when either Verizon has performed, by transferring goods or services to the customer in advance of receiving all or partial consideration for such goods and services from the customer, or the customer has made payment to Verizon in advance of obtaining control of the goods and/or services promised to the customer in the contract.

The following table presents information about receivables from contracts with customers:

	At December 31, 2020 ⁽¹⁾	At December 31, 2019	At January 1, 2019
(dollars in millions)			
Receivables ⁽²⁾	\$ 12,029	\$ 12,078	\$ 12,104
Device payment plan agreement receivables ⁽³⁾	10,358	11,741	8,940

⁽¹⁾ Balances reflected are subsequent to the adoption of Topic 326 on January 1, 2020.

⁽²⁾ Balances do not include receivables related to the following contracts: leasing arrangements (such as those for towers and equipment), captive reinsurance arrangements primarily related to wireless device insurance and the interest on equipment financed under a device payment plan agreement when sold to the customer by an authorized agent.

⁽³⁾ Included in device payment plan agreement receivables presented in Note 8. Balances do not include receivables related to contracts completed prior to January 1, 2018 and receivables derived from the sale of equipment on a device payment plan through an authorized agent.

The following table presents information about contract balances:

	At December 31, 2020	At December 31, 2019	At January 1, 2019
(dollars in millions)			
Contract asset	\$ 937	\$ 1,150	\$ 1,003
Contract liability	5,598	5,307	4,943

Contract assets primarily relate to our rights to consideration for goods or services provided to customers but for which we do not have an unconditional right at the reporting date. Under a fixed-term plan, total contract revenue is allocated between wireless service and equipment revenues. In conjunction with these arrangements, a contract asset is created, which represents the difference between the amount of equipment revenue recognized upon sale and the amount of consideration received from the customer when the performance obligation related to the transfer of control of the equipment is satisfied. The contract asset is reclassified to accounts receivable as wireless services are provided and billed. We have the right to bill the customer as service is provided over time, which results in our right to the payment being unconditional. The contract asset balances are presented in our consolidated balance sheets as Prepaid expenses and other and Other assets. We recognize the allowance for credit losses at inception and reassess quarterly based on management's expectation of the asset's collectability.

Contract assets decreased \$213 million during the year ended December 31, 2020. The change in the contract asset balance was primarily due to reclassifications to accounts receivable due to billings on existing contracts and impairment charges of \$75 million, partially offset by new contracts driven by customer activity related to wireless. Contract assets increased \$147 million during the year ended December 31, 2019. The change in the contract asset balance was primarily due to new contracts and increases in sales promotions recognized upfront, driven by customer activity related to wireless and Fios services, partially offset by reclassifications to accounts receivable due to billings on existing contracts and impairment charges of \$113 million.

Contract liabilities arise when we bill our customers and receive consideration in advance of providing the goods or services promised in the contract. We typically bill service one month in advance, which is the primary component of the contract liability balance. Contract liabilities are recognized as revenue when services are provided to the customer. The contract liability balances are presented in our consolidated balance sheets as Other current liabilities and Other liabilities.

Contract liabilities increased \$291 million during the year ended December 31, 2020. The change in contract liabilities was primarily due to increases in sales promotions recognized over time and upfront fees, as well as increases in deferred revenue related to advanced billings, partially offset by the satisfaction of performance obligations related to wireless and Fios services. Contract liabilities increased \$364 million during the year ended December 31, 2019. The change in contract liabilities was primarily due to increases in sales promotions recognized

[Table of Contents](#)

over time and upfront fees, as well as increases in deferred revenue related to advanced billings, partially offset by the satisfaction of performance obligations related to wireless and Fios services.

Revenue recognized during the years ended December 31, 2020 and 2019 related to contract liabilities existing at January 1, 2020 and 2019 were \$4.3 billion and \$4.2 billion, respectively, as performance obligations related to services were satisfied.

The balance of contract assets and contract liabilities recorded in our consolidated balance sheets were as follows:

(dollars in millions)	At December 31, 2020	At December 31, 2019
Assets		
Prepaid expenses and other	\$ 733	\$ 848
Other assets	204	302
Total	\$ 937	\$ 1,150
Liabilities		
Other current liabilities	\$ 4,843	\$ 4,651
Other liabilities	755	656
Total	\$ 5,598	\$ 5,307

Contract Costs

As discussed in Note 1, Topic 606 requires the recognition of an asset for incremental costs to obtain a customer contract, which are then amortized to expense over the respective periods of expected benefit. We recognize an asset for incremental commission expenses paid to internal and external sales personnel and agents in conjunction with obtaining customer contracts. We only defer these costs when we have determined the commissions are incremental costs that would not have been incurred absent the customer contract and are expected to be recoverable. Costs to obtain a contract are amortized and recorded ratably as commission expense over the period representing the transfer of goods or services to which the assets relate. Costs to obtain wireless contracts are amortized over both of our Consumer and Business customers' estimated device upgrade cycles, as such costs are typically incurred each time a customer upgrades. Costs to obtain wireline contracts are amortized as expense over the estimated customer relationship period for our Consumer customers. Incremental costs to obtain wireline contracts for our Business customers are insignificant. Costs to obtain contracts are recorded in Selling, general and administrative expense.

We also defer costs incurred to fulfill contracts that: (1) relate directly to the contract; (2) are expected to generate resources that will be used to satisfy our performance obligation under the contract; and (3) are expected to be recovered through revenue generated under the contract. Contract fulfillment costs are expensed as we satisfy our performance obligations and recorded in Cost of services. These costs principally relate to direct costs that enhance our wireline business resources, such as costs incurred to install circuits.

We determine the amortization periods for our costs incurred to obtain or fulfill a customer contract at a portfolio level due to the similarities within these customer contract portfolios.

Other costs, such as general costs or costs related to past performance obligations, are expensed as incurred.

Collectively, costs to obtain a contract and costs to fulfill a contract are referred to as deferred contract costs, and amortized over a two-to five-year period. Deferred contract costs are classified as current or non-current within Prepaid expenses and other and Other assets, respectively.

The balances of deferred contract costs included in our consolidated balance sheets were as follows:

(dollars in millions)	At December 31, 2020	At December 31, 2019
Assets		
Prepaid expenses and other	\$ 2,472	\$ 2,578
Other assets	2,070	1,911
Total	\$ 4,542	\$ 4,489

For the years ended December 31, 2020 and 2019, we recognized expense of \$3.1 billion and \$2.7 billion, respectively, associated with the amortization of deferred contract costs, primarily within Selling, general and administrative expense in our consolidated statements of income.

We assess our deferred contract costs for impairment on a quarterly basis. We recognize an impairment charge to the extent the carrying amount of a deferred cost exceeds the remaining amount of consideration we expect to receive in exchange for the goods and services related to the cost, less the expected costs related directly to providing those goods and services that have not yet been recognized as expenses. There have been no impairment charges recognized for the years ended December 31, 2020 and 2019.

Note 3. Acquisitions and Divestitures

Spectrum License Transactions

During 2019, the FCC completed two millimeter wave spectrum license auctions, Auction 101 and Auction 102. Verizon participated in these auctions and was the high bidder on 9 and 1,066 licenses, respectively, in the 24 Gigahertz (GHz) and 28 GHz bands. We submitted an application to the FCC and paid cash of approximately \$521 million for the licenses. We received the licenses during the fourth quarter of 2019.

In March 2020, the FCC's incentive auction, Auction 103, for spectrum licenses in the upper 37 GHz, 39 GHz, and 47 GHz bands concluded. Verizon participated in this incentive auction and was the high bidder on 4,940 licenses, which primarily consisted of 37 GHz and, to a lesser extent, 39 GHz spectrum. As an incumbent licensee, our 39 GHz licenses provided us with incentive payments that were applied towards the purchase price of spectrum in the auction. The value of the licenses won by Verizon amounted to \$3.4 billion, of which \$1.8 billion was settled with the relinquished 39 GHz licenses. The remaining balance was settled in cash of \$1.6 billion, of which \$101 million was paid in December 2019. In connection with the incentive auction, a pre-tax net loss of \$1.2 billion (\$914 million after-tax) was recorded in Selling, general and administrative expense in the consolidated statement of income during 2020 because the exchange of the previously held licenses for new licenses had commercial substance. See Note 4 for additional information. The new reconfigured licenses were received in the second quarter 2020 and are included in Wireless licenses in our consolidated balance sheet. The average remaining renewal period for these acquired licenses was 9.9 years.

The fair value of the licenses represents a Level 2 measurement as defined in Accounting Standards Codification 820, Fair Value Measurements and Disclosures, and was determined based on the final auction price for each defined geographical area.

In September 2020, the FCC completed Auction 105 for Priority Access Licenses. Verizon participated in the auction and was the high bidder on 557 licenses in the 3.5 GHz band. We submitted an application to the FCC and paid a cash deposit of approximately \$1.9 billion for the licenses. Deposits required to participate in these auctions and purchase licenses are recorded within Other assets in our consolidated balance sheet until the corresponding licenses are received, and within Net cash used in investing activities in our consolidated statements of cash flows. The timing of when the licenses will be issued will be determined by the FCC after all payments have been made.

In September 2020, Cellco Partnership (Cellco), a wholly-owned subsidiary of Verizon, filed an application to participate in FCC Auction 107, which relates to mid-band wireless spectrum known as C-Band. The auction commenced on December 8, 2020. On February 24, 2021, the FCC issued a final notice announcing the conclusion and results of the auction. In its final notice, the FCC announced that Cellco was the winning bidder with respect to approximately \$45.5 billion of licenses. Down payments, in the amount of 20% of the cost of the spectrum licenses less the amount of the upfront payment made by bidders in October 2020, with respect to the auction are due on March 10, 2021, and final payments in the amount of 80% of the cost of the spectrum licenses are due on March 24, 2021. In accordance with the rules applicable to the auction, licensees also must pay their allocable shares of an estimated \$13.1 billion in associated clearing and incentive costs at the times contemplated by the auction rules.

During 2020 and 2019, we entered into and completed various other wireless license acquisitions for cash consideration of \$360 million and an insignificant amount, respectively. During 2018, we entered into and completed various wireless license transactions, including the purchase of Straight Path Communications Inc. (Straight Path) and NextLink Wireless LLC (NextLink).

Straight Path

In May 2017, we entered into a purchase agreement to acquire Straight Path, a holder of millimeter wave spectrum configured for fifth-generation (5G) wireless services, for total consideration reflecting an enterprise value of approximately \$3.1 billion. Under the terms of the purchase agreement, we agreed to pay: (1) Straight Path shareholders \$184.00 per share, payable in Verizon shares; and (2) certain transaction costs payable in cash of approximately \$736 million, consisting primarily of a fee to be paid to

the FCC. The transaction closed in February 2018 at which time we issued approximately 49 million shares of Verizon common stock, valued at approximately \$2.4 billion, and paid the associated cash consideration.

The acquisition of Straight Path was accounted for as an asset acquisition, as substantially all of the value related to the acquired spectrum. Upon closing, we recorded approximately \$4.5 billion of wireless licenses and \$1.4 billion of a deferred tax liability. The spectrum acquired as part of the transaction is being used for our 5G technology deployment.

Blue Jeans Network, Inc.

In April 2020, we entered into a definitive purchase agreement to acquire Blue Jeans Network, Inc. (BlueJeans), an enterprise-grade video conferencing and event platform, whose services are sold to Business customers globally. The transaction closed in May 2020. The aggregate cash consideration paid by Verizon at the closing of the transaction was approximately \$397 million, net of cash acquired.

The financial results of BlueJeans are included in the consolidated results of Verizon from the date of acquisition. Revenue related to BlueJeans was approximately \$73 million for the year ended December 31, 2020.

[Table of Contents](#)

The acquisition of BlueJeans was accounted for as a business combination. We are currently assessing the identification and measurement of the assets acquired and liabilities assumed based on their fair values as of the close of the acquisition, subject to customary closing adjustments. Preliminarily, we recorded approximately \$253 million of goodwill and \$190 million of other intangible assets, which primarily consisted of customer lists and internally developed technology. Goodwill is calculated as the difference between the acquisition date fair value of the consideration transferred and the fair value of the net assets acquired. The goodwill represents future economic benefits that we expect to achieve as a result of the acquisition. The goodwill related to this acquisition is included within Business.

TracFone Wireless, Inc.

In September 2020, we entered into a purchase agreement (Tracfone Purchase Agreement) with América Móvil to acquire TracFone Wireless, Inc. (Tracfone), a provider of prepaid and value mobile services in the U.S. Under the terms of the Tracfone Purchase Agreement, we will acquire all of the stock of Tracfone for approximately \$3.1 billion in cash and \$3.1 billion in Verizon common stock, subject to customary adjustments, at closing. The number of shares issued will be based on an average trading price determined as of the closing date and is subject to a minimum number of shares issuable of 47,124,445 and a maximum number of shares issuable of 57,596,544. The Tracfone Purchase Agreement also includes up to an additional \$650 million in future cash consideration related to the achievement of certain performance measures and other commercial arrangements. The transaction is subject to regulatory approvals and closing conditions and is expected to close in the second half of 2021.

Bluegrass Cellular

In October 2020, we entered into a definitive agreement to acquire certain assets of Bluegrass Cellular, a rural wireless operator serving central Kentucky. Bluegrass Cellular provides wireless service to 210,000 customers in 34 counties in rural service areas 3, 4, and 5 in Central Kentucky. The transaction is subject to regulatory approvals and closing conditions and is expected to close in the first quarter of 2021.

Other

In July 2019, Verizon completed a sale-leaseback transaction for buildings and real estate. See Note 6 for additional information related to the transaction. In connection with this transaction and other insignificant transactions, we recorded a pre-tax net gain from dispositions of assets and businesses of \$261 million in Selling, general and administrative expense in our consolidated statement of income for the year ended December 31, 2019.

During 2020, we completed various other acquisitions for approximately \$127 million in cash consideration. During 2019 and 2018, we completed various other acquisitions for an insignificant amount of cash consideration.

In November 2020, Verizon entered into an agreement to sell our Huffington Post business. In connection with this transaction, we recorded a pre-tax loss of \$126 million in Selling, general and administrative expense in our consolidated statement of income for the year ended December 31, 2020. The transaction closed in February 2021.

Note 4. Wireless Licenses, Goodwill and Other Intangible Assets

Wireless Licenses

The carrying amounts of Wireless licenses are as follows:

	(dollars in millions)	
At December 31,	2020	2019
Wireless licenses	\$ 96,097	\$ 95,059

At December 31, 2020 and 2019, approximately \$6.4 billion and \$6.2 billion, respectively, of wireless licenses were under development for commercial service for which we were capitalizing interest costs. We recorded approximately \$242 million and \$321 million of capitalized interest on wireless licenses for the years ended December 31, 2020 and 2019, respectively.

In the first quarter of 2020, we reclassified substantially all of our 39 GHz wireless licenses, including capitalized interest, with a carrying value of \$2.8 billion to assets held for sale in connection with the FCC's incentive auction, Auction 103. As a result, these wireless licenses were adjusted down to their fair value of \$1.6 billion resulting in a pre-tax loss of \$1.2 billion (\$914 million after-tax) in 2020. The new reconfigured licenses were received in the second quarter 2020 and had a value of \$3.4 billion. See Note 3 for additional information regarding spectrum license transactions in 2020 and 2019.

During 2020, we renewed various wireless licenses in accordance with FCC regulations. The average renewal period for these licenses was 10 years. See Note 1 for additional information.

As discussed in Note 1, we test our wireless licenses for potential impairment annually or more frequently if impairment indicators are present. In 2020 and 2019, we performed a qualitative assessment to determine whether it was more likely than not that the fair value of our wireless licenses was less than the carrying amount. In 2018, our quantitative impairment test consisted of comparing the estimated fair value of our aggregate wireless licenses estimated using the Greenfield approach to the aggregated carrying amount of the licenses as of the test

[Table of Contents](#)

date. Our annual assessments in 2020, 2019 and 2018 indicated that the fair value of our wireless licenses exceeded the carrying value and, therefore, did not result in impairment.

Our strategy requires significant capital investments primarily to acquire wireless spectrum, put the spectrum into service, provide additional capacity for growth in our networks, invest in the fiber that supports our businesses, evolve and maintain our networks and develop and maintain significant advanced information technology systems and data system capabilities.

Goodwill

The Company transitioned into our new reporting structure as of April 1, 2019, which resulted in certain changes to our operating segments and reporting units. Upon the date of reorganization, the goodwill of our historical Wireless reporting unit, historical Wireline reporting unit and historical Verizon Connect reporting unit were reallocated to our new Consumer and Business reporting units using a relative fair value approach.

Changes in the carrying amount of Goodwill are as follows:

	(dollars in millions)					
	Consumer	Business	Wireless	Wireline	Other ⁽¹⁾	Total
Balance at January 1, 2019	\$ —	\$ —	\$ 18,397	\$ 3,871	\$ 2,346	\$ 24,614
Acquisitions	—	—	—	20	—	20
Reclassifications, adjustments and other	—	—	—	1	—	1
Balance at March 31, 2019	—	—	18,397	3,892	2,346	24,635
Reporting Unit reallocation ⁽²⁾	17,104	7,269	(18,397)	(3,892)	(2,084)	—
Balance at April 1, 2019	17,104	7,269	—	—	262	24,635
Acquisitions	—	2	—	—	—	2
Media goodwill impairment	—	—	—	—	(186)	(186)
Reclassifications, adjustments and other	—	(2)	—	—	(60)	(62)
Balance at December 31, 2019	17,104	7,269	—	—	16	24,389
Acquisitions ⁽³⁾	118	254	—	—	—	372
Reclassifications, adjustments and other	—	12	—	—	—	12
Balance at December 31, 2020	\$ 17,222	\$ 7,535	\$ —	\$ —	\$ 16	\$ 24,773

⁽¹⁾ Other Goodwill is net of accumulated impairment charges of \$4.8 billion at December 31, 2019 and December 31, 2020, related to our Media reporting unit.

⁽²⁾ Represents the reallocation of goodwill as a result of the Company reorganizing its segments.

⁽³⁾ Changes in goodwill due to acquisitions is related to BlueJeans and an other insignificant transaction. See Note 3 for additional information.

We performed qualitative impairment assessments for our Consumer and Business reporting units during the fourth quarter of 2020 and 2019. Our qualitative assessments indicated that it was more likely than not that the fair values for our Consumer and Business reporting units exceeded their respective carrying values and, therefore, did not result in an impairment.

We performed impairment assessments of the reporting units impacted by the strategic reorganization, specifically our historical Wireless, historical Wireline and historical Connect reporting units on March 31, 2019, immediately before our strategic reorganization became effective. Our impairment assessments indicated that the fair value for each of our historical Wireless, historical Wireline and historical Connect reporting units exceeded their respective carrying values, and therefore did not result in a goodwill impairment. We then performed quantitative assessments of our Consumer and Business reporting units on April 1, 2019, immediately following our strategic reorganization. Our impairment assessments indicated that the fair value for each of our Consumer and Business reporting units exceeded their respective carrying values and therefore, did not result in a goodwill

impairment. Our Media reporting unit was not impacted by the strategic reorganization and there was no indicator of impairment as of the reorganization date.

We performed quantitative impairment assessments for our Media reporting unit in 2019 and 2018. For details on our Media reporting unit, refer to the discussion below.

Our Media business, Verizon Media, experienced increased competitive and market pressures throughout 2018 that resulted in lower than expected revenues and earnings. These pressures were expected to continue and have resulted in a loss of market positioning to our competitors in the digital advertising business. Our Media business also achieved lower than expected benefits from the integration of the Yahoo and AOL businesses.

In connection with Verizon's annual budget process during the fourth quarter of 2019 and 2018, the leadership at both Verizon Media and Verizon completed a comprehensive five-year strategic planning review of Verizon Media's business prospects resulting in unfavorable adjustments to Verizon Media's financial projections. These revised projections were used as a key input into Verizon Media's annual goodwill impairment tests performed in the fourth quarter of 2019 and 2018.

During the fourth quarter of 2019 and 2018, consistent with our accounting policy, we applied a combination of a market approach and a discounted cash flow method reflecting current assumptions and inputs, including our revised projections, discount rate and expected growth

[Table of Contents](#)

rates, which resulted in the determination that the fair value of the Media reporting unit was less than its carrying amount. As a result, we recorded a non-cash goodwill impairment charge of approximately \$186 million (\$176 million after-tax) in the fourth quarter of 2019 and a charge of \$4.6 billion (\$4.5 billion after-tax) in the fourth quarter of 2018 in our consolidated statement of income. The goodwill balance of the Media reporting unit has been fully written off as a result of these impairment charges.

We performed a quantitative impairment assessment for all of the other reporting units in 2018. Our impairment tests indicated that the fair value for each of our historical Wireless, historical Wireline and historical Connect reporting units exceeded their respective carrying value and, therefore, did not result in an impairment.

Other Intangible Assets

The following table displays the composition of Other intangible assets, net as well as the respective amortization period:

	(dollars in millions)					
	2020			2019		
At December 31,	Gross Amount	Accumulated Amortization	Net Amount	Gross Amount	Accumulated Amortization	Net Amount
Customer lists (8 to 13 years)	\$ 4,021	\$ (1,961)	\$ 2,060	\$ 3,896	\$ (1,511)	\$ 2,385
Non-network internal-use software (5 to 7 years)	21,685	(15,104)	6,581	20,530	(14,418)	6,112
Other (2 to 25 years)	1,771	(999)	772	1,967	(966)	1,001
Total	\$ 27,477	\$ (18,064)	\$ 9,413	\$ 26,393	\$ (16,895)	\$ 9,498

The amortization expense for Other intangible assets was as follows:

Years	(dollars in millions)
2020	\$ 2,445
2019	2,311
2018	2,217

Estimated annual amortization expense for Other intangible assets is as follows:

Years	(dollars in millions)
2021	\$ 2,337
2022	2,009
2023	1,639
2024	1,210
2025	846

Note 5. Property, Plant and Equipment

The following table displays the details of Property, plant and equipment, which is stated at cost:

		(dollars in millions)	
At December 31,	Lives (years)	2020	2019
Land	-	\$ 608	\$ 594
Buildings and equipment	7 to 45	32,933	31,216
Central office and other network equipment	3 to 50	160,369	152,733
Cable, poles and conduit	7 to 50	56,814	52,658
Leasehold improvements	5 to 20	9,497	9,072
Work in progress	-	8,576	9,234
Furniture, vehicles and other	3 to 20	10,940	10,227
		279,737	265,734
Less accumulated depreciation		184,904	173,819
Property, plant and equipment, net		\$ 94,833	\$ 91,915

Note 6. Leasing Arrangements

We enter into various lease arrangements for network equipment including towers, distributed antenna systems, small cells, real estate and connectivity mediums including dark fiber, equipment, and other various types of assets for use in our operations. Our leases have remaining lease terms ranging from 1 year to 30 years, some of which include options that we can elect to extend the leases term for up to 25 years, and some of which include options to terminate the leases. For the majority of leases entered into during the current period, we have concluded it is not reasonably certain that we would exercise the options to extend the lease or terminate the lease. Therefore, as of the lease

[Table of Contents](#)

commencement date, our lease terms generally do not include these options. We include options to extend the lease when it is reasonably certain that we will exercise that option.

During March 2015, we completed a transaction with American Tower Corporation (American Tower) pursuant to which American Tower acquired the exclusive rights to lease and operate approximately 11,300 of our wireless towers for an upfront payment of \$5.0 billion. We have subleased capacity on the towers from American Tower for a minimum of 10 years at current market rates in 2015, with options to renew. We continue to include the towers in Property, plant and equipment, net in our consolidated balance sheets and depreciate them accordingly. In addition to the rights to lease and operate the towers, American Tower assumed the interest in the underlying ground leases related to these towers. While American Tower can renegotiate the terms of and is responsible for paying the ground leases, we are still the primary obligor for these leases and accordingly, the present value of these ground leases are included in our operating lease right-of-use assets and operating lease liabilities. We do not expect to be required to make ground lease payments unless American Tower defaults, which we determined to be remote.

The components of net lease cost were as follows:

Years Ended December 31,	Classification
Operating lease cost ⁽¹⁾	Cost of services Selling, general and administrative expense
	\$
Finance lease cost:	
Amortization of right-of-use assets	Depreciation and amortization expense
Interest on lease liabilities	Interest expense
Short-term lease cost ⁽¹⁾	Cost of services Selling, general and administrative expense
Variable lease cost ⁽¹⁾	Cost of services Selling, general and administrative expense
Sublease income	Service revenues and other
Total net lease cost	\$
Gain on sale and leaseback transaction, net	Selling, general and administrative expense
	\$

⁽¹⁾ All operating lease costs, including short-term and variable lease costs, are split between Cost of services and Selling, general and administrative expense in the consolidated statements of income based on the use of the facility or equipment that the rent is being paid on. See Note 1 for additional information. Variable lease costs represent payments that are dependent on a rate or index, or on usage of the asset.

Supplemental disclosure for the statements of cash flows related to operating and finance leases were as follows:

		(dollars in millions)	
Years Ended December 31,		2020	2019
Cash Flows from Operating Activities			
Cash paid for amounts included in the measurement of lease liabilities			
Operating cash flows for operating leases	\$	(4,813)	\$ (4,351)
Operating cash flows for finance leases		(39)	(35)
Cash Flows from Financing Activities			
Financing cash flows for finance leases		(394)	(351)
Supplemental lease cash flow disclosures			
Operating lease right-of-use assets obtained in exchange for new operating lease liabilities		3,800	3,511
Right-of-use assets obtained in exchange for new finance lease liabilities		562	511

Supplemental disclosures for the balance sheet related to finance leases were as follows:

		(dollars in millions)	
At December 31,		2020	2019
Assets			
Property, plant and equipment, net	\$	1,127	\$ 939
Liabilities			
Debt maturing within one year	\$	368	\$ 336
Long-term debt		916	780
Total Finance lease liabilities	\$	1,284	\$ 1,116

[Table of Contents](#)

The weighted-average remaining lease term and the weighted-average discount rate of our leases were as follows:

At December 31,	2020	2019
Weighted-average remaining lease term (years)		
Operating Leases	8	9
Finance Leases	4	5
Weighted-average discount rate		
Operating Leases	3.5 %	4.0 %
Finance Leases	2.5 %	3.2 %

The Company's maturity analysis of operating and finance lease liabilities as of December 31, 2020 were as follows:

(dollars in millions)			
Years	Operating Leases		Finance Leases
2021	\$	4,327	\$ 373
2022		3,924	324
2023		3,561	267
2024		3,023	211
2025		2,189	90
Thereafter		7,970	101
Total lease payments		24,994	1,366
Less interest		3,509	82
Present value of lease liabilities		21,485	1,284
Less current obligation		3,485	368
Long-term obligation at December 31, 2020	\$	18,000	\$ 916

As of December 31, 2020, we have contractually obligated lease payments amounting to \$1.6 billion primarily for office facility operating leases and small cell colocation and fiber operating leases that have not yet commenced. We have legally obligated lease payments for various other operating leases that have not yet commenced for which the total obligation was not significant. We have certain rights and obligations for these leases, but have not recognized an operating lease right-of-use asset or an operating lease liability since they have not yet commenced.

Real Estate Transaction

On July 23, 2019, Verizon completed a sale-leaseback transaction for buildings and real estate. We received total gross proceeds of approximately \$1.0 billion. We leased back a portion of the buildings and real estate sold and accounted for it as an operating lease. The term of the leaseback is for two years with four options to renew for an additional three months each. The proceeds received as a result of this transaction have been classified in Other, net within Cash Flows from Investing Activities in our consolidated statement of cash flows for the year ended December 31, 2019. The net gain as a result of this transaction is included in the components of net lease cost table above.

Disclosures Related to Periods Prior to Adoption of Topic 842

Total rent expense under operating leases amounted to \$4.1 billion in 2018.

Note 7. Debt

Outstanding long-term debt obligations as of December 31, 2020 and 2019 are as follows:

(dollars in millions)

At December 31,	Maturities	Interest Rates %	2020	2019
Verizon Communications	< 5 Years	0.85 – 5.51	\$ 17,936	\$ 19,885
	5-10 Years	1.38 – 7.75	35,423	30,038
	> 10 Years	1.75 – 8.95	65,019	47,777
	< 5 Years	Floating ⁽¹⁾	2,917	2,210
	5-10 Years	Floating ⁽¹⁾	941	1,789
Alltel Corporation	5-10 Years	6.80	38	38
	> 10 Years	7.88	58	58
Operating telephone company subsidiaries—debentures	< 5 Years	7.88 – 8.00	141	141
	5-10 Years	6.00 – 8.38	317	286
	> 10 Years	5.13 – 8.75	308	339
GTE LLC	< 5 Years	8.75	141	141
	5-10 Years	6.94	250	250
Other subsidiaries—asset-backed debt	< 5 Years	0.41 – 3.56	9,414	8,116
	< 5 Years	Floating ⁽¹⁾	1,216	4,277
Finance lease obligations (average rate of 2.5% and 3.2% in 2020 and 2019, respectively)			1,284	1,116
Unamortized discount, net of premium			(6,057)	(4,480)
Unamortized debt issuance costs			(604)	(492)
Total long-term debt, including current maturities			128,742	111,489
Less long-term debt maturing within one year			5,569	10,777
Total long-term debt			\$ 123,173	\$ 100,712
Total long-term debt, including current maturities			\$ 128,742	\$ 111,489
Plus short-term notes payable			320	—
Total debt			\$ 129,062	\$ 111,489

⁽¹⁾ The debt obligations bore interest at a floating rate based on the London Interbank Offered Rate (LIBOR) plus an applicable interest margin per annum.

Maturities of long-term debt (secured and unsecured) outstanding, including current maturities, excluding unamortized debt issuance costs, at December 31, 2020 are as follows:

Years	(dollars in millions)
2021	\$ 5,227
2022	8,645
2023	7,511
2024	4,286
2025	8,528
Thereafter	93,865

During 2020, we received \$31.5 billion of proceeds from long-term borrowings, which included \$5.6 billion of proceeds from asset-backed debt transactions. The net proceeds are a result of the liquidity strategy that we pursued at the beginning of the COVID-19 pandemic to maintain a higher cash balance in order to further protect the Company against the economic uncertainties associated with the COVID-19 pandemic and to opportunistically raise cash to finance future obligations at a time when we believed that market conditions were favorable. We used \$17.2 billion of cash to repay, redeem and repurchase long-term borrowings and finance lease obligations, including \$7.4 billion to prepay and repay asset-backed, long-term borrowings. The net proceeds from the green bond issued in 2020 are expected to be used to fund certain renewable energy projects.

During 2019, we received \$18.7 billion of proceeds from long-term borrowings, which included \$8.6 billion of proceeds from asset-backed debt transactions. The net proceeds were used for general corporate purposes including the repayment of debt and the funding of certain eligible green projects. We used \$23.9 billion of cash to repay, redeem and repurchase long-term borrowings and finance lease obligations, including \$6.3 billion to prepay and repay asset-backed, long-term borrowings.

2020 Significant Debt Transactions

Debt or equity financing may be needed to fund additional investments or development activities, including, for example, to complete our acquisition of Tracfone or to acquire additional wireless spectrum, or to maintain an appropriate capital structure to ensure our financial flexibility.

The following tables show the significant transactions involving the senior unsecured debt securities of Verizon and its subsidiaries that occurred during the year ended December 31, 2020.

Exchange Offers

(dollars in millions)	Principal Amount Exchanged	Principal Amount Issued
Verizon 2.450% - 5.150% notes and floating rate notes, due 2021 - 2024	\$ 1,047	\$ —
Verizon 1.680% notes due 2030 ⁽¹⁾	—	1,147
Verizon 5.012% - 6.550% notes, due 2037 - 2049	3,666	—
Verizon 2.987% notes due 2056 ⁽¹⁾	—	4,500
Total ⁽²⁾	\$ 4,713	\$ 5,647

⁽¹⁾ The principal amount issued in exchange does not include either an insignificant amount of cash paid in lieu of the issuance of fractional new notes or accrued and unpaid interest paid on the old notes accepted for exchange to the date of exchange.

⁽²⁾ The debt exchange offers above meet the criteria to be accounted for as a modification of debt. As a result, the excess of new notes issued over the notes exchanged of \$934 million, and an additional \$748 million cash consideration paid were recorded as a discount to Long-term debt in the consolidated balance sheets. The cash payment was recorded in Other, Net within Cash Flows from Financing activities.

Repayments, Redemptions and Repurchases

(dollars in millions)	Principal Repaid/ Redeemed/ Repurchased	Amount Paid ⁽¹⁾
Verizon 4.950% notes due 2047	\$ 1,475	\$ 1,475
Verizon 5.143% preferred stock due 2020	1,650	1,650
Verizon floating rate (LIBOR +0.550%) notes due 2020 ⁽²⁾	1,018	1,018
Verizon 4.600% notes due 2021	920	949
Verizon 3.125% notes due 2022	1,256	1,314
Verizon 3.450% notes due 2021	566	575
Open market repurchases of various Verizon notes	121	143
Verizon 2.375% notes due 2022 ⁽³⁾	€ 935	1,199
Verizon 0.500% notes due 2022 ⁽⁴⁾	€ 454	517
Total		\$ 8,840

⁽¹⁾ Represents amount paid to repay, redeem or repurchase, excluding interest or dividend.

⁽²⁾ The three-month LIBOR.

⁽³⁾ Principal and premium amount repaid was €980 million. U.S. dollar amount paid includes cash settlement from derivatives entered into in connection with the transaction. See Note 9 for information on cross currency swaps.

⁽⁴⁾ Principal and premium amount repaid was €463 million. U.S. dollar amount paid includes cash settlement from derivatives entered into in connection with the transaction. See Note 9 for information on cross currency swaps.

Issuances

(dollars in millions)	Principal Amount		Net Proceeds ⁽¹⁾
		Issued	
Verizon 3.600% notes due 2060	\$	2,385	\$ 2,369
Verizon 3.000% notes due 2027		750	747
Verizon 3.150% notes due 2030		1,500	1,489
Verizon 4.000% notes due 2050		1,250	1,241
Verizon 1.500% notes due 2030 ⁽²⁾		1,000	995
Verizon 3.000% notes due 2060		1,123	1,115
Verizon 0.850% notes due 2025		2,000	1,994
Verizon 1.750% notes due 2031		2,250	2,231
Verizon 2.650% notes due 2040		3,000	2,979
Verizon 2.875% notes due 2050		2,750	2,722
Verizon 3.000% notes due 2060		2,000	1,967
Verizon 2.500% notes due 2030 ⁽³⁾	C\$	1,000	705
Verizon 3.625% notes due 2050 ⁽³⁾	C\$	300	209
Verizon 1.300% notes due 2033 ⁽³⁾	€	1,350	1,464
Verizon 1.850% notes due 2040 ⁽³⁾	€	800	869
Verizon 1.125% notes due 2028 ⁽³⁾	£	600	766
Verizon 1.875% notes due 2038 ⁽³⁾	£	600	765
Total			\$ 24,627

⁽¹⁾ Net proceeds were net of discount and issuance costs.

⁽²⁾ An amount equal to the net proceeds from this green bond is expected to be used to fund, in whole or in part, certain renewable energy projects, including new and existing investments made by us during the period from July 1, 2020 through the maturity date of the green bond.

⁽³⁾ See Note 9 for information on derivative transactions related to the issuances.

Short-Term Borrowings and Commercial Paper Program

As of December 31, 2020, we had no short-term borrowings or commercial paper outstanding. In April 2020, we issued \$3.5 billion in commercial paper, of which \$2.5 billion was repaid during the three months ended June 30, 2020 and the remaining \$1.0 billion was repaid during the three months ended September 30, 2020. These transactions were recorded within Other, net cash flow from financing in our consolidated statements of cash flows.

Asset-Backed Debt

As of December 31, 2020, the carrying value of our asset-backed debt was \$10.6 billion. Our asset-backed debt includes Asset-Backed Notes (ABS Notes) issued to third-party investors (Investors) and loans (ABS Financing Facilities) received from banks and their conduit facilities (collectively, the Banks). Our consolidated asset-backed debt bankruptcy remote legal entities (each, an ABS Entity or collectively, the ABS Entities) issue the debt or are otherwise party to the transaction documentation in connection with our asset-backed debt transactions. Under the terms of our asset-backed debt, Cellco and certain other affiliates of Verizon (collectively, the Originators) transfer device payment plan agreement receivables to one of the ABS Entities, which in turn transfers such receivables to another ABS Entity that issues the debt. Verizon entities retain the equity interests in the ABS Entities, which represent the rights to all funds not needed to make required payments on the asset-backed debt and other related payments and expenses.

Our asset-backed debt is secured by the transferred device payment plan agreement receivables and future collections on such receivables. The device payment plan agreement receivables transferred to the ABS Entities and related assets, consisting primarily of restricted cash, will only be available for payment of asset-backed debt and expenses related thereto, payments to the Originators in respect of additional transfers of device payment plan agreement receivables, and other obligations arising from our asset-backed debt transactions, and will not be available to pay other obligations or claims of Verizon's creditors until the associated asset-backed debt and other obligations are satisfied. The Investors or Banks, as applicable, which hold our asset-backed debt have legal recourse to the assets securing the debt, but do not have any recourse to Verizon with respect to the payment of principal and interest on the debt. Under a parent support agreement, Verizon has agreed to guarantee certain of the payment obligations of Cellco and the Originators to the ABS Entities.

Cash collections on the device payment plan agreement receivables collateralizing our asset-backed debt securities are required at certain specified times to be placed into segregated accounts. Deposits to the segregated accounts are considered restricted cash and are included in Prepaid expenses and other, and Other assets in our consolidated balance sheets.

Proceeds from our asset-backed debt transactions are reflected in Cash flows from financing activities in our consolidated statements of cash flows. The asset-backed debt issued and the assets securing this debt are included in our consolidated balance sheets.

As mentioned above, holders of our asset-backed debt do not have any recourse to Verizon with respect to the payment of principal and interest on the debt. However, if an early amortization of our asset-backed debt occurs, including as a result of increased customer

[Table of Contents](#)

delinquencies or losses relating to the COVID-19 pandemic, all collections on the securitized device payment plan agreement receivables would be used to pay principal and interest on the asset-backed debt, and our financing cash flow requirements would increase for the twelve months immediately following an early amortization event.

ABS Notes

During the year ended December 31, 2020, we completed the following ABS Notes transactions:

(dollars in millions)	Interest Rates %	Expected Weighted-average Life to Maturity (in years)	Principal Amount Issued
January 2020			
A-1a Senior class notes	1.850	2.46	\$ 1,326
A-1b Senior floating rate class notes	LIBOR + 0.270 ⁽¹⁾	2.46	100
B Junior class notes	1.980	3.18	98
C Junior class notes	2.060	3.36	76
January 2020 total			1,600
August 2020			
A Senior class notes	0.470	2.48	1,426
B Junior class notes	0.680	3.18	98
C Junior class notes	0.830	3.36	76
August 2020 total			1,600
November 2020			
A Senior class notes	0.410	2.45	1,069
B Junior class notes	0.670	3.19	74
C Junior class notes	0.770	3.37	57
November 2020 total			1,200
Total			\$ 4,400

⁽¹⁾ The one-month LIBOR at December 31, 2020 was 0.144%.

Under the terms of each series of ABS Notes, there is a two year revolving period during which we may transfer additional receivables to the ABS Entity. During the year ended December 31, 2020, we made aggregate principal repayments of \$3.4 billion on ABS notes that have entered the amortization period, including principal payments made in connection with clean-up redemptions. During the year ended December 31, 2019, we made aggregate principal repayments of \$3.3 billion on ABS notes that had entered the amortization period, including principal payments made in connection with clean-up redemptions. In January 2021, we made a principal payment of \$180 million in connection with a clean-up redemption.

ABS Financing Facility

In May 2020, we amended and restated our outstanding ABS financing facility originally entered into in 2016, and previously amended and restated in 2019, with a number of financial institutions (ABS Financing Facility). Under the terms of the ABS Financing Facility, the financial institutions make advances under asset-backed loans backed by device payment plan agreement receivables of both consumer and business customers. One loan agreement is outstanding in connection with the ABS Financing Facility, and such loan agreement was amended and restated in May 2020. The loan agreement has a final maturity date in May

2024 and bears interest at floating rates. There is a one year revolving period until May 2021, which may be extended with the approval of the financial institutions. Under the loan agreement, we have the right to prepay all or a portion of the advances at any time without penalty, but in certain cases, with breakage costs. Subject to certain conditions, we may also remove receivables from the ABS Entity. During 2020, we borrowed \$1.3 billion and prepaid \$4.0 billion under the loan agreement. The aggregate outstanding balance under the ABS Financing Facility was \$500 million as of December 31, 2020.

Variable Interest Entities

The ABS Entities meet the definition of a VIE for which we have determined that we are the primary beneficiary as we have both the power to direct the activities of the entity that most significantly impact the entity's performance and the obligation to absorb losses or the right to receive benefits of the entity. Therefore, the assets, liabilities and activities of the ABS Entities are consolidated in our financial results and are included in amounts presented on the face of our consolidated balance sheets.

[Table of Contents](#)

The assets and liabilities related to our asset-backed debt arrangements included in our consolidated balance sheets were as follows:

(dollars in millions)	At December 31, 2020	At December 31, 2019
Assets		
Accounts receivable, net	\$ 9,257	\$ 10,525
Prepaid expenses and other	1,128	1,180
Other assets	2,950	3,856
Liabilities		
Accounts payable and accrued liabilities	8	11
Debt maturing within one year	4,191	5,578
Long-term debt	6,413	6,791

See Note 8 for additional information on device payment plan agreement receivables used to secure asset-backed debt.

Long-Term Credit Facilities

(dollars in millions)	Maturities	At December 31, 2020		
		Facility Capacity	Unused Capacity	Principal Amount Outstanding
Verizon revolving credit facility ⁽¹⁾	2024	\$ 9,500	\$ 9,392	N/A
Various export credit facilities ⁽²⁾	2022-2028	7,500	1,000	\$ 4,882
Total		\$ 17,000	\$ 10,392	\$ 4,882

N/A - not applicable

⁽¹⁾ The revolving credit facility does not require us to comply with financial covenants or maintain specified credit ratings, and it permits us to borrow even if our business has incurred a material adverse change. The revolving credit facility provides for the issuance of letters of credit.

⁽²⁾ During 2020 and 2019, we drew down \$1.0 billion and \$1.5 billion from these facilities, respectively. These credit facilities are used to finance equipment-related purchases. Borrowings under certain of these facilities amortize semi-annually in equal installments up to the applicable maturity dates. Maturities reflect maturity dates of principal amounts outstanding. Any amounts borrowed under these facilities and subsequently repaid cannot be reborrowed.

2021 Credit Agreement

Delayed Draw Term Loan Credit Agreement

On February 24, 2021 (the Effective Date), Verizon entered into a \$25.0 billion Delayed Draw Term Loan Credit Agreement (the Credit Agreement) with two financial institutions, which includes initial commitments of \$12.5 billion from each of these parties. The Credit Agreement provides Verizon with the ability to borrow up to \$25.0 billion for general corporate purposes, including any potential acquisition of spectrum. The loans under the Credit Agreement are available during the period (the Availability Period) beginning on the Effective Date and ending on the earlier of (i) May 28, 2021, and (ii) the receipt by the two financial institutions of written notice by Verizon of its election to terminate commitments pursuant to the Credit Agreement. The availability of the loans under the Credit Agreement, which have not yet been funded, is subject to the satisfaction (or waiver) of the conditions that certain representations of Verizon are accurate in all material respects and the absence of certain event of default. The loans under the Credit Agreement are to be made in a single borrowing on the funding date and will mature and be payable in full on the date that is 364 days after the funding date unless extended pursuant to the terms of the Credit Agreement.

The two financial institutions may syndicate their commitments under the Credit Agreement, subject to the terms of the Credit Agreement.

Interest Rate and Fees

The loans under the Credit Agreement will bear interest at a rate equal to, at the option of Verizon, (i) the base rate (defined as the greater of the rate last quoted by the Wall Street Journal as the "prime rate", the federal funds rate plus 0.500%, and one-month LIBOR plus 1.000%, subject to a floor of 1.000%) or (ii) LIBOR, in each case plus a margin to be determined by reference to Verizon's credit ratings and ranging from 0.000% to 0.125% in the case of base rate loans and 0.625% to 1.125% in the case of LIBOR loans. Additional margin of 0.125% is added to the loan on December 31, 2021.

Verizon will pay a commitment fee on the daily actual unused commitment of each lender starting on the date that is 60 days after the Effective Date through the last day of the Availability Period. This fee accrues at a rate determined by reference to Verizon's credit ratings and ranges from 0.070% to 0.125% per annum.

Prepayments

The Credit Agreement requires Verizon to reduce unused commitments and prepay the loans with 100% of the net cash proceeds received from issuances or sales of equity and incurrences of borrowed money indebtedness, subject to certain exceptions.

[Table of Contents](#)**Covenants and Events of Default**

The Credit Agreement contains certain negative covenants, including a negative pledge covenant, a merger or similar transaction covenant and an accounting changes covenant, and affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. An event of default may result in the inability to borrow in certain circumstances or the acceleration of any outstanding loan under the Credit Agreement, as applicable.

Non-Cash Transactions

During the years ended December 31, 2020, 2019 and 2018, we financed, primarily through vendor financing arrangements, the purchase of approximately \$1.7 billion, \$563 million, and \$1.1 billion, respectively, of long-lived assets consisting primarily of network equipment. As of December 31, 2020 and 2019, \$1.6 billion and \$1.1 billion, respectively, relating to these financing arrangements, including those entered into in prior years and liabilities assumed through acquisitions, remained outstanding. These purchases are non-cash financing activities and therefore are not reflected within Capital expenditures in our consolidated statements of cash flows.

Guarantees

We guarantee the debentures of our operating telephone company subsidiaries. As of December 31, 2020, \$765 million aggregate principal amount of these obligations remained outstanding. Each guarantee will remain in place for the life of the obligation unless terminated pursuant to its terms, including the operating telephone company no longer being a wholly-owned subsidiary of Verizon.

We also guarantee the debt obligations of GTE LLC as successor in interest to GTE Corporation that were issued and outstanding prior to July 1, 2003. As of December 31, 2020, \$391 million aggregate principal amount of these obligations remain outstanding.

Debt Covenants

We and our consolidated subsidiaries are in compliance with all of our restrictive covenants in our debt agreements.

Note 8. Device Payment Plan Agreement and Wireless Service Receivables

The following table presents information about accounts receivable, net of allowances, recorded in our consolidated balance sheet:

	At December 31, 2020							
(dollars in millions)	Device payment plan agreement		Wireless service	Other receivables ⁽¹⁾		Total		
Accounts receivable ⁽²⁾	\$	12,287	\$	5,320	\$	7,562	\$	25,169
Less Allowance for credit losses		686		262		304		1,252
Accounts receivable, net of allowance	\$	11,601	\$	5,058	\$	7,258	\$	23,917

⁽¹⁾ Other receivables primarily include wireline receivables, Verizon Media receivables and other receivables, the allowances for which are individually insignificant.

⁽²⁾ Following the adoption of Topic 326 on January 1, 2020, accounts receivable are measured at amortized cost.

Under the Verizon device payment program, our eligible wireless customers purchase wireless devices under a device payment plan agreement. Customers that activate service on devices purchased under the device payment program pay lower service fees as compared to those under our fixed-term service plans, and their device payment plan charge is included on their wireless monthly bill. We no longer offer Consumer customers new fixed-term, subsidized service plans for devices; however, we continue to offer subsidized plans to our Business customers. We also continue to service existing plans for customers who have not yet purchased and activated devices under the Verizon device payment program.

Wireless Device Payment Plan Agreement Receivables

The following table displays device payment plan agreement receivables, net, recognized in our consolidated balance sheets:

	(dollars in millions)	
At December 31,	2020	2019 ⁽¹⁾
Device payment plan agreement receivables, gross	\$ 17,959	\$ 19,493
Unamortized imputed interest	(453)	(454)
Device payment plan agreement receivables, at amortized cost	17,506	19,039
Allowance ⁽²⁾	(940)	(472)
Device payment plan agreement receivables, net	\$ 16,566	\$ 18,567
Classified in our consolidated balance sheets:		
Accounts receivable, net	\$ 11,601	\$ 13,045
Other assets	4,965	5,522
Device payment plan agreement receivables, net	\$ 16,566	\$ 18,567

⁽¹⁾ Balances reflected are prior to the adoption of Topic 326 on January 1, 2020.

⁽²⁾ Includes allowance for both short-term and long-term device payment plan agreement receivables. The allowance at December 31, 2020 and December 31, 2019 relate to our provision for credit losses and doubtful accounts, respectively.

Included in our device payment plan agreement receivables, net at December 31, 2020 and December 31, 2019, are net device payment plan agreement receivables of \$12.1 billion and \$14.3 billion, respectively, which have been transferred to ABS Entities and continue to be reported in our consolidated balance sheets. See Note 7 for additional information. We believe the carrying value of these receivables approximate their fair value using a Level 3 expected cash flow model.

For indirect channel wireless contracts with customers, we impute risk adjusted interest on the device payment plan agreement receivables. We record the imputed interest as a reduction to the related accounts receivable. Interest income, which is included within Service revenues and other in our consolidated statements of income, is recognized over the financed device payment term.

Promotions

We may offer certain promotions that allow a customer to trade in their owned device in connection with the purchase of a new device. Under these types of promotions, the customer receives a credit for the value of the trade-in device. In addition, we may provide the customer with additional future credits that will be applied against the customer's monthly bill as long as service is maintained. We recognize a liability, measured at fair value, for the customer's right to trade-in the device which is determined by considering several factors, including the weighted-average selling prices obtained in recent resales of similar devices eligible for trade-in. Future credits are recognized when earned by the customer. Device payment plan agreement receivables, net does not reflect the trade-in device liability. At December 31, 2020 and December 31, 2019, the amount of trade-in liability was \$70 million and \$103 million, respectively.

From time to time, we offer certain marketing promotions that allow our customers to upgrade to a new device after paying down a certain specified portion of the required device payment plan agreement amount as well as trading in their device in good working order. When a customer enters into a device payment plan agreement with the right to upgrade to a new device, we account for this trade-in right as a guarantee obligation.

Origination of Device Payment Plan Agreements

When originating device payment plan agreements, we use internal and external data sources to create a credit risk score to measure the credit quality of a customer and to determine eligibility for the device payment program. Verizon's experience has been that the payment attributes of longer tenured customers are highly predictive for estimating their reliability to make future

payments. Customers with longer tenures tend to exhibit similar risk characteristics to other customers with longer tenures, and receivables due from customers with longer tenures tend to perform better than receivables from customers that have not previously been Verizon customers. As a result of this experience, we make initial lending decisions based upon whether the customers are "established customers" or "short-tenured customers." If a Consumer customer has been a customer for 45 days or more, or if a Business customer has been a customer for 12 months or more, the customer is considered an "established customer." For established customers, the credit decision and ongoing credit monitoring processes rely on a combination of internal and external data sources. If a Consumer customer has been a customer less than 45 days, or a Business customer has been a customer for less than 12 months, the customer is considered a "short-tenured customer." For short-tenured customers, the credit decision and credit monitoring processes rely more heavily on external data sources.

Internal data and/or external credit data are obtained from the credit reporting agencies, if available, to create a custom credit risk score for Consumer customers. The custom credit risk score is generated automatically from the applicant's credit data using proprietary custom credit models. The credit risk score measures the likelihood that the potential customer will become severely delinquent and be disconnected for non-payment. For a small portion of short-tenured customer applications, a traditional credit report is not available from one of the national credit reporting agencies because the potential customer does not have sufficient credit history. In those instances, alternative credit data is used for the risk assessment. For Business customers, we also verify the existence of the business with external data sources.

[Table of Contents](#)

Based on the custom credit risk score, we assign each customer to a credit class, each of which has specified offers of credit including an account level spending limit and either a maximum amount of credit allowed per device or a required down payment percentage. During the fourth quarter 2018, we moved all Consumer customers, short-tenured and established, from a required down payment percentage, between zero and 100%, to a maximum amount of credit per device.

Credit Quality Information

Subsequent to origination, we assess indicators for the quality of our wireless device payment plan agreement portfolio using two models, one for new customers and one for existing customers. The model for new customers pools all Consumer and Business wireless customers based on 210 days and 12 months or less, respectively, as "new customers." The model for existing customers pools all Consumer and Business wireless customers based on 210 days and 12 months or more, respectively, as "existing customers."

The following table presents device payment plan agreement receivables, at amortized cost, as of December 31, 2020, by credit quality indicator and year of origination:

(dollars in millions)	Year of Origination			Total
	2020	2019	Prior to 2019 ⁽¹⁾	
New customers	\$ 1,914	\$ 765	\$ 12	\$ 2,691
Existing customers	10,662	4,103	50	14,815
Total	\$ 12,576	\$ 4,868	\$ 62	\$ 17,506

⁽¹⁾ Includes accounts that have been suspended at a point in time.

The data presented in the table above was last updated on December 31, 2020.

We assess indicators for the quality of our wireless service receivables portfolio as one overall pool. As of December 31, 2020, wireless service receivables, at amortized cost, originating in 2020 and 2019 were \$5.3 billion and an insignificant amount, respectively.

Allowance for Credit Losses

The credit quality indicators are used in determining the estimated amount and the timing of expected credit losses for the device payment plan agreement and wireless service receivables portfolios.

Activity in the allowance for credit losses by portfolio segment of receivables were as follows:

(dollars in millions)	Device Payment Plan Agreement Receivables ⁽¹⁾	Wireless Service Plan Receivables
Balance at January 1, 2020	\$ 472	\$ 156
Opening balance sheet adjustment related to Topic 326 adoption	265	—
Adjusted opening balance, January 1, 2020	737	156
Current period provision for expected credit losses	780	340
Write-offs charged against the allowance	(621)	(303)
Recoveries collected	44	69
Balance at December 31, 2020	\$ 940	\$ 262

⁽¹⁾ Includes allowance for both short-term and long-term device payment plan agreement receivables.

We monitor delinquency and write-off experience based on the quality of our device payment plan agreement and wireless service receivables portfolios. The extent of our collection efforts with respect to a particular customer are based on the results of our proprietary custom internal scoring models that analyze the customer's past performance to predict the likelihood of the customer falling further delinquent. These custom scoring models assess a number of variables, including origination characteristics, customer account history and payment patterns. Since our customers' behaviors may be impacted by general economic conditions, we analyzed whether changes in macroeconomic conditions impact our credit loss experience and have concluded that our credit loss estimates are generally not materially impacted by reasonable and supportable forecasts of future economic conditions. Based on the score derived from these models, accounts are grouped by risk category to determine the collection strategy to be applied to such accounts. For device payment plan agreement receivables, we consider an account to be delinquent and in default status if there are unpaid charges remaining on the account on the day after the bill's due date. For wireless service receivables, an account is considered delinquent 34 days after the bill cycle date. The risk class determines the speed and severity of the collections effort including initiatives taken to facilitate customer payment.

As of December 31, 2020, our allowance for credit losses considered the current and potential future impacts caused by the COVID-19 pandemic based on available information to date. The impacts also include the Company's commitment to the FCC's "Keep Americans Connected" pledge, through which we pledged to waive late fees for, and not terminate service to, any of our consumer or small business customers who informed us that they had been impacted financially by the COVID-19 pandemic through May 13, which we extended to June 30, 2020. Starting July 1, customers who had notified us that they had been financially impacted by the pandemic and had an unpaid balance were automatically enrolled in our "Stay Connected" repayment program, which allows customers to pay off their service balance over six months and extends any unpaid device payment plan agreements by the number of months unpaid.

[Table of Contents](#)

The balance and aging of the device payment plan agreement receivables, at amortized cost, were as follows:

(dollars in millions)	At December 31, 2020
Unbilled	\$ 16,333
Billed:	
Current	937
Past due	236
Device payment plan agreement receivables, at amortized cost	\$ 17,506

Collections of Repurchased Wireless Device Payment Plan Agreement Receivables

During 2017, we repurchased all outstanding device payment plan agreement receivables previously sold under the Receivables Purchase Agreement programs that were terminated in December 2017. Collections following the repurchase of receivables were insignificant during both 2020 and 2019, and were \$195 million during 2018. Collections of repurchased receivables were recorded in Cash flows used in investing activities in our consolidated statement of cash flows.

Note 9. Fair Value Measurements and Financial Instruments

Recurring Fair Value Measurements

The following table presents the balances of assets and liabilities measured at fair value on a recurring basis as of December 31, 2020:

	(dollars in millions)			
	Level 1 ⁽¹⁾	Level 2 ⁽²⁾	Level 3 ⁽³⁾	Total
Assets:				
Prepaid expenses and other:				
Foreign exchange forwards	\$ —	\$ 12	\$ —	\$ 12
Other assets:

Total	\$ —	\$ 1,226	\$ —	\$ 1,226
Liabilities:				
Other liabilities:				
Interest rate swaps	\$ —	\$ 173	\$ —	\$ 173
Cross currency swaps	—	912	—	912
Forward starting interest rate swaps	—	604	—	604
Total	\$ —	\$ 1,689	\$ —	\$ 1,689

⁽¹⁾ Quoted prices in active markets for identical assets or liabilities

⁽²⁾ Observable inputs other than quoted prices in active markets for identical assets and liabilities

⁽³⁾ Unobservable pricing inputs in the market

Certain of our equity investments do not have readily determinable fair values and are excluded from the tables above. Such investments are measured at cost, less any impairment, plus or minus changes resulting from observable price changes in orderly transactions for an identical or similar investment of the same issuer and are included in Investments in unconsolidated businesses in our consolidated balance sheets. As of December 31, 2020 and December 31, 2019, the carrying amount of our investments without readily determinable fair values were \$402 million and \$284 million, respectively. During 2020, there were approximately \$101 million of fair value adjustments due to observable price changes and insignificant impairment charges. Cumulative adjustments due to observable price changes and impairment charges were approximately \$81 million and insignificant, respectively.

Fixed income securities consist primarily of investments in municipal bonds. For fixed income securities that do not have quoted prices in active markets, we use alternative matrix pricing resulting in these debt securities being classified as Level 2.

Derivative contracts are valued using models based on readily observable market parameters for all substantial terms of our derivative contracts and thus are classified within Level 2. We use mid-market pricing for fair value measurements of our derivative instruments. Our derivative instruments are recorded on a gross basis.

We recognize transfers between levels of the fair value hierarchy as of the end of the reporting period.

Fair Value of Short-term and Long-term Debt

The fair value of our debt is determined using various methods, including quoted prices for identical debt instruments, which is a Level 1 measurement, as well as quoted prices for similar debt instruments with comparable terms and maturities, which is a Level 2 measurement.

The fair value of our short-term and long-term debt, excluding finance leases, was as follows:

(dollars in millions)	Carrying Amount	Fair Value				
		Level 1	Level 2	Level 3	Total	
At December 31, 2019	\$ 110,373	\$ 86,712	\$ 42,488	\$ —	\$ 129,200	
At December 31, 2020	127,778	103,967	52,785	—	156,752	

Derivative Instruments

We enter into derivative transactions primarily to manage our exposure to fluctuations in foreign currency exchange rates and interest rates. We employ risk management strategies, which may include the use of a variety of derivatives including interest rate swaps, cross currency swaps, forward starting interest rate swaps, treasury rate locks, interest rate caps and foreign exchange forwards. We do not hold derivatives for trading purposes.

[Table of Contents](#)

The following table sets forth the notional amounts of our outstanding derivative instruments:

	(dollars in millions)	
At December 31,	2020	2019
Interest rate swaps	\$ 17,768	\$ 17,004
Cross currency swaps	26,288	23,070
Forward starting interest rate swaps	2,000	3,000
Interest rate caps	—	679
Foreign exchange forwards	1,405	1,130

Interest Rate Swaps

We enter into interest rate swaps to achieve a targeted mix of fixed and variable rate debt. We principally receive fixed rates and pay variable rates that are currently based on LIBOR, resulting in a net increase or decrease to Interest expense. These swaps are designated as fair value hedges and hedge against interest rate risk exposure of designated debt issuances. We record the interest rate swaps at fair value in our consolidated balance sheets as assets and liabilities. Changes in the fair value of the interest rate swaps are recorded to Interest expense, which are offset by changes in the fair value of the hedged debt due to changes in interest rates.

During 2020, we entered into interest rate swaps with a total notional value of \$10.2 billion and settled interest rate swaps with a total notional value of \$9.5 billion. During 2020, we received \$764 million from the settlement of interest rate swaps, which was recorded in Other, net within Cash Flow from Operating Activities. During 2019, we entered into interest rate swaps with a total notional value of \$510 million and settled interest rate swaps with a total notional value of \$3.3 billion.

The ineffective portion of these interest rate swaps was a gain of an insignificant amount and \$54 million for the years ended December 31, 2020 and 2019, respectively.

The following amounts were recorded in Long-term debt in our consolidated balance sheets related to cumulative basis adjustments for fair value hedges:

At December 31,	2020	(do
Carrying amount of hedged liabilities	\$ 18,849	\$
Cumulative amount of fair value hedging adjustment included in the carrying amount of the hedged liabilities	557	
Cumulative amount of fair value hedging adjustment remaining for which hedge accounting has been discontinued	627	

Cross Currency Swaps

We have entered into cross currency swaps designated as cash flow hedges to exchange our British Pound Sterling, Euro, Swiss Franc, Canadian Dollar and Australian Dollar-denominated cash flows into U.S. dollars and to fix our cash payments in U.S. dollars, as well as to mitigate the impact of foreign currency transaction gains or losses.

During 2020, we entered into cross currency swaps with a total notional value of \$4.8 billion and we settled cross currency swaps with a total notional value of \$1.6 billion. A pre-tax gain of \$1.8 billion was recognized in Other comprehensive loss with respect to these swaps.

During 2019, we entered into cross currency swaps with a total notional value of \$6.4 billion and did not settle any cross currency swaps. A pre-tax loss of \$385 million was recognized in Other comprehensive loss with respect to these swaps.

A portion of the gains and losses recognized in Other comprehensive loss was reclassified to Other income (expense), net to offset the related pre-tax foreign currency transaction gain or loss on the underlying hedged item. See Note 14 to the consolidated financial statements for additional information.

Forward Starting Interest Rate Swaps

We have entered into forward starting interest rate swaps designated as cash flow hedges in order to manage our exposure to interest rate changes on future forecasted transactions. We hedge our exposure to the variability in future cash flows based on the expected maturities of the related forecasted debt issuance.

During 2020, we did not enter into any forward starting interest rate swaps and we settled forward starting interest rate swaps with a total notional value of \$1.0 billion. A pre-tax loss of \$486 million, resulting from interest rate movements was recognized in Other comprehensive loss with respect to these swaps.

During 2019, we did not enter into any forward starting interest rate swaps and we settled forward starting interest rate swaps with a total notional value of \$1.0 billion. A pre-tax loss of \$565 million, resulting from interest rate movements was recognized in Other comprehensive loss with respect to these swaps.

[Table of Contents](#)

Treasury Rate Locks

We enter into treasury rate locks to mitigate our interest rate risk. During 2020, we entered into and settled treasury rate locks designated as cash flow hedges with a total notional value of \$5.5 billion, and we recognized an insignificant pre-tax loss in Other comprehensive loss. During 2019, we did not enter into or settle any treasury rate locks designated as cash flow hedges, and we did not recognize any amount in our consolidated financial statements. In January and February 2021, we entered into treasury rate locks with a total notional value of \$4.3 billion.

Net Investment Hedges

We have designated certain foreign currency debt instruments as net investment hedges to mitigate foreign exchange exposure related to non-U.S. dollar net investments in certain foreign subsidiaries against changes in foreign exchange rates. The notional amount of Euro-denominated debt as a net investment hedge was €750 million as of both December 31, 2020 and 2019.

Undesignated Derivatives

We also have the following derivative contracts which we use as economic hedges but for which we have elected not to apply hedge accounting.

Interest Rate Caps

We enter into interest rate caps to mitigate our interest exposure to interest rate increases on our ABS Financing Facilities and ABS Notes. During both 2020 and 2019, we recognized insignificant pre-tax losses in Interest expense related to interest rate caps.

Foreign Exchange Forwards

We enter into British Pound Sterling and Euro foreign exchange forwards to mitigate our foreign exchange rate risk related to non-functional currency denominated monetary assets and liabilities of international subsidiaries, as well as foreign exchange risk related to debt settlements. During 2020, we entered into foreign exchange forwards with a total notional value of \$14.0 billion and settled foreign exchange forwards with a total notional value of \$13.8 billion. During 2019, we entered into foreign exchange forwards with a total notional value of \$12.0 billion and settled foreign exchange forwards with a total notional value of \$11.5 billion. During 2020, a pre-tax gain of \$142 million was recognized in Other income (expense), net. During 2019, a pre-tax loss of an insignificant amount was recognized in Other income (expense), net.

Treasury Rate Locks

We enter into treasury rate locks to mitigate our interest rate risk. During 2020, we entered into and settled treasury rate locks with a total notional value of \$1.6 billion, and we recognized an insignificant pre-tax gain in Interest expense.

During 2019, we entered into treasury rate locks with a total notional value of \$1.5 billion to hedge the tender offers conducted in May 2019 for fifteen series of notes issued by Verizon with coupon rates ranging from 4.672% to 5.012% and maturity dates ranging from 2054 to 2055 (May Tender offers). In addition, we entered into treasury rate locks with a total notional value of \$1.5 billion to hedge the tender offers conducted in November and December 2019 for eleven and twenty series of notes and debentures, respectively, issued by Verizon and other subsidiaries with coupon rates ranging from 3.850% to 8.950% and maturity dates ranging from 2021 to 2055 (November and December Tender offers). Upon the early settlement of the May, November and December Tender Offers, we settled these hedges and recognized an insignificant gain in Other income (expense), net.

Concentrations of Credit Risk

Financial instruments that subject us to concentrations of credit risk consist primarily of temporary cash investments, short-term and long-term investments, trade receivables, including device payment plan agreement receivables, certain notes receivable, including lease receivables, and derivative contracts.

Counterparties to our derivative contracts are major financial institutions with whom we have negotiated derivatives agreements (ISDA master agreements) and credit support annex (CSA) agreements which provide rules for collateral exchange. The CSA

agreements contain rating based thresholds such that we or our counterparties may be required to hold or post collateral based upon changes in outstanding positions as compared to established thresholds and changes in credit ratings. We do not offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments recognized at fair value. At December 31, 2020, we held \$0.2 billion of collateral related to derivative contracts under collateral exchange agreements, which were recorded as Other current liabilities in our consolidated balance sheet. At December 31, 2019, we held an insignificant amount of collateral related to derivative contracts under collateral exchange arrangements, which were recorded as Other current liabilities in our consolidated balance sheet. While we may be exposed to credit losses due to the nonperformance of our counterparties, we consider the risk remote and do not expect that any such nonperformance would result in a significant effect on our results of operations or financial condition due to our diversified pool of counterparties.

Note 10. Stock-Based Compensation

Verizon Long-Term Incentive Plan

In May 2017, Verizon's shareholders approved the 2017 Long-Term Incentive Plan (the 2017 Plan) and terminated Verizon's authority to grant new awards under the Verizon 2009 Long-Term Incentive Plan (the 2009 Plan). The 2017 Plan provides for broad-based equity grants to employees, including executive officers, and permits the granting of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance stock units and other awards. Upon approval of the 2017 Plan, Verizon reserved for issuance under the 2017 Plan the number of shares that were remaining but not issued under the 2009 Plan. Shares subject to outstanding awards under the 2009 Plan that expire, are canceled or otherwise terminated will also be available for awards under the 2017 Plan. As of December 31, 2020, 83 million shares are reserved for future issuance under the 2017 Plan.

Restricted Stock Units

Restricted Stock Units (RSUs) granted under the 2017 Plan generally vest in three equal installments on each anniversary of the grant date. The RSUs that are paid in stock upon vesting and are thus classified as equity awards are measured using the grant date fair value of Verizon common stock and are not remeasured at the end of each reporting period. The RSUs that are settled in cash are classified as liability awards and the liability is measured at its fair value at the end of each reporting period. All RSUs granted under the 2017 Plan have dividend equivalent units, which will be paid to participants at the time the RSU award is paid, and in the same proportion as the RSU award. In 2020, Verizon announced a broad-based program that provides for the annual award of cash-settled RSUs under the 2017 Plan to all full-time and part-time employees who meet eligibility requirements on the annual grant date.

In February 2018, Verizon announced a broad-based employee special award of RSUs under the 2017 Plan to eligible full-time and part-time employees. These RSUs vested in two equal installments on each anniversary of the grant date and paid in cash. The first installment of the restricted stock units vested and were paid in February 2019 and the remaining restricted stock units vested and were paid in February 2020.

In connection with our acquisition of Yahoo's operating business, on the closing date of the Transaction each unvested and outstanding Yahoo RSU award that was held by an employee who became an employee of Verizon was replaced with a Verizon RSU award, which is generally payable in cash upon the applicable vesting date. These awards are classified as liability awards and are measured at fair value at the end of each reporting period.

We estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. We use historical data to estimate forfeitures and recognize that estimated compensation cost of restricted stock units, net of estimated forfeitures, on a straight-line basis over the vesting period.

Performance Stock Units

The 2017 Plan also provides for grants of Performance Stock Units (PSUs) that generally vest at the end of the third year after the grant. As defined by the 2017 Plan, the Human Resources Committee of the Board of Directors determines the number of PSUs a participant earns based on the extent to which the corresponding performance goals have been achieved over the three-year performance cycle. The PSUs that are paid in stock upon vesting and are classified as equity awards are measured using the grant date fair value of Verizon common stock and are not remeasured at the end of each reporting period. The PSUs that are settled in cash and are classified as liability awards are measured at its fair value at the end of each reporting period and, therefore, will fluctuate based on the price of Verizon common stock as well as performance relative to the targets. All PSUs granted under the 2017 Plan have dividend equivalent units, which will be paid to participants at the time that PSU award is determined and paid, and in the same proportion as the PSU award. The granted and cancelled activity for the PSU award includes adjustments for the performance goals achieved.

The following table summarizes Verizon's Restricted Stock Unit and Performance Stock Unit activity:

(shares in thousands)	Restricted Stock Units		Performance Stock Units	
	Equity Awards	Liability Awards	Equity Awards	Liability Awards
Outstanding January 1, 2018	12,633	13,991	—	18,235
Granted	4,134	15,157	—	5,779
Payments	(5,977)	(6,860)	—	(4,526)
Cancelled/Forfeited	(213)	(2,362)	—	(2,583)
Outstanding December 31, 2018	10,577	19,926	—	16,905

Outstanding December 31, 2020	6,901	19,559	4,242	9,637

[Table of Contents](#)

As of December 31, 2020, unrecognized compensation expense related to the unvested portion of Verizon's RSUs and PSUs was approximately \$881 million and is expected to be recognized over approximately 2 years.

The equity awards granted in 2020 and 2019 have weighted-average grant date fair values of \$57.38 and \$56.66 per unit, respectively. During 2020, 2019 and 2018, we paid \$961 million, \$737 million and \$773 million, respectively, to settle RSUs and PSUs classified as liability awards.

Stock-Based Compensation Expense

After-tax compensation expense for stock-based compensation related to RSUs and PSUs described above included in Net income attributable to Verizon was \$780 million, \$872 million and \$720 million for 2020, 2019 and 2018, respectively.

Note 11. Employee Benefits

We maintain non-contributory defined benefit pension plans for certain employees. In addition, we maintain postretirement health care and life insurance plans for certain retirees and their dependents, which are both contributory and non-contributory, and include a limit on our share of the cost for certain current and future retirees. In accordance with our accounting policy for pension and other postretirement benefits, operating expenses include service costs associated with pension and other postretirement benefits while other credits and/or charges based on actuarial assumptions, including projected discount rates, an estimated return on plan assets, and impact from health care trend rates are reported in Other income (expense), net. These estimates are updated in the fourth quarter to reflect actual return on plan assets and updated actuarial assumptions or upon a remeasurement event. The adjustment is recognized in the income statement during the fourth quarter or upon a remeasurement event pursuant to our accounting policy for the recognition of actuarial gains and losses.

Pension and Other Postretirement Benefits

Pension and other postretirement benefits for certain employees are subject to collective bargaining agreements. Modifications in benefits have been bargained from time to time, and we may also periodically amend the benefits in the management plans. The following tables summarize benefit costs, as well as the benefit obligations, plan assets, funded status and rate assumptions associated with pension and postretirement health care and life insurance benefit plans.

Obligations and Funded Status

(dollars in millions)

At December 31,	Pension		Health Care and Life	
	2020	2019	2020	2019
Change in Benefit Obligations				
Beginning of year	\$ 21,248	\$ 19,567	\$ 15,669	\$ 16,364
Service cost	305	247	110	96
Interest cost	505	695	429	629
Plan amendments	—	—	—	(22)

Funded Status - End of year	\$ (2,108)	\$ (1,797)	\$ (15,596)	\$ (14,926)

[Table of Contents](#)

		(dollars in millions)			
		Pension		Health Care and Life	
At December 31,		2020	2019	2020	2019
Amounts recognized on the balance sheet					
Noncurrent assets	\$	5	\$ 5	\$ —	\$ —
Current liabilities		(63)	(67)	(721)	(603)
Noncurrent liabilities		(2,050)	(1,735)	(14,875)	(14,323)
Total	\$	(2,108)	\$ (1,797)	\$ (15,596)	\$ (14,926)
Amounts recognized in Accumulated Other Comprehensive Income (Pre-tax)					
Prior service cost (benefit)	\$	463	\$ 524	\$ (2,783)	\$ (3,749)
Total	\$	463	\$ 524	\$ (2,783)	\$ (3,749)

The accumulated benefit obligation for all defined benefit pension plans was \$22.2 billion and \$21.2 billion at December 31, 2020 and 2019, respectively.

Actuarial Loss, Net

The net actuarial loss in 2020 is primarily the result of a \$3.2 billion loss due to a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 3.3% at December 31, 2019 to a weighted-average of 2.6% at December 31, 2020.

The net actuarial loss in 2019 is primarily the result of a \$4.3 billion loss due to a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 4.4% at December 31, 2018 to a weighted-average of 3.3% at December 31, 2019, partially offset by other assumption adjustments of \$1.9 billion, of which \$1.6 billion related to healthcare claims experience.

Collective Bargaining Negotiations

The extension agreement ratified in August 2018 extended our collective bargaining agreements with the Communications Workers of America and the International Brotherhood of Electrical Workers that were due to expire on August 3, 2019 for four years until August 5, 2023. Amendments triggered by the collective bargaining negotiations were made to certain pension plans for certain union-represented employees and retirees. The impact of the plan amendments was an increase in our defined benefit pension plans plan obligations and a net decrease to Accumulated other comprehensive income of \$230 million (net of taxes of \$170 million). The annual impact of the amount recorded in Accumulated other comprehensive income that will be reclassified to net periodic benefit cost is insignificant.

The reclassifications from the amounts recorded in Accumulated other comprehensive income as a result of collective bargaining agreements and plan amendments made in 2016 and 2017 resulted in a decrease to net periodic benefit cost and increase to pre-tax income of approximately \$729 million during 2020, 2019 and 2018.

Information for pension plans with an accumulated benefit obligation in excess of plan assets follows:

		(dollars in millions)	
At December 31,		2020	2019
Accumulated benefit obligation	\$	22,116	\$ 21,134
Fair value of plan assets		20,064	19,388

Information for pension plans with a projected benefit obligation in excess of plan assets follows:

		(dollars in millions)	
At December 31,		2020	2019
Projected benefit obligation	\$	22,178	\$ 21,190
Fair value of plan assets		20,064	19,388

[Table of Contents](#)

Net Periodic Benefit Cost (Income)

The following table summarizes the components of net periodic benefit cost (income) related to our pension and postretirement health care and life insurance plans:

(dollars in millions)

Years Ended December 31,	Pension			Health Care and Life		
	2020	2019	2018	2020	2019	2018
Service cost - Cost of services	\$ 245	\$ 202	\$ 230	\$ 89	\$ 78	\$ 104
Service cost - Selling, general and administrative expense	60	45	54	21	18	23
Service cost	305	247	284	110	96	127
Amortization of prior service cost (credit)	61	61	48	(966)	(971)	(976)
Expected return on plan assets	(1,186)	(1,130)	(1,293)	(28)	(37)	(44)
Interest cost	505	695	690	429	629	615
Remeasurement loss (gain), net	744	606	369	866	(480)	(2,658)
Curtailment and termination benefits	—	—	181	—	—	—
Other components	124	232	(5)	301	(859)	(3,063)
Total	\$ 429	\$ 479	\$ 279	\$ 411	\$ (763)	\$ (2,936)

The service cost component of net periodic benefit cost (income) is recorded in Cost of services and Selling, general and administrative expense in the consolidated statements of income while the other components, including mark-to-market adjustments, if any, are recorded in Other income (expense), net.

Other pre-tax changes in plan assets and benefit obligations recognized in other comprehensive (income) loss are as follows:

(dollars in millions)

At December 31,	Pension			Health Care and Life		
	2020	2019	2018	2020	2019	2018
Prior service cost (benefit)	\$ —	\$ —	\$ 230	\$ —	\$ (22)	\$ (8)
Reversal of amortization items						
Prior service cost (benefit)	(61)	(61)	(48)	966	971	976
Total recognized in other comprehensive loss (income) (pre-tax)	\$ (61)	\$ (61)	\$ 182	\$ 966	\$ 949	\$ 968

Assumptions

The weighted-average assumptions used in determining benefit obligations follow:

At December 31,	Pension		Health Care and Life	
	2020	2019	2020	2019
Discount Rate	2.60 %	3.30 %	2.50 %	3.20 %
Rate of compensation increases	3.00 %	3.00 %	N/A	N/A

N/A - not applicable

The weighted-average assumptions used in determining net periodic cost follow:

At December 31,	Pension			Health Care and Life		
	2020	2019	2018	2020	2019	2018
Discount rate in effect for determining service cost	3.30 %	4.60 %	4.10 %	3.50 %	4.60 %	3.90 %
Discount rate in effect for determining interest cost	2.40	3.80	3.40	2.80	4.00	3.20
Expected return on plan assets	6.50	6.80	7.00	4.50	4.30	4.80
Rate of compensation increases	3.00	3.00	3.00	N/A	N/A	N/A

N/A - not applicable

In determining our pension and other postretirement benefit obligations, we used a weighted-average discount rate of 2.6% in 2020. The rates were selected to approximate the composite interest rates available on a selection of high-quality bonds available in the market at December 31, 2020. The bonds selected had maturities that coincided with the time periods during which benefits payments are expected to occur, were non-callable and available in sufficient quantities to ensure marketability (at least \$300 million par outstanding).

In order to project the long-term target investment return for the total portfolio, estimates are prepared for the total return of each major asset class over the subsequent 10-year period. Those estimates are based on a combination of factors including the current market interest rates and valuation levels, consensus earnings expectations and historical long-term risk premiums. To determine the aggregate return for the

[Table of Contents](#)

pension trust, the projected return of each individual asset class is then weighted according to the allocation to that investment area in the trust's long-term asset allocation policy.

The assumed health care cost trend rates are as follows:

At December 31,	Health Care and Life		
	2020	2019	2018
Weighted-average healthcare cost trend rate assumed for next year	6.20 %	6.30 %	6.80 %
Rate to which cost trend rate gradually declines	4.50	4.50	4.50
Year the rate reaches the level it is assumed to remain thereafter	2029	2027	2027

Plan Assets

The Company's overall investment strategy is to achieve a mix of assets that allows us to meet projected benefit payments while taking into consideration risk and return. While target allocation percentages will vary over time, the current target allocation for plan assets is designed so that 48% to 68% of the assets have the objective of achieving a return in excess of the growth in liabilities (comprised of public equities, private equities, real estate, hedge funds, high yield bonds and emerging market debt) and 35% to 55% of the assets are invested as liability hedging assets (where interest rate sensitivity of the liability hedging assets better match the interest rate sensitivity of the liability) and a maximum of 15% is in cash. This allocation will shift as funded status improves to a higher allocation of liability hedging assets. Target policies will be revisited periodically to ensure they are in line with fund objectives. Both active and passive management approaches are used depending on perceived market efficiencies and various other factors. Due to our diversification and risk control processes, there are no significant concentrations of risk, in terms of sector, industry, geography or company names.

Pension and healthcare and life plans assets do not include significant amounts of Verizon common stock.

Pension Plans

The fair values for the pension plans by asset category at December 31, 2020 are as follows:

Asset Category	(dollars in millions)			
	Total	Level 1	Level 2	Level 3

Total investments at fair value	567	514	53	—
Investments measured at NAV	176			
Total	\$ 743	\$ 514	\$ 53	\$ —

The following are general descriptions of asset categories, as well as the valuation methodologies and inputs used to determine the fair value of each major category of assets.

Cash and cash equivalents include short-term investment funds (less than 90 days to maturity), primarily in diversified portfolios of investment grade money market instruments and are valued using quoted market prices or other valuation methods. The carrying value of cash equivalents approximates fair value due to the short-term nature of these investments.

Investments in securities traded on national and foreign securities exchanges are valued by the trustee at the last reported sale prices on the last business day of the year or, if no sales were reported on that date, at the last reported bid prices. Government obligations, corporate bonds, international bonds and asset-backed debt are valued using matrix prices with input from independent third-party valuation sources. Over-the-counter securities are valued at the bid prices or the average of the bid and ask prices on the last business day of the year from published sources or, if not available, from other sources considered reliable such as multiple broker quotes.

Commingled funds not traded on national exchanges are priced by the custodian or fund's administrator at their net asset value (NAV). Commingled funds held by third-party custodians appointed by the fund managers provide the fund managers with a NAV. The fund managers have the responsibility for providing this information to the custodian of the respective plan.

[Table of Contents](#)

The investment manager of the entity values venture capital, corporate finance and natural resource limited partnership investments. Real estate investments are valued at amounts based upon appraisal reports prepared by either independent real estate appraisers or the investment manager using discounted cash flows or market comparable data. Loans secured by mortgages are carried at the lesser of the unpaid balance or appraised value of the underlying properties. The values assigned to these investments are based upon available and current market information and do not necessarily represent amounts that might ultimately be realized. Because of the inherent uncertainty of valuation, estimated fair values might differ significantly from the values that would have been used had a ready market for the securities existed. These differences could be material.

Forward currency contracts, futures, and options are valued by the trustee at the exchange rates and market prices prevailing on the last business day of the year. Both exchange rates and market prices are readily available from published sources. These securities are classified by the asset class of the underlying holdings.

Hedge funds are valued by the custodian at NAV based on statements received from the investment manager. These funds are valued in accordance with the terms of their corresponding offering or private placement memoranda.

Commingled funds, hedge funds, venture capital, corporate finance, natural resource and real estate limited partnership investments for which fair value is measured using the NAV per share as a practical expedient are not leveled within the fair value hierarchy but are included in total investments.

Employer Contributions

In 2020, we made no discretionary contribution to our qualified pension plans, \$57 million of contributions to our nonqualified pension plans and \$709 million of contributions to our other postretirement benefit plans. No qualified pension plans contributions are expected to be made in 2021. Nonqualified pension plans contributions are estimated to be approximately \$70 million and contributions to our other postretirement benefit plans are estimated to be approximately \$800 million in 2021.

Estimated Future Benefit Payments

The benefit payments to retirees are expected to be paid as follows:

Year	(dollars in millions)	
	Pension Benefits	Health Care and Life
2021	\$ 2,147	\$ 889
2022	1,706	921
2023	1,651	904
2024	1,107	887
2025	1,080	881
2026 to 2030	5,253	4,437

Savings Plan and Employee Stock Ownership Plans

We maintain four leveraged employee stock ownership plans (ESOP). We match a certain percentage of eligible employee contributions to certain savings plans with shares of our common stock from this ESOP. At December 31, 2020, the number of allocated shares of common stock in this ESOP was 46 million. There were no unallocated shares of common stock in this ESOP at December 31, 2020. All leveraged ESOP shares are included in earnings per share computations.

Total savings plan costs were \$730 million in 2020, \$897 million in 2019 and \$1.1 billion in 2018.

Severance Benefits

The following table provides an analysis of our severance liability:

(dollars in millions)

Year	Beginning of Year	Charged to Expense	Payments	Other	End of Year
2018	\$ 627	\$ 2,093	\$ (560)	\$ (4)	\$ 2,156
2019	2,156	260	(1,847)	(4)	565
2020	565	309	(248)	(24)	602

Severance, Pension and Benefits (Credits) Charges

During 2020, in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur, we recorded net pre-tax pension and benefits charges of \$1.6 billion in our pension and postretirement benefit plans. The charges were recorded in Other income (expense), net in our consolidated statement of income and were primarily driven by a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 3.3% at December 31, 2019 to a weighted-average of 2.6% at December 31, 2020 (\$3.2 billion), partially offset by the difference between our estimated return on assets and our actual return on assets (\$1.6 billion). During 2020, we also recorded net pre-tax severance charges of \$309 million in Selling, general and administrative expense in our consolidated statements of income.

During 2019, in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur, we recorded net pre-tax pension and benefits charges of \$126 million in our pension and postretirement benefit plans. The charges were recorded in Other income (expense), net in our consolidated statement of income and were primarily driven by a decrease in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 4.4% at December 31, 2018 to a weighted-average of 3.3% at December 31, 2019 (\$4.3 billion), partially offset by the difference between our estimated return on assets and our actual return on assets (\$2.3 billion) and other assumption adjustments of \$1.9 billion, of which \$1.6 billion related to healthcare claims experience. During 2019, we also recorded net pre-tax severance charges of \$260 million in Selling, general and administrative expense in our consolidated statements of income.

During 2018, we recorded net pre-tax pension and benefits credits of \$2.1 billion in accordance with our accounting policy to recognize actuarial gains and losses in the period in which they occur. The pension and benefits remeasurement credits of \$2.3 billion, which were recorded in Other income (expense), net in our consolidated statements of income, were primarily driven by an increase in our discount rate assumption used to determine the current year liabilities of our pension plans and postretirement benefit plans from a weighted-average of 3.7% at December 31, 2017 to a weighted-average of 4.4% at December 31, 2018 (\$2.6 billion), and mortality and other assumption adjustments of \$1.7 billion, \$1.6 billion of which related to healthcare claims and trend adjustments, offset by the difference between our estimated return on assets of 7.0% and our actual return on assets of (2.7) % (\$1.9 billion). The credits were partially offset by \$177 million due to the effect of participants retiring under the Voluntary Separation Program.

In September 2018, Verizon announced a Voluntary Separation Program for select U.S.-based management employees. Approximately 10,400 eligible employees separated from the Company under this program as of the end of June 2019. The severance benefit payments to these employees were substantially completed by the end of September 2019. Principally as a result of this program but also as a result of other headcount reduction initiatives, the Company recorded a severance charge of \$1.8 billion (\$1.4 billion after-tax) during the year ended December 31, 2018, which was recorded in Selling, general and administrative expense in our consolidated statement of income. During 2018, we also recorded \$339 million in severance costs under our other existing separation plans.

Note 12. Taxes

The components of income before provision for income taxes are as follows:

		(dollars in millions)		
Years Ended December 31,		2020	2019	2018
Domestic	\$	22,844	\$ 21,655	\$ 19,801
Foreign		1,123	1,078	(178)
Total	\$	23,967	\$ 22,733	\$ 19,623

The components of the provision for income taxes are as follows:

		(dollars in millions)		
Years Ended December 31,	2020	2019	2018	
Current				
Federal	\$ 2,826	\$ 518	\$ 2,187	
Foreign	159	221	267	
State and Local	1,081	974	741	
Total	4,066	1,713	3,195	
Deferred				
Federal	1,432	1,150	175	
Foreign	1	(13)	30	
State and Local	120	95	184	
Total	1,553	1,232	389	
Total income tax provision	\$ 5,619	\$ 2,945	\$ 3,584	

[Table of Contents](#)

The following table shows the principal reasons for the difference between the effective income tax rate and the statutory federal income tax rate:

Years Ended December 31,	2020	2019	2018
Statutory federal income tax rate	21.0 %	21.0 %	21.0 %
State and local income tax rate, net of federal tax benefits	3.9	3.7	3.7
Preferred stock disposition	—	(9.9)	—
Affordable housing credit	(0.2)	(0.4)	(0.6)
Employee benefits including ESOP dividend	(0.2)	(0.3)	(0.3)
Internal restructure	(0.1)	—	(9.1)
Noncontrolling interests	(0.5)	(0.5)	(0.5)
Non-deductible goodwill	—	0.1	4.7
Other, net	(0.5)	(0.7)	(0.6)
Effective income tax rate	23.4 %	13.0 %	18.3 %

The effective income tax rate for 2020 was 23.4% compared to 13.0% for 2019. The increase in the effective income tax rate and the provision for income taxes was primarily due to the recognition of a \$2.2 billion tax benefit in connection with the disposition of preferred stock representing a minority interest in a foreign affiliate in 2019 that did not reoccur in 2020.

The effective income tax rate for 2019 was 13.0% compared to 18.3% for 2018. The decrease in the effective income tax rate and the provision for income taxes was primarily due to the recognition of a \$2.2 billion non-recurring tax benefit in connection with the disposition of preferred stock representing a minority interest in a foreign affiliate in 2019 compared to the non-recurring deferred tax benefit of approximately \$2.1 billion, as a result of an internal reorganization of legal entities within the historical Wireless business, which was offset by a goodwill charge that is not deductible for tax purposes in 2018.

The amounts of cash taxes paid by Verizon are as follows:

		(dollars in millions)		
Years Ended December 31,	2020	2019	2018	
Income taxes, net of amounts refunded	\$ 2,725	\$ 3,583	\$ 2,213	
Employment taxes	618	1,044	1,066	
Property and other taxes	2,093	1,551	1,598	
Total	\$ 5,436	\$ 6,178	\$ 4,877	

Deferred Tax Assets and Liabilities

Deferred taxes arise because of differences in the book and tax bases of certain assets and liabilities. Significant components of deferred tax assets and liabilities are as follows:

	(dollars in millions)	
At December 31,	2020	2019
Deferred Tax Assets		
Employee benefits	\$ 5,218	\$ 5,048
Tax loss and credit carry forwards	2,848	3,012
Other - assets	6,096	5,595
	14,162	13,655
Valuation allowances	(2,183)	(2,260)
Deferred tax assets	11,979	11,395
Deferred Tax Liabilities		
Spectrum and other intangible amortization	22,726	22,388
Depreciation	18,009	16,884
Other - liabilities	6,867	6,742
Deferred tax liabilities	47,602	46,014
Net deferred tax liability	\$ 35,623	\$ 34,619

At December 31, 2020, undistributed earnings of our foreign subsidiaries indefinitely invested outside the U.S. amounted to approximately \$5.0 billion. The majority of Verizon's cash flow is generated from domestic operations and we are not dependent on foreign cash or earnings to meet our funding requirements, nor do we intend to repatriate these undistributed foreign earnings to fund U.S. operations. Furthermore, a portion of these undistributed earnings represents amounts that legally must be kept in reserve in accordance with certain foreign jurisdictional requirements and are unavailable for distribution or repatriation. As a result, we have not provided U.S. deferred taxes on these undistributed earnings because we intend that they will remain indefinitely reinvested outside of the U.S. and therefore unavailable for use in

[Table of Contents](#)

funding U.S. operations. Determination of the amount of unrecognized deferred taxes related to these undistributed earnings is not practicable.

At December 31, 2020, we had net after-tax loss and credit carry forwards for income tax purposes of approximately \$2.8 billion that primarily relate to state and foreign taxes. Of these net after-tax loss and credit carry forwards, approximately \$1.7 billion will expire between 2021 and 2040 and approximately \$1.1 billion may be carried forward indefinitely.

During 2020, the valuation allowance decreased approximately \$77 million. The \$2.2 billion valuation allowance at December 31, 2020 as well as the 2020 activity is primarily related to state and foreign taxes.

Unrecognized Tax Benefits

A reconciliation of the beginning and ending balance of unrecognized tax benefits is as follows:

	(dollars in millions)		
	2020	2019	2018
Balance at January 1,	\$ 2,870	\$ 2,871	\$ 2,355
Additions based on tax positions related to the current year	160	149	160
Additions for tax positions of prior years	258	297	699
Reductions for tax positions of prior years	(166)	(300)	(248)
Settlements	(46)	(58)	(40)
Lapses of statutes of limitations	(132)	(89)	(55)
Balance at December 31,	\$ 2,944	\$ 2,870	\$ 2,871

Included in the total unrecognized tax benefits at December 31, 2020, 2019 and 2018 is \$2.5 billion, \$2.4 billion and \$2.3 billion, respectively, that if recognized, would favorably affect the effective income tax rate.

We recognized the following net after-tax expenses related to interest and penalties in the provision for income taxes:

Years Ended December 31,	(dollars in millions)
2020	\$ 5
2019	35
2018	75

The after-tax accruals for the payment of interest and penalties in the consolidated balance sheets are as follows:

At December 31,	(dollars in millions)
2020	\$ 388
2019	385

Verizon and/or its subsidiaries file income tax returns in the U.S. federal jurisdiction, and various state, local and foreign jurisdictions. As a large taxpayer, we are under audit by the Internal Revenue Service (IRS) and multiple state and foreign jurisdictions for various open tax years. The IRS is currently examining the Company's U.S. income tax returns for tax years 2015-2016 and Cellco's U.S. income tax return for tax year 2017-2018. Tax controversies are ongoing for tax years as early as 2006. The amount of the liability for unrecognized tax benefits will change in the next twelve months due to the expiration of the statute of limitations in various jurisdictions and it is reasonably possible that various current tax examinations will conclude or require reevaluations of the Company's tax positions during this period. An estimate of the range of the possible change cannot be made until these tax matters are further developed or resolved.

Reportable Segments

We have two reportable segments that we operate and manage as strategic business units - Consumer and Business. We measure and evaluate our reportable segments based on segment operating income, consistent with the chief operating decision maker's assessment of segment performance.

[Table of Contents](#)

Our segments and their principal activities consist of the following:

Segment	Description
Verizon Consumer Group	Our Consumer segment provides consumer-focused wireless and wireline communications services and products. Our wireless services are provided across one of the most extensive wireless networks in the U.S. under the Verizon brand and through wholesale and other arrangements. Our wireline services are provided in nine states in the Mid-Atlantic and Northeastern U.S., as well as Washington D.C., over our 100% fiber-optic network through our Verizon Fios product portfolio and over a traditional copper-based network to customers who are not served by Fios.
Verizon Business Group	Our Business segment provides wireless and wireline communications services and products, including data, video and conferencing services, corporate networking solutions, security and managed network services, local and long distance voice services and network access to deliver various IoT services and products. We provide these products and services to businesses, government customers and wireless and wireline carriers across the U.S. and select products and services to customers around the world.

Our Consumer segment's wireless and wireline products and services are available to our retail customers, as well as resellers that purchase wireless network access from us on a wholesale basis. Our Business segment's wireless and wireline products and services are organized by the primary customer groups targeted by these offerings: Small and Medium Business, Global Enterprise, Public Sector and Other, and Wholesale.

Corporate and other includes the results of our media business, Verizon Media, and other businesses, investments in unconsolidated businesses, unallocated corporate expenses, certain pension and other employee benefit related costs and interest and financing expenses. Corporate and other also includes the historical results of divested businesses and other adjustments and gains and losses that are not allocated in assessing segment performance due to their nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and losses from these transactions that are not individually significant are included in segment results as these items are included in the chief operating decision maker's assessment of segment performance.

The reconciliation of segment operating revenues and expenses to consolidated operating revenues and expenses below includes the effects of special items that the chief operating decision maker does not consider in assessing segment performance, primarily because of their nature.

The following tables provides operating financial information for our two reportable segments:

(dollars in millions)

				Total Reportable Segments
2020	Consumer	Business		
External Operating Revenues				
Service	\$ 64,884	\$ —	\$	64,884
Wireless equipment	15,492	—		15,492
Other	7,916	—		7,916
Small and Medium Business	—	11,112		11,112
Global Enterprise	—	10,405		10,405
Public Sector and Other	—	6,362		6,362
Wholesale	—	3,013		3,013
Intersegment revenues	241	70		311
Total Operating Revenues⁽¹⁾	88,533	30,962		119,495
Cost of services	15,610	10,659		26,269
Cost of wireless equipment	15,736	4,064		19,800
Selling, general and administrative expense	16,936	8,380		25,316
Depreciation and amortization expense	11,395	4,086		15,481
Total Operating Expenses	59,677	27,189		86,866
Operating Income	\$ 28,856	\$ 3,773	\$	32,629

⁽¹⁾ Service and other revenues and Wireless equipment revenues included in our Business segment amounted to approximately \$28.1 billion and \$2.9 billion, respectively, for the year ended December 31, 2020.

Reconciling items:			
Eliminations	(537)	(443)	(369)
Consolidated Operating Revenues	\$ 128,292	\$ 131,868	\$ 130,863

A reconciliation of the total reportable segments' operating income to consolidated income before provision for income taxes is as follows:

	(dollars in millions)		
Years Ended December 31,	2020	2019	2018
Operating Income			
Total reportable segments	\$ 32,629	\$ 32,723	\$ 32,179
Corporate and other	(1,472)	(1,403)	(1,326)
Reconciling items:			
Severance charges	(221)	(204)	(2,157)
Other components of net periodic pension and benefit (charges) credits (Note 11)	(817)	(813)	(823)
Acquisition and integration related charges (Note 3)	—	—	(553)
Loss on spectrum license transactions (Note 3)	(1,195)	—	—
Impairment charges	—	(186)	(4,591)
Product realignment charges	—	—	(451)
Net gain (loss) from dispositions of assets and businesses	(126)	261	—
Consolidated operating income	28,798	30,378	22,278
Equity in losses of unconsolidated businesses	(45)	(15)	(186)
Other income (expense), net	(539)	(2,900)	2,364
Interest expense	(4,247)	(4,730)	(4,833)
Income Before Provision For Income Taxes	\$ 23,967	\$ 22,733	\$ 19,623

No single customer accounted for more than 10% of our total operating revenues during the years ended December 31, 2020, 2019 and 2018. International operating revenues were not significant during the years ended December 31, 2020, 2019 and 2018. As of December 31, 2020 and December 31, 2019, international long-lived assets were not significant.

The chief operating decision maker does not review disaggregated assets on a segment basis; therefore, such information is not presented. Depreciation included in the measure of segment profitability is primarily allocated based on proportional usage.

Note 14. Equity and Comprehensive Income

Equity

In December 2019, 46,100 preferred shares of a foreign affiliate of Verizon was sold for cash consideration of \$51 million and is reflected in non-controlling interests. The preferred shares pay cumulative dividends of 8.25% per annum.

Common Stock

In February 2020, the Verizon Board of Directors authorized a share buyback program to repurchase up to 100 million shares of Verizon's common stock. The program will terminate when the aggregate number of shares purchased reaches 100 million, or a new share repurchase plan superseding the current plan is authorized, whichever is sooner. During the years ended December 31, 2020, 2019, and 2018, Verizon did not repurchase any shares of Verizon's common stock under our current or previously authorized share buyback programs. At December 31, 2020, the maximum number of shares that could be purchased by or on behalf of Verizon under our share buyback program was 100 million.

[Table of Contents](#)

Common stock has been used from time to time to satisfy some of the funding requirements of employee and shareholder plans. During the years ended December 31, 2020, 2019, and 2018, we issued 2.3 million, 3.8 million and 3.5 million common shares from Treasury stock, respectively, which had an insignificant aggregate value.

In connection with our acquisition of Straight Path in February 2018, we issued approximately 49 million shares of Verizon common stock, valued at approximately \$2.4 billion.

Accumulated Other Comprehensive Income (Loss)

Comprehensive income consists of net income and other gains and losses affecting equity that, under U.S. GAAP, are excluded from net income. Significant changes in the components of Other comprehensive loss, net of provision for income taxes are described below.

The changes in the balances of Accumulated other comprehensive income (loss) by component are as follows:

(dollars in millions)	Foreign currency translation adjustments	Unrealized gains (losses) on cash flow hedges	Unrealized gains (losses) on marketable securities	Defined benefit pension and postretirement plans	Total
Balance at January 1, 2018	\$ (468)	\$ (111)	\$ 32	\$ 3,206	\$ 2,659
Opening balance sheet adjustment (Note 1)	(15)	(24)	(13)	682	630
Adjusted opening balance	(483)	(135)	19	3,888	3,289
Other comprehensive income (loss)	(117)	(574)	—	(164)	(855)
Amounts reclassified to net income	—	629	1	(694)	(64)
Net other comprehensive income (loss)	(117)	55	1	(858)	(919)
Balance at December 31, 2018	(600)	(80)	20	3,030	2,370
Other comprehensive income (loss)	16	(699)	8	—	(675)
Amounts reclassified to net income	—	(37)	(1)	(659)	(697)
Net other comprehensive income (loss)	16	(736)	7	(659)	(1,372)
Balance at December 31, 2019	(584)	(816)	27	2,371	998
Other comprehensive income (loss)	180	953	7	—	1,140
Amounts reclassified to net income	—	(1,524)	(9)	(676)	(2,209)
Net other comprehensive income (loss)	180	(571)	(2)	(676)	(1,069)
Balance at December 31, 2020	\$ (404)	\$ (1,387)	\$ 25	\$ 1,695	\$ (71)

The amounts presented above in net other comprehensive income (loss) are net of taxes. The amounts reclassified to net income related to unrealized gains (losses) on cash flow hedges in the table above are included in Other income (expense), net and Interest expense in our consolidated statements of income. See Note 9 for additional information. The amounts reclassified to net income related to unrealized gains (losses) on marketable securities in the table above are included in Other income (expense), net in our consolidated statements of income. The amounts reclassified to net income related to defined benefit pension and postretirement plans in the table above are included in Cost of services and Selling, general and administrative expense in our consolidated statements of income. See Note 11 for additional information.

Note 15. Additional Financial Information

The following tables provide additional financial information related to our consolidated financial statements:

Income Statement Information

	(dollars in millions)

	\$	(2,712)	\$	(2,917)	\$	(1,824)

Note 16. Commitments and Contingencies

In the ordinary course of business, Verizon is involved in various commercial litigation and regulatory proceedings at the state and federal level. Where it is determined, in consultation with counsel based on litigation and settlement risks, that a loss is probable and estimable in a given matter, the Company establishes an accrual. In none of the currently pending matters is the amount of accrual material. An estimate of the reasonably possible loss or range of loss in excess of the amounts already accrued cannot be made at this time due to various factors typical in contested proceedings, including: (1) uncertain damage theories and demands; (2) a less than complete factual record; (3) uncertainty concerning legal theories and their resolution by courts or regulators; and (4) the unpredictable nature of the opposing party and its demands. We continuously monitor these proceedings as they develop and adjust any accrual or disclosure as needed. We do not expect that the ultimate resolution of any pending regulatory or legal matter in future periods will have a material effect on our financial condition, but it could have a material effect on our results of operations for a given reporting period.

Verizon is currently involved in approximately 25 federal district court actions alleging that Verizon is infringing various patents. Most of these cases are brought by non-practicing entities and effectively seek only monetary damages; a small number are brought by companies that

[Table of Contents](#)

have sold products and could seek injunctive relief as well. These cases have progressed to various stages and a small number may go to trial in the coming 12 months if they are not otherwise resolved.

In connection with the execution of agreements for the sales of businesses and investments, Verizon ordinarily provides representations and warranties to the purchasers pertaining to a variety of nonfinancial matters, such as ownership of the securities being sold, as well as indemnity from certain financial losses. From time to time, counterparties may make claims under these provisions, and Verizon will seek to defend against those claims and resolve them in the ordinary course of business.

Subsequent to the sale of Verizon Information Services Canada in 2004, we continue to provide a guarantee to publish directories, which was issued when the directory business was purchased in 2001 and had a 30-year term (before extensions). The preexisting guarantee continues, without modification, despite the subsequent sale of Verizon Information Services Canada and the spin-off of our domestic print and internet yellow pages directories business. The possible financial impact of the guarantee, which is not expected to be adverse, cannot be reasonably estimated as a variety of the potential outcomes available under the guarantee result in costs and revenues or benefits that may offset each other. We do not believe performance under the guarantee is likely.

As of December 31, 2020, letters of credit totaling approximately \$677 million, which were executed in the normal course of business and support several financing arrangements and payment obligations to third parties, were outstanding.

During 2020, Verizon entered into 12 renewable energy purchase agreements (REPA) with third parties. Each of the REPAs is based on the expected operation of a renewable energy-generating facility and has a fixed price term 12 to 18 years from the commencement of the facility's entry into commercial operation, which is expected to occur in 2021 through 2023, as applicable. The REPAs generally are expected to be financially settled based on the prevailing market price as energy is generated by the facilities.

We have various commitments, totaling \$24.6 billion, primarily to purchase content and network services, equipment, software and marketing services, which will be used or sold in the ordinary course of business, from a variety of suppliers. Of this total amount, \$8.2 billion is attributable to 2021, \$10.8 billion is attributable to 2022 through 2023, \$4.1 billion is attributable to 2024 through 2025 and \$1.5 billion is attributable to years thereafter. These amounts do not represent our entire anticipated purchases in the future, but represent only those items that are the subject of contractual obligations. Our commitments are generally determined based on the noncancellable quantities or termination amounts. Purchases against our commitments totaled approximately \$10.5 billion for 2020, \$10.9 billion for 2019 and \$9.0 billion for 2018. Since the commitments to purchase programming services from television networks and broadcast stations have no minimum volume requirement, we estimated our obligation based on number of subscribers at December 31, 2020, and applicable rates stipulated in the contracts in effect at that time. We also purchase products and services as needed with no firm commitment.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the registrant's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934), as of the end of the period covered by this Annual Report, that ensure that information relating to the registrant which is required to be disclosed in this report is recorded, processed, summarized and reported within required time periods using the criteria for effective internal control established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 2013. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the registrant's disclosure controls and procedures were effective as of December 31, 2020.

In the ordinary course of business, we routinely review our system of internal control over financial reporting and make changes to our systems and processes that are intended to ensure an effective internal control environment. In the third quarter of 2020, we began a multi-year implementation of a new global enterprise resource planning (ERP) system, which will replace many of our

existing core financial systems. The new ERP system is designed to enhance the flow of financial information, facilitate data analysis and accelerate information reporting. The implementation is expected to occur in phases over the next several years.

As the phased implementation of the new ERP system continues, we could have changes to our processes and procedures which, in turn, could result in changes to our internal controls over financial reporting. As such changes occur, we will evaluate quarterly whether such changes materially affect our internal control over financial reporting.

There were no changes in the Company's internal control over financial reporting during the fourth quarter 2020 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's report on internal control over financial reporting and the attestation report of Verizon's independent registered public accounting firm are included in Item 8. "Financial Statements and Supplementary Data".

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Set forth below is information with respect to our executive officers.

Name	Age	Office	Held Since
Hans Vestberg	55	Chairman and Chief Executive Officer	2019
Ronan Dunne	57	Executive Vice President and Group CEO - Verizon Consumer	2019
Matthew D. Ellis	49	Executive Vice President and Chief Financial Officer	2016
Tami A. Erwin	56	Executive Vice President and Group CEO - Verizon Business	2019
K. Guru Gowrappan	40	Executive Vice President and Group CEO - Verizon Media	2019
Kyle Malady	53	Executive Vice President and Chief Technology Officer	2019
Christine Pambianchi	52	Executive Vice President and Chief Human Resources Officer	2019
Rima Qureshi	56	Executive Vice President and Chief Strategy Officer	2017
		Executive Vice President and Chief Administrative, Legal and Public Policy Officer	
Craig L. Silliman	53	Officer	2019
Anthony T. Skiadas	52	Senior Vice President and Controller	2013

Prior to serving as an executive officer, each of the above officers has held high-level managerial positions with the Company or one of its subsidiaries for at least five years, with the exception of Hans Vestberg, who has been with the Company since 2017, Ronan Dunne, who has been with the Company since 2016, K. Guru Gowrappan, who has been with the Company since 2018, Christine Pambianchi, who has been with the Company since 2019 and Rima Qureshi, who has been with the Company since 2017. Officers are not elected for a fixed term of office and may be removed from office at any time at the discretion of the Board of Directors.

Hans Vestberg is the Chairman and Chief Executive Officer of Verizon. Mr. Vestberg joined the Company in April 2017 as Executive Vice President and President - Global Networks and Technology. He began serving in his current role of Chief Executive Officer in August 2018 and was elected Chairman in March 2019. Prior to joining Verizon, Mr. Vestberg served for six years as President and Chief Executive Officer of Ericsson, a multinational networking and telecommunications equipment and services company headquartered in Sweden.

Ronan Dunne is the Executive Vice President and Group CEO - Verizon Consumer. Mr. Dunne joined the Company in September 2016 as Executive Vice President and President of Verizon Wireless. Prior to joining Verizon, Mr. Dunne served for eight years as Chief Executive Officer of Telefónica UK Limited (O2), the second largest wireless operator in the United Kingdom.

K. Guru Gowrappan is the Executive Vice President and Group CEO - Verizon Media. Mr. Gowrappan joined the Company in April 2018 as the President and Chief Operating Officer of Oath. He began serving in his current role of Executive Vice President and CEO of Verizon's Media business in October 2018 and assumed his current title in May 2019. Prior to joining Verizon, Mr. Gowrappan served as the Global Managing Director of Alibaba Inc. from 2015 to 2018 and as the Chief Operating Officer for Quixey, a mobile search engine, from 2012 to 2015.

Christine Pambianchi is the Executive Vice President and Chief Human Resources Officer. Ms. Pambianchi joined the Company in July 2019. Prior to joining Verizon, Ms. Pambianchi led the Human Resources function at Corning Incorporated, a leading innovator in materials science, where she served as Executive Vice President, People and Digital, from 2018 to 2019 and as Senior Vice President, Human Resources, from 2010 to 2018.

Rima Qureshi is Executive Vice President and Chief Strategy Officer of Verizon. Ms. Qureshi joined the Company in November 2017. Prior to joining Verizon, Ms. Qureshi served as President and Chief Executive Officer of Ericsson North America from 2016 to 2017 and as Senior Vice President and Chief Strategy Officer and head of mergers and acquisitions of Ericsson from 2014 to 2016. Ms. Qureshi also served as Vice President of Ericsson's CDMA Mobile Systems Group, Senior Vice President of Strategic Projects, Chairman of Ericsson's Northern Europe, Russia and Central Asia Group and Chairman of Ericsson's Modem division before becoming Chief Strategy Officer.

For other information required by this item, see the sections entitled "Governance — Item 1: Election of Directors — Nominees for Election and — Election Process, — Our Approach to Governance — Where to Find More Information on Governance at Verizon, — Our Board Composition and Structure — Board Committees — Audit Committee and — Our Approach to Strategy and Risk Oversight — Other Risk-Related Matters — Business Conduct and Ethics" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2021 Annual Meeting of Shareholders, which are incorporated herein by reference.

Item 11. Executive Compensation

For information with respect to executive compensation, see the sections entitled "Governance — Non-Employee Director Compensation" and "Executive Compensation — Compensation Discussion and Analysis, — Compensation Committee Report and — Compensation Tables" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2021 Annual Meeting of Shareholders, which are incorporated by reference herein. There were no relationships to be disclosed under paragraph (e)(4) of Item 407 of Regulation S-K.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

For information with respect to the security ownership of the Directors and Executive Officers, see the section entitled "Stock Ownership — Security Ownership of Certain Beneficial Owners and Management" in our definitive Proxy Statement to be filed with the SEC and delivered to shareholders in connection with our 2021 Annual Meeting of Shareholders, which is incorporated herein by reference.

The following table provides information as of December 31, 2020 for (i) all equity compensation plans previously approved by the Company's shareholders, and (ii) all equity compensation plans not previously approved by the Company's shareholders. Since May 4, 2017, the Company has only issued awards under the 2017 Verizon Communications, Inc. Long-Term Incentive Plan (2017 LTIP), which provides for awards of stock options, restricted stock, restricted stock units, performance stock units and other equity-based hypothetical stock units to employees of Verizon and its subsidiaries. No new awards are permitted to be issued under any other equity compensation plan. In accordance with SEC rules, the table does not include outstanding awards that are payable solely in cash by the terms of the award, and such awards do not reduce the number of shares remaining for issuance under the 2017 LTIP.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)
Equity compensation plans approved by security holders	11,142,765 ⁽¹⁾	\$ —
Equity compensation plans not approved by security holders	111,389 ⁽⁴⁾	—
Total	11,254,154	\$ —

⁽¹⁾ This amount includes: 11,142,765 of common stock subject to outstanding restricted stock units and performance stock units, including dividend equivalents accrued on such awards through December 31, 2020. This does not include performance stock units, deferred stock units and deferred share equivalents payable solely in cash.

⁽²⁾ Verizon's outstanding restricted stock units, performance stock units and deferred stock units do not have exercise prices associated with the settlement of these awards.

⁽³⁾ This number reflects the number of shares of common stock that remained available for future issuance under the 2017 LTIP.

⁽⁴⁾ This number reflects shares subject to deferred stock units credited to the Verizon Income Deferral Plan, which were awarded in 2002 under the Verizon Communications Broad-Based Incentive Plan. No new awards are permitted to be issued under this plan.

Item 13. Certain Relationships and Related Transactions, and Director Independence

For information with respect to certain relationships and related transactions and Director independence, see the sections entitled "Governance — Our Approach to Governance — Our Approach to Strategy and Risk Oversight — Other Risk-Related Matters — Related Person Transactions and — Our Board Composition and Structure — Our Board's Independence" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2021 Annual Meeting of Shareholders, which are incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

For information with respect to principal accounting fees and services, see the section entitled "Audit Matters — Item 3: Ratification of Appointment of Independent Registered Public Accounting Firm" in our definitive Proxy Statement to be filed with the Securities and Exchange Commission and delivered to shareholders in connection with our 2021 Annual Meeting of Shareholders, which are incorporated herein by reference.
